A London representative of the Gillette Co. stated in evidence that a number of blades which he bought from Carson & Co. were traced to Gerber Bros.

An employee of Gerber Bros. stated that when the blades in question arrived he received instructions from his principal, Mr. Nathan Gerber, to put them aside and not to sell any of them until he received further orders. Mr. Carson had called at the shop in February, and was sold a quantity of blades in which a part of the stock which had been set aside had been inadvertently included.

Sheriff Thomson said it was the first case that had come before him of a rejuvenated Germany trying to flood the country with bogus articles, in this case with bogus Gillette blades. He was not satisfied with the explanation offered by the accused, who, there was no doubt, had committed a contravention of the Act. The bogus blades passed through their hands and got into circulation. The accused did quite correctly in writing to the Gillette Co., and it was extraordinary that they did not then reject the goods. The Sheriff imposed a fine and ordered the goods to be confiscated.

BRITISH CHORTLE OVER BIG U.S. PAINT ORDER

AT a time when there is a particularly keen struggle by the United States for supremacy in everything pertaining to their mercantile marine, it is interesting to hear of a contract being secured by British manufacturers of marine paints. In this respect, it is stated that the International Paint & Composition Co., Inc., who are the manufacturers of the brand of "International" compositions for ships' bottoms, has secured from the United States Shipping Board a contract for supplying to the vessels of the Board anti-corrosive and anti-fouling compositions. It is estimated that the requirements of the United States Shipping Board will amount to close on $1,000,000, a figure which, it is understood, establishes a record amount for a single paint order.

INCREASE OF $70,000,000 A YEAR IN TAX RECEIPTS

THE effect of Canada's new luxury taxes are somewhat clearly shown in the excise tax figures now available. These taxes include luxury, sales, and manufacturers' tax, and already several millions have been added to the country's income. Collections from all sources of the Inland Revenue branch for July amounted to $9,982,051 as compared with $4,356,452 for the corresponding month of last year, or an increase of $5,525,599, which is more than 100 per cent. increase. On the excise tax side, the amount collected last month totalled $6,944,457, as compared with $969,299 for the same month last year. This is another abnormal increase which reflects the effects of this year's legislation. Now that the new taxes have been in force two or three months officials of the department estimate, on the basis of the figures quoted above, there will be an increase of approximately $70,000,000 within one year.

Sheet Makers Await Clearer Outlook

Bookings Will Not Be Increased Until Outlook Improves — Car Shortage Affecting Both Incoming Raw Materials and Outgoing Finished Products

Pittsburgh.—"Operations in the finishing mills in all steel lines are steadily growing more restricted as car supply affects both incoming of raw materials and the removal of the finished product that has been piling higher because of the lack of means of shipping," says the Daily Metal Reporter. "Sheet mills are especially pressed for cars. There is less semi-finished material reaching them and less finished stock leaving them. Looking ahead, sheet makers are unable to see much hope of improvement and hence are not willing to accept new business or further burden their orderbooks until there is a clearer outlook. In the automobile trade a more decisive effect of lessened activity and demand is noted. This does not interfere in any way with the market but puts a new aspect on the whole situation and enables producers to figure ahead a little on back business. Most of the black sheet producers of the Pittsburgh district now regard their capacity sold for the remainder of 1920 and with few exceptions blue annealed capacity is absorbed equally as complete. There is less galvanized stocks moving but it is difficult to obtain them because of the mill conditions. Probably 60 per cent. of the galvanizing departments are active at this time. All sheet prices on new business appear to be on the resale basis and are somewhat varied."

Hardware Man to Compete at Olympic Games

Owen Sound.—The Olympic Games in Belgium will have particular interest to Owen Sounders, through the fact that a native son will represent Canada there. Mr. Ben McLaren was born here and resided here until about 14 years ago. He learned the hardware business with Christie Brothers in Owen Sound. He is a Canadian champion trap-shooter, and one of the best on the continent. He will also shoot at the games in London, England. The following statement is from the Calgary Daily Herald of June 26th:

"Mr. McLaren is a well-known figure in Calgary, having lived here for over 13 years. He came here from Owen Sound, Ontario, where he was born. In Calgary, Mr. McLaren conducted a hardware business for a time but later joined the Ashdown wholesale firm. In 1915 he won the Canadian championship at Ottawa, and for seven years he has held the trap-shooting title in this province."

T. S. Simms Company Reunion

St. John, N.B.—The fifth annual convention and reunion of T. S. Simms & Co., Limited, was held last week. After the dinner at Bonds, the national anthem was sung in response to a toast to The King. The banquet was the most successful yet held and those present were the salesmen and all male employees, also L. W. Simms and the directors. M. Lusignan of Montreal was a guest of honor. Others present included: Harry Champolivier of the Winnipeg branch; H. B. Agnew of the London (Ont.) branch; F. M. Baker and Karl C. Baker of the Toronto branch; Henry Gratton and R. Meloche of the Montreal branch; B. W. Turnbull, Mr. Dykeman and D. C. Lewis of the St. John headquarters.

In a breezy address of welcome L. S. Simms outlined the future policies of the company which were under consideration in connection with the co-operative scheme between employer and employee.

The toast, "Our Salesmen," was splendidly handled by A. L. Foster and H. G. Agnew. "Our Home Forces" was proposed by Mr. Champolivier and responded to by Bevis Turnbull and Ben Sheppard. Henry Gratton proposed "Our Organization," to which J. L. Brown made a happy response.

PLENTY OF FUN AT LONDON HARDWARE PICNIC

Continued from page 39

were: 1st, B. Beattie, 2nd, A. Brownlee and 3rd, C. McKerlie.

Other Events

Other events on the program and the winners were as follows:

Boys, 11 to 15.—M. Bradshaw, A. Dale; girls, 11 to 14—Marion Wilson, Crace Mattis; boys, 7 to 10—Jack Page, Jack Rowland, Reed McElheran; girls, 7 to 10—I. Morgan, Elsie Forsyth, Mary Conroy; hardware clerks' 100-yard dash—H. Weld, G. Blinkhorn, Harry May; needle and thread race—Annie Talbot; hardware drivers' race—George Blinkhorn, T. Peekham, W. Heatherly; married ladies' race—Mrs. C. Arnold, Mrs. Heddington, Mrs. R. Craig; lucky race for men—H. Weld; ladies employed in hardware stores—Miss E. Brownlee, Miss Annie Smith, Miss Margaret Odell; kicking balloon race (ladies)—Marjory Carrothers; fat men's race, Bert Maul; married hardware clerks' 100-yard dash—R. Pearce, H. Cummer, B. Scott; elopement race—G. Blinkham and Miss O'Dell, R. Beattie and Miss Carrothers; water race, L. Best, W. Dunn; judges' race—Mr. Forsyth, T. J. Coates; fishing contest—Miss Forsyth, Mrs. Kennedy; blind-pig race—Mr. and Mrs. C. Arnold; R. Craig and Miss M. Carrothers; hardwaremen's consolation—L. Kingsborough, J. Kilpatrick, L. A. Chamberlain.

A Real Spread

After such a strenuous program everyone was ready for supper and the spread was a real one. Long tables were spread under the trees and in the cool of the evening the meal was thoroughly enjoyed.

"There is no doubt about it," said President Tom Jones, "the picnic has been the best of any we have ever had and they have all been good."

SECURE AGENCY FOR LOCO LAMPS

The Maxim Lamp Co., 28 Front St. East, Toronto, have secured the sale of Loco lamps for Ontario. These lamps are now being manufactured in Montreal.

GERMANY LEADS IN MOST HARDWARE AND CUTLERY EXPORTS TO UNITED KINGDOM—CANADA'S PRODUCTS LEAD IN SAFETY RAZOR EXPORTS

Germany still continues to be a prominent exporter of certain lines of hardware to the United Kingdom. Figures for the month of June show imports of hardware other than hollowware into the U.K. from Germany of 1,558 cwt. valued at £18,807, being second only to the United States. Germany stands first in regard to hollowware, cast, not enamelled, and is second only to Belgium in respect to cast enamelled hollowware. In wrought enamelled hollowware Germany exported 150 tons valued at £18,393. In cutlery, other than machine knives, Germany again heads the list with 15,808 dozens valued at £5,906. In respect to cutlery including scissors and shears, Germany is far ahead of any other country, having exported 11,635 dozens valued at £7,334 during the month. In safety razors Canada stands first with exports of 185,116 dozens valued at £61,168, with Germany second with evidently a cheap grade, where 27,775 dozens are valued at only £2 314. In other kinds of razors Germany heads the list with 4,265 dozens valued at £7,008. Cutlery of other kinds to the extent of £3,454 worth was imported into the U.K. from Germany during the month.

Besides safety razors, Canada was a large exporter of knives, other than machine knives, to the U.K. during the month, standing second to Germany, exports totalling 9,733 dozen valued at £2,475.

EVENTS IN THE TRADE

Business Changes

Kingston, Ont.—Edwin Chown & Son, Kingston, have purchased from D. A. McNab the hardware business at 22 King street west, Brockville, and will continue its operation under the name of the Brockville Hardware Co. Mr. W. J. McIntyre, Whitby, late manager of the Chown Hardware Co., London, Ont., will be manager of the store. D. A. McNab came here in May, 1919, from Orillia, and purchased the business from the late B. D. Steacy. Mr. and Mrs. McNab and family will remain in town for the present.

Fire Losses

St. Thomas, Ont.—Fire, originating from an unknown source, completely destroyed the pattern storage department, pattern room, and a portion of the roof of the casting foundry of the Canada Iron Foundries Limited, and the material sheds and shipping building of the Dominion Brake Shoe Company, Limited, last week. The total damage is estimated at $100,000, partly covered by insurance. Thousands of dollars worth of value in patterns were lost Despite the heavy loss and damage, work was resumed in the casting department the next morning.

Old Scrap Shipped Abroad

Montreal.—A considerable quantity of heavy melting steel is being shipped to the Old Country, according to a Montreal dealer, who handles large quantities. This is being paid for at the rate of $24 to $25 per ton, at the wharves, Montreal, and manufacturers abroad seem to be anxious to get large quantities at this price. In this way prices here have been materially helped. The movement may continue.

Canadian Steel Plates Go Abroad

Montreal.—There docked in Montreal this week the S. S. Otira, bound for New Zealand. This boat carried the first consignment of steel plates made in Canada for foreign account, and it is expected that large quantities of steel plates will follow later when the plant of the Dominion Steel Company at Sydney is in full swing. It is estimated that eventually this capacity will aggregate 250 tons of steel plates daily.

Among other interesting products included in this cargo are automobiles, steel rails, and various lines of hardware.

Canadian and U. S. Interests in New Steel Company

Welland, Ont.—A large interest in Dillon Crucible Steel Alloys, of Welland, has been acquired by Atlas Crucible Steel Co., of Dunkirk, N. Y., and the company will hereafter go under the name of Canadian Atlas Crucible Steel Co., Ltd.

Stove Manufacturer Optimistic Over Business Outlook

D. S. Fisher of the Enterprise Foundry Company, Sackville, N.B., was a visitor at the Toronto office of Hardware and Metal this week. Mr. Fisher was optimistic regarding the business outlook, stating that the chief difficulty facing stove manufacturers at the present time is the scarcity of raw materials and inability to secure delivery on many lines such as steel sheets, etc.

Goodyear Company Picnic

A mammoth Goodyear basket picnic was held on August 7th to Valley View Park, Streetsville, under the auspices of the Amateur Athletic and Relief Association of the company. During the day the factory was closed, and the employees, together with those in the head office, took a holiday. Among the events being featured were a baby show, a tug-of-war for women and a prize to the Goodyear man who brought the largest family. Three trains were chartered for the outing.

Eastern Crop Report Encouraging

Montreal.—According to Col. Robert Starke, vice-president of the Canadian Wholesale Hardware Association, crop reports covering Quebec and the Maritime Provinces are very encouraging. "Our various travellers coming in from these districts report that the outlook is very splendid," said Col. Starke to Hardware and Metal, "and the prospects are bright. Business conditions promise well for the coming fall if materials can be secured."

Brantford Sells Land to Spark Plug Co.

Brantford.—At a special meeting of the City Council last week the proposed sale of 16½ acres of water works land to the A. C. Spark Plug Co., which desires to provide for extensions to its newly erected plant here, was approved, the sale price to be $1,250 an acre.

Cobourg on Standard Time

Cobourg.—Contrary to a recent report, no stove, tinsmithing and plumbing stores close on Wednesday afternoon, and standard time is in effect.

Wells Bros. Company Changes Name

In the interest of uniformity the Wells Brothers Company of Canada, Limited, Galt, Ontario, will in the future be known as the Greenfield Tap and Die Corporation of Canada, Limited.

Montreal Tax Revenue Is Large

Montreal.—The Department of Inland Revenue at Montreal is recording heavy receipts these days from the special taxes imposed by the budget. On one day this week over $32,000 was collected, total entries being made to the extent of 354. Special tax payments made during July for the month of June amounted to $1,659,000. When related to the amount calculated by the Government as collectable it bears a very small relation to the aggregate sum which was estimated at $36,000,000 for the calendar year. Doubtless heavier months than that of June will be recorded.

General satisfaction is being expressed with regard to the new arrangement whereby payments may be made on the first and fifteenth of each month.

Gurney Company to Extend Business

Toronto.—The Gurney Company, Limited, Toronto, has purchased the plant, including all of the machinery, equipment and patterns of the Canada Stove & Foundry Company, Limited, at St. Laurent, a suburb of Montreal, Quebec.

The Canada Stove & Foundry Company has an established stove business in the Province of Quebec and this business will be added to the turnover of the Gurney Foundry Company. The Montreal plant has also a modern, well-equipped plant for producing white and colored vitreous enamel on iron and steel. The head office of the company will remain at Toronto. The manufacturing plant of the company at West Toronto will be increased in scope and will produce the warm air furnaces hitherto manufactured in the King St. plant.

Newsy Notes From Here and There

London.—Charles Craig of the staff of D. H. Howden & Co. is spending his vacation at Port Stanley.

* * *

Norman Howden, of D. H. Howden & Co., London, is enjoying a cruise on the lakes in a yacht which he recently purchased.

* * *

Toronto.—W. F. Hill, vice-president of Kasement Skrene Dore Co., Toronto, left this week on a business trip through the Western Provinces.

* * *

Acton Vale.—A. P. Beaupre, proprietor Canadian Veneering Co., Acton Villa, Quebec, was a caller at the Montreal office of Hardware and Metal on Monday last.

* * *

Montreal.—H. L. Griffiths, of G. L. Griffiths and Son, Stratford, Ont., was in the city this week. J. L. Ling, Chicago Flexible Shaft Co., Ltd., Chicago, was this week in Montreal.

* * *

London.—Among the business men who have subscribed for stock in the proposed new million dollar hotel in London, Ont., is Col. T. S. Hobbs, of the Hobbs Hardware Co.

* * *

London.—Western Ontario hardware merchants without exception are looking for a fine fall trade as the farmers are harvesting one of the best season's crops they have ever had and are getting splendid prices for everything they have to offer.

* * *

Montreal.—Messrs. Dempsey of the Slaymaker Lock Co., Lancaster, Pa., and Shine of the Peterboro Lock Co., Peterboro, were callers this week on the hardware trade. Mr. Winston, representing the Bancroft Razor Co., Worcester, Mass., was in Montreal this week.

* * *

Montreal.—W. S. Fallis, managing director the Sherwin-Wililams Company of Canada, Ltd., returned from an extended trip to the western provinces. Mr. Fallis is very much pleased with the crop prospects there and believes the money value of the yield will be in excess of any previous season.

* * *

London.—John Rankin, hardware merchant of Mitchell, Ont., who was badly shaken up and painfully injured when a ladder slipped as he was sawing a branch off a tree in front of his residence, is around again. The saw made a bad gash in his arm, but this is healing nicely.

* * *

Brantford.—Howard Derbyshire, of Wheatley, Ont., was one of the representatives of the Wheatley bowlers at the big W. O. B. A. tournament in Brantford. Following his return home he took part in a Scotch doubles tournament on the local green and captured first prize.

* * *

Arthur.—On civic holiday a team of bowlers from Arthur, Ont., including E. Brocklebank, went down to Kitchener and almost succeeded in capturing the trophy which Kitchener had won at a former game. The game was one of the best seen on Kitchener greens this year.

Blue Bird Company in Merger

Approval has been granted of a merger between the Davis Sewing Machine Company, of Dayton, Ohio, and the properties of the defunct Blue Bird Washing Machine Co. All the Blue Bird stockholders and nearly all of the creditors have approved of the merger, it is stated.

The merger is the outgrowth of the receivership proceedings filed two months ago against the Blue Bird company. The factories of the washing machine company at St. Louis will be re-opened and operations be resumed.

The Davis Company is one of the largest bicycle manufacturers in the world and is rated as a six million dollar corporation. The stockholders of the Blue Bird will share in the proceeds of both companies.

The Blue Bird Company located at Brantford, Ont., is not connected in any way with the United States firm.

Hardware Letter Box

Pins

R. Odell & Co., Capelton, Ont.—Can you give us the names of firms here or abroad, who manufacture common pins?

Answer.—Imperial Pin Co., 500 Parthenais St., Montreal; De Long Hooks & Eye Co., of Canada, Ltd., St. Marys, Ont.; Samstag & Hilder Bros., 1200 Broadway, New York.

* * *

What is Address of E. Broad & Son?

Fraser Hardware Company, Galt, Ont.—Would you please tell us the new name of E. Broad & Son, manufacturers of edge tools?

Answer.—This firm is now being operated under the name of Gilmour Bros. & Co., Montreal, Que.—Ed.

Incorporations

Recent incorporations include the following:

Page-Hersey Tubes, Ltd., Toronto, $4,500,000.

Anglo-American Motors Ltd., $10,000,000; Canadian Tube and Steel Products Ltd., Montreal, $5,000,000; The Parker Motor Car Company, Ltd., of Winnipeg, $3,000,000; The Superheater Company, Ltd., Toronto, $1,000,000.

Catalogs and Booklets

ADAM HALL LTD.

Adam Hall Limited, Peterboro, Ont., have issued their new Catalogue "G" of Tropic ranges, camp ranges and heaters. An introductory note mentions that the older patterns in the construction of ranges have been departed from and special attention given to the minutest details of design to insure perfect combustion and satisfaction. The following pages contain a complete description of each part of the ranges showing illustrations of each part described. Illustrations of the ranges complete are next shown with complete specifications. Lumbermen ranges, right and left oven ranges, square, camp heaters, hotel ranges are treated similarly.

Henry Carey Baird Co.

Henry Carey Baird & Co., Inc., 2 West 45th St., N.Y., have issued a very complete edition entitled Tin Sheet—Iron and Copper—Plate Worker, by Blinn. The new edition covers many phases of sheet metal working and contains rules for describing the various patterns used by sheet metal workers. Practical geometry, mensuration of surfaces and solids, table of weights and strength of metals and other materials. Also tables of areas and circumferences of circles. There are also some interesting discussions on composition of metallic alloys and solders with numerous valuable receipts and manipulations, for every day use in the work shop.

Buffalo Forge Co.

Buffalo Forge Co., Buffalo, N. Y., have issued a very attractive catalog containing 51 pages describing their full line of Niagara Conordal Fans. The book is very well illustrated and has considerable literature regarding the description of fans, including the details of construction of the wheel housing, shafting, balance, bearings and shows pulley-driven fans, direct connected units, steam engines, as well as many tables showing dimensions of housing pulleys, also various list prices. Readers of Hardware and Metal wishing copy of this catalog may have one on request from the above named firm.

This firm have also issued a new catalog on Fan System of heating, ventilating and humidifying. This catalog contains 115 pages and it describes in great detail the various kinds of fans required for the purposes above mentioned. There are also many useful charts on ventilation of public buildings as well as discussions on heating with Exhaust Steam and Systems of Air Supply. Readers of Hardware and Metal may also have a copy of this on request from the manufacturers.

NEWS OF WESTERN CANADA

Save the Surface Convention in Winnipeg

L. C. Stephens Appointed Western Chairman—Travelers Urged to Get Dealers to Hold Local Clean-Up Week—To Secure the Co-Operation of Dominion R.M.A.—Members of Winnipeg Paint Club to Hold Convention During Bonspiel Week

(By Staff Correspondent Hardware and Metal)

WINNIPEG.—A "Save the Surface" convention of paint and varnish manufacturers, jobbers and salesmen was held at the Fort Garry Hotel on July 28th, and a representative gathering listened to the addresses of those responsible for the movement in Canada. The convention was most successful, all present being thoroughly enthused over the work of the campaign. A resolution was unanimously adopted that each paint and varnish salesman agree to further the "Save the Surface" idea throughout Western Canada with the dual thought of advancing the sale of paint and varnish products for the purpose of increased employment and primary protection and preservation of property.

The afternoon meeting was presided over by John Drewe, president of the Winnipeg Paint Club, and George Henderson, president of the National Committee spoke of the inauguration of the campaign and the effects so far manifest in the paint trade. Mr. Henderson's address is reproduced in full elsewhere.

H. E. Mihell, Imperial Varnish & Color Company, and a member of the campaign committee, told of the start of the work under Ernest Trigg of Philadelphia, and the co-ordination of the Canadian campaign. He also told of the meetings held in Calgary, Montreal, Vancouver, Edmonton and Ottawa, stating that the work in Canada had required the expenditure of about $24,000.

Paint Now for Protection Not Decoration

A paper was read from W. S. Fallis, general manager of the Sherwin-Williams Company, by Mr. H. H. Eager of that company. Mr. Fallis pointed out that it formerly was considered that paint was for decoration and not for protection. "Paint used to be an extravagance, but now it is a necessity," were his words.

C. C. Falconer, Winnipeg, added that the retailer was selling too much paint and not enough of the idea. He pointed out that for the past five years the dealer has sold paint practically all for decorative purposes but that times have changed and it is now a point of business to sell to save the surface. Mr. Falconer advocated that retailers should give every traveller a hearing, whether the dealer is handling the product sold by that traveller or otherwise, and recommended the closest co-operation among retail dealers to push the campaign.

L. C. STEPHENS

Head of the firm of G. F. Stephens & Company, Ltd., Winnipeg, who was made Western chairman and representative of the National Committee in charge of the Save the Surface Campaign in Western Canada, at the recent convention held in Winnipeg.

E. Pilgrim, president of the Master Painters' Association, offered the co-operation of the association.

Urge Dealers to Hold Clean-Up Week

Mr. C. H. S. Bamford, of J. H. Ashdown Hardware Co., advocated that the travelling men should, in visiting towns and municipalities, urge dealers to agitate for a clean-up week, and that the dealers themselves should be the first to set the example. He thought more advertising in weekly newspapers would be advisable.

On the suggestion that retailers throughout the country should co-operate in the campaign and subscribe ten to fifteen dollars annually, the opinion was advanced that $12,000 more funds could be obtained from 22 or 23 firms behind the campaign by each putting up $600.

"There is this aspect to that question," added Mr. Mihell. "A very important one from an advertising standpoint. I realize it is an advertising one. If there are any hardware men here to-day I am going to be perfectly frank with you. A paint manufacturer or any other manufacturer is not going to spend $1,000 of his own money where, in many cases, if it succeeds all well and good, and if it fails all well and good so far as retail dealers are concerned. A friend of mine in India, a missionary, tells me that when he gives bibles away they do not count for much and the message does not go over, but if he charges them a nominal sum they take an interest in it and put the message over. The object is this, that where a man's treasure is his heart is also, and if we can get a little bit of his money then he is going to take an interest in the campaign and he is going to get back of us if he has got any constructive criticisms or otherwise to make. He is going to make them and get his money out of them. If this thing is worth while and is going to increase his business, isn't it logical he should put a little money into it? I believe, gentlemen, if you can get only $10 or $15 out of the retailer and get his interest in it, that you are going to get probably far greater results than if we probably forked up another $600, because that $15 throughout the thousands of subscribers throughout the country is going to have a greater effect than the $600 that may come from the 20 subscribers. It is going to be much more effective in their locality."

Mr. Henderson stated cuts and electros would be supplied for local advertising.

L. C. Stephens Elected

Mr. Paul of Brandram-Henderson spoke on organization as follows: "Mr. Chairman, as secretary of the Winnipeg Paint Club I might suggest that it would be well to start at some particular point, and that means organization. The first thing we have got to have, naturally, is

a representative of a National Committee in the West. We require a Western chairman, possibly that chairman would nominate his committee or a committee may be nominated in the convention. Starting at that point to create the machinery I do not believe work should all be attended to by the Winnipeg Paint Club. I think you should have a chairman direct from the National Committee and he would in turn have his committee. I would respectfully suggest that Mr. Stephens be nominated as the Western chairman, Western representative of the National Committee."

Mr. Henderson pointed out that Mr. Stephens was the vice-president of the Canadian Paint, Oil and Varnish Association, for the West, and the "Save the Surface Committee," being really a sub-committee of the Canadian Paint, Oil and Varnish Association, and the Winnipeg Paint Club being not necessarily the machinery, the natural person without question to take the chairmanship of such a Western effort would be Mr. Stephens.

Mr. Cookson seconded the nomination which was carried.

Mr. Cleveland put in the form of a motion that each one obligate themselves to the "Save the Surface" campaign, that each go out and talk and try and put the thing over as a starter. "We do not know what we can do, but whenever we get the chance take it, putting ourselves under the obligation to the committee to do all we can," said Mr. Cleveland. Mr. Fraser seconded, and it carried.

Secure Co-operation of R.M.A.

Mr. Smith of the International Laboratories asked if there had been anything done to obtain the co-operation of the Dominion Retail Merchants' Association. "They have their own travelling representatives going through the country and if the "save the surface" campaign would be officially endorsed by the Retail Merchants' Association at Ottawa it would go through all their papers and their own men that are on the road all the time talking about this thing would make it much easier for us to get the retail men in each little town to get together, because they would be familiar with the idea and realize it was not a personal campaign."

Mr. Henderson: "I have to admit nothing has been done in that regard. I appreciate something should be done. I will have a note of that and it will be one of the things we have learned at the Winnipeg convention, one of the advantages that the committee have secured by being here."

Mr. Herbert, British-American Paint Co., Calgary. "I am very much interested in being here to-day and I feel we cannot get right co-operation by merely holding meetings in Winnipeg or Vancouver. I think it was a step in the right direction to nominate Mr. Stephens as the Western chairman to take over the "Save the Surface" campaign and I feel that that should result in close co-operation of the paint clubs from here to Victoria, because even over in Victoria and Vancouver they have paint clubs and they have a movement steadily going forward to stimulate the conservation of property that should be protected. I think that the best way to do that probably would be to have a branch chairman or vice-chairman or members of committees in each city of any size between here and Victoria, and those men possibly could assemble at some central point from time to time and formulate a constructive plan to carry out the work that we are trying to discuss to-day. Probably this will be attended to before the meeting is over. I might say that we have felt handicapped, particularly at Regina branch. You may have heard that we opened a branch there a few years ago and we have kind of been betwixt and between. We could not associate, as it were, with Calgary, owing to distance and yet we were an Ishmael, as a gentleman said a while ago, so far as Winnipeg was concerned, and I think this movement to-day should bring our Regina branch in close co-operation with the Winnipeg and Calgary paint movements, being as it is about half way between."

Mr. Bamford moved a resolution that the 21 firms, members of the Winnipeg Paint Club, pledge themselves to hold a united convention of their travelling salesmen, and any customers which they have in the city during the week of the Bonspiel in 1921, and that a committee be formed in the paint club to provide speakers and other material for this meeting. Mr. Stephens seconded the motion and it carried.

Paint Industry Carried with Increasing Momentum

Save the Surface Campaigns Have Helped Educate Public So That Paint Industry Will Take Big Strides Even in Face of General Business Curtailment—Activities of Winnipeg Paint Club Told at Winnipeg Convention

(By Staff Correspondent Hardware and Metal)

THE convention brought to a close with a banquet in the evening at the Fort Garry Hotel, John Drewe presiding. Following the toast to The King, George Henderson, chairman of the National Committee, spoke on "Save the Surface," as follows:

"Let me, at the outset, assure you on behalf of the 'Save the Surface and you Save all' Campaign Committee, that we esteem it a great privilege and a great advantage to be given the opportunity of talking to you this afternoon under the auspices of the Winnipeg Paint Club.

"I have said 'talk to you' because it is hoped that this afternoon's meeting will be very largely in the nature of a conversation, and that quite as much opportunity will be extended Mr. Mihell and myself of listening, and of learning, as of talking. We do not only regard our presence here as a privilege but also as a great pleasure and satisfaction, and we hope that this satisfaction at least will to-day extend to each and every one of you, because unless we utterly fail to put over our message, you will be placed in a position to accomplish greater success in the work with which we are all associated.

"Before directing your attention to the history of this great international effort, the salient particulars of which Mr. Mihell will touch upon in his address, I should like to address some consideration to what I may term the Why and Wherefore of the 'Save the Surface' campaign.

"For years past many paint and varnish manufacturers, jobbers, dealers and painters, both in Canada and the United States, have felt that in spite of the vigorous sales promotion work of individual firms that the great home market was not expanding as rapidly as it should, in the interest of the trade and in the interest of the public.

"It is a fact that the industry was in a healthy condition, even prosperous, and that the output was steadily advancing year by year, but the condition of the country's homes and buildings proved that possibilities had been merely scratched.

"It was evident to those who made a careful study of statistics which correctly reflected actual conditions, that less than one-third of the necessary painting and varnishing was being undertaken, and it was realized that if the two-thirds left undone would be undertaken by drawing public attention to the necessity for it, that the advantage derived would be not only enormous to the paint trade in particular, but to the nation at large.

"This tendency not to paint had been increasing rather than diminishing, several causes for which have been advanced:

1. The war, which impregnated the people of the Dominion with an idea of economy which became in its interpretation a mere policy of penny wise and pound foolish.
2. The undue emphasis which was being laid on the purely decorative characteristics of paint and varnish.
3. The increased cost of paint and varnish occasioned by the increased cost of raw materials and of labor. This caused people not so much to decide not to paint as to indefinitely postpone painting, which really amounted to the same thing.

"Clearly, there never was a greater **justification for a co-operative educational advertising campaign,** and significantly enough the need of this campaign was realized at practically the same time on both sides of the International line. As a result there sprang into existence a crystalized determination in Canada and the United States to educate the public to the idea that to neglect the surfaces of property was a false economy—a robbing of Peter to pay Paul.

"Might I here point out that the International 'Save the Surface' campaign is

dual in character, and that while on both sides of the boundary we use the same slogan, 'Save the Surface and You Save All,' and employ in a measure the same arguments, and even after the same, or similar illustrations, we have our separate organizations at Montreal and Philadelphia, where national considerations are never forgotten and you can be quite sure the Canadian identity will be as carefully safeguarded as the identity of the United States.

"You can readily see the enormous advantage of an International slogan, common to both Canada and the United States —the great gain also in similarity of copy argument and of design, when you remember that the United States campaign committee employ among their media such periodicals and journals having a large circulation in Canada, as the Saturday Evening Post, The Literary Digest and The American Magazine. If a distinct general similarity were not maintained we would in Canada lose much of the cumulative value and effect.

"When I spoke to the Master House Painters and Decorators' Association of Canada in Hamilton just a year ago, I felt it my duty to particularly point out that it must never be forgotten that this 'Save the Surface' campaign is conducted on behalf of the trade generally — as a booster for business, it is true—but still more as a conservation programme, and that it never has in mind the development of sales of any particular brand or kind of paint or varnish, but I believe to-day there is little necessity for me to insist on this characteristic as it has been so carefully safeguarded as to be by this time well recognized.

"The campaign is in its second year. The intention is to conduct it for a minimum of five years. Advertising, no matter whether educational and co-operative, or merely familiarizing and proprietary, must of necessity be cumulative.

"Public apathy takes a repetition of blows to break down and we believe that the evidence we have during this second year of results being so much greater than during 1919 proves that by the time the campaign is well along in its course, its value will be recognized on all hands.

"This is the fourth convention we have held this year, meetings of this character having already taken place at Montreal, Toronto and Vancouver. All of them have been successful, and at all of them your national committee learned as much for their future guidance as they themselves imparted. For instance, at the Toronto convention the salesmen present developed the idea of sub-conventions for Ontario. I would like to give you some particulars of this idea as I believe it can be developed quite as successfully in the Prairie Provinces as in Ontario.

"In order to secure similar results in Manitoba, Saskatchewan and Alberta you should form local 'Save the Surface' committees in Winnipeg and in Calgary and Edmonton.

"I wish to refer to a difficulty that possibly exists in making it easy for the salesmen of the paint and varnish houses, for the paint dealer and for the painter to link up his own activities with the activities of the 'Save the Surface' campaign in such a manner as to produce the most satisfactory results for himself.

"Any one of these individuals is apt to feel that the committee is doing probably some good, that no doubt a certain number of people will be influenced by the 'Save the Surface' advertising, and that the conservation of property by means of paint and varnish will be increased, but he is very apt to regard it as general rather than particular, and be willing to await developments rather than to strain every effort to develop particular instances.

"This condition of mind natural and forgiveable, as it is, is one of the chief occasions for the projection of this series of conventions. It will be our purpose this afternoon to show you how you can, as it were, cash in, link up and crystalize the situation to your own advantage and to the advantage of those with whom you are associated.

"To do this you must be absolutely sold yourself, you must be willing to admit that it is only fair to attribute a large measure of the present excellent business in paints and varnishes to this co-operative educational advertising campaign, you must be determined that no subscriber to the fund shall do better in securing these possible results than your own firm or company, you must familiarize yourself with and carry a copy of each national campaign advertisement as it appears, you must talk and enthuse your agents, customers and all acquaintances with the absolute certainty of effecting economy and money saving by buying and applying paint and varnish coating to protect their properties from destruction and decay. Let everybody learn the real meaning and truth of the statement that if you save the surface you save all.

"Gentlemen, I am neither a prophet nor the son of a prophet, but I venture to make the prediction that should hard times come again, as they eventually will in either a great or a modified form, that ours is the one industry that can ride along with unslacked pace and even increasing stride. When by means of our campaign we have made the truth known that the property owner cannot afford not to paint, that by buying and applying paint he will avoid the greater expense of repairs, that by spending money on our products he will keep his money, we shall be independent of general trade conditions and be busy at all times."

Following Mr. Henderson's address the activities of the Winnipeg Paint Club were told of by C. H. S. S. Bamford, who spoke of the formation of the club in February, 1912, which to-day has a membership representative of 21 firms, either entirely in the paint and varnish trade or handling these goods. Its primary object, he said, is to further the sale of paint and varnish in Western Canada and assist by every effort the use of these commodities. The 1920 clean-up campaign was touched upon by Mr. Bamford, which he said was successful in every respect and "we do not intend to allow our activities to relapse," he said.

Following the addresses a general discussion took place, during which the question of the shortage of help experienced by the master painters was brought up. It was suggested that efforts be made to have the painting trade included in the schedule of the technical schools with a view to relieving the shortage of painters.

H. F. Mihell of Toronto explained by means of figures the extent of the possibilities in Canada for the paint and varnish industry. "The bureau of statistics gives the population of Canada as about nine millions," Mr. Mihell said. "What does this mean to you as paint and varnish dealers? Every living soul is a prospective buyer either directly or indirectly of paint and varnish. Every phase of life from the beginning to the end needs paint and varnish."

Western Notes

Winnipeg.—H. E. Mihell, of the Imperial Varnish & Color Works, of Toronto, was a speaker at the "Save the Surface" convention.

Winnipeg.—Visitors to Winnipeg last week included the following hardware retailers: M. Tretheway, Willard, Man.; L. M. Zovitz, Punnicky, Sask.; John Yellowlees, Ninette, Man.

Winnipeg.—The Franco-British Supply Co., 705 Great West Permanent Building., Winnipeg, have secured the selling agency for the Duplex Products Co., 3520 Princeton Ave., Chicago, who manufacture the Duplex double duty timer for Fords.

Winnipeg. — W. R. Herbert, general manager of the Prairie division of the British-America Paint Co., attended the "Save the Surface" convention here in Winnipeg on July 2[illegible]; Mr. Harcourt, manager of Regina branch of the British-America Paint Co., was also in attendance.

Marshall-Wells Alberta Ltd., Hold Annual Picnic

Edmonton, Alta.—The second annual basket picnic of Marshall Wells, Alberta, Ltd., and Revillon Wholesale Ltd. was held recently to Alberta Beach. A special train leaving Edmonton at 8.20 a.m. conveyed about 700 pleasure-bent employees with their families and friends to the picnic grounds. The following officials were conspicuous among the fun makers, and their activities contributed much toward furthering the cordial relations between employer and employees already so firmly established among these respective staffs: J. E. Brown, J. F. McMullen, W. R. Bottom, C. F. Peter, J. C. Jamieson and J. D. MacEdwards.

Purchases Standard Machinery & Supplies Ltd.

Montreal.—George G. Cuttle has just purchased the entire interests of the Standard Machinery and Supplies, Ltd., Montreal. The company is capitalized at $200,000, and has been successfully operated since 1916. Mr. Cuttle became connected with the company in 1917 as manager of the metal department; in January, 1918, he was appointed general manager and six months later was elected vice-president. He first entered the iron and steel trade in 1904 with the Montreal Rolling Mills, now a part of the Steel Company of Canada, and worked through various departments until 1913, when he was appointed general purchasing agent, which position he held until joining his present company.

The Standard Machinery and Supplies are the Canadian representatives of the Waltham Grinding Wheel Company of Waltham, Mass.; J. L. Goodhue Company, Limited, Danville, Que.; and the Clinton Metallic Paint Company of Clinton, N.Y., in addition to carrying large stocks of tool steels, machine tools and other supplies.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

THE holiday season is accounting for a little quieter time, but business continues to keep good all the same. The unprecedented shortage in almost all lines of hardware is causing great anxiety and no immediate prospects of any relief appears visible and prices remain firm as a whole.

Bar iron and steel, sheets and wire and nails remain firm and scarce.

A change is to be noticed this week in the standard size for corrugated sheets, which is now 30 inch. This ruling goes into effect immediately.

New quotations are given on corrugated sheets, steel turnbuckles, barn door hangers, bolt clippers, stair plates, shoemaker's wax, wire cage rat traps, shoe knives and wire rope clamps.

Linseed oil and turpentine have steadied in price in response to a firmer tone in seed, but prices are inclined to vary somewhat.

Slight reductions are noticed in certain makes of wrenches.

A good demand for certain sizes in rope and of binder twine is reported and prices are steady. The situation for fall for window glass is regarded as rather serious, indications pointing to a likelihood of supplies being small if fuel and transportation difficulties do not become easier.

Collections generally are satisfactory.

MONTREAL MARKETS

MONTREAL, Aug. 5—Many changes continue to mark the price of hardware. These are, for the most part, advances, and there is scarcity on a number of lines, with little promise of this being righted for a long time.

Glaziers' points are selling at a new high price of 29c per lb., clothes pins are higher, both common and spring, some lines of press and brace drills are higher through a revision of discount, and rope thimbles are up. School crayons are advanced to $5 for a dozen boxes. A line of match boxes is quoted higher. Marble's hunters' axes are higher. Standard fence pliers are up. Stub end buckles are up. Rubber belting is higher in price. Stillson pipe wrenches are up. Horse clippers and machines and parts for the same are revised upward. Building papers are active, with tendencies firm. Wire products are scarce and firm. Range boilers are steadily firm, and rope, while unchanged, is strong. Oil and gasoline are firm at the new prices quoted last week. Steel and iron products are scarce. In the old material list heavy melting steel is higher, a demand having developed from the Old Country for this. Antimony, tin and spelter are somewhat easier. All around there is a remarkable summer activity in wholesale trading circles, country business being active.

New High Quotation on Glaziers' Points

Montreal.

GLAZIERS' POINTS.—As announced last week zinc-coated glaziers' points are advanced in price. These are being quoted to the retail trade at 29c per pound.

All Clothes Pins Are Revised Upward

Montreal.

CLOTHES PINS.—The clothes pin market is very firm and prices now quoted on the common are $2.30 per box of 5 gross, and on the "spring", 2 gross boxes, $1.80 per box.

Some Lines Drills Cost More to Trade

Montreal.

DRILLS.—A revision of the discount for various steel drills has been made and brace bits are quoted at 45 per cent. off the list, and "Bitstock" have the same discount. Straight shank are quoted at 25 per cent., and ratchet are subject to list plus 22½ per cent.

Prices Marked Up on Rope Thimbles

Mon'real

ROPE THIMBLES.—An advance has been made in the price of wire rope thimbles, and these are selling as follows: ¼ in., per 100, $6.00; 5-16, $75; ⅜, $8.50; ½, $11.00; 5-8, $7.50; ¾, $21.00; 7-8, $25.00;. 1 in. $32.00.

ROPE CLIPS, it will be recalled, were advanced last week approximately 20 per cent.

School Crayons Are Taking Higher Basis

Montreal.

SCHOOL CHALK.—The following recent advances for various grades of chalk prices have been revised upward on school chalk. White is now selling at $5.00 per dozen boxes and pink at $5.50.

Wheelbarrows Scarce ; May be no Relief

Montreal.

WHEELBARROWS. — Jobbers report a continued scarcity of all kinds of wheelbarrows including those constructed of steel and of wood. The scarcity of material and labor are large attributory reasons, and it is doubtful if the demand will be overtaken this Fall. Shipments are decidedly slow in arriving and no surplus seems to be held by jobbers generally.

Matchbox Prices Revised Upward

Montreal.

MATCH BOXES.—Higher prices are being quoted on match boxes, No. 181.

These are selling to the trade at $5.80 per dozen.

Hunters' Axe Prices Show Some Advances

Montreal.

AXES.—Hunter's axes of "Marble" make, No. 2, are now selling at $31.50 per dozen, and No. 6, at $21.60 per dozen.

More Money Charged For Fence Pliers

Montreal.

FENCE PLIERS. — Standard fence pliers are revised upward in price and are selling at following net prices per dozen: 4½ in., $8.00; 6 in., $10.00; 8 in., $13.20; 9 in., $15.00; 10 in., $16.00. These commodities are still scarce and the market is naturally ruling very firm on all kinds of pliers and will probably continue for some time.

Stub End Buckles Are Priced Higher

Montreal.

TURN BUCKLES. — Stub end turn buckles have advanced in price. The various sizes selling at these net prices: ½ in. per doz., $7.20; 5-8, $7.80; ¾, $10.00; 7-8, $11.70; 1 in., $13.80; 1⅛, $20.00; 1¼, $24.55; 1½, $30.00.

Rubber Belting Is Now Quoted Higher

Montreal.

BELTING.—Prices are higher on various rubber belting, due to a revision of the discount. Transmission belting with frictioned-surface is quoted at 16 per cent. from the list, the previous discount being 20 per cent. Frictioned-surface rubber belting for the high-speed and small pulleys only, "Acme Red Special," white duck, is quoted at 24 per cent., and regular rubber-coated belting is elling as follows: Peerless, 16 per cent. from the list; Reliance, 32 per cent; Banner, 6 in. and under, 38 per cent.

Conveyor belting has also advanced in price, the increases ranging from 5 to 10 per cent. The market is quite firm and is active.

Pipe Wrenches and Parts Revised Higher

Montreal.

WRENCHES.—Stillson wrenches and parts have advanced in price again and are now quoted at 25 per cent. off the list.

Clippers and Machines, Clipper Parts Advanced

Montreal.

CLIPPERS.—In addition to the price of $16.00 on No. 1 power horse clipper, already quoted, other prices are in effect. No. 2 are quoted at $20.75 each, and both these clippers are subject to a 25 per cent. discount. Attachments for the horse clipper are listed at $10.00 each, and for the sheep shearing attachment at $14.50. No. 8 sheep shearing machine is quoted at $21.00, No. 9 at $24.00. These are likewise subject to a 25 per cent. discount.

Building Papers Active With Tendencies Firm

Montreal.

BUILDING PAPERS, ROOFINGS. — Prices are firm on all these lines and there is little to indicate lower prices. The present activity comes from the filling of back orders, and manufacturers state that raw materials of many kinds are scarce. Coal tar, sheathings, soapstone, rubber and nails are scarce from time to time, labor is high and transportation slow. Altogether the situation is very firm and makers will be busy for some time executing orders now in hand.

Wire Demand Is Bigger Than Total of Supplies

Montreal.

WIRE PRODUCTS.—As far as baling wire, smooth galvanized, coiled spring and barb wires go, they are very scarce. Hardware jobbers express their belief that this fall will see a shortage. Prices are really nominal and no definite basis is being adhered to in all cases. No. 9 is based by some at $7 per 100 lbs.

Nail Demand Continues With Supplies Short

Montreal.

NAILS.—The demands are still active, and little relief is in prospect. As a matter of fact there are ever-decreasing supplies of needed sizes, and it begins to look as though this market will be bare for the present season. Prices are therefore firm and the basis holds steady at $6.40 per keg for standard wire, and at $7.35 for cut.

Range Boilers Steady Without Price Change

Montreal.

RANGE BOILERS.—There has been quite a steady movement of range boilers of standard size and pattern. The steel plates for stamping these have been scarce, but there seems to have been a fair supply all along. The standard 30-gallon boiler is quoted at $15 and the extra heavy at $18 each.

Rope Is Holding Firm Without Change

Montreal.

ROPE AND CORDAGE.—Prices are firm on rope, manufacturers stating that the raw materials have been advancing steadily in price and that they have had to pay more for imported fibres. The market is ruling firm, but no quotable changes have been made, pure manila being quoted at 35½c; British manila and New Zealand at 28c, and sisal at 22½c per lb. There is a fair movement, though heavy business at this period of the year is not anticipated.

Firm at New Prices Are Oil and Gasoline

Montreal.

COAL OIL, GASOLINE.—At the advanced prices quoted last week, coal oil is firm. The movement is quite heavy, this being the active season for oil stoves. Prices are quoted at 31 to 34 cents per gallon, and tendencies are strong.

GASOLINE, of motor grade, is selling at the new price of 41½ cents per gallon and the better grades at 46½c. Summer demand for this has greatly increased with the holiday use of automobiles.

Holders of Sheets Receive Record Prices

Montreal.

SHEETS AND PLATES.—It is necessary, almost, to beg supplies when steel sheets are wanted these days. Manufacturers have been getting a little better delivery from various mills, however, but there is a continued shortage, and this, on some gauges, is often acute. The outlook for the coming Fall is said to be in no wise improved, and it may be that free movement of supplies will be deferred beyond the present year.

18 and 20 gauge	11 35	11 85

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Trade in Products Made of Lead Is Good

Montreal.

LEAD PRODUCTS.—The demand for these products, seasonably considered, is quite satisfactory. This reveals that there is quite a considerable amount of building under construction. Pig lead is holding its own and there is therefore little likelihood that a readjustment of price on the made-up lines will come in the immediate future. Stocks are in reasonably good shape.

Lead pipe, per 100 lbs.	....	17 00

No Hope For Bigger Supply Steel and Iron

Montreal.

IRON AND STEEL.—"We cannot get what we require of some sizes steel and iron," said a prominent jobber this week to Hardware and Metal. It is evident, when present production is taken into consideration, that there will not be much relief for some weeks, for there are many tons on back order, and the outlook is less favorable than it was two weeks ago. Prices are firm and there is likely to be a maintenance of the basis, if not an advance.

IRON AND STEEL

Iron finish machinery steel		5 35
Norway iron	13 50	15 00

Bar iron, base		4 95
Refined iron, per 100 lbs.		5 95
Mild steel		5 30

3-16 and thinner flats in iron or steel take extra 50c per 100 lbs. over base and regular extra.

Old Material Quiet; Melting Steel Higher

Montreal.

OLD MATERIAL.—Prices have been sagging on most lines, for there is a dearth of demand from the mills. Heavy melting steel has firmed and advanced in price, however, this being due to the recent increase of demand from abroad. For car lots, $24 to $25 per ton is being paid. Other lines are quiet and prices low.

Ware List Steady; Will be Active Trade

Montreal.

WARES.—The list is steady but unchanged. Enamelled ware, tinware and japanned goods are all firm, due to the sheet and tinplate stringency. The outlook does not indicate that there will be any reduction in prices, and with booked orders and prospects for future orders, there will be a heavy outturn of supplies this fall.

Many Heaters Booked; Will be a Big Season

Montreal.

STOVES AND HEATERS.—"We expect to sell more heating stoves this fall than at any time in our history." Such was the comment of a Montreal manufacturer to Hardware and Metal this week, and there is little likelihood that this has been the experience of other makers. Prices are, and will likely continue to rule firm for some time, for it is not an easy matter to get the steel plates. Those who have placed orders in advance will, however, be likely to obtain their requirements.

Antimony, Tin, Spelter Are Revised Downward

Montreal.

INGOT METALS.—While the recent decline further in English exchange has been a factor, mills have revised their quotations to coincide with this. In local trading circles prices are fairly well maintained and there is some trading.

TIN.—London cables are little different, although the local basis has eased off somewhat. Importers are quoting 56 to 57 cents per lb.

COPPER.—Some trading is being done at 24 cents for casting and at 24½ cents for electrolytic.

LEAD.—This is the strongest item in the list for the week, and is held at 10¼ cents per lb.

ANTIMONY.—The price is softer this week and a quotation of 10½ cents is made. Sales are more limited.

SPELTER.—This metal is not actively in demand and price has sagged to 10¾ cents per lb.

ALUMINUM.—Not much change in any respect and trading is conducted on the basis of 37-39 cents per lb.

TORONTO MARKETS

TORONTO, August 5.—Fewer changes are noted on various lines this week. This may be on account of the holiday season and not that prices are becoming stabilized. Corrugated sheets have been advanced and the standard size for these is now 30 inch.

Stoves and enamelware are moving fairly, though bookings for the former for fall are not as heavy as usual. Higher prices are noted on steel turnbuckles, barn door hinges, nail pullers, shoemaker's wax, self wringing mops, stair plates, steam cylinder oil. Galvanized sheets are still very scarce and prices are only conditional on being able to make deliveries. Wire and wire nails also continue to be very difficult to obtain and the outlook for fence and fence wire is also poor.

The holiday season is responsible for a decline in the amount of business, but generally this is as good and better than usual at this time of the year, and the only complaints that manufacturers have are the shortage of raw material caused by want of fuel and transportation difficulties, due to lack of cars.

Considering that many travellers are away on their annual vacation, fall bookings are coming in very well.

Advance of 12½% on Corrugated Sheets

Toronto.

CORRUGATED SHEETS. — An important announcement this week is to the effect that 30" sheets have been adopted as the standard size of material for manufacturing corrugated iron, all gauges lighter than 24. Corrugated iron in all gauges lighter than 24, made from wider sheets than 30" carry extra list price of 75 cents per 100 square feet. This ruling is effective immediately on all new orders but does not affect any orders now on hand.

Owing to railroad congestion it is still difficult to get delivery of sheets, and manufacturers are putting forth every effort to overcome the handicap. An advance of approximately 12% is recorded this week. New prices are shown herewith.

Corrugated Sheets—	Per 100 square feet Gal'zd.	Painted
No. 28 gauge	$12 00	$ 9 50
No. 26 gauge	12 75	11 00
No. 24 gauge	18 75	13 50
No. 22 gauge	22 25	17 00
No. 20 gauge	26 50	21 75
No. 18 gauge	32 75	26 75

On shipments of 300 lbs and over, freight is allowed south and east of and including North Bay; also several Western counties in Quebec Province. Places north and west of North Bay, he freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Discount, 7½%.

Westcott Wrenches Are Down a Little

Toronto.

WESTCOTT WRENCHES. — A slight shading is noted on the Westcott wrench and the following are new net quotations:

6 in., $11.60 doz.; 8 in., $14.55 doz.; 10 in., $17.45 doz.; 12 in., $26.15 doz.; 14 in., $34.85 doz.

Gasoline and Coal Oil Remain Firm

Toronto.

GASOLINE.—The present quotation on gasoline is 40 cents per gallon. No immediate change is looked for from the advance of last week, but with present high costs still higher prices are not unlikely. The demand continues heavy.

COAL OIL.—This is moving freely and is unchanged from 29½ cents for Royalite, and 32½ cents for Palacine.

Stoves Continued Firm and Steady

Toronto.

STOVES.—Manufacturers report fall booking for stoves and heaters to be fairly good, but shortage of supplies continues and outlook for those who leave ordering until last is none too good.

Steam Cylinder Oil Quoted Higher

Toronto.

CYLINDER OIL.—Capitol cylinder oil is now selling at 96 cents per gallon, barrels less 15%.

Drop-forged Steel Standard Turnbuckles

Toronto.

TURNBUCKLES.—The prices of drop forged steel turnbuckles have been revised and the following are the present net quotations:

	With Stubs	Without Stubs
3/8 in.	$ 0 42	$ 0 28
7-16 in.	0 45	0 30
1/2 in.	0 48	0 33
9-16 in.	0 50	0 35
5/8 in.	0 52	0 37
3/4 in.	0 66	0 44
7/8 in.	0 78	0 50
1 in.	0 92	0 62
1 1/8 in.	1 33	0 85
1 1/4 in.	1 65	1 05
1 3/8 in.	1 85	1 15
1 1/2 in.	2 00	1 25
1 5/8 in.	2 70	1 65
1 3/4 in.	3 05	1 85
1 7/8 in.	3 35	2 15
2 in.	4 45	2 80
2 1/4 in.	7 75	4 75
2 1/2 in.	10 50	6 65

Rope and Binder Twine Moving Briskly

Toronto.

ROPE & BINDER TWINE. — There is no change to report in the price of rope and binder twine this week. Markets are firm and manufacturers do not anticipate any decline in cost. The demand for twine continues heavy. Present prices are as per current quotation pages.

Barn Door Hangers Advance in Price

Toronto.

BARN DOOR HANGERS.—Richard-Wilcox barn door hangers are now quoted at 15% off list.

Wire Rope Clamps Show 20% Advance

Toronto.

WIRE ROPE CLAMPS.—Crosby wire rope clamps now show the following prices:

3-16 in., 8c; 1/2 in., 8c; 5-16 in., 8 1/2c; 3/8 in., 10c; 1/2 in., 14c; 5/8 in., 19c; 3/4 in., 26c; 7/8 in., 36c; 1 in., 42c; 1 1/8 in., 51c; 1 1/4 in., 62c; 1 1/2 in., 98c.

Prices Advance on Shoemakers' Wax

Toronto.

SHOEMAKERS' WAX.—Higher prices are quoted on shoemakers' wax, it having advanced $1.50 per hundred balls.

Nail Pullers and Box Openers Higher

Toronto.

NAIL PULLERS AND BOX OPENERS.—New prices are given on unbreakable nail pullers of $2.60 each, and Matchless box openers are $11.50 per doz.

Enamelware Demand Continues Good

Toronto.

ENAMELWARE.—Manufacturers report a good demand for these lines despite many travellers being on their holidays.

Shortages continue in many articles and no relief seems in sight in supplies of raw material; galvanized and tinned sheets being particularly scarce and hard to obtain.

Bar Iron and Steel Scarce, But Unchanged

Toronto.

IRON AND STEEL BARS.—Business in these is reported but fair.

Stocks generally are low, some sizes being hard to obtain, and jobbers state they could dispose of large quantities of certain sizes if they could get them. Prices are as follows:

Common bar steel, 3-16 and light	6 00
Common bar steel, 1/4 in. and heavier	5 50
Common bar iron, 3-16 in. and heavier	6 00
Common bar iron, 1/4 in. and heavier	5 50
Angle base	5 75
Horseshoe iron	6 00
Tire steel	5 95
Band steel	5 75
Spring steel	12 75
Mining drill steel	31 25
Sheet cast steel	....
Mild steel	5 75
Norway iron	16 25
Toe caulk iron	6 70
Sleigh shoe steel	5 75
Hoop steel	6 75

Cement Prices Withdrawn; Shipments Very Scarce

Toronto.

CEMENT. — The prices on Cement have been withdrawn and orders are only accepted for prices ruling at date of shipment. Shortage of fuel is given as the reason for half the plants being closed down, and inability to secure either cars or coal is holding up production. Reports from the States seem to indicate that the car shortage cannot be righted before fall.

New Quotations on Bolt Clippers

Toronto.

BOLT CLIPPERS. — The new net prices on Newcasy bolt clippers are for No. 0, $4.40; No. 1, $5.90; No. 2, $8.25, and No. 3, $10.65.

Wire Nails Show No Change

Toronto.

WIRE NAILS.—Wire nails are firm at the last week's price of $6.40 base. Demand continues good, but no relief is in sight. Mills report scarcity of steel as well as shortage of coal, and prospects for a decline seem slight.

Self-wringing Mops Marked Up

Toronto.

SELF - WRINGING MOPS. — Self-wringing mops are now quoted at $6.30 per doz.

Stair Plates Are Revised Upward

Toronto.

STAIR PLATES.—The following are new prices on these lines: No. 826, gilt, $2.30 per gross net; No. 828, nickel plated, $2.00 per gross net.

Annealed Wire Scarce and Firm

Toronto.

ANNEALED WIRE.—The base price on this is now $6.25 base, but stocks are scarce and supplies slow in coming in. Other grades of wire are equally short, and this is especially noticeable as regards barbed wire.

Ingot Metals Quiet Prices Rule Firm

Toronto.

INGOT METALS.—The demand continues light and deliveries are still feeling the effects of car and fuel shortage. Prices continue steady.

TIN.—The market is very quiet. Four plants of the American Sheet and Tinplate Company have been forced to close down on account of fuel and transportation difficulties.

LEAD is remaining firm and price is unchanged at 10 1/2 cents per pound.

SPELTER.—Little activity is noticeable. Market is held firmly at 10 3/4 cents per pound.

ANTIMONY.—The market is dull. Reports state that imports for the first half of the year were equal to the whole of last year, but present stocks in hand are generally lower.

COPPER is rather featureless this week and prices are largely nominal. The general opinion is that stocks are fairly large. It is quoted at 24 cents per pound.

ALUMINUM.—No new features were evident, demand was small and prices continue firm at 37 cents per pound.

Lead and Zinc Products Dull; Price Firm

Toronto.

LEAD AND ZINC PRODUCTS. — Business is reported a little quiet on these lines but it is only to be expected at this time of the year. Prices are ruling firm. The following are quotations on principal lines:

Lead pipe, list, per lb.	0 17
Do., over 8 in., list, per lb.	0 19
Lead traps and bends	add 30%
Lead wool, lb.	0 16
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 13
Cut sheets 1/2 to 3/4c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 43
Solder, strictly, lb.	0 35

Solder, commercial, lb.	0 33
Solder, guaranteed, lb.	0 39
Solder, wiping, lb.	0 33
Lead waste pipe, list, per lb............	0 18
Zinc sheets, per lb.	0 19

Waste Materials Quotations Unchanged

Toronto.

WASTE MATERIALS.—Business is reported a little quieter this week, with no noticeable change in prices. Car shortage is still hampering movements, following are the juotations on principal lines.

WASTE MATERIAL

No. 2 busheling	$13 00
Stove plate, per ton	32 00
Yellow brass	0 10
Red brass	0 15¾
Light brass	0 08
Scrap zinc	0 06
Heavy copper	0 17
No. 1 machinery cast	33 00
Heavy melting steel	15 00
Wrought iron, No. 1, per gr. ton	15 00
Heavy lead pipe	0 06
Old rubbers, boots and shoes....	0 06
Overseas lumbermen's rubber boots	0 04
Bicycle tires	0 01½
Automobile tires	0 02½
Heavy lead pipe	0 05¾
Tea lead	0 03

Fair Demand For Wrought Pipe

Toronto.

WROUGHT PIPE—There is a steady demand for certain sizes in both black and galvanized but manufacturers still find it difficult to fill orders. Prospects for any immediate improvement in deliveries appear slight.

Illustrating the condition the iron and steel trade has been placed in as a result of railroad congestion and shortage of fuel and raw material reports from the Cleveland district say: "that traffic conditions in the iron and steel industry, during the past month, have reached a more acute shortage and it has become a matter of constant struggle to keep plants in operation and finished material moving."

Prices on list No. 46 of July 26, 1920, hold good and are as follows:

Standard Buttweld Pipe
Per 100 Ft.

	Steel Blk.	Steel Galv.	Gen. Wrought Iron Blk.	Gen. Wrought Iron Galv.
⅛	$ 6.50	$ 8.50	$.....	$.....
¼	5.31	7.41	5.91	8.01
⅜	5.31	7.41	5.91	8.01
½	7.10	8 63	7.95	9.48
¾	8.80	10.87	9.95	12.02
1	13.01	16.07	14.71	17.77
1¼	17.60	21.74	19.90	24.01
1½	21.04	25.99	23.79	28.74
2	28.31	34.97	32.01	38.17
2½	44.75	55.28	.....	.....
3	58.52	72.29	.....	.....
3½	74.06	90.62	.....	.....
4	87.75	107.37	.....	.....

Standard Lapweld Pipe
Per 100 Ft.

	Steel Blk.	Steel Galv.	Gen. Wrought Iron Blk.	Gen. Wrought Iron Galv.
2	$32.01	$ 38.67	$ 35.71	$ 42.37

10L	2.77	3.41	3.41	4.05
10	3.56	4 39	4.39	5.21

Galvanized and Black Sheets Scarce

Toronto.

SHEETS, GALVANIZED & BLACK. —Deliveries of these are very scarce. The prices given in current quotation pages are only nominal, and are for stocks that may be on hand at time of order. To fill orders dealers have had to secure what they could locally in many cases, and have had to pay, and charge, increased prices for the privilege.

LONDON MARKETS

LONDON, Aug. 5—Business here is reported as very satisfactory. There is a steady volume of trade and lines such as builders' hardware and carpenters' tools are enjoying a good sale along with the various summer lines.

Prices continue firm, with the exception of linseed oil, which is down another ten cents. Collections continue good.

Further Decline in Linseed Oil

London, Ont.

LINSEED OIL.—Continuing the downward movement of recent weeks, linseed oil has dropped another 10 cents in price. Crushers are getting larger supplies of seed and the general situation is much improved. New quotations are as follows:

	Raw	Boiled
1 to 2 bbls.	$2.17 gal.	$2.20 gal.
3 to 5 "	2.16 gal.	2.19 gal.
6 to 9 "	2.14 gal.	2.17 gal.

Less than bbls. add 15 cents gal.

Turpentine Prices Unchanged; Good Sale

London, Ont.

TURPENTINE. — Following recent price declines turpentine has remained steady this week with a good sale reported. Following are present quotations:

1 bbl. lots .... $2.60 Imp. gal.
2 to 4 bbl. lots .... 2.59 Imp. gal.
5 gal. lots .... 2.75 Imp. gal.

Good Sale For White Lead in Oil

London, Ont.

WHITE LEAD IN OIL.—A good buying movement continues for white lead in oil with prices unchanged as follows:

	Tons	Less tons
Pure, per 100 lbs.	$20.45	$20.80
Elephant, per 100 lbs. ..	20.95	21.30

Fair Sales For Rope During Past Week

London, Ont.

ROPE.—A fair sale for rope is reported from the local trade during the past week. Prices are steady and no change is anticipated in the immediate future. Prices are as follows:

Pure Manila, 35½ cts. base; Beaver Manila, 28 cts. base; New Zealand Hemp, 28 cts. base; Sisal, 22½ cts. base.

Good Demand For Nails Continues

London, Ont.

NAILS.—A good demand for nails exists locally. This is no doubt due to the increased amount of building being undertaken in the district. Present prices are as follows:

Wire .... $6.25 base
Cut .... $7.50 base

Wire Cage Rat Traps Advance

London, Ont.

WIRE CAGE RAT TRAPS.—An advance is recorded this week on wire cage rat traps, bringing present price to $9.50 doz. for No. 1 traps.

Higher Prices on Reid Lightning Screw Drivers

London, Ont.

REID LIGHTNING SCREW DRIVERS. —New and higher prices are named this week on Reid lightning screw drivers. These are now being quoted as follows: No. 1, $3.25 each; No. 2, $2.60 each.

Shoe Knives Reach Higher Price Level

London, Ont.

SHOE KNIVES. — New and higher prices are named this week on shoe knives. These are now being quoted at $3.65 per doz.

Stillson and Trimo Wrenches Up 10 Per Cent.

London, Ont.

STILLSON AND TRIMO WRENCHES —A 10 per cent. advance has been made in prices of Stillson and Trimo wrenches this week, bringing new quotations to 25 per cent. off list

Parts For Stillson and Trimo Wrenches Higher

London, Ont.

PARTS FOR STILLSON AND TRIMO WRENCHES.—Simultaneously with a change in prices of Stillson and Trimo wrenches comes an advance on parts for these wrenches. New quotations are on the basis of 25 per cent. off list.

Iron Horse Shoes Advance in Price

London, Ont.

IRON HORSE SHOES.—The advances this week include higher prices for iron horse shoes, these now being quoted as follows: No. 2 and larger, $8.25 keg; No. 1 and smaller, $8.95 keg.

Prices Higher on Richards Wilcox Line

London, Ont.

RICHARDS-WILCOX LINE. — A new discount of 20 per cent. off list has been

named on Richards-Wilcox Catalog C2 list. This makes an increase in price. New net prices on some of the best selling lines are as follows:

Barn Door Rollers—No. 543, $22.40 doz.; No. 544, $20.80; No. 545, $16.00; No. 843, $14.40; No. 021, $14.40; No. 821, $27.20; No. 21, $22.40; No. 321, $24.

Parlor Door Hangers—No. 12 Double sets complete, $5.20 set; No. 12 Single sets complete, $2.65 set.

Mounted Grindstones—No. 300, $8.80 each; No. 400, $10.00 each.

Higher Prices on Rochdale Pruners

London, Ont.

ROCHDALE PRUNERS. — Higher prices are recorded this week on Rochdale pruners, bringing quotations to the following: No. 35, $18.75 doz.; No. 38, $24.75 doz.

Higher Prices For Fence Staples

London, Ont.

FENCE STAPLES.—Among the lines showing an advance this week are fence staples. New prices on these are as follows: Bright, in 100 lb. kegs, $6.65 per 100 lbs.; Bright, in 25 lb. boxes, $7.65; Galvanized, in 100 lb. kegs, $7.65; Galvanized, in 25 lb. boxes, $8.65.

Steady Sale For Window Glass

London, Ont.

WINDOW GLASS.—A steady sale for window glass is reported this week with stocks in fair condition. Back orders have recently been moving more freely. Prices are as follows: single diamond 15 per cent. off list; double diamond, 15 per cent off list; Cut Lights, 40 per cent. off list.

Putty Has Seasonable Sale; Prices Firm

London, Ont.

PUTTY.—A good seasonable sale for putty now exists locally, and prices are firm as follows: Standard, 100 lb. drums, $8.30 per 100 lbs.; 25 lb. drums, $8.55; pure, 100 lb. drums, $10.80; 25 lb. drums $11.05.

Good Sale For Harvest Tools

London, Ont.

HARVEST TOOLS. — With the approach of harvest season the sale of harvest tools is picking up. Quotations are now being made at 50/10 per cent. off list.

WINNIPEG MARKETS

WINNIPEG, Aug. 5—Business was not so brisk during the past week as it has been, but jobbers are well satisfied with the volume alloted them for this season of the year. A great many advances in prices have been made during the past week on hardware commodities. There seems to be no hope for anything but advances, although the price of turpentine has dropped 50 cents per gallon after being advised that the price was almost bound to go up on account of the big demand of the English buyers and the limited supply in the South which is smaller than it has been for a number of years.

There is still a great shortage of raw materials and nearly all kinds of hardware commodities are showing very little relief. There is great anxiety over deliveries for the future. A number of lines for fall bookings are going out to the dealers now and the trade are looking for a heavy buying movement. Collections are better and although business in general is not as brisk as it might be, merchants are fairly well satisfied with the volume of business being done.

Advances this week have been made on wrought iron pipe on the larger sizes only and also cold chisels, stocks and dies, horse muzzles, washing machines, wringers, cotton gloves, cold blast lanterns, wrought iron and cast iron fittings, Dart unions and several other lines. Wire nails are steady and scarce at the present high basis of $7.00 per keg. Paper bags and toilet paper are up in price and hard to get. The price on manila rope is expected to take an advance shortly on account of the manufacturers being confronted with higher prices for raw material. In general, prices are firm with a strong tendency to be higher on many lines.

Advance Made on Wrought Iron Pipe

Winnipeg.

WROUGHT IRON PIPE.—Price advances on wrought iron pipe from 4½-inch up are recorded this week. It was stated in the markets of last week that a probable advance in the price of wrought iron pipe would be forthcoming in the near future. It is felt that still a further advance will be made soon, as there is a great demand, and it is very hard to get any large quantity. The following prices are in effect:

Sizes, ⅛, black, $6.17, Galvanized, $8.64; ¼, $5.76, $8.10; ⅜, $5.90, $8.24; ½, $7.88, $9.59; ¾, $9.77, $12.06; 1, $14.40, $17.82; 1¼, $19.53, $24.12; 1½, $23.40, $28.80; 2, $31.50, $38.84; 2½, $50.94, $63; 3, $66.60, $82.80; 3½, $84.60, $103.50; 4, $99.90, $122.40; 4½, $119.25, $146.70; 5, $139.05, $171; 6, $180, $222.30.

Malleable Iron Fittings Up 10%

Winnipeg.

MALLEABLE IRON FITTINGS. — Prices on malleable iron fittings are firm, and the tendency is upward. Class A is now quoted at 50 per cent. off the list.

Dart Unions Take Higher Discount

Winnipeg.

DART UNIONS. — Dart unions are selling on a revised discount basis which makes some of the sizes 10 per cent. higher in price. Dart unions ¼-in. to 2-in. are selling at 15 per cent. off the list, and ⅛-in., 2½, 3½ and 4-in., the discount is 5 per cent. off.

Wrought Iron Nipples Are Firm in Price

Winnipeg.

WROUGHT IRON NIPPLES. — The demand is extremely heavy and cannot be met from the available supply. The tendencies are very firm and even higher prices may be looked for on wrought iron nipples.

Washing Machines Advance Slightly

Winnipeg.

WASHING MACHINES. — A sharp advance has been made on the price of washing machines. New prices quoted this week are as follows: Dowswell, $9.55; New Century, $16.30; Canadian, $9.55.

Higher Prices on Cold Blast Lanterns

Winnipeg.

COLD BLAST LANTERNS.—A sharp advance has been made on cold blast lanterns amounting to an increase of 10 per cent. The new prices quoted are: No. 2, plain, $15.75; No. 2, japanned, $16.50; No. 2, coppered, $19.25.

Jap. Gold Paint Advances 10%

Winnipeg.

GOLD PAINT.—An advance of 10 per cent. has been made on Japanese gold paint, and No. 2 size is now quoted at $4.00, and No. 3 size at $1.90 per doz.

Change Expected in Wire Nail Prices

Winnipeg.

WIRE NAILS.—Although the price has remained firm for some little time on wire nails, an advance is expected very soon.

The base price to-day is $7.00 per keg.

Higher Prices on Zig-Zag Rules

Winnipeg.

ZIG ZAG RULES. — Although the demand is only fair for this particular line

the price has advanced about 5 per cent. The new prices quoted are: No. 02, $2.75 per doz.; No. 03, $3.80 per doz.; No. 04, $5.00 per doz.; No. 06, $7.85 per doz.

Prices Change on Stewart Clippers

Winnipeg.

HORSE CLIPPERS. — Lower quotations are made on Stewart horse clippers and sheep shears this week. New quotations are less a discount of 25 per cent. The net prices on the Stewart horse clipper is $14.50.

Tie-out Chains Advance 10 Per Cent.

Winnipeg.

TIE OUT CHAINS. — There has been a fair demand for this commodity and the supply is none too good. The price quoted this week is 15 per cent. off the list, being an advance of 10 per cent.

Wringers Up 10% on Previous Lists

Winnipeg.

WRINGERS.—Wringers are up about 10 per cent. on previous prices. A good trade is being done in this line and the stock of some lines is fair. This week's prices are: New Eze, $82.50 per doz.; Regent, $75.00 per doz.

Fire Extinguishers Show Price Advance

Winnipeg.

FIRE EXTINGUISHERS.—Owing to the rising market in the price of metals it was necessary to advance the price on Pyrene fire extinguishers. The prices for this week are as follows: No. 25, sizes 1 to 6, $10.00 each; No. 25, sizes 7 to 12, $9.38 each.

Advance of 10% to 15% on Soil Pipe Lists

Winnipeg.

SOIL PIPE.—A 15 per cent. advance on soil pipe lists up to four inches in size has been made this week. In larger than four inch size the advance equals 10 per cent.

PITTSBURGH MARKETS

PITTSBURGH, Aug. 5. — Taking the blast furnaces and steel works as a whole, the shipments are somewhat improved, and thus the rail transportation situation as relates to the distribution of the iron and steel industry's products appears at least to have rounded the turn. The worst condition fell towards the end of April, and for some time afterwards there was improvement, but late in June conditions started growing worse again, not because the total volume of rail transportation did not continue to increase, but because cars were diverted from general movement to the movement of coal. The original coal mine preference order was dated June 21, and was run for 30 days, while a 30-day extension carries it to August 19. The blast furnaces and steel works were deprived of a considerable number of gondola cars, but with increasing transportation all around the handicap is being overcome. The time is now probably near at hand when the coal mines will be supplied with all the cars they can load, whereupon any further increase in the volume of transportation will bring benefits to the iron and steel and other industries.

The point has not yet been reached at which all the furnaces and mills are shipping as much tonnage as they make, but the additions to stock are at a smaller rate, and at some plants, though thus far at only a few, the shipments exceeded the production. The Chicago district had been doing very well in this respect, having cleaned up the larger part of its accumulation of steel at mill, when last week the coal mine strike in Illinois and Indiana effected a large curtailment in iron and steel production in the district, about half the blast furnaces having to bank. There was an immediate effect upon the rolling of steel at the Gary plant, on account of the mills depending for power upon blast furnace gas.

The policy has become still more general among steel mills of holding steel, when it cannot be shipped, in the semi-finished form, whereby the production of finished steel is less, proportionately, than the production of crude steel, and shipments are approximately equal to the finished steel output. At some mills special orders rolled in the past are being picked out for shipment, while the mills are rolling stock sizes, the object being to get into consumers' hands such finished steel as might be desirable for use at some later time, leaving the stocks at mill in more mobile form.

Light Demand Continues

The market demand for steel has been light for some time past, and prospects now are that this light demand will continue for some months to come, general business and financial conditions being distinctly unpropitious for bringing out a full demand for steel, particularly when productive capacity is 40 to 50 per cent. greater than before the war. There is railroad buying in prospect, but no large volume compared with the heavy purchases the railroads used to make, as in 1905 and 1906, in 1909 and 1910 and in 1912. With railroad buying extremely light in the recent past, even a fair volume of buying in the near future would not strike anything like the average that used to be common, and either in the next year or the next ten years the steel industry cannot expect the railroads to take nearly as large a percentage of the total steel output as they have in the past, although in point of tonnage the purchases may be fairly large.

In the matter of construction work generally the outlook for steel consumption is not particularly favorable, for even though the cost of steel can be shown to be relatively moderate, the cost of other building materials, and the cost of labor, are very high, while there are vexatious delays in all construction work. Then, again, conditions as to financing new enterprises are rather unfavorable.

Equalization of Prices

It is a more common view than formerly that steel prices in general will decline to the level maintained steadfastly by the Steel Corporation since the Industrial Board arrangement of March 21, 1919. That there should be two or three markets is unprecedented, and is illogical, except for brief periods when there may be delivery premiums. That the corporation will not advance its prices was made clear long ago. Only recently Judge Gary issued a statement on business conditions in general, in which he took occasion to criticize in strong language the disposition of so many sellers of various commodities to exact the highest price obtainable and thus make inordinate profits. As to earnings the Steel Corporation's report for the second quarter of the year furnishes further testimony to the fact that the Industrial Board prices are quite profitable, for the earnings were far in excess of dividend requirements even though the shipments were much below capacity.

The second quarter earnings of the Steel Corporation, after payment of interest on subsidiary company bonds, but before depreciation allowances, sinking funds, etc., were $43,155,705, against $42,089,019 in the first quarter, and the surplus after dividends was $13,776,833.

The pig iron price outlook is particularly uncertain, because the market has no basis. Prices in the different districts are made from week to week by small transactions, while in steel products there is the stable basis afforded by the Steel Corporation's having adhered to the Industrial Board prices for over 16 months. The pig iron markets have advanced far above the Industrial Board schedule and thus are entirely out of line with steel prices. The markets as made of late have been made by demand for prompt iron, but generally of buyers having no inclination to buy for forward deliveries. Thus in the past fortnight the valley market has advanced $1 a ton on Bessemer, basic and foundry, on transactions of only a few thousand tons in each grade, and these small tonnages can hardly be considered adequate to advance the whole market for the future, when hundreds of thousands of tons will have to be traded in. What consumers are buying now is deliveries rather than pig iron. The only market that now exists is the prompt market, it being quotable, with the recent advances, at $47 for Bessemer and $46 for foundry or basic, f.o.b. valley furnaces, freight to Pittsburgh being $1.40.

Retail Clerks' Association Going Ahead Steadily Now in Sault Ste. Marie, Ont.; Merchants Are Co-operating Heartily

Members Meet Regularly For Social and Business Benefits—Strength of Organization Has Increased in Six Months From Thirteen to a Hundred and Fifty—Wednesday Half-holiday was One of First Coups Effected.

(Written Specially for Hardware and Metal by Secretary J. N. Rush, (hardware) 23 Herrick Street, "Soo.")

THE merchants of Sault Ste. Marie, Ont., last year, 1919, started a movement with regard to the weekly half-holiday the year round except December, but unfortunately they fell down in their enterprise; therefore, the following year the Retail Clerks' Association was formed with the hearty co-operation of the merchants.

At the time the clerks started the movement the Trades and Labor Council tried to form a union and block out the association, of which the merchants were more highly in favor. They did not like the idea of a union, so they asked the clerks to form an association.

Formed For Three Reasons

The association was formed then for three reasons:

(1) The Wednesday half-holiday;

(2) The meeting of all clerks regularly for social and business benefits, and

(3) For sports during the different seasons of the year.

The association is managed by the following officers: President, J. W. Pybus; 1st vice-president, J. G. Stewart; treas., Alex. Murray, and sec., J. N. Rush. They are assisted by various committees, such as sports, literary, etc.

Our first meeting in January was not a very great success, but with every meeting the members have increased from the unlucky 13 to 150, which is a goodly percentage of retail clerks. We are, however, just starting, and next winter we hope to enlarge more strongly.

The reason the fair sex were taken in was because they, too, are entitled to the Wednesday half-holiday, and also to the getting-up of dances, etc., which the association puts on. We had one dance last winter which would have been a failure had it not been for the girls, as they did all the work, that is the making of sandwiches, etc.

At the First Meeting

Given here is a copy of the minutes of the first meeting on January 8, 1920:

"The president, J. W. Pybus, opened the meeting, briefly outlining the purpose of the Retail Clerks' Association to the members of the association and also to a number of retail merchants who were present.

"The president's remarks dealt largely with the weekly half-holiday question, to which the merchants present expressed their hearty approval.

"Several of the business men present were then asked to speak on the half-holiday, and all agreed that it was a good thing as they themselves enjoyed a half-holiday, and, therefore, would like to see it in vogue. All were in favor of giving it a boost and helping it along. Those expressing opinions were: J. H. Bryan, of Bryan's, Ltd.; J. Hussey, of Hussey-Ferrier; C. M. Green, of Nipissing Stores; E. L. Bedford, of E. L. Bedford & Co., and W. Langstaffe, of Langstaffe Bros.

All Merchants Closing

"The meeting was brought to a close with the merchants asking the clerks to circulate a petition for the merchants to sign re the half-holiday closing. On motion of J. G. Stewart, seconded by J. W. Pybus, the meeting was adjourned."

In ending, I might state that all the merchants are closing and think it is a mighty good thing for themselves and clerks.

We have also ball teams which at present are developing into shape. We play a game every Wednesday afternoo weather permitting.

Not a Difficult Matter to Interest the Passing Public in Thermometers

There is comparatively little demand for thermometers, but there is no limit to the amount of business a merchant can do if he thoroughly merchandises a thermometer line. Weather is always a topic of conversation, and especially in the summer, when the temperature has a habit of climbing to dizzy heights and doing little tricks that take the breath away. People are always thinking and talking about the weather. Summer is, therefore, an ideal time to merchandise thermometers.

Keep your window display of thermometers simple. The instruments and the accompanying display cards will arouse sufficient interest without much additional display material. People will go out of their way to look at a thermometer and read the temperature it registers, and they will surely stop and look at a window display in which a thermometer is shown. For that same reason, it is easy to interest people in thermometers, and to induce them to purchase.

Wit and Wisdom

A FISH STORY

The second course of the table d'hote was being served.

"What is this leathery stuff?" demanded the diner.

"That, sir, is filet of sole," replied the waiter.

"Take it away," said the diner, "and see if you can't get me a nice, tender piece from the upper part of the boot."

IT MIGHT BE WORSE

Flyver.—What's the most you ever got out of your car?

Second Ditto.—I think seven times in one mile is my record.

HE WAS POSITIVE

A young man consulted a physician about "tobacco heart," which he thought he had contracted by excessive smoking.

"Doctor," said he, "do you believe that the use of tobacco tends to shorten a man's days?"

"Do I?" exclaimed the doctor, "I know it does. I tried to stop once, and the days were 90 hours long."

Canadian Veneering Company Erects Factory

The Canadian Veneering Company, Limited, Acton Vale, Quebec, is just completing the erection of a concrete, fireproof factory. This will be modern and one of the best-equipped factories, it is stated, for the manufacture of chair seats, closet seats, etc., in Canada. The main building will be 80 by 160 feet, the engine and boiler room, 50 by 50 feet, driers, 40 by 160 feet, and in addition there will be a separate machine and blacksmith shop and garage. All buildings will be fireproof.

Clerks of St. Thomas, Ont., Have a Strong Organization

Compromise On Early Closing Question Reached With Retail Merchants' Association—Public Becoming Accustomed to the New Hours—Everything Going Well.

WITH their working principles, and their organization thoroughly independent of all outside unions or combinations, the retail salespeople and store assistants of St. Thomas, late in April, formed themselves, almost one hundred per cent. strong, into what is known as the "St. Thomas Retail Clerks' Association." The organization was virtually the re-formation of the clerks. In December, 1919, the idea of amalgamation for the betterment of working conditions was broached and a branch of the American Federation of Labor's retail clerks' department resulted. The aims and objects of the branch were radical, antagonistic. They savored of "closed shop," strikes and "walkouts." Sympathy with every other branch of the Federation was the keynote, literally the mandate of the clerks' organization. The St. Thomas branch proved a failure from the very beginning. It was frowned on by employers, and the better thinking classes of clerks refused to identify themselves in such a movement. The branch died an abortive death, but with its death the new organization was ushered in. Diametrically opposed to the first organization in theory and practice, the regenerated union has proved a brilliant and growing success. It has accomplished big things by the application of common-sense methods.

Shorter Hours Asked For

The united clerks wanted shorter hours. They had been talking Saturday night early closing for months but had accomplished little, simply because they had lacked a definite purpose and co-operative effort.

In a giant petition that savored more like a suggestion than a request, the association asked the Retail Merchants' Association of St. Thomas to confer with them on the early-closing question, and to consider nine o'clock Saturday night closing, six o'clock closing the other five business days of the week and Wednesday half-holidays from May until the end of September. The meeting was held and a compromise agreed on, the retail merchants signing up for ten o'clock Saturday night closing from April 30 to September 30 and nine o'clock Saturday night closing the remainder of the year, six-thirty closing the other five days and Wednesday half-holidays from June 1 to September 1. The change was made with the understanding on both sides that it should be tentative, the idea being to try out this medium course on the buying public before attempting to introduce six o'clock closing every night in the week the year round. The new hours are meeting with the approval of the public, who have beome accustomed to the change with little inconvenience. And now the St. Thomas Retail Clerks' Association is conducting an energetic campaign with the consent of their employers to educate the people to shop earlier on Saturday. Their campaign is already producing the desired results.

The clerks' organization has developed along many other commendable lines. It has one of the livest sports committees in the city, with a baseball team, bowling and tennis clubs and other athletics. Its entertainment committee has staged two brilliant "at homes" this spring, with the retail merchants and business men as their guests and they have several others planned for the summer. There is an active visiting committee in connection with the association whose duty it is to cheer up the members who are ill and also to look after newcomers and find them congenial lodgings. This committee has proved its worth in the case of young women coming to the city. The glad hand of welcome is extended to all.

The Retail Clerks' Association is one of the finest organizations ever formed in St. Thomas. It is progressive and brimful of pep and it has received the hearty support of the merchants

Electricity May Yet Replace Coal

Two New Types of Electric Heating Devices Being Exploited—If Coal Gets Much Dearer It Will Be Cheaper to Use Electricity—Some of the Drawbacks of Electricity for Heating.

COMMENTING upon the possibility of heating Toronto's homes by means of electricity, which has come into prominence by reason of the announced discoveries of two new types of electric-heating devices. Dr. John Satterly of the thermo-dynamics department of Toronto University, stated that he could not give a scientific opinion on the subject without some knowledge of the new devices. Dr. Satterly was inclined to support the views of Sir Adam Beck on the subject.

"If coal gets dearer," said Prof. Satterly, "then electric heating may become more economical than coal, but I do not think that that time has yet arrived. Electric heating has some obvious advantages over coal, the chief of which is the utilization of all the heat energy developed, whereas in the use of coal a great deal of the heat goes up the chimney."

Dr. Satterly thought that there was not enough electrical power being developed at present to heat all of Toronto's homes by means of known electric heating devices. Because most of the power would be required in the winter, a great plant would have to be constructed to supplement the existing plants, and unless some new industries could be found that would purchase the summer output of electric power from this plant, he thought that it would be a difficult matter to secure anyone to construct and operate such a plant.

Of the two new electric heating devices one has been developed by Prof. A. W. Dorsay of Winnipeg and the other by Major William Myall of Toronto. The Winnipeg man maintains that he can heat all the homes in Winnipeg in 40-below zero weather at a rate that would make the cost of heating an eight-room house about $9 a month. The Toronto man does not advance such comforting estimates, but he does maintain that if the power were available Toronto's homes could be heated for less than they can by means of coal. While P. W. Ellis, chairman of the local Hydro Commission, is ready to throw up his hat and cheer for the man who can produce a practicable device that will reduce the present costs of heating, Sir Adam Beck states that as far as known electric heating apparatus is concerned there are three grave objections. The first is insufficiency of the available power; the second, the fact that the greatest supply would be needed in the winter months, which is now the time of the heaviest demands on the Hydro system. The third objection, according to Sir Adam, is that electric heating would be more costly than coal, but he stated that if the power could be taken at night and stored so that it could be used in the day time, it would make a great difference in the problem.

Better Shipments of Wire and Nails

Pittsburgh.—Wire and nail mills have been able during the past week to make a slightly better showing in the matter of shipments, and especially in the matter of deferred contracts. The fact is that the increased flow of box cars for this purpose, while normally infinitesimal, has been sufficient to make room in the overstocked warehouses for more finished stock and the producers are no longer offering to dispose of congested material at the mills for truck shipment, but are holding it consistently on storage for customers until cars can be obtained.

How I Developed My Paint Department

First Decision to Stock With One Brand of Paint That Would Not Fail in Any Respect—Well Lighted Paint Section—Constant Message Through Local Newspaper

(Written for Hardware and Metal by a Western Canada Hardware Merchant).

THERE were not more than 1,500 souls in the mid-Alberta town that I had selected in which to establish myself as a hardware dealer. Nothwithstanding, I made up my mind, early in the game, that one of my big lines would be paint and paint specialties. There was a broad and extended rural district, too, from which to draw trade.

When I arrived at my destination and took stock of my partner-to-be and of the business he had already started, it set me thinking. Insofar as it applied to the paint section of the less than five thousand dollar stock, in all, that was carried, I was far from satisfied with the showing, or the methods that had been adopted by the management for display. This, I considered, was the first great lack—that of a proper and appealing display of the paints, varnishes and specialties already stocked. After definitely deciding to enter the business, therefore, one of my first decisions was that of considering the whole matter of what paint should be handled, and how it should be displayed and featured to obtain the best results.

Clearing the Muss

While I am to-day a stronger advocate of a one-line paint stock than ever I was, at this time, convinced that the selling of paint, to be eminently a success, must be quite definitely confined to one good brand of paint, and that the best I could procure. Those were the days when the agency plan was taking shape very definitely all over Canada. Having spent some years in paint selling in Ontario, I was convinced, now that I had determined on getting a big share of the business in my town and district, that I would stock only one line. If I were to build aright I must do so with a brand of paint at my back that would not fail me in any respect.

Well, there was some job ahead of me. As may have been already assumed, there was anything but a good or well-assorted paint stock now on the shelves. There was a smattering of many lines. A little after my arrival I had learned that some of the paint now being sold had proven unsatisfactory; yea, more, it had greatly displeased one or two users. Apparently we had been sent part of a batch that was inferior; it would not dry. And so, after a little thought, I decided that we should throw the line out, gradually, and secure the agency for a line in which I had every confidence, because I had sold it before. Some job this was—that of clearing the stock, and it was years before we saw the end of it.

Rearranging Department

An advocate of the best possible display methods in the store, I am, perhaps, a crank on the display of paint, varnishes and other accessories. In the first place these goods lend themselves to pleasing and effective arrangement. Take a line of house paint, floor paint, varnishes or enamels, for instance. Quarts may be arranged neatly in sections, and thus make a fine appearance, adding to the whole general effect, when other various sizes are arranged in like manner. In this connection I always planned to have the shelving just of the right depth and height to accommodate the stock.

When the department was reorganized, a section about 15 feet long was set aside. This was at the extreme rear or the store, and whatever the disadvantage may have been in choosing this location, it had one fine advantage—that of splendid light. I might call attention to

(Continued on page 58)

IN SHABBYTOWN

In Shabbytown they do not care if things look seedy everywhere. They have no pep, they've lost their grip, they simply sit around and yip, in envy's tones, of Glossyville, the shining village on the hill. Oh, Shabbytown is punk and gray, and it shows symptoms of decay, and strangers passing through remark, "It surely dates back to the Ark." "Clean Up and Paint Up" makes men frown along the streets of Shabbytown. A can of paint makes no appeal to this bum village, down at heel; the people think there is no sense in going to so much expense; so things are always going down, and getting worse in Shabbytown. It always gives my soul a thrill when I arrive in Glossyville. The town looks like a blooming bride; the people take a hearty pride in making things look clean and bright, and in their labors take delight. They're lavish with the helpful paint, selecting colors chaste or quaint, and decorating every shack; thus warding off decay's attack, and making all the buildings look like buildings read of in a book. And strangers, when they see the town, say, "Here we'll come and settle down, and raise us nineteen kids apiece, and live and die as slick as grease." This happy burg goes right ahead, while Shabbytown is prone and dead.

—WALT MASON.

"Save the surface and you save all"—Paint & Varnish

MOORE'S LINE

of Tough and Durable Porch and Deck Paint

"Impervo" Porch and Deck is not an ordinary floor paint and must not be classed with such. It is made on Moore's House Color Base with Spar Varnish added to make it tough and durable. It is made especially for porches, verandah floors and steps, and dries perfectly hard with a high gloss. It produces a hard-wearing surface that satisfactorily resists the wear and tear and continual scrubbing to which such floors are subjected. Every can is full of quality and consumer satisfaction. It builds business for the dealer.

The Brush Department

Special Sale Livens Up Brush Sales

Link Up Special Two-Day Sale With Local Clean-Up Campaigns and Other Events—Brush Department Includes Wide Range of Articles Which Should be More Generally Used—Good Argument for Each Through Ads. and Windows

MANY ways have been advocated to speed up sales in the paints and brush departments, but it is doubtful if there is any better way for achieving this end than to set aside a certain day each week or each two weeks on which special effort will be made to acquaint customers with the merits of different types of brushes. For dealers located in outlying towns where farmers form a large part of the store's trade, it may be well for the dealer to choose the last two days in the week to push brush sales, at which time the bulk of the farming population can be reached.

Advance Advertising Throughout Local Community

A special of this kind always attracts a number of people and if some advance advertising has been done through the medium of the local paper with a circulation among townspeople and the farmers, it will render it more effective. The window display should also be devoted to brushes on the two days in order to serve as a further reminder to those visiting town.

Emphasize Prices

Dealers who have followed out this plan successfully find that it is a good idea to quote prices in plain figures on each brush. Emphasize the prices and the good value given through the advertisement and the window display and the customer will then enter the store with a definite idea of how much it is going to cost them.

For the special sale window cards can be used in conjunction with the display. These should emphasize the big value and the money saved by buying brushes at the special sale.

Link up With Clean-up Campaign

Just now when clean-up campaigns are in full swing in a number of cities and towns is a splendid time to link up such a special sale as is outlined. Clean-up involves not only painting but sweeping and scrubbing and brushes are required for all these purposes. Under this heading might be put scrub brushes, clothes brushes, shoe brushes, stove daubers, nail brushes, floor brushes, stable brooms, window brushes, feather dusters, brooms, etc. There are enough items here to justify a special sale, and many effective arguments can be used for the wider use of each of these articles.

Carpenter-Morton Co. Salesmen Convene

The annual four days' convention for the travelling salesmen representing Carpenter-Morton Co., Boston, manufacturers of varnish, paint and other specialties, took place at the Boston City Club, Boston, on Monday, August 2nd, at which 66 travelling salesmen, representing the company in all the states in the United States and Canada were in attendance. The sessions were presided over by M. Elton Vose, vise-president and sales-manager for the company. During the sessions addresses were made by H. K. Stroud, Edw. B. Brown and F. W. Farnsworth, of Stroud and Brown, New York City, advertising counselors for the Carpenter - Morton Co., and the salesmen were given full particulars regarding the extensive selling and advertising campaign which has been planned for the 1920-1921 season. On Thursday, August 5th, the men were given an outing at Wardhurst Club, Lynnfield, Mass., the trip being made in automobiles. Games and sports were enjoyed, followed by a banquet.

Saturday Afternoon Closing in Fort William

Fort William.—Local hardware stores are closing Saturday afternoons at 1 o'clock during July and August. Store proprietors like the idea and other trades are following this practice.

HOW I DEVELOPED MY PAINT DEPARTMENT

Continued from page 56

the fact that, while many hold that the paint department may be well placed at the front of the store, if the attractiveness of the store all the way from the front door to the back door be compelling enough, nine out of ten customers will find their way to the rear, and will not depart without knowing that your store is fully and well departmentized. That was the condition in which I aimed to always keep my stock, and the paint department was, I consider, well placed. When filled with the new stock it was very attractive.

Now for Business

It is fine to have a well-appointed paint department. No successful hardware store is to-day without one. But it does not work out well from the standpoint of turning that stock into profit. Customers have to be persuaded. Your townsmen and those from whom you may draw custom must be approached for business. Every possible avenue must be exploited if one is to attain a success for his paint department.

My plans embraced several distinct features. The first of these was the purchase of a quarter page space on the front page of our weekly newspaper. It cost me good money and for this reason in part, and also because I do not like to read the same copy this week that I read last, and believe that others are of the same mind, I always had a new message. But in that quarter page space I had a message on paint or varnish, and their advantages to the house owner, that I believed would tell. And it did tell, bringing many in to discuss paints and painting, and helping win me many new customers. Impressed with the uniqueness of my copy—sometimes a "set" advertisement secured from the manufacturer whose paint I was handling, and sometimes my own copy with a good strong headline—I soon had many people convinced that I was after the paint trade, and I got a goodly share of this trade, as a result.

(To be continued in next issue)

Bristles in the Raw State

BOECKH
Quality Material

Whenever you see the Boar's Head on the Boeckh trade-mark, think of this bundle of raw bristles at the left. These are bristles in the raw state. It is bristles like these that give Boeckh brushes their wonderful wearing qualities.

Every time you sell a Boeckh brush to a painter he sees with pleasure the length and resilience of these splendid bristles. It means better work for him—better covering and better spreading. Painters dislike to break in new brushes, and the long, generous bristles of Boeckh's brushes mean that they last him a long time.

The steel-grip gives the brush a better shape for painting, besides making it impossible for bristles to come out.

Stores that sell Boeckh brushes are sought for. Display Boeckh brushes so that your store will be easily found.

Higher Freight Rates Will Advance Cost of Steel Production

"Broadly and generally speaking," says John A. Topping, chairman of the Republic Iron & Steel Co., "the freight advances and the resultant increase in railroad revenues will undoubtedly lead to increased buying by the railroads for at least the necessary increases to equipment and road-bed betterments.

"It will make financing for these purposes comparatively easy.

"The freight rate advances will unquestionably mean substantial increases in the cost of steel production, because it will increase freight charges, and, necessarily, the assembling cost of all raw materials and supplies that enter into steel production."

Tinplate Makers Unable to Fill All Requirements

Pittsburgh.—It is becoming more evident each week that the market for tin plate for this year is going to fall far short of its needs. There is a lessened production in the field and the supply is so far in arrears of actual demand that tin plate makers frankly admit that they do not hope to fill all requirements this year and the policy of allotment of tonnage will have to remain in force for months to come. Export trade has been restricted to small lots, and resale material picked up, as well as small lots in warehouses, have been obtained at stiff premiums.

EVEN A FOOL

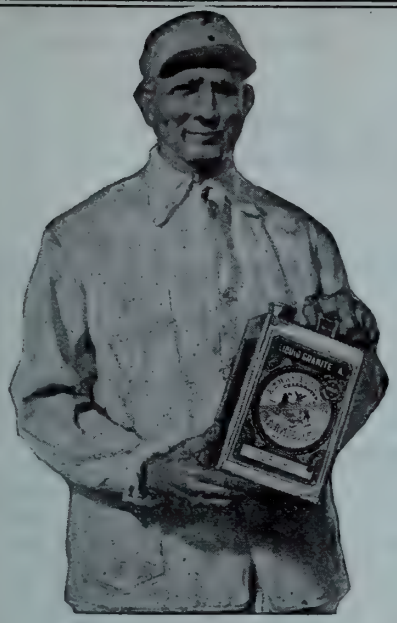
A farmer, just arrived in town, was walking across the street and happened to notice a sign on a plumbing store: "Cast Iron Sinks."

He stood for a minute and then said, "Any fool knows that."

How Hardwaremen Advertise Paints--No. 19

THE plea for a local paint-up and clean-up campaign is made through this ad. by Hendershot Hardware, Mt. Forest, Ont. By linking up his efforts with others to turn popular sentiment in favor of cleaning up, the hardware dealer can take advantage of an effective medium for advertising.

The wording of this ad. appeals to the pride of the citizens to have the cleanest, neatest and best looking town in the Dominion. Paint is necessary to achieve this end and the ad. points out that the regular use of paint not only is a source of pride but is an economy by saving expensive repairs.



The Luxeberry Painter Says:

"FINISH IN HASTE AND REPENT AT LEISURE. A wrong choice of finishes has spoiled many a home interior. When my customers put it up to me I guarantee them a handsome, lasting finish, and always make good by using "Berry" Brothers' Varnishes, Enamels and Stains."

It is because of the friendly attitude of painters, architects and consumers generally that "Berry" products are staple and easy to sell.

THE BEST IN GLASS

WEEKLY PAINT MARKETS

MONTREAL

MONTERAL, Aug. 5.—Paint markets are now ruling with a quieter condition all around. August is looked upon as a quiet month and the business transacted these days is more in the nature of that done with large factors, various manufacturers, etc. Some trade sorting is still being done. Prices are holding without change and it will be some weeks, perhaps, before any changes are considered by the manufacturers. The difficulty of securing raw materials still exists, and while some may come to hand others will often be lacking. Linseed oil declined about 5 cents a gallon during the week and there is plenty to be had. Turpentine is available in larger quantities. Shellac has been reduced in price and there is more to be had. Putty and glass are unchanged, although the undertone on glass is firm and double diamond is scarce. No change has been made on white lead in oil.

Trifle Lower Price on Linseed Oil Market

Montreal.

LINSEED OIL.—Manufacturing interests are practically the only ones buying any round lots of linseed oil at the present time. The movement to the retail trade is seasonably limited. Prices are shaded in some quarters from the basis of last week and where larger than the four-barrel quantities are desired prices are more favorable and will be named on application. Seed has arrived more freely and the basis for this has settled down to a more definite thing.

	Imp. Gal.	
Raw—		
1 to 4 barrels	1 85	1 90
3 to 4 barrels	....	....
Boiled—		
1 to 4 barrels	1 87½	1 92½
3 to 4 barrels	....	....

NOTE—Owing to fluctuations seed markets jobbers, generally, are not quoting.

Plenty Turpentine and Prices Are Held

Montreal.

TURPENTINE. — Considering that demands are limited there is plenty of turpentine in the hands of paint jobbers to meet present needs. The price basis is unchanged and jobbers state that, aside from the demands of various manufacturing interests the retail request for the product is a very small one.

Turpentine—	Imp. Gal.	
Single barrels	2 75	2 85
Small lots	2 85	2 95

(Packages extra.)

Putty Holds Steady; Glass Firm and Scarcer

Montreal.

PUTTY AND GLASS.—Movement of putty to the trade is fair, though the midsummer season usually brings quieter trading conditions. Some lots are going forward to the trade, however, and prices are fully maintained. No improvement is reported in supplies of whiting but these may be more readily available in the near future if production is not further hampered in England.

GLASS is now plentiful. This is specially true of double strength box glass. The movement to and from the importer has been an active one this summer and there is likely to be one of the best seasons on record when the story of the year is written. Prices are steadily firm. If increased freight rates become effective there will naturally be an advance of price.

PUTTY—	5 ton	1 ton	ton
Bulk, in barrels	6 50	6 75	7 10
Do., ½ barrels	6 65	6 90	7 80
Do., 100 lbs.	7 35	7 60	7 95
Do., 25 lbs.	7 60	7 85	8 20
Do., 12½ lbs.	7 85	8 10	8 45
3 and 5 lb. tins	9 60	9 85	10 30
1 and 3 lb. tins	11 10	11 35	11 70
Do., in 100 lbs. cases	8 35	8 60	8 95

Paint Trade Quieter; Varnish List Is Firm

Montreal.

PAINTS AND VARNISHES.—Prices on varnishes are firm. The tendencies toward higher prices are still evident and manufacturers may, at an early date, decide upon changes that have been considered, for some time, inevitable. The high prices asked for cans, the cost of various ingredients and the continued high wages that are being paid make it certain that prices will not be revised downward in any event.

The sale of prepared paint has become more confined but there is still a heavy demand from large factors. In this direction there is considerable activity but purely trade sales are seasonably quiet.

Shellacs Are Easier; More Stock Available

Montreal.

SHELLAC.—The supplies of both white and orange shellac are freer and more favorable prices are being quoted. The present basis on orange, in gallon jugs is $7.90, and on white, in jugs, the price is $8.65 per gallon. Prices are somewhat varied, the jobbers state, and in quantities more favorable rates may be obtained, HARDWARE AND METAL is informed.

Basis Holds Unchanged on White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—Prices are holding steadily and without any changes whatsoever. Excepting for special orders from large users there is not a great deal of activity. The difficulty of obtaining large supplies of pig lead promptly, from both the English and Canadian producers has served to maintain a strong market, with little change in the basis for some time.

TORONTO

TORONTO, August 5th.—Business in the paint departments generally is somewhat slacker, but is seasonably good.

Prices tend to be firm, and shortages in the supply of whiting do not indicate any reduction in the price of putty.

Linseed oil has steadied somewhat and is quoted around $2.12 for raw in barrel lots. Prospects are for a good crop of flaxseed and there is thought to be a possibility of slightly lower prices.

Turpentine is roughly 5 cents above last week's quotations but is moving only slowly, the decrease in prices of both oil and turpentine in the past few weeks having apparently caused buying to ease up. Collections are said to be fair.

White Lead in Oil Prices Unchanged

Toronto.

WHITE LEAD.—Jobbers and manufacturers report a quieter demand for white lead in oil, due principally to the holiday season. The present prices remain unchanged and are on pure in ton lots $20.35 per 100 lbs.

Turpentine Declines Somewhat Freely

Toronto.

TURPENTINE. — Somewhat lower prices are quoted on turpentine and some jobbers are offering it as low as $2.65.

Glass Shipments Reported Slow

Toronto.

GLASS.—Dealers and jobbers report a quieter time in orders for glass and also in deliveries from the factories. Prices are unchanged. Despite a rather favorable report last week the situation

ANNOUNCEMENT

A new distributing center for the well-known paint and varnish products of A. Ramsay & Son Company will be opened at

123 Bannatyne Ave. East
Winnipeg, Manitoba

on or about

September 1st, 1920

Our new branch will be under the able management of Mr. H. S. Duncan, who is well known to the paint and varnish trade throughout Manitoba and Saskatchewan.

The opening of this branch will enable us to supply with quicker dispatch the growing demands for RAMSAY'S PAINTS AND VARNISHES throughout the Middle West.

We are pleased to inform the trade that in addition to the opening of our new branch warehouse, Messrs. Merrick-Anderson Co., Limited, 117 Bannatyne Avenue East, are cataloguing and will handle a full line of the Ramsay products.

Our Winnipeg branch will be known as

A. RAMSAY & SON COMPANY
of Manitoba, Limited

A. Ramsay & Son Company
MONTREAL
Makers of Paints and Varnishes Since 1842
Branches also at
TORONTO and VANCOUVER

DISTRIBUTORS

EDMONTON DISTRICT—Revillon Wholesale Limited, Edmonton
CALGARY DISTRICT—The McDonald Baker Co., 818 8th Ave. W., Calgary
NOVA SCOTIA—James Simmonds, Limited, Halifax, N.S.

regarding Fall deliveries is not looked upon as being at all good by some jobbers.

Reports to hand from Pittsburgh districts indicate that plants, which at this season of the year are always closed down, do not anticipate being able to open up or resume operations as soon as they usually do. Shortage of fuel and transportation difficulties are advanced for the reason of this and these facts coupled with the already low stocks due to labor troubles and under production do not warrant any outlook for lower prices, and it looks as if the prospects of good deliveries for next season are slim unless Belgian shipments come in much more freely than they are doing.

Shellacs Are Lower Demand Is Good

Toronto.

SHELLAC.—A lower quotation is given on both white and orange shellac which are moving freely.

Prices are:

	Pure White	Orange
Shellac, per bbl.	8 25	7 50
Do., gal. jugs.	8 75	8 00

Lower Prices Quoted on Rosin

Toronto.

ROSIN.—Lower prices are given on rosins and present quotations are barrels, per 100 lbs. $10.75. Less per lb. 14 cents.

Putty Remains Firm; Glaziers' Points Advance

Toronto.

PUTTY.—The situation in this remains quiet with prices firm. Owing to the scarcity of whiting no easing up is expected, but the normal demand at this time of the year is not heavy. Glazier' points, zinc coated, are now quoted at 18c per pound in 1 lb. packages.

Red Dry Lead Slightly Higher

Toronto.

LEAD (RED DRY).—A few changes have to be noted in this and the following are the new prices:

	Per 100 lbs.
Genuine 560 lb. Casks	15.50
Genuine 100 lb. Casks	16.50
Lesser quantity	17.00
Genuine Eng., Casks	16.50

Whiting Slightly Higher and Very Scarce

Toronto.

WHITING.—Dealers report a continued scarcity of this product. The price has advanced 25 cents and stocks are low. The difficulty in obtaining whiting supplies is also affecting the putty market.

Prepared Paints Quiet and Unchanged

Toronto.

PREPARED PAINT.—Jobbers report business a little quiet in these lines owing principally to the holiday season, though orders by mail continue to come in freely. Prices remain unchanged and despite reduction in the price of oil and turpentine no change is expected at present, as other base materials are inclined to be higher and containers are scarce, and operating costs remain high.

Linseed Oil Steadies in Price

Toronto.

LINSEED OIL.—There is little to report of any change in the oil market this week. The demand is fairly heavy and the flax price stiffening would seem to indicate that no further decline is to be expected.

Prices are as follows:

Linseed Oil—		
1 to 2 barrels, gal.	2 17	....
3 to 5 barrels, gal.	2 16	....
10 barrels and over, gal.	2 14	....
		Boiled
1 to 2 barrels, gal.	2 20	....
3 to 5 barrels, gal.	2 19	....
10 barrels and over, gal.	2 17	....

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market; less than barrel lots are 15c per gal. higher than single barrel price.

Carrying On Business on Small Capital Tests the Ability of the Merchant

STRETCHING the capital is one of the tests of a true merchant. Almost anyone with any merchandising ability at all can do things with plenty of capital, but it takes a genuine manager to do business on a small amount of cash.

The banana man loads his cart in the morning with, say $10 worth of fruit. He returns at night with an empty cart and $15. Since he works every day, excepting only holidays and Sundays, he turns his capital about 300 times a year. On a gross annual business of $4,500 he makes 300 separate profits of 33 1-3 per cent., and all on an original investment of $10 plus the cart and his time.

Nor does the banana man carry any surplus stock. If some of his fruit gets over-ripe or is frostbitten, he sells it out at cost or less, and he will even give it away to the youngsters rather than lose the fruit entirely. In this way he makes use of his capital all the time.

Question of Over-buying.

What would this man make if he had a capital of $10,000 instead of $10, and turned it on the same plan, 300 times a year?

Not many business men can successfully imitate the banana man's methods, but a great many of them could well go much further in that direction than they usually do. All business men who are not blessed with abundant capital should be interested in trying to see how far they can make this capital go.

It is a rare business man who hasn't a lot of his money tied up in stock that doesn't move fast. Over-buying has been called the greatest curse of retailing. It seems to be inevitable that merchants will buy more goods than they need, and some merchandise that they can't use at all.

Sometimes this is the fault of the merchant, but not always. The man who keeps detailed records of past purchases and sales can judge his future needs pretty well. His calculations are only upset by backward business conditions, unexpected demands, or changing styles. In buying new goods he may have no definite guide and thus is dependent on intuition, but a dealer soon learns to approximate what his customers will buy.

Uses For Ready Capital

Knowing with some exactness what will be his needs for a given period—a month or six months—a merchant can gauge his purchases accordingly so as to obtain the most rapid turnovers. If some goods sell fast and he can stock them daily or weekly, that means he can handle the business in this line of goods with small capital. It is the goods that represent a high investment and turn only once or twice a year that tie up his capital. The less of this last class of goods he can get along with, the better for his capital.

There may be some men who wouldn't know what to do with more capital if they had it, so they are not interested in releasing what was tied up in slow-moving stock. This money, however, can be used in taking advantage of cash discounts, in improving the store equipment, in advertising, in adding new lines, and in other ways.

So, Mr. Merchant, if you are losing cash discounts or if you lack ready cash, suppose you look through your stock to see where you can do with less, or where some items need to be pushed. Advertising and good salesmanship may lighten your load. And, once you have reduced your stock to the point where it is the livest possible, careful records on each line will help you keep it alive by governing both your buying and your selling.

Cater to the Painter

Give the painter the quality he expects and the quality he demands. Your success depends on the results he gets.

Glidden Endurance Paint is a true painter's paint. It's the kind his customers like to have him use. They know its wonderful qualities and unquestionable worth. Fifty years of successful performance has convinced them of Glidden reliability. That's why painters choose Glidden.

Identify yourself with Glidden and go after the painter business. You will find a ready response among painters for Glidden products. Write to-day for dealer's proposition.

THE GLIDDEN COMPANY, LIMITED

Toronto, Ontario

Branches at Montreal and Winnipeg

If interested tear out this page and place with letters to be answered.

CURRENT MARKET QUOTATIONS

These prices are for such quantities as are usually ordered by retail dealers. Large buyers can frequently make purchases at better prices.

Beatty Bros. Limited Bulletin

The Time Saver is Easy to Operate

There is not a single complicated part in the "Time Saver."

The operator can stand in one position to do all the work. The working parts are not scattered all over the machine.

Wringer is reversed or stopped by single pull of a lever.

The Time Saver not only washes but wrings too.

The Time Saver can easily be used in small kitchens as it is not bulky and is easily moved.

The ringer is started, reversed or stopped by a single pull on a lever.

Look for the "TIME SAVER" Trade Mark

There are many reasons why your customers will appreciate the Time Saver.

In addition to its simplicity it is strong and substantial and has many patented advantages.

Gears are all accurately machine cut. Tub is made of cypress—the wood everlasting.

All working parts are based on a solid iron bed plate, therefore their alignment is not altered by the warping of the lid.

The motor is 1/6 H.P.—the best procurable for this work.

The operator can raise the dolly before raising the lid, thus liberating it from the heavy, wet clothes and saving the clothes from injury.

Drop a card to our nearest branch for circular and complete details, including particulars of the help we give in selling.

The dolly is raised independently of the lid. This saves the clothes.

The Time Saver is not bulky, takes up little space and is easy to move.

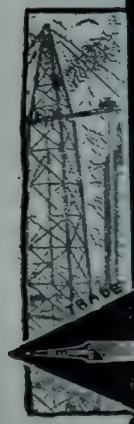
Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Stephens'
REGISTERED TRADE MARK

Barn Paint

Makes Friends with Farmers

Stephens' Barn Paint makes friends with the farmers and sales for the dealer. Its surface-saving features attract favorable interest among the farmers that results in repeat sales and new business, with profit for the dealer who stocks and sells this popular barn paint. To-day farmers insure their buildings and stock from various dangers. Point out to them the advantage of insuring against decay in their buildings, with Stephens' Barn Paint. It will pay you to sell Stephens

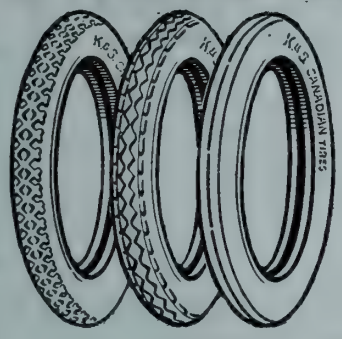
The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

K&S. TIRES



7,000 Miles!

Reliable Performance

K. & S. Canadian Tires are guaranteed for Reliability and Performance.

The "K. & S." tread, for passenger cars, as illustrated, carries the Highest Guarantee in Canada—7,000 miles on small cars—6,000 miles on large cars.

The "Commercial" tread, for trucks and business purposes, is a sturdy non-skid of remarkable wearing qualities.

Your customers pay only for the guaranteed mileage, but K. & S. Tires always deliver more mileage than the guarantee calls for. That is why the motorist buys them.

K&S. CANADIAN RUBBER GOODS

Write us for FREE Mileage Record Booklet containing useful information and hints on the care of tires.

CARTER'S

Carter's Genuine Dry Red Lead

A pure, uniform and economical paint and preservative for metal work, steam pipes, etc.

Made from the highest grade of Canadian Pig Lead, highly oxidized and very finely ground. Used with pure Linseed Oil, it is very easy to apply and has unusual covering capacity.

Every sale of Carter's Genuine Dry Red Lead assures you a satisfied customer and a good profit.

Ask for prices on this and the other Carter lines—Carter's Genuine Dry White Lead, Carter's Genuine Orange Lead and Carter's Litharge.

The Carter White Lead Company of Canada, Ltd., 91 Delorimier Ave., Montreal

Morrow Drills for Particular Buyers

The most particular buyers in the average hardware store are men who demand tools of precision, tools that will do their work correctly down to the thousandth part of an inch.

These men are always willing to pay a fair price for a good product.

They include superintendents, foremen and individual users of tools. Their patronage is highly desirable—they need and want the best. When it comes to drill requirements they are critically careful.

You will require less selling time and effort to sell "Morrow High Speed Forged Drills." If you carry a complete stock of "Morrow High Speed Forged Drills" the news will soon spread around among drill users.

You can safely guarantee every "Morrow" drill. They are made from hammered steel bars—"Morrow" tempered—made with a graduated thickness of web, giving strength where strength is needed.

More Holes with less Re-grinding

John Morrow Screw & Nut Company, Limited

Ingersoll *London, England—7 Hop Exchange Southwark St., S.E. 1.* **Canada**

"Oldest, Largest and Best Equipped Plant in the Dominion Manufacturing Set Screws, Cap Screws, Engine Studs, Semi-Finished Nuts."

"Sole Distributors for the Ingersoll File Company's Files."

Barrett Roofings, Cements Industrial Paints etc.

SUMMER is here, bringing with it an increasing demand for these Barrett Products. Be sure you are well stocked — make the Barrett name increase your reputation and your profits. That's just what it will do.

Everlastic Liquid Roofing Cement

UNEQUALLED for resurfacing worn-out felt and "Rubber" roofs. Has the consistency of thick molasses; is easy to apply and dries quickly into a hard, elastic, wonderfully durable coat. Proof against moisture, acids, alkalies and fumes. Has same base as Barrett Specification Pitch, which is famous for its waterproofing qualities. Comes ready for use in packages ranging from 1 pint tins to 40 gallon barrels.

Elastigum Plastic Patching Cement

THE plastic cement of a thousand uses — tough, elastic, adhesive, waterproof. Easy to apply and sticks obstinately to both wet and dry surfaces.

Unequalled for patching holes and leaks in roofs of all kinds and for repairing flashings, relining gutters, stuffing cornices, lining cisterns, etc. Its life and elasticity are unaffected by changing temperatures. It *stays tight* throughout the most severe weather conditions.

Elastigum is a popular repair material for which dealers will find a tremendous demand this year.

In 1-lb. tins (24 to the case), 5-lb. packages (12 to the case), 25-lb. packages, ½ barrels (about 300 lbs.) and barrels (about 600 lbs.).

HERE are some other Barrett Products ready to make money for you. They all bear the Barrett name and they're all Barrett quality. The popular Everlastic "Rubber" Roofing, Everjet Elastic Carbon Paint, Nox-Aer-Leek Boiler Setting Cement, Creonoid (Fly Oil) Lice Destroyer and Cow Spray.

What is the Life of a Paint Brush?

Generally it depends on the usage it gets and the preparations in which it is used.

TRADE SIMMS SET IN RUBBER MARK

Paint Brushes

can be used in any paint, oil or varnish preparation, kalsomine, glue, paint removers, etc., and yet live longer than the ordinary brush that is used in only one kind of paint.

The SIMMS brush lives until its bristles are worn down to the handle, and it gives excellent service all the time, under all conditions.

The painter's trade will come your way if you handle SIMMS Set-In-Rubber Paint Brushes.

Our other lines are also winners.

Brooms	**Stove Brushes**
Whisk Brooms	**Lather Brushes**
Shoe Brushes	**Scrubbing Brushes**

THE STANLEY WORKS

BALL BEARING

BUTTS

POSITIVE SERVICE

is obtained when this type of The Stanley Works Butt is used.

The Ball Bearing Washers do the work. They carry the load of the door and successfully, too, every day where they are employed.

Talk The Stanley Works Ball Bearing Butts to your Contractor and Builder Customer.

Our book featuring all the different types of these butts will aid you in selling them. Write for it, ask for R62.

Again in Demand

The wooden tub is back—the high cost of the metal is largely responsible, but a wooden tub has other advantages.

There is no galvanizing or plating to fall off. No rust to spoil clothes, and hot water retains its heat longer.

Cane's wash tubs will be favored. They last a lifetime and are built with the workmanship that has made Cane's Woodenware popular for over thirty-five years.

Order a supply of Cane's Tubs from your dealer for a Source of Good Revenue

Reed's Patent Plastic Asphalt Roof Cement

repairs cracked joints, nail-holes and defective places on slate, metal, gravel and prepared roofs.

This cement will repair a roof WHERE SOLDER CANNOT BE USED.

It is VERY ADHESIVE and sticks firmly to anything forming a tough, leather-like skin over the top; WILL NOT RUN or loosen from joints or cracks in Summer or Winter.

For twenty-five years, in all climates, this cement has given perfect satisfaction and its supreme usefulness makes it one of the best-selling items in a hardware store when properly displayed.

Put up in 1, 5, 10, 125 and 500 lb. containers

Superb AND Supreme

¶ The measure of mileage you expect to get from an automobile tire is exactly the measure we are prepared to give you in **Dunlop Cord Tires.**

¶ **Dunlop Tires** are thoroughly "thought out" in the Scientific Research Department, then they are thoroughly "tried out" on the road. You, as a tire buyer, get the Final Result.

¶ The new ideas we have evolved from world-wide collaboration with Dunlop Master Tire Builders have worked wonders in tire construction.

¶ Every other make of tire has suffered in comparison with Dunlop in a test of endurance; **and that means foreign-made tires as well as Canadian-made.**

¶ A tough tread, sturdy walls, largest air-chamber, unsurpassable anti-skid features, are some of the reasons why **Dunlop Cord Tires** are so much in evidence these days.

¶ And just as **Dunlop Cord Tires,** wherever you go, are being awarded the palm as "1920's best," so, right across Canada, our 1920 sales figures are registering the definite approval of motorists in decidedly unusual increases.

¶ When you buy **Dunlop Tires** you buy from the world's greatest rubber organization, whether the comparison is in technical knowledge, area of plants, financial resources, etc.

¶ Our new million-and-a-half-dollar factory is now nearing completion. It will be exclusively devoted to the manufacture of **Dunlop Cord Tires—"Traction," "Ribbed."**

You Have Very Little "Selling" to do In Connection With

Champion

Dependable Spark Plugs

EVERY engine owner knows that with a Champion in each cylinder he is assured of dependable, efficient spark plug service, even under the most unusual conditions.

Spark plug buyers are ALREADY sold; all you have to do is to supply the demand that we have created for Champions.

Our advertising is telling your customers of Champion dependability, so why not make sure you have on hand a full line of Champions, and be certain the word "Champion" is on each insulator and the "World" trademark on each box.

Champions help to sell your other lines, because users feel that the dealer who sells Champions MUST sell other dependable lines of automotive equipment.

Order from your jobber to-day.

Have You Had Trouble With Your Tires?

MOST tire troubles can be traced to either too little or too much air pressure. Keep the pressure at the exact point recommended by the tire-maker and your tires will give less trouble and more mileage—to say nothing of greater riding ease. The Schrader Universal Tire Pressure gauge enables you to test the pressure easily and quickly anywhere, anytime. It is one of the indispensables for every motorist.

Price $1.75 anywhere in Canada.

OWL BABBITT METALS

Hardware dealers can get Owl Traction Babbitts for tractors, Owl Babbitt Metal for threshers, and Owl Vulcan Babbitts for light, general work from their jobbers. Also solders for tinsmiths and plumbers.

OWL METAL COMPANY WINNIPEG

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

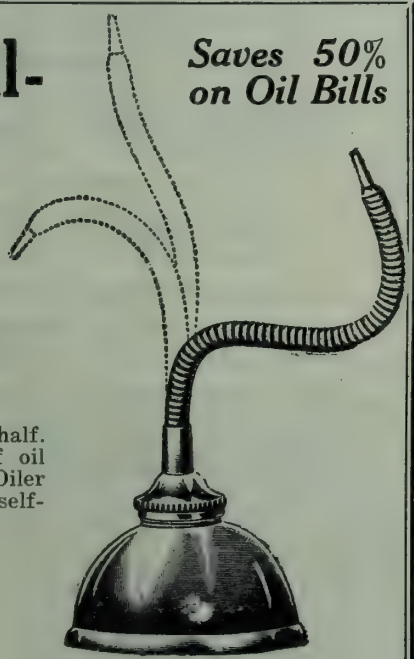
bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

The All-Way Oiler

Saves 50% on Oil Bills

Eliminates Spilling

and cuts oil bills in half. There is no waste of oil when an All-Way Oiler is used. The flexible, self-cleaning spout can be bent to reach difficult places. Made of copper - plated steel in different sizes. Ask about the All-Way Oil Gun, Combination Funnel and Filler, and R. R. Oiler.



General Purpose Oiler
Made with steel spring bottom in three sizes No. 1, 1-3 pint; No. 2, ½ pint, and No. 3, 1 pint. 7" spout to each.

Why Not Allow Your Staff the Privilege of Increasing Your Sales?

Making change takes time that might be used to better advantage in the selling of more goods. And, too, it diverts the salesman's mind from his real business.

We have a Cash Carrier to assist you, and there is no better investment than the purchase of a carrier system. It affords more time for salesmen to remain with customers, and in this way increases the efficiency and selling capacity of an entire staff. And the saving of steps—they should not be forgotten.

Write for our four-page leaflet. It tells how to obtain a double check on sales, and allow your salesmen, in a greater degree, to display their selling ability.

WANT ADS

IF you want a buyer, clerk, salesman, traveller, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $1.50 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

HELP WANTED

SALESMAN WANTED AT ONCE

Young man with general hardware experience, good penman, and steady habits.

This is an exceptional opportunity for man with selling ability, to travel for Manufacturers' Agent representing leading Canadian and American factories and calling on Wholesale Hardware Trade exclusively.

State age and experience in own handwriting.

Apply Box No. 29,
HARDWARE AND METAL, Montreal.

MANUFACTURER REQUIRES A1 SELLING connection, on commission basis, for New Brunswick, Nova Scotia, Prince Edward Island and Newfoundland. Product selling through hardware and grocery jobbers and transportation companies. Lines comparatively new but trade partially established in territory named. Box 776, Hardware and Metal.

WANTED — GOOD ROAD SALESMAN FOR Wholesale Hardware; must be a live wire, have good personality and be of steady habits. This is an excellent proposition for the right man. Territory covered in Western Canada. Apply in own handwriting, stating experience, age, height, etc., to Box 370, Hardware and Metal.

COLLECTIONS

MANUFACTURERS, WHOLESALERS AND Jobbers can reduce their "Collection expenses" to a minimum, by using Nagle One-Per-Cent. Draft-Service. Don't pay 10% or 15% on accounts you can have collected at 1%. Investigate this System. Thoroughly reliable. Established 1909. Send for supply of 1% Drafts today. Nagle Mercantile Agency, Laprairie (Montreal), Que.

FOR SALE

FOR SALE—THE PATENT RIGHTS, OR CANadian manufacturing rights of letters patent No. 201,327, relating to self-contained soldering iron. This tool generates its own fuel and would be a boon to mechanics and motorists. Fred Mayor, 36 O'Leary Ave., Toronto.

FOR SALE—GOOD LIVE ONTARIO BUSINESS, established 20 years, splendid location, town on St. Lawrence River. Owner retiring on account of other interests. Present turnover about thirty-five thousand yearly and can be greatly increased. Box 119, Hardware and Metal, Toronto.

CLEARANCE LINE—GENUINE "SLOCOMBE" Drills are offered at a sacrifice. Sizes "C," "E," "F," and "G." Wholesalers and dealers will find it of interest to communicate their requirements to Box No. 140, Hardware and Metal.

HARDWARE STOCK AND PROPERTY FOR sale. Town of 800, on Provincial highway, good farming district; $10,000 stock. Retiring from business. Write Box 304, Hardware and Metal.

GOOD HARDWARE BUSINESS AND STOCK in good live Central Ontario town for sale. Box 623, Hardware and Metal.

SITUATIONS WANTED

YOUNG MARRIED MAN WITH 10 YEARS' hardware experience would like steady position in wholesale or retail store. Address Box 339, Hardware and Metal.

WANTED

Hardware lines wanted for Western Canada. Satisfactory representation and prompt service guaranteed. Manitoba Supply Co., 400-1 Electric Railway Chambers, Winnipeg.

WANTED — A HARDWARE BUSINESS IN Southwestern Ontario. Stock from $5,000 up. Must be in good location. Box 211, Hardware and Metal.

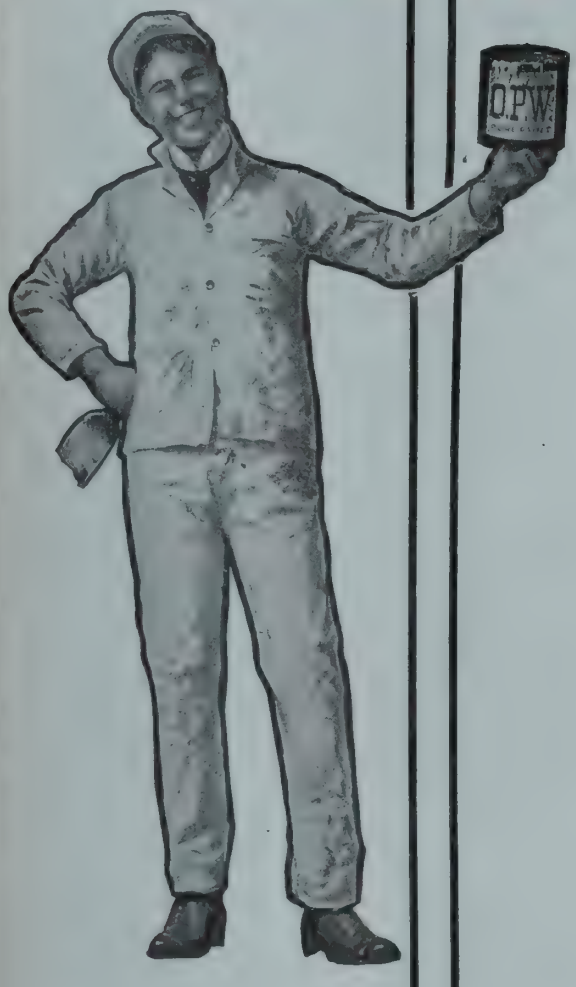
O.P.W.

Trade Mark Registered



Of varnishes and paints
And the purest of white lead,
O.P.W. makes sales that
Put dealers well ahead.

"Save the surface and you save all" Paint & Varnish

"Paints and Varnishes for Every Purpose."

Have You Talked O.P.W. With Owners of Country Homes?

The hardware paint and varnish departments that sell the most to-day don't wait for customers to respond to the O.P.W. advertising in their favorite papers. The alert, modern paint department sends its outside salesmen to call on owners of country homes.

The live, aggressive firms sell O.P.W. and its selling points and records in covering, brushing and weather tests offer convincing arguments for the salesmen to close the sales. Get all the country homes near you. The farmer to-day wants his home to reflect his prosperity.

There are no disappointed O.P.W. Dealers

IT'S UP TO YOU

DO you know that recently our big new Toronto factory has been pushed to top-notch production by the demand of thousands of Canadians who insist on Durham-Duplex Razors and Blades and no others?

This is a hard, cold fact. It has definite significance for you. It says: Stock Durham-Duplex bigger, display better, NOW, TO-DAY. Get on the crest of the wave. Don't wait. Generous profits and quick turnovers are yours. It's up to you!

Set $2 to $12.

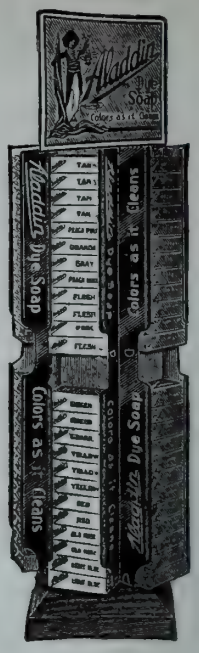
Aladdin Dye Soap



ALADDIN is the magic color-maker which will wash and dye, at the same time, any fabric that water will not injure—from finest silks to coarsest cottons and cotton mixtures.

ALADDIN is as reliable as a perfect Dye Soap, as O-Cedar is dependable as a brilliant floor and furniture polish. The excellence of both is guaranteed by the makers of O-Cedar Polish.

Order 1 gross of ALADDIN and receive the handsome ALADDIN Revolving Display Stand. A real sales-maker that forms the link-up between the extensive ALADDIN newspaper advertising and your store. It keeps the stock clean and makes it easy to handle. Takes up very little room; a valuable asset for your counter. ALADDIN comes in 18 beautiful colors. Sells for 15c a cake.

Name your jobber when ordering.

CUTLERY

Cuts A Big Figure In Getting And Holding Trade

When two boys swap knives "sight unseen" each hopes to get the better of the bargain. Neither is willing to subject his knife to scrutiny lest he be worsted in the deal.

There is no "sight unseen" element between the buyer and seller of Universal Cutlery. Neither has desire, nor is it possible to take advantage of the other. One has the goods—the other the money. It is an open visible exchange of **value** for **value.** One gets what he expects in quality the other what he is honestly entitled to in profit.

Cutlery that cuts a big figure in business is keen to please trade. "Universal" is that kind. It is the line for every person, purpose and purse.

Hatch
Garage Door Outfits

Exceptionally easy to apply and have full directions packed with each set. Slamming or sagging of the doors is impossible; nor can snow and ice interfere with their working easily and reliably.

The Hatch Garage Door Outfit is rich in selling points and easily closes the sales. Its performance is so reliable and satisfactory to the user that sales of Hatch Garage Door Outfits lead to more future sales and permanent business.

With the present oversold condition of the automotive industry, the Hardware Dealer in Garage Hardware has a splendid outlook for the future.

Canada Steel Goods Co., Limited

Hamilton, Canada

The Set Includes

- 3 Special Swivel Door Rollers.
- 22 Feet of Track.
- 3 Pairs Special Garage Door Hinges.
- 3 Stay Rollers (floor guides).
- 2 Extra heavy Garage Door Handles.
- 1 Safety Hasp (for fastening doors outside)
- 1 Hook and Eye (for hooking back swinging section inside).

The track comes in separate bundles—two 8-foot and one 6-foot lengths. Screws and bolts for everything. Japan finished and all neatly packed in a wooden box. Ask for prices and details.

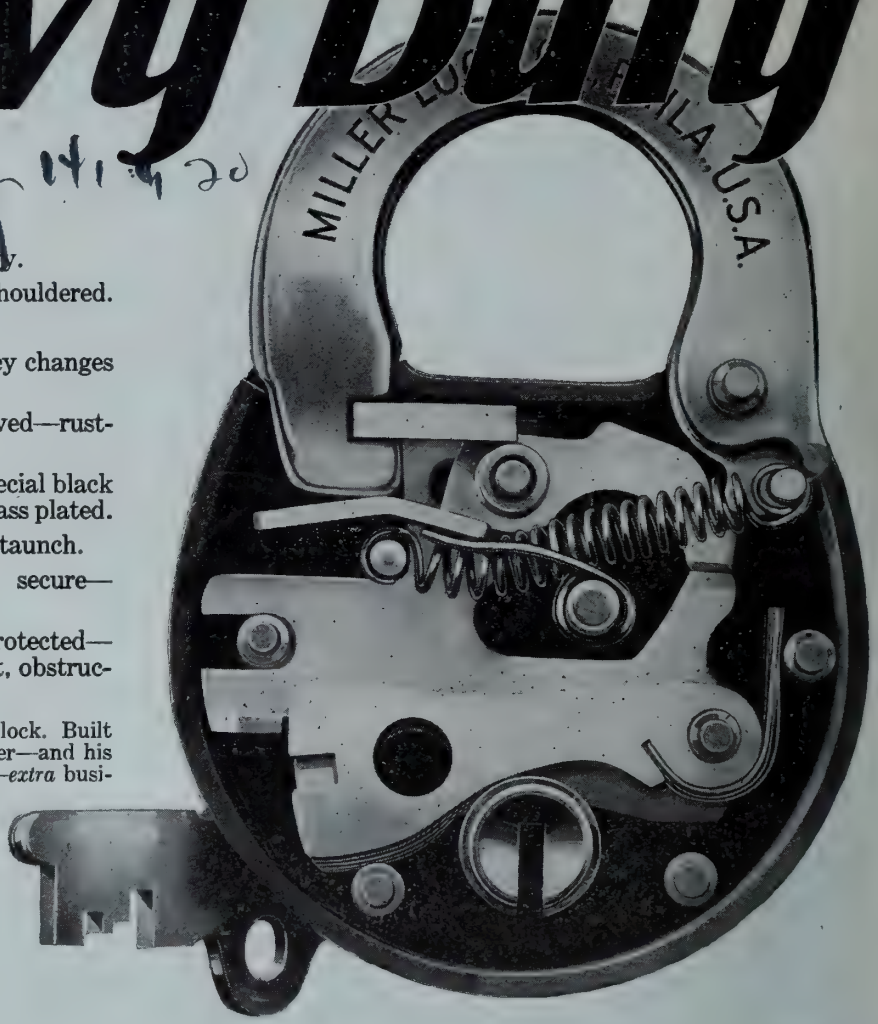
Heavy Duty

1. The Steel Case is *extra* thick.
2. The Malleable Shackle is *extra* heavy.
3. The Rivets are *extra* stout—and shouldered.
4. The Bolt is *extra* strong.
5. The Levers are *extra* secure—144 key changes (or more).
6. The Interior Parts are *extra* long-lived—rustless all-brass.
7. The Finish is *extra* durable—case special black rust-proof, inside and out; shackle brass plated.
8. The Steel Nickeled Keys are *extra* staunch.
9. The Locking Mechanism is *extra* secure—shackle locks at heel as well as nose.
10. The Shackle Opening is *extra* protected—special patented device makes it dirt, obstruction and tamper proof.



Yes, sir! The MILLER Heavy Duty is a *super* padlock. Built for *extra* severe usage, *extra* service to the customer—and his *extra* appreciation in return. It means *extra* value—*extra* business—extra *profits*—*extra* satisfaction all around.

And, selling the MILLER Heavy Duty offers the romance of a "war record" that is as interesting as its "extra" features of construction. Hardly a branch of the war's activities that the MILLER Heavy Duty did not serve.

Precisely the kind of padlock people want to rely on today.

Or perhaps you prefer this mounted - ready - for - display 1¼-dozen assortment No. 920—7 Steel and 8 Bronze in the three sizes shown below. Your jobber can supply you. The attractive green enameled steel display panel can be hinged (right or left) to wall, door or window frame, showcase, shelving, pillar, etc.; or suspended from nail or hook.

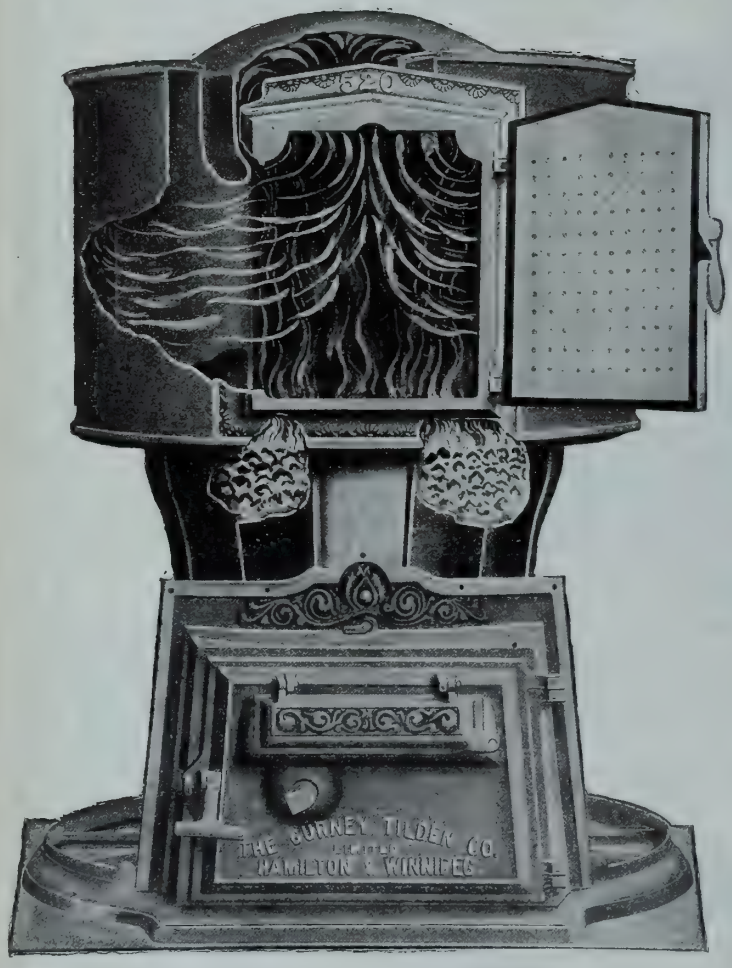
NEW IDEA

WARM AIR FURNACE

The Best Furnace Ever Made

FULLY GUARANTEED

BURNS COAL OR WOOD



A few of its many qualities

1. Has more heating surface than any other furnace. The large, roomy ash-pit prevents the ashes from banking up and burning out the grates.

2. The New Idea has a heavy flanged cast fire-pot which is guaranteed for five years.

3. Ball Bearings Duplex Grate, so simple in construction that a child can operate it. The Duplex grate enables one to dump ashes and clinkers easily and with no waste of live coals.

Further information upon request. Write for our new catalogue which describes and illustrates all of our furnaces, stoves, ranges and Builders Hardware.

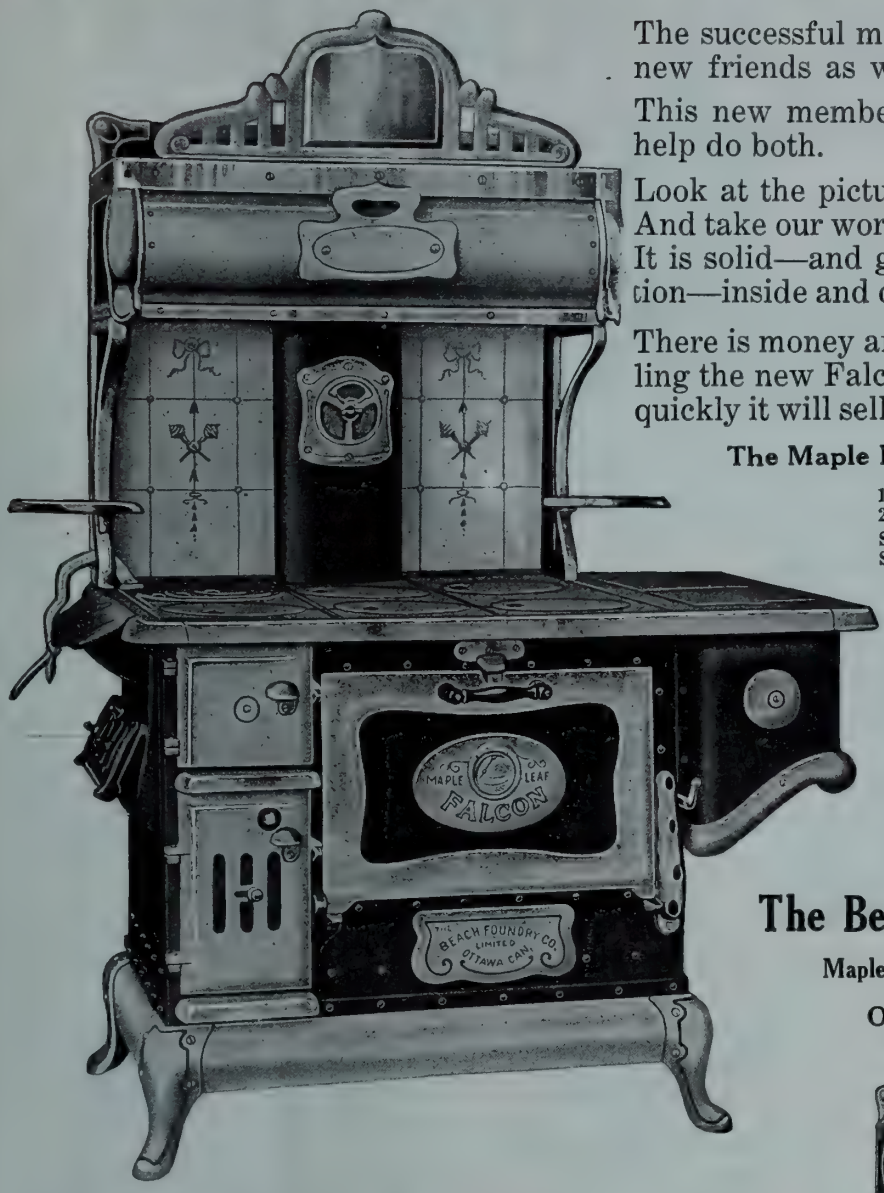
A New Range That Will Make Friends



The successful merchant must continually make new friends as well as keep the old ones.

This new member of the Maple Leaf line will help do both.

Look at the picture! Isn't the range a beauty? And take our word for it—it's as good as it looks. It is solid—and genuine—and will bear inspection—inside and out.

There is money and satisfaction for you in handling the new Falcon. Send for one and see how quickly it will sell.

The Maple Leaf Falcon is made in two sizes

18" oven 18 x 19 x 12½
20" oven 20 x 19 x 12½
Size of top for 18" 43½ x 27
Size of top for 20" 45 x 27.

HAVE YOU OUR FULL LISTS AND PRICES OF STOVES AND RANGES? SHALL WE SEND THEM TO YOU?

The Beach Foundry Co., Ltd.

Maple Leaf Ranges, Stoves and Heaters

OTTAWA CANADA

Details of the New Falcon

Design—Smooth, nickel castings, free from heavy carving, well proportioned, heavily nickelled.

Body—Made of heavy planished steel and all parts coming in contact with extreme heat are protected by asbestos and reinforced by cast iron.

Firebox—Made in latest and most approved style, carefully proportioned according to size of top, oven and flue spaces in order to give the best results. The fireback is sectional and linings are perpendicular and well ventilated. Grates, suitable for coal or wood, are of the famous duplex type, with improved holders for cogs, or if wood only is required, special wood grate may be supplied. Grates may be removed without the use of tools and without disturbing the firebox linings. Burns 24½" wood.

The Oven—Made of heavy sheet steel. Bottom is braced with heavy cast iron supports, preventing warping or buckling, and top is made of a double thickness of steel with heavy asbestos interlining.

The Oven Door—Is of improved balanced spring type, equipped with thermometer for registering the degrees of heat, and with non-heating handle. Door is held shut by spring catch.

The Direct Draft Damper—Of the sliding type, designed to get full control of the heat units.

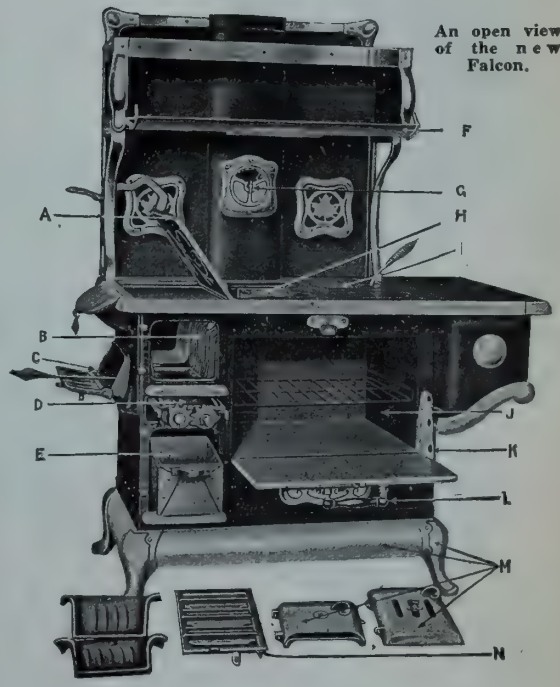
The Top—Is of the sectional or key plate type—the sections, centres and covers being heavily ribbed. Reducing cover is supplied with each range. Front section is fitted with high lift, making it convenient for broiling or adding fuel to the fire.

The Upper Front—Made of all cast iron and fitted with pouch feed door and with combination draft and poker door.

The Reservoir—Made of heavy tinned copper.

The Base—Of sanitary type made high to allow sweeping underneath.

The Warming Closet—Very large and fitted with combination check draft. Made in various styles.



An open view of the new Falcon.

A Message from the man who makes the Stars

N August 15, our company which has manufactured Star Hack Saws from the beginning will change its selling policy and market its own blades. The double-page Saturday Evening Post advertisement of August 21 reproduced in miniature on the opposite page will announce this change to Star Hack Saw users.

This new service is, I believe, one of the most important steps ever taken by the organization over which I have the honor to preside. Since 1883 we have been making Star Hack Saw Blades of a quality that has made the green box of Star Saws famous wherever hardware or mill supplies are sold.

No matter how small or remote the store, you are almost sure to find Star Saws there—often the only hack saw carried. It is the famous old brand in hack saws that has stood out in front for 37 years.

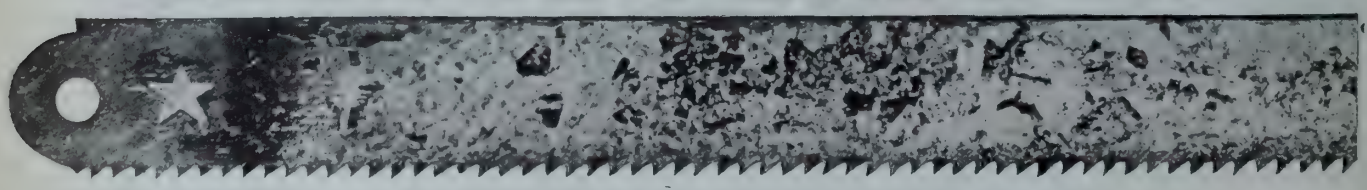
There is no need here to recount the price paid for this leadership in a lifetime of metallurgical research and machine invention, concentrated on hack saws alone—in the development of a highly organized plant with special Star Hack Saw manufacturing methods from one end to the other.

The important thing now is that to this better Star Saw we are now adding a better Star Service by selling Star blades ourselves from the factory that makes them. This change is of vital interest to you and every other customer of Star blades, for it makes Star results doubly sure in the users' hands.

After August 15, 1920, send your orders for Star blades to this office if you order direct, or be sure to specify "Star" on your jobber orders. We invite correspondence and service suggestions from the trade on any subject connected with Star Saws. I will see to it personally that they receive every attention.

Geo. N. Clemson *President*

CLEMSON BROS. INC.



If interested, tear out this page and keep with letters to be answered.

Star national advertising is well known. And it has made the leadership of Star Hack Saws still more emphatically apparent. By a substantial margin Star Hack Saws are the largest selling hack saws and our advertising is increasing this demand still further and making them more and more profitable for you to handle.

Our plans for 1921 will continue our advertising policy on a larger broader scale than ever before which is your guarantee of the continued and increasing demand for this famous old brand of hack saws.

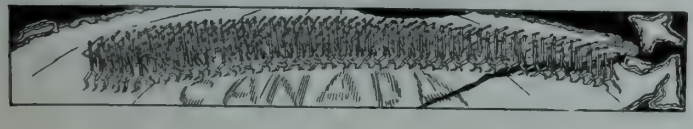
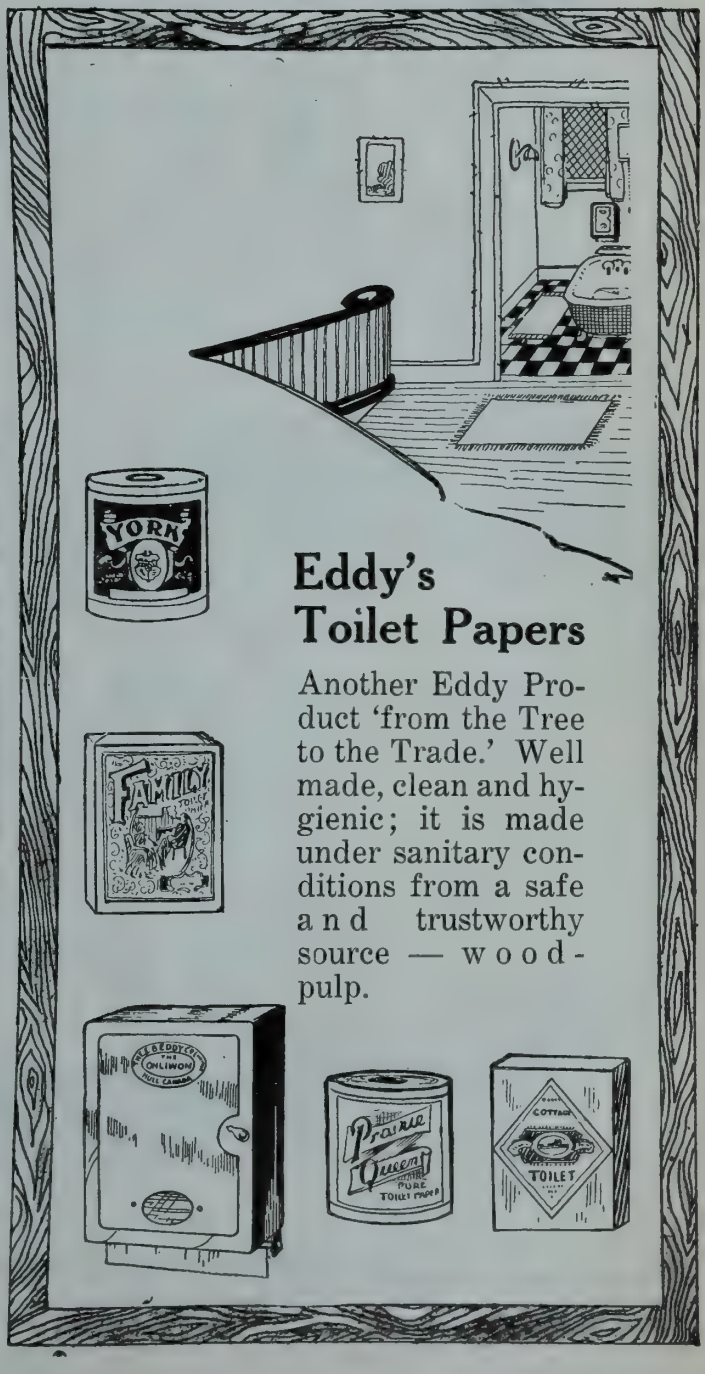
Story for Week Dated August 14th, 1920. **Being No. 18 in the Series**

Rafting The Lumber To The Eddy Plant

An important movable unit in the Eddy plant is the steamer "Mud-pout" seen in the illustration above. It is the business of the "Mud-pout" to take care of the logs that come down the Rouge River to Calumet, and assemble them into cribs. The steamer is built especially for the purpose, sturdy and powerful, capable of bunching the logs together compactly by engine-power, and of towing from 18 to 24 cribs of them in one haul from Calumet to the wharves at the Eddy plant, Hull where the photograph reproduced above was taken. The logs are mostly of spruce for making pulp and paper, but some poplar is included. The poplar can be used for making matches, and also for paper-making. The long logs you see in the picture are spruce.





Eddy's Toilet Papers

Another Eddy Product 'from the Tree to the Trade.' Well made, clean and hygienic; it is made under sanitary conditions from a safe and trustworthy source — wood-pulp.

A Message of Opportunity to You

Outstanding Sales Ideas Occur But Once in A Generation—

BlueBird

is ONE

AS you read this announcement BlueBird Electric Clothes Washers are actually being made in Brantford—not "assembled" or "painted" in Brantford, but MANUFACTURED IN BRANTFORD from the ground up, in a modern and fully-equipped factory—an all-Canadian product, made by Canadians for Canadians and citizens of the British Empire, and financed entirely by Canadian capital. In point of material, design, workmanship, and finish it is a peerless product, fit to carry the prestige of Canadian craftsmanship to the four corners of the British Empire and beyond.

Now it is very essential that you, the dealer, should have an appreciation of the important place that electric household appliances hold in the world to-day. The electric washer, particularly, is undoubtedly the most important home appliance yet devised for the saving of time and labor. But the immense sales possibilities for washing machines are only beginning to be appreciated. The growth of this business will be as spectacular and profitable as the expansion of the automobile. Just think what this development means, Mr. Dealer, in sales and revenue to you and the thousands of other dealers in Canada.

One of the strongest "planks" in our sales platform is dealer co-operation. Our policy recognizes the supreme importance of the dealer in merchandising a household appliance. Our sales plan makes it possible for him to secure a maximum of profit for his share in the transaction. By placing the BlueBird Washer in his hands by a direct method we eliminate the necessity for a large and expensive organization to span the space between the manufacturer's plant and the dealer's door. Thus, we effect a readjustment of discounts for which the retail trade has been striving for generations. BlueBird discounts go where they properly belong—to YOU. BlueBird Dealers are going to get co-operation that only stops when BlueBird Washers are in the hands of the ULTIMATE CONSUMER—your customers.

An Invitation

If you cannot visit the home of "BlueBird" in Brantford, at least do not fail to see our exhibit at Toronto, London and Ottawa Exhibitions.

BlueBird Corporation, Limited
Brantford, Canada

The Canadian-Made

Blue ELECTRIC

The BlueBird Electric Clothes Washer

A Supreme Sales Opportunity---and Why

Casing removed to show the construction of the BlueBird Washer

BECAUSE the electric washer is a "specialty," a piece of machinery, it is natural, perhaps, to compare it with such articles as the automobile and the gramophone. But the washing machine must not be classed with these semi-luxuries.

The electric washing machine is a strict necessity. It is the greatest aid to woman's health and happiness that has been devised for a generation at least. When you sell a BlueBird Washer, you sell not a piece of machinery—but happiness, comfort, economy and freedom forever from woman's hardest and most uncongenial task—the washing of clothes.

You, the dealers who will sell BlueBird Washers, should know some of the principles of design and manufacture that make it the outstanding machine of its kind extant.

The BlueBird Electric Clothes Washer operates on the "oscillating" principle, which has proved in actual test to be the most effective principle in removing dirt from clothes with practically no wear to the most delicate fabrics.

WORKMANSHIP.—We are prepared to say without reservation, that the workmanship of the BlueBird Washer is of a higher and more perfect standard than has heretofore been reached in the manufacture of any washer made in this or any other country.

MATERIAL.—The material from which the Canadian BlueBird is made is of a strength and quality greatly exceeding any conditions which a washing machine could be called upon to meet. Quality runs through its construction from top to bottom, without exception. The special waterproof motor that drives it, the all-steel wringer, the genuine sheet-copper tub, tin-lined; everything about it radiates quality of the very highest order.

APPEARANCE.—The BlueBird Washer is also a thing of actual beauty. Its lines are sturdy and graceful. It is finished in such a way that it attracts immediately any housewife who sees it, and this, as you know, is a very important "selling point."

You are invited to visit the BlueBird factory. If you can come you will gladly be shown every operation in the making of BlueBird Washers. You will find a plant of sufficient capacity to take care of the constantly increasing stream of orders which will pour in from our dealers in all parts of Canada, for it is our firm intention to systematically develop the washing machine field in Canada, both in co-operation with our dealers, and by nation-wide advertising.

Will you write and ask us for booklet, "Pay Dirt", now on the press, and details of the ***tremendous market in your neighborhood*** *for washing machines, and how we propose to help you develop and cash in on it?*

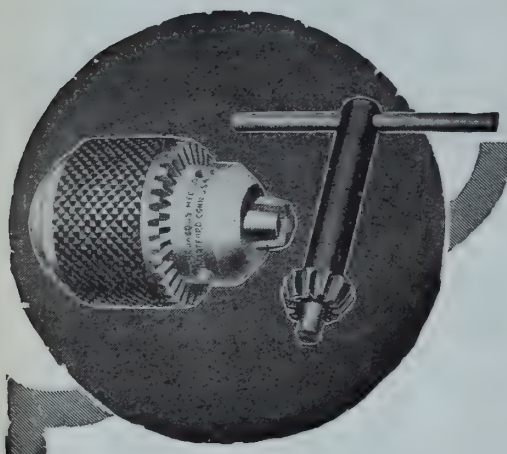
JACOBS CHUCKS



---It's the Way They are Made

Speed, accuracy and grip of Jacobs Chucks are the result of scientific engineering and careful workmanship through every phase of production.

To the drill user this means efficiency, convenience, ease of handling and economy in operation.

When you are selling your customers Jacobs Chucks, you are selling them better drilling. And that's what they are willing to pay for every time.

That's why Canadian hardware dealers handling mill supplies have found Jacobs Chucks a most profitable line.

THE JACOBS MFG. CO. HARTFORD, CONNECTICUT, U.S.A.

WILLIAMS' "AGRIPPA" TOOL HOLDERS

ENTHUSIASM is the lubricant that overcomes friction in production—the use of good tools promotes and encourages Enthusiasm. In this period of insistent demand for the products of manufacture, the importance of anything that tends to increase the output of man or machine, is strongly emphasized.

Williams' Drop-Forged Machinists' Tools are sturdy and dependable—they have made good in quality and in efficiency for nearly half a century. Their reputation is thoroughly established. Ambitious operators welcome an opportunity to use them for "Better tools make better workmen."

Suggest that your customers make an inspection of their equipment *now*. It may indicate where they could obtain increased production, or improved quality, or both, through the lubricant of Enthusiasm, stimulated by the use of Williams' Superior Drop-Forged Machinists' Tools.

Our Machinists' Tools Book will be sent on request.

About Better Tires

Before you stock any more tires, remember this—

The demand for Partridge Tires has increased over 1,700% in the last two and a half years.

Our extensive plant has been enlarged to over double its former capacity, and is now recognized as one of the most modern and up-to-date factories on the continent, and is in a position to make prompt shipments.

The adjustments on Partridge Tires have been less than one half of one per cent.

Partridge tires have been known to do over 7,000 miles and come up practically as good as new.

Every tire is backed to the limit by us, and we spend a very large sum every year in advertising to help our dealers make sales.

These and other facts allow us to make the statement,—that Partridge Tires have proved their dependability to both dealer and consumer, making quite easy sales for the dealer, giving long wear, free from the annoyance of tire troubles to the consumer.

Never hesitate about recommending Partridge Tires—they meet every claim we make for them.

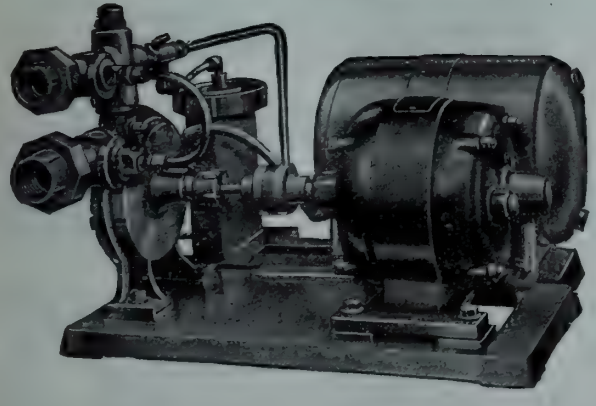
THE FARMER is Badly in Need of the

Westco

Tankless Water System



See It at Toronto Exhibition

Aggressive salesmen and progressive dealers are always looking for a good selling and profitable line to handle. A splendid place to find good selling lines is the Canadian National Exhibition, Toronto, where almost every modern appliance will be on exhibition. Nowhere in all the grounds will you find an article with greater selling possibilities than the Westco Tankless Water System.

It abounds with selling points, features that are vitally interesting to farmers, suburbanites and rural residents. These are some:

(a) Needs no storage tank; pumps water direct from well to taps.
(b) Low cost to buy, install, maintain and operate.
(c) Entirely automatic; turn tap and pump starts at once; close tap, pump stops.
(d) Runs off farm lighting plant or central station power.
(e) Has no valves, no gears, no belt.
(f) Pump has only one moving part—rarely needs attention.
(g) Pumps from 300 to 500 gallons per hour.
(h) Weighs less than 100 pounds.
(i) Uses less power than electric iron while supplying water to four faucets.

There is a fine field for aggressive salesmen selling the Westco System. Can you afford to ignore the possibilities it holds out? You will find it on exhibition at the west end of the Machinery Hall.

PERFORMANCE COUNTS

BURMAN CLIPPERS

Are made for clipping horses and for shearing sheep. They are made of the best materials procurable, by the best skilled workmen it is possible to engage, and by a large company who manufacture only clippers. Never has expense been spared if there was possible the slightest improvement in quality or cut. That means a tremendous lot to the hardware merchant.

YOU DON'T HAVE TO BUY A NEW HEAD

PLATES ARE INTERCHANGEABLE

BURMAN CLIPPERS

Are the acme of perfection when it comes to performance. They cut clean. Heavy work does not frighten the "Burman"; they handle the heavy, tough hair well, giving every service and satisfaction to the user.

One important point for the dealer is that plates are interchangeable, that is, when the purchaser wants to shear sheep he simply requires to change the plates. This does away with the old necessity of buying a new and costly head.

YOU DON'T HAVE TO BUY A NEW HEAD

If You Want "Sports" Business Go After It

Omer DeSerres, of Montreal, Goes After This Trade With a Will —Carry the Stock—Make the Display and Give Prominence to the Line, His Slogan

SINCE the cannon ceased to boom in France and Flanders, permitting the release of the Canadian boys from the firing line and their return to the land of liberty and the resumption of old haunts and pastimes, there has been a wonderful resurrection of popular sport. In this desirable change of events it is noteworthy and of real satisfaction to the hardware man that various games have taken on anew an interest that is steadily growing. To the hardware dealer who has sized this matter up for himself, and particularly to that merchant who has livened "things sporty" up of his own volition, the results have been pleasing and profitable. Herein rests, indeed, one of the great underlying principles of modern retailing—that of sensing and creating a demand for those goods which yield a profit and which will sell if vigorously pushed to the front.

In this way, Omer DeSerres, of Montreal, has taken advantage of the gradual return to normal conditions by anticipating the probable demand for baseballs, footballs, bats and the many accessories that a well-regulated and prosperous club must needs have to win the colors.

(Continued on page 37)

A display of sporting goods which confirms the store manager's statement that when he takes on a line worth while he goes after it in a big way. Here is shown a very complete and attractive display of many lines of sporting goods. A cup is on view in the centre of the display, suggesting the many sporting contests which are open in amateur circles. It is displays of this kind which arouse and hold interest in such goods in season, and which keep the cash register ringing in the sporting goods department.

Sound Systems for Figuring Turnovers; Actual Inventory Figures Do Not Always Show the Average Condition of the Stock

The Dealer's Problems Are Taken Up in the Following Article in a Way That Should Furnish Him With New Thoughts on the Value of Keeping Records, Particularly Now When Everything is So Uncertain in the Way of Buying and Selling.

NO matter how many dollars are put into a business, unless they are made to produce new profits they might better be left in the bank, or loaned on good security to some one who would pay the legal rate of interest. Idle dollars represent a continual loss, especially when they are tied up in stock that no one wants.

This fact, of course, is quite generally understood, but the difficulty lies in the fact that the dealer is not always able to tell when the dollar is idle and how to make it stick on the job. For the dollar is a quiet worker, and unless he has the right kind of assistance the dealer may not discover until it is too late that some portion of his capital has gone into retirement. There is only one sure way out of this and that is through figure records that tell everything that is done about the store during the day, how much stock is on hand; how much is tied up in accounts receivable; sales for the day, payments on account and expenses—in fact, every little detail that affects the profits the dollar should make.

The Folly of Overbuying

We are told by commercial agencies that at least 90 per cent. of dealers overbuy because they do not know how their stock is moving. They lack the records that should tell them when it is necessary to buy certain lines and when it is not. And right here it is well to say that a large proportion of failures are due to this glaring business fault.

Whenever a dealer invests his money in a certain line and sells out that line entirely, he has turned his investment once. Every time a turn is made a profit is made. It follows then that the more turnovers a dealer can pluck from his dollars the greater will the number of his profits be. Frequent turnovers, then, cannot be accomplished if a grocer is inclined to overbuy.

Consequently, it doesn't take much of an effort to show that a few dollars turned frequently will do more than many dollars that move slowly or dollars that do not move at all.

The number of times a year a stock of a business is turning may easily be figured by dividing the year's sales (figured at the cost of the goods) by the average value of the stock on hand during the year.

Safe Basis for Figuring

The cost value of goods sold last year in a certain store amounted to $50,000. The stock records showed that an average of $10,000 worth of goods was carried. Of course, there was more than this amount on hand sometimes, and less at others, but the average for the year—the only safe basis for figuring turnovers—was $10,000. This goes into $50,000 five times—or this business succeeded in making five complete turnovers.

Sales (at cost)	$50,000
Stock	10,000
Turnovers	5

There is another way of figuring turnovers that in many cases is equally satisfactory. That is, to take the total sales, at selling price, and divide by the retail value of the stock.

Sales (at selling price)	$75,000
Stock (at selling price)	15,000
Turnovers	5

A very natural mistake can be made—has been made—in some cases where a dealer takes his total sales at retail and his stock at cost and attempts to find the number of times his capital has turned. See what happens:

Sales (at retail)	$75,000
Stock (at cost)	10,000
Turnovers	7½

This is an easy way to make a few more stock turns, but it isn't worth much as an accurate reflection of the condition of the business. And figures like these must be accurate if they are worth anything at all.

Lets Supply Get Low

Another thing to be remembered is that actual inventory figures do not always show the average condition of stock. The wise manager lets his supply of goods get as close to the low water mark as he dares before taking inventory, so as to cut down the labor required. Where a stock record is kept, an average of value of goods on hand can be taken, which is more satisfactory for figuring turnovers than the inventory figures.

WHY THE POCKET KNIFE COSTS MORE MONEY

A good pocket knife, says the American Cutlery Bureau of Information, costs possibly twice as much to-day as before the war, but the advance in price is not representative of the actual increase in the cost of producing a first-class pocket knife. Crucible steel used for the blade is costing to-day 125 per cent. more than before the war, while spring steel, used for the spring action, has increased 100 per cent. German silver and brass are offered at varying rates, with increases from 100 per cent. in the case of German silver and 150 per cent. for brass against pre-war rates.

So-called patent stag, used for the making of handles, is costing 150 per cent. more, while genuine stag has increased 100 per cent. Ebony costs to-day four times its pre-war price and similar price increases have been witnessed in the case of other woods used for knife handles. Advances in the case of perlmut are 100 per cent., buffalo horn 200 per cent., and celluloid is quoted at approximately three times its previous cost.

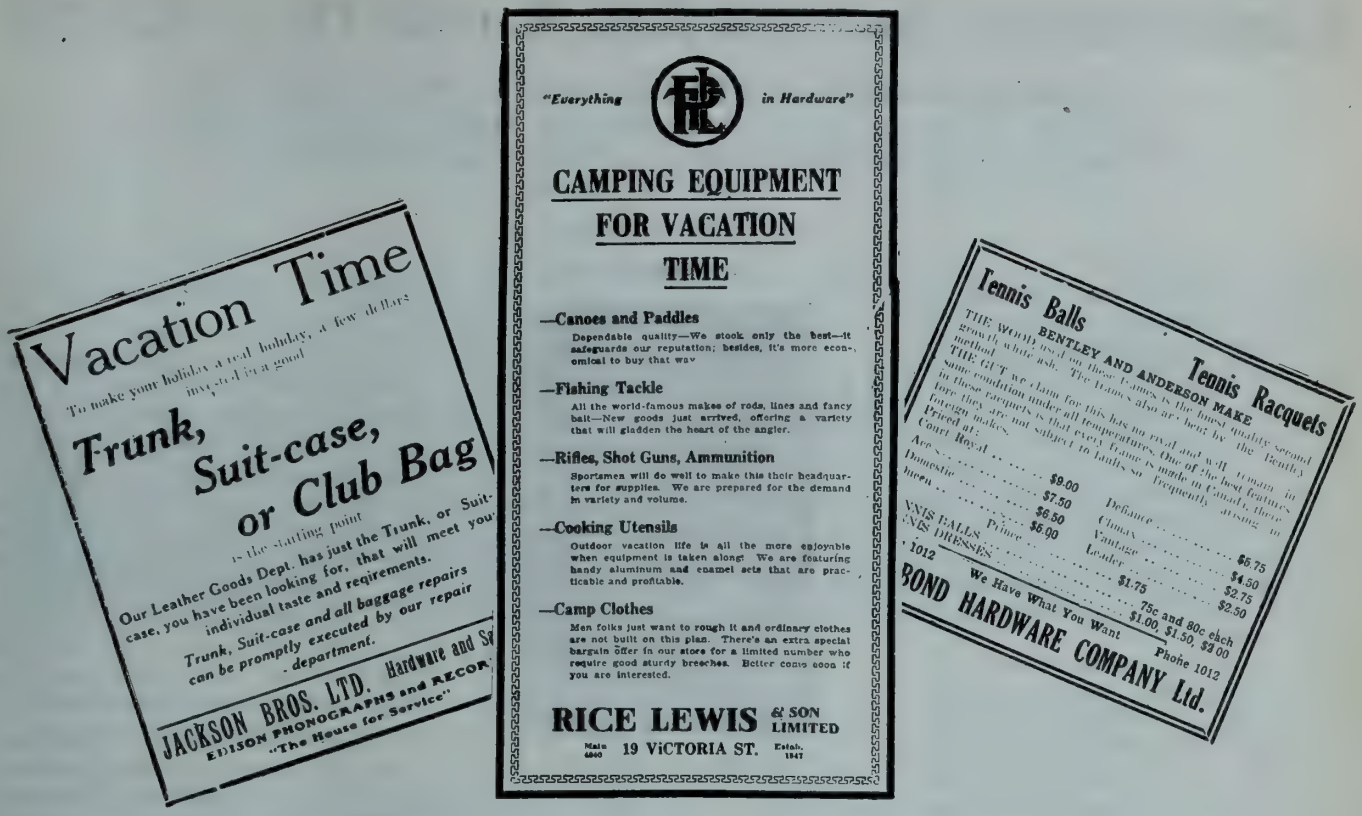
But the most important increases have taken place in the cost of labor, because labor enters into cutlery production at a much higher rate than is the case with other industries. It is a peculiar fact in this respect that semi-skilled and unskilled labor has been mostly benefited by the wage increases, with the result that between 125 to 200 per cent. has been added to the wages of these groups of helpers, while the highly-skilled operations are paid at fully double the pre-war rates.

ONE THOUSAND NEW HOUSES READY FOR NEXT WINTER

Provincial Housing Commission Has Used up $8,750,000 it Received From Dominion Government

Over one thousand new homes will be erected this summer under the Provincial housing scheme throughout Ontario, and no less than $4,000,000 will be spent in this direction. The points most directly concerned in this effort to provide homes at a reasonable cost are Windsor, Ford City, Niagara Falls, London, Guelph and Ottawa. About sixty new houses are being erected under the scheme in the Township of York, where about $250,000 will be spent on the work this year. Twenty houses are being erected in the Township of Etobicoke, where about $100,000 is being spent on the work.

The Provincial Housing Commission has no more money to loan.



Linking up the local advertisements with the window displays also helps to stimulate sporting goods trade. Epecially now that vacation time is here is it necessary to go after this business. The ad. by Rice Lewis & Son, Ltd., Toronto, makes a specialty of certain lines of camping equipment for vacation time. Canoes and paddles, fishing tackle, rifles, shot guns, ammunition, cooking utensils and camp clothes are mentioned, with a paragraph about each. In the ad. by the Bond Hardware Co., Guelph, tennis goods are advertised with a little talk on the merits of the line handled. The ad. by Jackson Bros., Ltd., Pincher Creek, Alta., deals with trunks, suitcases or club bags for the vacation time. These are all lines which may be linked together in the mid-summer advertising.

IF YOU WANT "SPORTS" BUSINESS

(Continued from page 35)

Go After It Big

If Mr. DeSerres decides to put in a new line, and if that line be an extensive one, he usually puts it in "big." That is to say, he concludes that if a paying business is to be done, the whole line must be secured, affording wide variety for selection. This is true of sporting goods generally, and the accompanying reproduction of a recent window display will leave no doubt as to the completeness of the stock carried within the store.

Interior display is made very attractive; if results are to be the most satisfying attention must be paid to this, always. And there is no remissness in the DeSerres plans on this score. The department, under a capable manager, is truly neat at all times, and this is, in no small measure, responsible for the steadily increasing sales that are being recorded.

Get Their Orders

In discussing matters with Mr. Mousseau, the store manager, he told Hardware and Metal that it was proposed to issue a catalog which could be used in helping increase the sales of purely sporting goods. This is arranged to contain illustrations of those goods, and those goods only which are offered for sale. This helps all around, in that there is little or no confusion. For instance, if a baseball club wants a certain type of uniform, it will select it, knowing that the store has what is described and illustrated. Otherwise, with a number of ""dead" lines described, there is bound to be confusion and dissatisfaction. Mr. Mousseau stated that the idea was to cater to the needs of clubs as well as of individuals. By having the big stock it is thus possible, in nearly all instances, to get the business. By making sales in most cases the actual cost of overhead is lessened, for waste motion is increased expense in operating costs.

The excellent display herewith shown scarcely needs comment. It is neat, attractive, sales-provoking, and "different." There is variety without stuffiness, and this is surely a good display from many standpoints. The arrangement indicates the care that has been taken to make this a selling window, and it is but typical of many others that are dressed from month to month. The large plates of glass are kept scrupulously clean and hundreds of interested spectators view each new showing.

Equipment Saves the Cost of a Clerk

Considering the Cost of Modern Fixtures at $1,000 It Is Estimated That the Time of One Clerk at $20 Per Week, Which It Will Save, Pays for the Equipment in a year—Equipment Cheaper Than Man-Power.

By HENRY JOHNSON Jr.

From Canadian Grocer

HARVARD'S latest investigation reveals one striking condition in the grocery business; that merchants whose turnover is highest and net earnings greatest in percentage are usually those who have paid some attention to the economics of internal arrangement. Those men have given thought to the most costly commodity they handle—TIME. For time and its corollary, man-power, must enter into all our calculations. It enters whether we note it or not. It is the most extensive thing we buy. The wise merchant will not waste it.

Some twenty-five years ago we, in our store, got the notion that sugar was not a profitable item because the margin was less than the average expense of operation. That is a commonly accepted notion and, in passing, I may say it is wrong. But we thereupon rearranged our store, keeping what we regarded as profitable goods forward and putting the "unprofitable" item 'way back out of sight.

What we had not taken into account was the fact that, whether we would or not, we must sell just about so much sugar—twenty per cent. of our turnover, probably—and therefore must "tote" it across all that extra space. After a particularly busy, hot and trying Saturday, one of us got thinking of that extra fifty feet from the main counter to the sugar. He passed it off roughly and calculated how often that distance had been traversed. We felt that the journey was made on the average of not less than a hundred times daily.

Saving Three Hundred Miles a Year

That showed five thousand feet a day, or just short of a mile. In an average year that meant 300 miles of walking, waste energy, lost time. Believe me, we got that —— relocated promptly! It seemed to us that as we had to handle that commodity "without profit," we should be wise at least to cut the expense of handling it to a minimum. We concluded that facts were better than theories. We grew to prefer cents to sentiment.

Many times after that I watched dealers work. I saw men walk twenty feet to a scale and back—forty feet, shuttling during the whole day to get goods in constant demand. I wondered why they thought they were saving money by not having extra scales. Count the time and energy against the cost of any scale you can think of and the scale will be earned several times each year. It will prove an investment which yields large returns.

The last store I fitted up had scales

HENRY JOHNSON, Jr.

everywhere. Nobody had to do much more than swing around from any location in the store to reach a scale. The money put into them was a prime investment. Having got started rearranging the store to save steps, we kept at it. We studied daily how we might cut the travel from goods to counter. We located cones of twine and rolls of paper all over the shop to save seconds.

The result was very tangible. It got to be said that we handled more goods per man than any other store in several townships. The counter books used to show sales of $75 to $90 for the three or four behind the counter, and each put up himself practically everything he sold. That meant that, counting every employee, the turnover was probably $1,400 to $1,500 per month each, at a time when goods were valued at about a third what they cost now.

New Furnishings Help Vastly

But it was when we fitted up the new store complete that we carried this idea to its logical conclusion. The space under every counter was utilized entirely, not a cubic inch of waste room. Everything was concentrated as closely as possible. A man could wait on trade, reaching most things in common demand, and hardly move ten feet in any direction.

But here is a point suggested which did not occur to us, which you can put into effect. Take your sales slips for a month and tabulate the goods sold. Make a column for each item. Then total the column. My impression is that you will be much surprised with the result. You will find that you are travelling miles per month of perfectly avoidable distance. Estimate the time taken on each journey and figure up the total cost. You will discover that your bill for waste time is a very large percentage of your total wages expense.

Carry it further. Step from your front counter scale to where you usually pile your cabbage and step back again, counting the steps. Calculate how often that trip is made daily. Figure out the cost against the price of a scale in your store, convenient for service.

There is a phase of difficulty here. The change of some commodities from distance to proximity will go far to remedy the difficulty, but not all. For in place of certain things moved nearer, others, now near, must be put further away. So thus you have saved, but you have not saved all the loss. How to make the greatest saving possible?

Equipment Cheaper Than Man-Power

Carry the idea clear through. Figure up what a set of fixtures which would concentrate practically all goods within reach, convenient, handy, accessible, yet protected, would mean to you. Then you will be converted, as I was, to the best planned fixtures anybody can devise.

Consider the cost of equipment of this character. Let us say it is $1,000. If it saves the time of one man at $20 per week, the entire cost will be wiped out in a year. Remember, too, that he does not need to be much of a man to get that sum nowadays. After the first year it will earn 100 per cent. velvet annually. If it saves only half that sum it still will pay 50 per cent. a year.

This reasoning applies whether the saving is made on a hired man or your own time and energy. Every minute used in service costs so much whether the expense is visible in the outlay Saturday night or not. If you can save your own time to devote to something besides needless stepping you are apt to join the few who make the extra net earnings whom Harvard digs out in its annual investigations.

Cutting the Rental

Such study tends to result in another big, valuable discovery: That likely you have a store much bigger than you need. It is one of the commonest and most costly mistakes dealers make to have too much room.

I have done business in three stores during the past fifteen years, each successively smaller than the former one. In each move I have done a vastly better, larger business. In the first store there was 7,500 feet space altogether, 3,200 in the salesroom. There we did $33,000 to $35,000. In the second we had 4,800 feet and there we did $60,000 to $65,000. The salesroom in that

Shooting Booms Ammunition Trade

St. John Trapshooting Association Revived by Hardwaremen—Big Tournament Held and Extensive List of Prizes for Maritime Provinces—Some Suggestions to Other Hardware Dealers

The ammunition business is booming in St. John, N.B. During the war the St. John Trapshooting Association suspended activities, but have now reorganized. J. Walker Andrews, who was well known as Remington's representative, now with W. H. Thorne & Co., Ltd., is responsible for the reviving of trapshooting in St. John. The list of officers is as follows: Honorary president, J. M. Robinson; president, O. J. Killam; vice-president, J. L. McAvity; treasurer, J. Gillis; secretary, J. Walker Andrews; field captain, Dr. L. A. Langstroth. Executive committee: R. E. Anderson, G. McA. Blizzard, H. W. Berry, F. J. Shreve.

O. J. Killam, the president, is the high man for Canada, with a mark of 296 out of a possible 300. He was five points ahead of his nearest rival, W. Hamilton, of High River, Alta., who broke 291 in the recent trials. Mr. Killam was selected in the make-up of the Olympic team to shoot in England's championship, Belgium championship and the National championship, but owing to business pressure was unable to leave St. John.

James McLaughlan, of Halifax, N.S., being the first man on the waiting list, took Mr. Killam's place.

A big tournament was held on August 9th and 10th. Ten events on the first day and five events on the second day, in addition to seven special events.

The following is a list of cups, trophies, etc., open to the Maritime Provinces:

Halifax Hotel Cup, Grand Aggregate; McAvity Cup, High Gun; Commercial Travelers' Cup, High Gun; Dominion Cartridge Shield, Two-Man Maritime Championship; Silver Cup, Two-man Team Match; Halifax Cup, Five-man Team Match, Halifax vs. St. John; St. John Cup, Two Man Team Match, Yarmouth vs. St. John; St. Regis Cup, Long Run; Magee Cup, Long Run; McGaw Cup, Second Grand Aggregate.

Mr. Andrews sets a good example other hardware merchants in Canada would do well to follow. Organize a shooting club and boost ammunition sales.

Continued from page 38

store contained 2,200 feet. In the third we had 5,000 feet altogether, but only 1,800 in the salesroom. There we did $75,000 to $89,000.

Making some allowance for difference in values between a staple trade and one progressively more fancy, there still was great economy of operation in the smaller spaces. You can see this idea exemplified in any large city. Look at New York, Chicago or Los Angeles and see what big businesses are conducted in spaces that will seem very cramped to you. But note also the economy of operation. Then you will not be surprised to learn how nice a net profit those men earn.

Subletting at a Profit

"I know a dealer in Southern Canada who cut out twenty-two feet of front by forty deep and rented it to a friend, retaining the back end for storage. Thereby he cut his salesroom in two in the middle. He saved a lot of heat and light and any number of needless steps. He did this by concentration of stock in modern equipment.

At another extreme is a dealer in Birmingham, Ala., who did much the same thing. He cut out and rented a full store front, retaining the rear. He did not cut the width of his store behind, but he saves a lot of walking. He did this with modern concentrated equipment.

Both those merchants have lessened expenses by subletting space not really under greater concentration of stocks. It's all right to run a "big store" if you have real use for it; but if it be only a matter of vanity, it won't get you very far. Space should be kept at such minimum as will keep you hustling to find room for things. Then you will avoid another great waste of profit possibilities—overstocking.

Now Necessary to Hold Down Credit Business

Present Conditions Make Necessary the Curtailing of Credit and the Cleaning Up of Long Standing Accounts to Provide Free Capital, So Cash Discounts Can be Taken and Interest Charges Against Capital be Decreased

HIGH prices of commodities and the necessity of carrying a complete and well assorted stock makes it more necessary than ever before to have plenty of "free capital" available, rather than to have small funds on hand and large stocks represening a big investment on which some speculating may be done before it is moved. Thus it behooves the merchant to watch his credit accounts very closely and clear as many questionable credit accounts off his books as possible in order to give him capital with which to take his cash discounts when buying and to cut down his interest charges against capital. Some 25 suggestions are outlined herewith to help the merchant hold down credit sales and to get customers to pay up. These are taken from Electrical Merchandising, and are as follows:

Poor collections and a disproportionate volume of credit sales usually indicate a poor collection policy or none at all. A carefully thought out policy is as necessary in merchandising as mortar is in making a brick wall. Determine a policy fair to yourself and fair to your trade. Acquaint your sales-people with your policy and see that your customers also know it. Then enforce it. This is fundamental. No special "stunt" for getting your money collected can compare in value with a sound policy firmly and fairly enforced. Fast and loose collection methods result in fast and loose profits. Leave out the mortar and the wall falls.

* * *

SELL FOR CASH WHENEVER POSSIBLE

You will have less trouble in getting customers to pay up if you carry fewer customers' charge accounts. Therefore sell for cash whenever it is possible to do so. Of course, do not lose the sale by refusing credit if you know the credit can be fairly and honestly extended. Credit is often extended on small purchases when a tactful word or two would turn it into a cash sale. Have all your salespeople make your confidential instruction their silent slogan, " We sell for cash whenever possible."

* * *

EXTRA MONEY FOR YOUR SALESMEN

Let your store salesmen and house-to-house salespeople earn an extra dollar or two by making a collection now and then during their business hours as they have opportunity or during their off-duty hours. Try this idea out any time, but it ought to work well at the beginning and middle of the month—the time when "the ghost" walks for many people, meaning the pay envelope, of course.

* * *

HOOK UP WITH THE METER MAN

Why not get in touch with the commercial manager of your local central station and arrange to have the meter man present your bill to your customer and make the collection when he calls monthly to read the customer's meter? This plan should work out well, especially in the smaller cities and towns. Have the meter man report directly to you and pay him a small commission on each account settled in full. That's better than not getting a settlement. Choose your accounts carefully for this method of collection and instruct the meter man carefully. If dealers' stores offer good advantages for collecting central station bills monthly, why is not the meter man a good person to help collect the contractor's or dealer's bill, when that method is expedient?

* * *

CHARGE ACCOUNT PRICES

One of the most successful hardware stores in Connecticut—and one that is selling electrical goods — marks its "charge account price" on all of its price tags. And that is the only price mark appearing on the tag. Why? Because in former days many of its customers insisted on carrying charge accounts and on paying up about when they felt like it. The interest that the uncollected money could have earned almost exceeded the profits. Hence the change to the "charge account price." Now when a customer buys he is surprised pleasantly to find that he gets a discount for cash on the spot, and learns that he must pay the larger amount if he wishes the purchase to go on an account and make it necessary for the proprietor to collect later. That is an excellent way to teach the public the cost of collections.

* * *

SEND YOUR INSPECTION MAN

Don't hire a professional, free-lance "bill collector." Train one of your salespeople to do a better job of it. Send him around ostensibly to inspect the appliances that you have sold, to make sure that they are in good working condition and are being used correctly. Let him make the collection quietly before he leaves.

* * *

USE THE TRADE ACCEPTANCE

Get acquainted with the trade acceptance, if you have not already done so. Work out your own method of using it. Then use it. Get your customer to sign an acceptance covering the amount that he owes you. You can then discount the acceptance at the bank and get your money. One St. Louis electrical house has been using the trade acceptance for several years. Ask your banker about it. He can tell you how to use the acceptance, at least he ought to be able to do so if he is an up-to-date banker.

* * *

SEND ANOTHER APPLIANCE

Surprise your debtor by sending another appliance to her home. Let the salesman who delivers it make the demonstration and leave the appliance for a short trial. Have him call again in a day or two and complete the sale, if possible. He should sell for cash if he can, but he should first of all collect the balance due on the previous bill.

* * *

OPEN FOR COLLECTIONS ONLY

If your business happens to be located in a small city or town you know quite well how prone the population is to go promenading on Saturday night or on band concert night. It may be that you and the other business men have agreed to close every night at six during the summer. Perhaps all of you close up

REVENUE RULINGS

Mr. J. D. Fox, collector of Inland Revenue at Montreal, reports the following recent rulings by the department, respecting ceiling fixtures.

Semi-indirect bowl fixtures:

Chandeliers are defined as ceiling fixtures with two or more lights and the tax of 10 per cent. is applicable on all chandeliers in excess of $12.

Semi-indirect bowl fixtures, domes, etc., are not classed as chandeliers and are subject to the tax of 10 per cent. when sold in excess of $3.

Gas and electric light fixtures, include newle post lights, wall brackets and other electric lighting fixtures.

Lighting glassware, such as semi-indirect lighting fixtures, is subject to the tax of 10 per cent.

As regards the material used in semi-indirect lighting fixtures, that might be purchased separately and assembled by the retailer, the retailer in this case would become the manufacturer and his sales would be subject to the tax of 1 per cent. as well as the sales tax of 2 per cent.

for Wednesday afternoon, and the weekly band concert comes on Wednesday night. Why not advertise that you will be open for one hour on that evening —"for collections only." On such a night the crowd is likely to contain many of your customers. It should be easy for one to slip in and pay up.

* * *

TELEPHONE TO HIM

It will save time, money and effort to use the telephone now and then. If he owes you a bill, or if she does, call up and have a friendly chat about the matter. Be careful how you do it. Make sure that nobody is listening on the line. Don't threaten. Talk briefly. Make the man who owes you pay you a smile by wire, at least, and get his promise for an early settlement.

* * *

BEWARE OF "POOR PAYS"

In every community there are people who are commonly known as "poor pays." Beware of these. Sell to them, knowing their reputation, and you have only yourself to thank, if you add to your credit sales and to your collection difficulties. Sell to them, by all means, but sell for cash. You then do yourself a good turn and you certainly help them to improve their own credit standing in the community.

* * *

SELL TIME-PAYMENT CONTRACTS TO THE BANKER

Sometimes a banker can be persuaded to take over for you the time-payment leases of your customers, thus permitting you to get in your money less a reasonable discount. The banker is not likely to do this unless he is sure that leases are absolutely good. He is more likely to favor the trade acceptance. Many leases require the use of the acceptance. Frequently, however, dealers and contractors have made arrangements whereby the local banker takes over the contracts.

* * *

COLLECTION DAY

When a customer opens up an account tell her that the last day of the month (or some other day) is your "collection day," on which you make collections of outstanding balances from house to house, merely as a way of making it easy for the woman in the home (or the man) to pay up any outstanding balance or an installment on a time-payment purchase. Some folks will avoid this call of your collector by paying up in advance. Other customers will wait until he calls.

* * *

SHALL I GO TO LAW?

Sooner or later in the effort to collect what looks like a lost "balance due" there comes a time when the dealer asks himself, "Shall I go to law in this matter?" Of course, there are times when this must be done, but be sure that you have arrived at that time. Many a creditor has lost the "balance due" and also the good will of a slow debtor by threatening a suit at law too early in the game. Just about the time the debtor looks for the usual "recourse to law," surprise him with a friendly little word showing your confidence in him and in his ability to pay up. Often this little note of confidence is just the thing needed to bring in the money.

* * *

REPAIRS FREE

Appliances will get out of repair sometimes, usually through some fault of the customer. If a bill has been outstanding for a long time, perhaps the appliance is out of repair. Find out. Offer to make the repairs free, if the account is closed.

* * *

MAKE HIM RECOGNIZE YOUR BUSINESS ABILITY

"I am badly in need of the money that you owe me," is a sentence seen many times in poor collection letters. It ought to be killed and buried. Tell your debtor that you are having difficulty in collecting your money and he will be convinced that in that respect you are just as poor a business man as he is in not paying up. He probably reasons rightly that if you have a heavy amount tied up in unpaid balances due from your customers you also probably have a number of creditors who are pushing you. Convince him that you are an able business man and show him that you expect him to be the same.

* * *

WRITE HIM A LETTER

Write just as you would talk to him, if you were face to face and both of you in a smiling mood. Forget the "beg to advise" and the "unless we receive your check by return mail" and the "we shall be forced to resort" and the "must act without delay." All of these threadbare phrases are known to every ten-cent debtor in the land. He recognizes them as the earmarks of a weak and carelessly planned collection system. If you use a form letter system in handling your collections, be sure that the letters are out of the ordinary run of such letters and that they carry a personal note.

* * *

OFFER A DISCOUNT

When you are faced with an out-and-out loss of the entire balance due and when you have practically given up hope of collecting any portion of what is due, offer an attractive discount for settlement at once. Better get even a small part than none at all. Don't use this method except as a last resort.

* * *

SCALE OF DISCOUNTS

Dealers have sometimes aided their collections by offering a set of discounts, each discount for a short period, and the discount diminishing as the time lengthens before payment is made.

* * *

HAVE HIS BANKER SPEAK TO HIM

If a man owes you a goodly sum of money and he has repeatedly refused settlement, and if your banker happens to be his banker also, perhaps a careful word spoken by the banker at the right time will bring in the money.

* * *

GET IT ON DEMONSTRATION DAY

Some time when you are planning to hold a special demonstration in your store mail your slow-pay customer a personal letter announcing the demonstration and inviting her to come. Don't mention the "balance due." The customer will expect you to do it and will be pleasantly surprised at its absence. An invitation instead of a "dun" will often prove the better bait.

* * *

POOL COLLECTIONS.

Perhaps your customer who does not pay his bill also owes money to other electrical contractors. If you have reason to think so, get in touch with the other creditors — and all of you send him a collective bill. Against your

Continued on page 43

Close Watch to Be Kept on Merchants in Recording Book

One of those terribly Governmental looking books—at least a yard wide—has been received by the Dominions collectors of inland revenue from Ottawa for recording the payments of luxury and sales taxes. In it is being entered the name of every retailer, wholesaler, manufacturer and jobber, and each one is being given a number. It is the intention of the collector to open an account with every firm or person affected by the new taxes and thus keep "tab" on them.

The number of persons who call at these offices to ask questions and take away information continues to be greater than those who come to pay the taxes. Nevertheless the Toronto officials are satisfied that Toronto merchants are doing well under the circumstances. A number of extra clerks have taken their places behind the collection counter, but there was not quite as much work for them as was contemplated, the rush of last week having apparently fallen off.

This is explained by the fact that most of the first week's collections came from the smaller dealers, who had little difficulty in filling out their returns. The larger firms, it is conceded, required more time for making out their first returns, particularly since it means committing themselves as to the extent of their business.

Much time has been wasted, insofar as the local officials are concerned, by hundreds of people insisting on arguing the unfairness of some of the taxes, and it has been one of the biggest problems of the staff to stave off such arguments.

EDITORIAL COMMENT

GETTING BACK TO NORMAL

ONE of the most encouraging signs that have been seen of late is contained in the replies of 23 manufacturers to a questionnaire recently sent out by the Merchants' Association of New York. These replies show that slowly but steadily the output of labor is reaching a higher percentage of its possible maximum, and that, man for man, the worker is working more steadily, and producing more during his working time, than he has been doing for some time past. If this tendency persists, and a higher plane of efficiency ensues and remains, then a long step has been made towards the reduction in the cost of living. It is a fact that there has been, pretty well throughout the world, a tendency on the part of the average worker to hold back, so as to make the work in hand last as long as possible, and thereby, in his opinion, preserve the era of plentiful employment and high wages. This tendency was perhaps not so much in evidence on this continent as it was in other countries, Great Britain especially suffering from this viewpoint of labor. Over there they had a regular name for it, thus giving it the dignity of a policy. It was known as "ca' canny," which is a Scotch colloquialism for "take it easy," and for which the French use the expression "laissez faire."

Conscientiously carried out, this policy results in bringing the production costs of every article it is applied to up to an ever-increasing figure, a figure which represents far more than the real value of the finished article. Brought to bear over a wide range of articles, it naturally affects the pockets of the men themselves who are responsible for it, and forces them to demand a correspondingly higher rate of pay. So the thing goes on. The surest way to obtain better living conditions and a reasonable wage, which will allow the worker to obtain the comforts of life, is for him to work while he is at it, without skimping and holding anything in reserve. An article produced by maximum efficiency, at lowest cost, will be in greater demand than when the same article is produced at a price which puts it out of the reach of many who would otherwise use it. The workman can receive a higher wage, the manufacturer can realize his profit, and a far larger demand is created. High wages in themselves are not an objectionable feature to any manufacturer. Where he loses money is in training men to supply a constant turnover, and in having machines standing idle or operating at low efficiency through the unwillingness of a man to give his best when he is receiving the wages he has demanded. If this condition is passing away, there is much to hope for. It would seem that the common-sense of the workers was at last asserting itself, to the detriment of those who have so long been trying to lead him along what looked like the flowery paths of ease. This return to a normal viewpoint will be no doubt viewed with alarm by some of these erstwhile friends of the people.

EDITORIALS IN BRIEF FORM

BE prepared to talk about your goods, to explain their use, and to show their advantage. Do this constructively and in a dignified manner, and you will increase sales many times.

* * *

BE helpful to your customers in making their selection. Don't force your choice upon them, but convincingly explain to them why a certain brand or a certain kind is just what they want. They like attention but not assertiveness.

* * *

IN THE case of hand-bills, brevity and display are essential. A hand-bill must be so written and so typographically arranged, as to tell its story even as it is flying down the street, after having been given a hasty "once-over" by the original recipient. Dealers who employ this method of advertising should remember this.

* * *

THE agitation for closer trade relations between Canada and the British West Indies is meeting with most encouraging success. Business men have long recognized the advantages to accrue from an agreement such as that which has resulted from the recent conference at Ottawa.

St. John Hardware Clerks Are Keen Sportsmen

AS well as being wide-awake business men, and anxious for the welfare of their home town, the St. John hardware clerks are keen sportsmen. The pictures show them at their sports recently held at Fairvale, N.B.

The first picture shows the team they defeated, all clerks in other lines of business. The second is the hardware team, employees of the leading hardware stores in St. John. The third shows the preparations being made for the sack race.

It is an old saying that you can judge a man by what he reads. These clerks are all regular readers of HARDWARE AND METAL. *Further comment is unnecessary.*

English Auto Accessories Will Come Freely

Due to Organization Will Be Plenty of These Products For Canadian Trade With Promise of Prompt Delivery—May Erect Factories Here Later—Mass Production

THAT there will be plenty of British-made Automobile Accessories available for the Canadian market is the expressed statement of Joseph H. Rose, special representative for S. Smith & Sons, Inc., London, England. Interviewed in Montreal by Hardware and Metal, Mr. Rose stated that, as far as his principals are concerned, they are in a position to make early and immediate delivery of these products.

"While we have a big trade at home, we are able to offer large supplies to the Canadian trade," said Mr. Rose. "Already we are serving nearly every British colony and in South Africa alone we have five different branches. It is our intention to establish connections in Canada, perhaps at Montreal, Toronto, Winnipeg and Vancouver, and possibly some other points. In time, after these connections have been established, we may erect a factory. But stocks will be carried at various points and shipments can be made without any delay whatever."

Shortage Overcome

In connection with the manufacture of these products Hardware and Metal asked if there was not some difficulty in obtaining raw materials, and if skilled labor was not scarce. In reply to this Mr. Rose stated that no difficulties exist in either respect.

"The very newest types of machinery are being used over there, and we have been enabled to make use of feminine help to a very great extent in operating these special machines. This has helped to solve the skilled labor problem, and under the most ideal conditions that can be arranged, there is no difficulty in maintaining almost ideal results in production. Every comfort is provided for the workers, and there is no difficulty in securing a high type of employee. In addition to the greatest care being taken in providing every convenience for those employed, meals are prepared and dispensed at a very small cost, the employees being given

HOLD DOWN CREDIT BUSINESS

Continued from page 41

united effort he may hesitate to delay payment any longer.

* * *

BUY NEW BUSINESS

Offer a debtor "a dollar off" of her balance for every sale to a prospect whose name is suggested by the debtor.

* * *

TAKE HIM TO LUNCH

Suppose your debtor is a business man who may be a prospect for still more business. Take him out to lunch some day, don't mention the "balance due," talk about more business, foot the bill for the lunch, and leave him with a pleasant good-by. Your hospitality will urge him to pay up every time he thinks of the good meal.

* * *

CHARGE INTEREST

Many retail dealers and a goodly number of professional men have begun to charge interest on outstanding accounts not settled within a certain time. This is almost the opposite of giving a discount for prompt payment. After all, why should it not be done? When value is received by one party to the transaction, value should be received by the other party at the same time. If not, why should not the customer pay interest for the use of the seller's money? Think it over.

EVENTS IN THE TRADE

Business Changes

Sioux Lookout, Ont.—The hardware busines of Hamilton Bros. has been sold to L. J. Williams.

Reorganize Canada Copper Co.

The Canada Copper Corporation will be reorganized. Heretofore, the Canada Co. and its predecessor, the British Columbia Copper Co., have operated under American charters, but the new concern will take up a Canadian charter, thereby effecting some saving by eliminating dual taxation. The Canada Copper Corporation has practically completed a 2,000-ton mill and production, after many delays, should be started before the end of the year. It has taken about three years to build the plant, which can treat 2,500 tons of ore daily.

Conditions in Maritime Provinces

Moncton, N. B.—The continued shortage of cement is having some effect on the building trade here at present, and a great many of those who have cellars dug ready for foundations are wondering if they are going to be able to complete their buildings this year. Among the buildings being built are two theatres.

In the State of Maine the people are also suffering from a shortage of all kinds of hardware. In Eastport and Lubec all of the sardine factories are closed down on account of the shortage of tin-plate and the local merchants report that building papers, cement and other articles are not only high but very scarce. Quite a quantity of Canadian hardware, especially nails, has found its way into the American market recently.

The automobile accessory business is particularly good in this section at the present, the number of American cars which are touring the province this year having helped it considerable, escially in the matter of gasoline and oils. So far this season over 300 more motor cars have crossed the boundary at St. Stephen this year than last.

Hold Managers' Conference

Montreal.—The managers of the various branches of Brandram-Henderson Limited met at Montreal this week for a conference on the advertising and sales policies for 1921. Those present, in addition to the Montreal staff, were: J. Leonard Paul, Winnipeg, Manager Western Division; S. W. Smith, Toronto, Manager Ontario Division, and W. George Hellier, Manager Maritime Division, Halifax.

Western Ontario Notes

Burglars who broke into the store of C. W. Summers & Son, at London, Ont., were evidently frightened away before they had a chance to take goods of any value. Nothing is missed from the hardware store and in the grocery department the only thing that is known to have been taken is a large picnic ham.

* * *

Corless and Venner have purchased the hardware business of W. H. Davison, at Clinton, Ont. Mr. Davison has not enjoyed good health for some time and intends to take a long rest. The new firm plans to operate an electrical business also. This will be in charge of Mr Venner.

* * *

Work has commenced at Petrolia, Ont., on the new plant to be equipped by the Ortons Motor Co., manufacturers of autos and auto accessories. Manufacturing will commence as quickly as possible.

* * *

M. I. Adolph, of Listowel, Ont., has returned after spending several days in Port Huron on business.

* * *

At the big bowling tournament in Seaforth, W. J. Heaman, of Exeter, and his team mate, R. Creech, captured the Stewart trophy for the second time.

* * *

C. W. Summers & Sons, of London, Ont., are extending their hardware store by an addition 30x45.

* * *

In competition with twenty-two rinks, including many of the best bowlers in the district, a team from Hensall, of which W. A. McLaren, hardware merchant, was a member captured the handsome silver trophy donated at Goderich by the Purity Flour Milling Co.

* * *

Thomas H. Purdom, Jr., of the Purdom Hardware Co., is spending a couple of weeks in New York and Rochester.

* * *

Miss Florence Quick, of the J. G. Steele Hardware, is spending her vacation in Detroit.

* * *

Earl Knight, of the sales staff of the Purdom Hardware Co., who has been confined to the house several days with illness, is much improved.

* * *

The head office of the Great Lakes Oil Refining Co. has been removed from Toronto to Wallaceburg and T. H. Hamilton, the general manager, will move there next week. The company contemplate adding a number of new stills shortly.

Millers Fall Company Adds Hack Saws to Its Line of Tools

The Millers Falls Company has purchased the plant of the West Haven Mfg. Co. at West Haven, Conn., which for twenty-five years has been engaged in the manufacture of Universal and other brands of hack saws, band saws and small tools.

The company will in future manufacture both "Universal," "Millers Falls" brand of hand and power hack saws, etc.

It will be operated hereafter through its plants at Millers Falls, its plant at Brattleboro, Vermont, and its new plant at West Haven, Conn.

Group Insurance Announcement at Picnic

Hamilton, Ont.—Wabasso Park was the scene of the first annual picnic of Slater & Barnard, Limited, last week. About 500 people, including the members of the firm, employees and their families went to the park by the Canada Steamship Lines vessels and spent a delightful day. A long programme of sports was run off, and three baseball games were played.

A feature of special interest was the announcement that the firm had arranged to insure the lives of all their employees at from $500 to $3,000, according to length of service.

Thermos Park on Hamilton Highway

Toronto, Ont.—The Thermos Bottle Co., Ltd., Toronto, manufacturers of Thermos bottles, realizing the great lack of places along the Toronto-Hamilton highway and that farmers were forbidding the use of their property and that parking on the highway was not allowed, have opened up a Thermos park on the highway, two miles west of Oakville. It includes four acres of wooded land, 900 feet of lake front, 2 toilets, facilities for picnic parties, waste barrels, etc.

NEWS OF WESTERN CANADA

COLLECTING TAX IN MANITOBA

Inspector of Inland Revenue in Winnipeg Planning Campaign Against Delinquent Firms—Prosecutions Are Being Contemplated.

ABOUT 1,500 persons or firms contributed approximately $175,000 in luxury and sales taxes to the Winnipeg branch of the Inland Revenue Department during June. To date this is the most definite report on the effect of the luxury tax in the Manitoba district.

What percentage 1,500 represented of the total persons or firms who should have submitted statements with cheques for the new taxes was not known by officials of the department. They could not even guess how much more should have been collected.

"The previous estimate of $1,000,000 of the $50,000,000 to be collected throughout Canada for the first year was very conservative," one official declared. "It should be much more, for where Manitoba will pay $1 for manufacturers' sales taxes, Quebec and Ontario will pay $5. But no one will be able to tell with any precision until the first six months' collections are in."

T. H. Verner, inspector of inland revenues, has set himself to the task of finding out how many defaulters to the new tax provisions there are in the district. He is compiling a list of firms who should collect taxes and will check this off with the list of those who paid.

Prosecutions are sure to follow the completion of the list, for with the most optimistic estimates less than 50 per cent. of merchants liable have paid up to the department, it is asserted.

CROPS WILL RECTIFY EXCHANGE SITUATION

W. C. Miller, Secretary of Ontario R.M.A., Returns From Tour of the West

W. C. Miller, secretary of the Ontario branch of the Retail Merchants' Association, returned to the city after an extensive tour of the West in going to and returning from the Dominion convention.

Mr. Miller found everyone wearing broad smiles. The merchants have had their worries lifted by the field prospects, and the farmers, he said, were declaring their crops would rectify the exchange situation and bring the Canadian dollar back to its rightful standard across the line.

Fire at Lanfine

Saskatoon.—A fire occured at Lanfine, Sask., Saturday evening. The blaze originated in or near a small oil warehouse. A hardware store and bank building were totally destroyed.

* * *

Western Notes

Melita, Man.—Campbell & Furguson, Ltd., hardware merchants, of Melita, Man., have sold their stock to Farrow Bros.

* * *

Millet, Alta.—J. M. Adison has sold his hardware business to H. Eastwood.

* * *

Spy Hill, Sask.—H. Hall has purchased the hardware stock of D. E. Campbell.

UNITED FARMERS' STORE AT INNISFAIL, ALTA.

The United Farmers of Alberta have opened a number of stores in the Province during the last year. These stores are not run as a chain of stores, but each town and district has its own association, and each association runs its own store, independently of the others. The growth of the U. F. O. idea in Alberta is an indication of what the independent retailer has to contend with in an agricultural country.

The accompanying picture is that of the Innisfail, Alta., U.F.O. co-operative association store. It was purchased by the Farmers' Association from G. W. West in March last, Mr. West having opened the first store in Innisfail, 29 years ago. It is stated that fully 75 per cent. of the farmers of the district trade at this store. The stock in this store comprises groceries, hardware, implements, ladies' wear, and dry goods. J. Saul is the manager. Previous to coming to Innisfail he had charge of a retail store in Calgary.

Newsy Notes From Here and There

Hamilton, Ont. — Canadian Polishes Ltd. are now in the Hoem Bank Bldg., 70 James Street N.

Toronto.—Mr. Conoer, local manager of the Martin-Senour Co., returned this week from his vacation.

* * *

Toronto.—T. B. Williamson, of H. S. Howland Sons & Co., Toronto, has returned to the office after a holiday in Muskoka.

* * *

Montreal.—George Henderson, president Brandram-Henderson, Ltd., left for a two weeks' trip to the Maritime Provinces. J. H. Gordon, secretary-treasurer The Sherwin-Williams Company of Canada, Ltd., is spending several weeks in the West, visiting various branches of his firm.

* * *

Montreal.—Herbert Kennedy, manager the Standard Paint Company of Canada, Ltd., is spending his vacation at out-of-town points. J. H. Rose, vice-president and treasurer S. Smith and Sons, motor accessories, is in Montreal. Colonel Hatch, of the Canada Steel Goods Co., was in Montreal during the week.

Montreal.—Royal Cluxton, manager of the Canada Paint Company, is away to United States points on his vacation.

Harold E. Taylor, manager of Sales Promotion Department, Canada Paint Company, has returned to the city after spending his vacation in the Northern States.

* * *

Standard Tube Co. Changes Name

Woodstock, Ont.—Standard Tube & Fence Company, Limited, has been authorized to change its name to Standard Tube Company, Limited. The manufacture of wire fence has been discontinued, and as the future will be devoted to the tubing business, the change in name was desirable. Expansion of the tubing line is now under way, and the new company expects to be able, shortly, to place on the market a complete range of close joint and gas and electric welded steel tubing. No change has been made in the company's personnel.

Not in many years have there been such bumper crops in Western Ontario and merchants are preparing for record business. At the Western Fair to be held in London next month every square foot of exhibition space has been taken and many late comers will have to show outside. Many of the hardware men are already busy with their plans for fancy window trims.

Hardware Letter Box

TABLE OIL CLOTH

Dubensky Bros., Ford, Ont.—Can you tell us the name of firm making table oil cloth?

Answer.—The Dominion Oil Cloth Co., Montreal, Que.

LIVINGSTONE VACUUM CLEANERS

Latimer & Johnston, Collingwood, Ont.—Can you tell us who are the makers of the Livingstone Vacuum Cleaners?

Answer.—The makers are the Livingstone Vacuum Sweeper Company, 1313 W. Congress St., Chicago, Ill.

PETER WRIGHT ANVIL

J. O. Demors, Thetford Mines, P.Q.—Can you inform us of the address of the maker of the Peter Wright anvil?

Answer.—These anvils are made by Peter Wright, Dudley Works, Stourbridge, England.

GASOLINE IRONS

D. S. Aldridge, Bright, Ont.— Where can I procure the Comfort gasoline sad iron in Canada?

The Comfort gasoline iron is stocked by the following jobbers: H. S. Howland, Sons & Co., Toronto; D. H. Howden Co., Ltd., London, Ont.; Merrick-Anderson Co., Ltd., Winnipeg; the J. H. Ashdown Hardware Co., Winnipeg.

MANUAL TRAINING BENCHES

J. T. Henderson, Niagara Falls, Ont.—Can you tell us where we can procure carpenters' benches as used in technical schools?

Manual training benches are sold by the Canadian Richards-Wilcox Co., Ltd., London, Ont., the Globe Furniture Co., Ltd., Waterloo, Ont., the Aikenhead Hardware Co., Toronto.

WOOD MALLETS

John Bailes & Sons, Oshawa, Ont.—Can you give us the names of makers of wood mallets in Canada or U. S. A. and who specialize in tennis mallets?

R. A. Sproule, Ottawa; Piqua Handle Mfg. Co., Piqua, O., U.S.A.; Slazengers, Ltd., 53 Yonge St., Toronto. The last named specialize on tennis goods.

ICE SAWS

Edgar Barette, Hull, Que.—Will you please let us know who makes Ice Saws to be worked with gasoline engine.

Henry Disston & Sons, Ltd., Toronto; Shurly Dietrich Ltd., Galt, Ont.; E. C. Atkins & Co., Hamilton, Ont.

HAND BELLOWS

Cochrane Hardware, Ltd., Sault Ste Marie, Ont.—Kindly advise us where we can procure hand bellows for prompt shipment.

The Aikenhead Hardware Co., Toronto; Canadian Blower & Forge Co., Merlin, Ont., A. B. Jardine & Co., Hespeler; Sheldon's, Ltd., Galt.

WESTERN NOTES

Winnipeg.—J. L. Paul, manager of the Brandram-Henderson Co., Winnipeg, is making a two weeks' trip through Manitoba and Saskatchewan.

Winnipeg.—C. H. S. Bamford, of the J. H. Ashdown Hardware Co., is spending a two weeks' vacation at Kenora, Ont. L. C. Stephens, of G. F. Stephens & Co., Ltd., is spending a two weeks' vacation at Keewatin, Ont.

Regina, Sask.—Jas. Feir, local manager of Wood Vallance, Ltd., wholesale hardware company, has let a contract for the erection of a large residence in Lakeview, which will cost, when completed, about $15,000.

Lethbridge, Alta.—Many complimentary remarks by convention delegates were heard about some of the special convention week window displays of the merchants. That of Hick-Sehl Hardware Co. was especially mentioned by President Jardine, of Kansas, as excellent, artistic and helpful.

Vancouver.—There has been a reorganization in the General Specialty Co. of Vancouver, manufacturers of Kwik Hand Cleaner, and several other sanitary and domestic specialties. J. D. Gilchrist and J. A. Brownsword have purchased the interest of F. W. Hodgetts.

Chain Stores Show Large Profits

S. S. Kresge Co., Detroit, Mich., is Now Operating 181 Stores—Offering New Issue of Gold Serial Notes

, The S. S. Kresge Company, Detroit, Mich., one of the largest chain store systems in the United States, is offering a new issue of seven per cent. serial gold notes, the entire issue amounting to $3,000,000. Figures indicating the development of this company are interesting. The business was first started in 1897, and the company has built its activities from a small beginning to 181 stores. The gross business of the company in 119 was $42,668,061 as compared in the first year of the organization, 1909, with $5,116,099. Net profits after federal taxes for the five years ended December 31, 1919, have averaged $1,852,951 per annum. Net profits after federal taxes for the year ended December 31, 1919, were $2,280,201.

The business of the Kresge Company is carried on largely in the state of Michigan, and consists of five and ten cent stores. A number of new stores has been added each year, until they now number over one hundred and eighty.

Canada's Copper Production in 1919

Copper Production in 1919 Lightest Since 1911 —Zinc, Lead and Nickel Also Lighter

ACCORDING to preliminary official returns, the Canadian production of copper fell from 59,384 tons of 2,000 lbs. in 1918, the highest on record, to 37,562 tons in 1919, the smallest since 1911. Of the total, 27,160 tons were contained in blister copper and in matte produced in Canada, part of which was refined at Trail, B.C., and part at Port Colborne, Ontario, the balance being exported for refining, while 10,402 tons were estimated as recovered from ores exported to United States smelters. The total production of refined copper in Canada last year was 3,487 tons (2,000 lbs.) against 3,809 tons in 1918, practically all of which was produced at the electrolytic refinery of the Consolidated Mining & Smelting Company at Trail.

The zinc production last year amounted to 15,869 tons (2,000 lbs.) against 17,451 tons in 1918. The production of refined zinc (all of which was produced at Trail) was last year 12,326 tons against 12,574 tons in 1918, 9,985 tons in 1917, and 2,974 tons in 1916, the first year in which commercial zinc was produced in the country.

Canada's output of lead in 1919 was estimated at 21,948 tons (2,000 lbs.) against 25,694 tons in the previous year, the figures representing the quantity of refined lead and pig lead produced in Canada from Canadian ores, together with the lead estimated as recovered from ores exported to the United States. The 1919 production included 16,446 tons of refined lead produced at Trail.

The nickel production of Canada in 1919 is given as 22,272 tons (2,000 lbs.) against 46,254 tons in 1918. The new refinery of the International Nickel Co. at Port Colborne commenced operations in July, 1918, and the smelter of the British America Nickel Corporation started operations in January, 1920, the refinery of the latter plant having an annual capacity of about 7,000 tons of nickel and 3,500 tons of copper.

Trade Enquiries

The names of the firms making the inquiries given below, with their addresses, can be obtained only by those interested in the respective commodities upon application to HARDWARE AND METAL.

Please Quote the Reference Number When Requiring Addresses

1489. **Construction material.**—A leading firm in Roumania for construction of houses desire to receive catalogues, price lists and quotations from Canadian firms in a position to export construction material of all kinds.

1490. **Rubber goods and celluloid.** — A Manchester firm are open to represent manufacturers of celluloid goods and manufactures of rubber.

1491. **Textile card-wire.** — A Manchester firm can purchase large quantities of textile card-wire. (A sample of the material desired is in the possession of the Commercial Intelligence Branch, Department of Trade and Commerce.)

1476. **Heavy chemicals, leather, metals and lumber.**—A firm in Rome dealing in the foregoing articles would be glad to hear from Canadian exporters who handle these commodities.

1477. **Tanned leathers, chemical products, dyeing extracts, machinery, tools, etc.** — A Genoese import and export house would be glad to enter into relations with Canadian exporters of tanned leathers, chemical products, dyeing extracts, machinery, tools, etc.

1480. **Lead ingots, linseed oil, turpentine, carbonate of soda, varnishes, paints.** — A firm in Genoa are disposed to do business with Canadian firms in the above articles.

1481. **Motor-cycles, lubricating oils, varnishes, etc.**—A very important firm in Rome would buy on its own account the foregoing articles, or act as representatives for Canadian firms.

1483. **Oils, etc.**—A Manchester firm would like to receive offers of all kinds of oils, fats and waxes.

1485. **Paints and varnishes.**—A commission agent in Roumania desires to receive samples and quotations from Canadian firms in a position to export all kinds of paints and varnishes.

1486. **Linseed.**—An Australian firm manufacturing linseed oil and meal wish to secure large quantities of linseed in Canada.

1487. **Construction material.** — A leading firm in Roumania for construction of houses desire to receive catalogues, price lists and quotations from Canadian firms in a position to export all kinds of construction material.

1488. **Construction material.**—A firm in Roumania desire to receive catalogues, price lists and quotations from Canadian firms in a position to export all kinds of construction material.

1466. **Tools.**—A firm in Roumania desire to receive quotations and other particulars from Canadian firms in a position to export all kinds of tools.

1468. **Electric apparatus.**—A firm in Roumania desire to receive quotations and other particulars from Canadian firms in a position to export electric apparatus of all kinds.

1461. **Hardware.**—A Manchester firm are in a position to import all kinds of hardware.

1460. A Manchester firm are open to import hardware lines, including mechanics' tools.

1459. **Asbestos.**—A firm in Roumania desire to receive quotations and other particulars from Canadian firms in a position to export asbestos.

1441. **Wood Alcohol.**—A Manchester firm would like to receive offers of wood alcohol.

1442. **Leather.**—A Leicester firm are in a position to import upper leather such as glace kid, box calf, and soling leather.

1443. **Leather.**—A Manchester firm are always prepared to consider offers of sole and upper leather.

1444. **Leather.**—A Northampton firm are open to purchase upper leather for boots and shoes.

1445. **Leather manufactures.**—A Manchester firm would like to hear from exporters of leather manufactures.

1446. **Leather and belting.**—A commission agent in Roumania desires to receive quotations from Canadian firms in a position to export all kinds of leather and belting.

1447. **Leather belting and industrial installations.**—A firm in Roumania desire to receive quotations and other particulars from Canadian firms in a position to export industrial installations and leather belting.

Catalogs and Booklets

The Stanley Works, New Britain, Conn., hvae issued a new folder illustrating Set No. 1783 of the Stanley Works Garage Hardware.

They state that this set is a popular combination for the better class of garage. It has the ball-bearing hinges, foot and chain bolts, and the 1774 garage door holder.

Readers of Hardware and Metal may have a copy on writing the above-named firm, quoting B12, the key number for this booklet.

The Thermos Bottle Co., Ltd., of 146 Wellington Street, West, Toronto, have issued a new catalogue of their line of goods. The catalogue is fully illustrated and describes each article they now manufacture, comprising Thermos bottles, food jars, carafes, tray sets, lunch kits, picnic sets, motor kits, etc., as well as a list of repair parts of Thermos products. A copy may be obtained by Hardware and Metal readers on request from the above-named firm.

Travellers' Day at Prince Albert Fair

Eight Thousand People Attended, And the Success was Characteristic of the Organization

Prince Albert, Sask.—Travellers' Day at the Prince Albert Fair last week passed off with a spirit of vim and enthusiasm characteristic of an organization that knows what it wants and bends its energies to achieve its object. From the time the freak menagerie left the depot in the morning until the dance in the moonlight was over not a dull moment was experienced and the travellers' association is to be complimented upon its ability to arrange a good day.

The attendance at the fair during the afternoon attained large proportions and there must have been 8,000 present. The grandstand was filled to overflowing with an appreciative audience who applauded the racing and the stage performances offered for its amusement. A large audience unable to obtain seats on the stand contented itself by watching the performance from other points of vantage.

Fred. Ford was director of the operations, and great credit is due him and the travellers for the outstanding success.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

STEER WARM, MOTOR HEATER, SHOCK ABSORBER

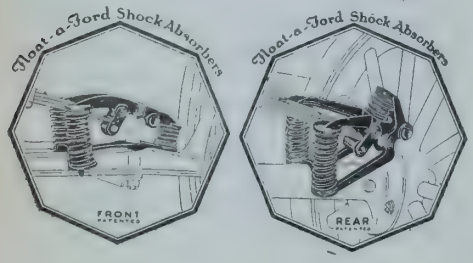
New lines being put out for the motor accessory trade by Motor Sundries Ltd., Toronto, include the Steer Warm for

cold weather. This device consists of two leather covered grips, one for each hand, which lace to the steering wheel at a place convenient for driving. Special resistance wires are arranged between copper plates so that with a very small current the grips are kept warm. After a certain heat is attained an even temperature is then held. A type designed for the Ford car is heated from the magneto. One of the outstanding claims for this article is the importance of keeping the hands warm and the fingers nimble

Motor Heater

while steering a car in the cold weather.

The Ironclad is an improvement on the Mayall motor heater. It is stated that less current is consumed than formerly and the element is adjustable. The device allows the motorist to take advantage of arrangements made by some municipalities for power outlet on the street to which heaters on motor cars may be attached. The device is also used, of course, in garages. As illustrated the heater consists of a steel housing with enlarged space for water in which is inserted the nickel chrome heating element with plug attachment. The element is guaranteed for six months.



The Float a Ford Shock Absorber is another line being marketed by Motor Sundries Ltd. The principle of this device is to absorb both upward and downward shocks, three springs being provided for the purpose. It is stated that the device allows free expansion and contraction of the Ford spring and prevents side thrusts. These springs are produced in three weights — touring, coupe, sedan and commercial and roadster. The device is fully guaranteed and sold under a refund offer if not satisfactory.

HYRATE ELECTRO TROUBLE DETECTOR

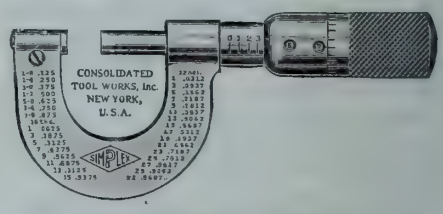
The Service Station Supply Co., of 30 East Larned St., Detroit, Michigan, has developed a combination instrument for detecting troubles in the electrical apparatus of any make of automobile.

It is claimed that the Hyrate ELECTRO TROUBLE DETECTOR combines five instruments in one, and is so designed that a series of simple tests, readily made and requiring no special electrical training, will enable anyone with this instrument to discover the cause of any defect or failure in the generator, starting motor, lights, horn, switches, wiring, battery or ignition apparatus.

This tester is handled in Canada by the Chas. E. Goad Engineering Co., Toronto.

SELF-READING MICROMETER

The Simplex Micrometer is a new self-reading instrument made by the Consolidated Tool Works, 261 Broadway, New York.



Self-Reading Micrometer

This tool is based on the established design of standard micrometers, but it is claimed has the advantage of easy reading numerals instead of the familiar graduation. The exact reading is at all times in plain view and can be seen at a glance, which it is stated will save time for the user and prevent mistakes in reading and in computing measurements.

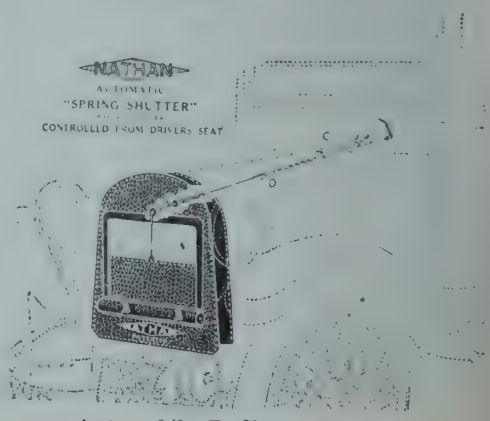
There are only two working parts in the self-reading unit of the tool, and these are made of hardened steel.

The maker claims that any one who can read three figures can successfully use this micrometer with accuracy.

AUTOMATIC SPRING SHUTTER RADIATOR COVER

The Nathan Novelty Mfg. Co., 55 Fifth Ave., New York, are marketing what they describe as the latest design in radiator covers. It consists of a frame coated with rubber and rubberized to the Kersey felt lining. It is operated from the driver's seat and, it is stated, unlimited adjustment can be made even while car is in motion.

The spring shutter, the makers claim, offers the best method of regulating temperature of motor, as it operates from the bottom up, and radiators freeze at the bottom first.



Automobile Radiator Cover

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

HIGHER prices are noted on many lines of hardware commodities this week. Galvanized conductor pipe and elbows have higher quotations, together with eavetroughing and metallic shingles. Other lines that show an advance in price are farriers' hammers and horse rasps, wheelbarrows, wrapping paper, brass and steel jack chain and cut nails. Sash weights, car movers, hay wire and fibre chair seats are also marked up.

Certain lines of builders' hardware comprising lock-sets, locks and door knobs are advanced in price.

Snowshoes for fall booking bear a higher price and a considerable increase in the new prices just issued for lawn mowers for next season is noticed.

While business has fallen off a little, it is greater than usual at this time of the year, in most lines, and jobbers state they could do more if they could get larger supplies.

Shortage of supplies is reported in many quarters, and this is especially noticeable in the heavy lines of hardware, such as galvanized and black sheets, boiler plates and tubes, stoves and ranges, Canada plate and nails. Wrought iron pipe, both black and galvanized, is also very short.

Further increases in the price of heavy goods in iron and steel is expected as a result of the higher freight rates which take effect in the United States about the end of this month.

Collections are said to be coming in satisfactorily.

MONTREAL MARKETS

MONTREAL, August 12.—Activity is greater at this season of the year than it was this time a year ago, jobbers report. Each month indicates favorable increases in the volume of trading, and this is hardly looked for. There are some important advances, builders' hardware having advanced from 5 per cent. to 12½ per cent., according to finish and material. Fibre chair seats are higher. Yard sticks have advanced, this being due to increased charges for Government stamping. One line of silverware has been revised upward. Two lines of egg timers are marked up. Car movers of "Samson" make are advanced in price. Knob screws are quoted higher, old material has a firmer undertone, steel and iron bars are firm. Cut nails advanced to $6.90 per keg, but standard wire nails are unchanged. There is an excessive and an insistent demand for binder twine. An advance has been made for hay wire. One dollar has been added to the horse nail list. Sash weights are marked up. Altogether there is a better tone to business than is found in many trade circles, and despite the shortage of some lines the volume of business being transacted is remarkably heavy. In a general way the outlook is anticipated as a favorable one.

Fibre Chair Seats Go Up in Price

Montreal.

CHAIR SEATS. — Fibre chair seats have been revised upwards this week, following prices being in effect: 13 in. per dozen $1.60; 14 in. $1.75; 15 in. $1.95; 16 in. $2.10.

Advances Are Made For Builders' Hardware

Montreal.

BUILDERS' HARDWARE.—An advance of approximately 12½ per cent. has been made in various builders' hardware, jobbers announce. No change has been made in common locks or lock sets, prices remaining as they were previously. The 12½ per cent. increase applies to steel or iron lines, while an approximate increase of 5 per cent. applies to brass or bronze.

More Money Charged For Some Yard Sticks

Montreal.

YARD STICKS.—Higher prices are in effect for yard sticks No. 7122 being quoted at $5.00 and No. 7422 at $6.25. A recent change in Government stamping charges is doubtless due to a certain extent for this advance.

Silverware Prices Are Again Revised

Montreal.

SILVERWARE.—A change of the discount from 30 per cent. to 20 per cent. has been made for all Rogers' Brothers 1847 silverware.

Egg Timer Prices Are Marked Higher

Montreal.

EGG TIMERS.—Two leading lines of egg timers are marked higher this week, "Silver's" being quoted at $8.40 per dozen and "Three Minute" at $6.00 per dozen.

More Money Charged For Line Car Movers

Montreal.

CAR MOVERS.—A rather stiff advance has been made in the price of Samson car movers which are now quoted at $90 per dozen. This is due to increases for labor and also steel.

Sheet Prices Firm, With Supply Short

Montreal.

SHEETS AND PLATES.—Prices have remained firm on all gauges of sheets. Little encouragement is manifest here for an early easing of the stringency. It may be that some odd lots will come to hand in September, but as yet a general improvement has not been suggested

by those importing the products. Prices are bound to rule high until there is relief in the matter of supplies.

22 gauge	11 80	12 30
18 and 20 gauge	11 35	11 85

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Knob Screws Advance to Forty-five Cents

Montreal.

KNOB SCREWS.—An advance has been made in the price of ordinary door knob screws, the net price to the trade now being 45c per gross.

Still Firm Undertone on Iron and Steel Bars

Montreal.

IRON AND STEEL.—The manufacturers are behind on delivery of some sizes of bars and there is little improvement reported in jobbing circles. Prices are quite firm. If some of the reports current are borne out shortage will continue for weeks, and perhaps longer. Whether prices will again advance is uncertain. Changes may not come immediately, but any revision is likely to be that of an advance of price. Manufacturers report little easing of the situation, one leading mill stating that there was still a shortage of the raw material.

Mild steel		5 30

3-16 and thinner flats in iron or steel take extra 50c per 100 lbs. over base and regular extra.

Better Tone Surrounds Various Old Materials

Montreal.

OLD MATERIAL.—Prices are somewhat steadier on various old scrap metals. Mills, while not buying in some instances, are inclined to make more frequent enquiry and large factors in the accumulation of old metal are hopeful that conditions will improve. This means that there will be a tendency to firmer prices and the outook for the fall trading is much better than it was two or three weeks ago.

Orders Will be Many This Fall For Wares

Montreal.

WARES.—While there is very little new in the situation, and although present movement of wares is not extensive, the outlook is very satisfactory. Prices will naturally be firm this fall on these lines, and manufacturers are not so sure that it will be possible to obtain the desired tonnage of sheets for manufacturing. Orders will begin to move out to the trade in about a month for fall trade, and in the meantime manufacturers are looking around for the requisite material to make these goods.

Stove Sales Will be Active This Fall

Montreal.

STOVES.—The indications are all of the best for an active sale of stoves and heaters this fall. Some makers report that they will have fairly good stocks to begin the season with, but the average comment indicates that there will be a greater sale for stoves—and particularly for heaters—than ever before. Prices are unchanged as yet, but these are ruling firm.

Cut Nails Now on a Basis of $6.90

Montreal.

NAILS.—The movement of nails to the trade has been unabated. As expected in some quarters, and as definitely forecast as a strong probability by Hardware and Metal, cut nails have advanced, the basis increasing from $6.40 to $6.90—a straight increase of 55 cents per keg. There has been no change in standard wire nails, which hold still at $6.40. At the same time there is no guarantee that wire nails will not be higher. They are very scarce and it will not be surprising if higher prices become effective.

Heavy Demands Now For Binder Twines

Montreal.

BINDER TWINE. — The heavy demands for binder twine at the present time are somewhat unprecedented. "We are getting heavier repeat orders from customers than the placing orders were in the spring," said an Eastern Canada representative to Hardware and Metal, "and it is almost impossible to fill the same. We look for relief very soon, but at present we cannot fill all orders. It is one of the best seasons here on record." Prices are firm but there has been no change quotably.

Rope Basis Steady, With Light Movement

Montreal.

ROPE AND CORDAGE.—Sales of rope are steady, but the midsummer condition of quiet prevails. Price are ruling without change, and while there have been some advances on raw material there has not, as yet, been any advance of price on the made up rope. Pure manila is selling on a base price of 35½c, New Zealand and British manila at 28c and sisal at 22½ cents.

Hay Wire Higher; and Is Scarcity

Montreal.

HAY WIRE.—Prices have advanced on cut hay wire. This is not a great surprise to the jobbing trade for there is a great scarcity of wire in most forms. The standard wire in 6 to 10 foot cut lengths is now selling as follows: No. 9, per hundred lbs., $7.05; 10, $7.15; 11, $7.20; 12, $7.30; 13, $7.40; 13½, 7.45; 14, $7.60; 15, $7.75; 16, 7.90. Singe loop bale ties, from 12 to 16 gauge, are based at the same relative prices. Previously these carried a 30 cent advance over cut wire ties.

Horse Nail List Prices Are Higher

Montreal.

HORSE NAILS. — Prices have advanced on Capewell horse nails. The net advance over list price is $1 per 100 lbs. and the change is at once effective.

Increase Is Made on Sash Weights

Montreal.

SASH WEIGHTS.—Prices are revised

upward on sectional and solid sash weights. Solid are now quoted at $6 per 100 lbs. and sectional at $7.00.

Excessive Demand For Gasoline and Coal Oil

Montreal.

GASOLINE, COAL OIL.—There has been a firm, though unchanged basis this week for gasoline and coal oil. The high prices do not seem to have deterred the buyer. Prices are 31c to 33c per gallon on coal oil and average from 41½c to 46½c for gasoline.

Ingot List Is Held With Trading Limited

Montreal.

INGOT METALS. — There has been little new feature in the market list this week, and local trading conditions are rather quiet. This is to be expected in mid-August. There has been some uncertainty with regard to prices in view of the European situation but at this writing the outlook is somewhat more encouraging.

TIN.—In view of the war talk over the Polish situation there was uneasiness during the week. Prices tended to sag, but locally the situation is somewhat better and prices remain unchanged at 56c to 57c per lb.

COPPER.—This is quiet but there has been no change of any consequence, prices remaining unchanged at 24c for casting and half a cent higher for electrolytic.

LEAD.—The market is held at 10¼c per lb. Trading is seasonably light.

ANTIMONY.—Steady but unchanged and with average quantities this is selling at 10½c.

ALUMINUM. — Not of outstanding interest here. Prices range from 37c to 39c per b.

SPELTER.—What limited trading is transacted is being done on the basis of around 10¾c per lb.

TORONTO MARKETS

TORONTO, Aug. 12.—Considerable increases in prices are noted this week and among the lines advanced are conductor pipe and eavestrough, with elbows and allied lines which are now 10 per cent. higher. Lock-sets and locks and door knobs have also been marked up and new prices are given on post-hole augers, sap spiles and spring hinges.

Lawn mowers for 1921 season will be considerably higher; the new lists just out showing an advance of about a third.

Large shortages in black and galvanized sheets, boiler plates, boiler tubes, and iron and steel rods and bars.

Stocks of these heavy lines are everywhere low, with little improvement expected.

Business, considering the season, is good and collections are fair.

Roofing Demand Good; Prices Unchanged

Toronto.

ROOFINGS—A fair demand for roofing and tarred and dry fibres and kindred lines is being experienced, though a noticeable slackening is lately observed. Raw materials in these goods are reported as being a little easier to get now and no price change is expected for the present. Tarred fibre No. 2 is quoted at $1.45 per roll.

Wooden Clothes Pins Advance in Price

Toronto.

CLOTHES PINS. — The common variety of wooden spring clothes pins are now selling at $1.85 per 5 gross box.

Waste and Oakum Moving Freely

Toronto.

COTTON WASTE AND OAKUM.—A good demand for these products is reported, business being above average. The various lines of cotton waste show no change in price and are as per current market quotation pages. Plumbers, oakum is quoted at $5.00 bale.

Some Lines Builders' Hardware Advance

Toronto.

LOCK SETS. — There has been an advance on Canadian makes of locks, lock-sets and knobs of approximately 10 per cent. The higher cost of raw material is said to be the cause.

Electric Washers in Good Demand

Toronto.

ELECTRIC WASHERS. — There is a good sale for electric washing machines being reported and business is also good for the ordinary washers and wringers. The Seafoam Electric Washer is now quoted at $160.00 list; the New Century is $19.75, and B, $21.75; less 20 per cent.

Demand Seasonable For Cordage and Twines

Toronto.

ROPE.—The rope situation is unchanged. Business is reported brisk, especially in binder twine, which is moving freely. Prices remain unchanged and are to be found on the current market quotation pages.

Galvanized Sheets Show no Improvement

Toronto.

GALVANIZED SHEETS. — The unparalelled shortage in galvanized sheets shows no sign of any improvement. Manufacturers frankly state that stocks are very low in all gauges and report an inability to procure raw material.

Opinion is expressed that labor is more plentiful and the increased freight rates in the U. S., which go into effect before the end of the month, may help somewhat by providing more cars, which have been diverted for other purposes.

Prices given are but nominal and depend on ability to ship.

BLACK SHEETS

14 gauge	....	$8 95
16 gauge	....	9 00
18-20 gauge	....	9 45
22-24 gauge	....	9 50
26 gauge	....	9 55
28 gauge	....	9 65
3-16 inch plate	....	9 75
¼-inch boiler plate	....	....

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS

	Premier		Apollo	
10¾ oz.	$12 00	$12 50	$12 00	$13 25
U.S. 28	11 45	12 70	11 45	12 85
U.S. 26	11 15	12 40	11 15	12 55
22 and 24	11 00	12 25	11 00	12 40
18 and 20	10 70	11 95	10 70	12 10
16	10 70	11 95	10 70	12 10
12 and 14	10 55	11 20	10 55	11 95

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Belting and Cut Laces Remain Steady

Toronto.

BELTING AND LACES.—No change in price is anticipated at present in leather belting and leather belt laces. A recent reduction in hides was in the poorer grades only, which do not enter into belting or laces, the manufacture of which calls for the backs of the higher grades of hides and the prices of these have continued to be firm. Discounts as shown on current market quotation pages remain in effect.

Sash Cord Moving Well; Price Steady

Toronto.

SASH CORD.—A good demand for sash cord is reported, due principally to building operations continuing good. While the price of raw cotton remains steady, no decline in price is expected

either in sash cord or cotton rope and twine.

No shortage in the raw materials is observed.

Bar Iron and Steel Supplies Short

Toronto.

BAR IRON AND STEEL.—The market report of these is that stocks are low and supplies hard to get. Jobbers and dealers state they are getting all the business they can handle and could do more if deliveries were better. The base price on bar iron remains round $5.50 with $6.00 quoted for sizes under ¼.

Common bar steel, 3-16 in. and lighter	$ 6 00
Common bar steel, ¼ in. and heavier	5 50
Common bar iron, 3-16 in. and lighter	6 00
Common bar iron, ¼ in. and heavier	5 50

Mild steel	5 75
Norway iron	16 25
Toe caulk iron	6 70
Sleigh shoe steel	5 75
Hoop steel	6 75

Continued Scarcity in Pipe Fittings

Toronto.

PIPE FITTINGS.—A continued scarcity in pipe fittings is reported from all quarters. Certain sizes appear to be off the market and stocks everywhere are light. There is no change at present in price and demand is a little quieter.

Quotations are as follows:

PIPE FITTINGS

Cast iron fittings	Plus 10%
Plugs	7½%
Bushings	10%
Unions, ¼-in. to 2½-in.	30%
Do., ⅛-in. to 3-in. and larger	25%
Dart union, ¼-in. to 2-in.	8%
Do., 2½-in. and larger	Plus 5%
Nipples, up to 4-in.	50%
Do., 4½-in. and larger	40%
Do., running thread, 4-in. and under	20%
Couplings, 4-in. and under	20%

MALLEABLE FITTINGS

Class A	0 70	0 85
Class B	0 30	0 40
Class C	0 20	0 30

Gas Stoves and Ranges Reported Scarce

Toronto.

GAS STOVES.—The demand for different lines of gas ranges has been such that manufacturers have been unable to keep sufficient stoves on showroom floor for display purposes. The supply of raw material, too, has greatly handicapped production.

Fairly Heavy Demand For Range Boilers

Toronto.

RANGE BOILERS.—Stocks of these are reported very low. The raw material is hard to get, and higher in price. There seems to be no visible improvement in conditions in sight. Although prices on these goods are higher, dealers and manufacturers report having all the business they can handle.

The 66 gal. size in the extra heavy is now quoted at $40.00. Prices on the different sizes are as follows:

RANGE BOILERS—	Standard	Ex. Heavy
30-gallon	$15 00	$18 00
35-gallon	18 00	21 00
40-gallon	20 00	23 00
52-gallon	25 00	29 00
66-gallon	35 00	40 00
82-gallon	42 00	48 00
100-gallon	55 00	65 00
120-gallon	70 00	80 00

Wrapping Paper Makes Big Advance

Toronto.

WRAPPING PAPER. — There has been a big advance in wrapping papers and the best quality kraft is now quoted at $17.75 per 100 lbs.

Post Hole Augers Prices Changed

Toronto.

POST - HOLE AUGERS. — The Vaughan make of post-hole augers is revised in price as follows:

6 in., doz.	$17 85
7 in., doz.	19 80
8 in., doz.	21.65
9 in., doz.	22 65
10 in., doz.	25 60

Eureka Sap Spouts Revised Upwards

Toronto.

EUREKA SAP SPOUTS are now quoted as follows: Regal, bronze, $16.85 per thousand; galvanized, $23.75.

Spring Hinges and Screen Door Sets

Toronto.

SPRING HINGES AND SCREEN DOOR SETS.—New prices are quoted on these lines as below:

Spring hinges, No. 200, $2.50 doz. prs.; 201, $3.30; 202, $2.95.

SCREEN DOOR SETS.—No. 1200, $3.70; 1201, $4.30.

Lawn Mowers For Next Season 33 1-3% Higher

Toronto.

LAWN MOWERS. — The new price lists issued for lawn mowers for 1921 indicate that next season's prices will be about one-third more than this year's.

Increased operating costs, raw materials and labor are said to be the cause for this big advance.

Slight Change on Solid Sash Weights

Toronto.

SOLID SASH WEIGHTS have been changed slightly and are now quoted at $5.00 per 100 pounds.

Jack Chain Goes a Little Higher

Toronto.

JACK CHAIN.—Advances have been put into effect on the various sizes of both steel and brass jack chain and the brass is now about 10 per cent. higher and the steel 15 per cent.

Nails, Both Wire and Cut, to Cost More

Toronto.

NAILS GOING HIGHER. — The nail situation is very unsettled at present Stocks are low and with deliveries uncertain prices are apt to vary. Cut nails are $7.50 and wire $6.40.

These prices are not expected to be held for long as an advance is looked for.

Little Trading Done in Iron Pipe

Toronto.

IRON PIPE.—Jobbers report but a small amount of business being done in black and galvanized pipe—the reason given is that it is scarce and hard to get. Higher prices would surprise none, and with other heavy lines it is felt that prices will be affected by the increased freight rates. List No. 46 is the latest and prices are as follows:

Standard Buttweld Pipe
Per 100 Ft.

	Steel Blk.	Gen. Galv.	Wrought Iron Blk.	Galv.
⅛	$ 6.50	$ 8.50	$.....	$.....

Asbestos Products Having Ready Sale

Toronto.

ASBESTOS GOODS. — The various lines of asbestos goods are said to be moving freely and prices are firm with no changes at present.

10% Advance on Conductor Pipe

Toronto.

CONDUCTOR PIPE. — There has been an advance this week on conductor pipe of 10 per cent., and it is now selling plus 25 per cent. on list. Materials are very scarce and though business is reported fair dealers state they could do more if they had the goods.

The new net prices would be as follows:

2 in., 10 ft. lengths	$10.00	per 100 ft.
3 in., 10 ft. lengths	12.13	" "
4 in., 10 ft. lengths	16.00	" "
5 in., 10 ft. lengths	21.88	" "
6 in., 10 ft. lengths	26.63	" "

Eave Trough Now Quoted 25% Above List

Toronto.

EAVESTROUGH. — Together with conductor pipe, eavestroughing, eavestroughs and elbows, and allied goods have advanced a further 10 per cent., making 25 per cent. above list the new selling price. Scarcity and higher prices on sheets is given as the cause.

Boiler Tubes, Prices Nominal; Stocks Light

Toronto.

BOILER TUBES. — Stocks of these are at an extremely low level and prices quoted are purely nominal. No expectation is held of an early improvement in the situation and dealers do not anticipate any lower prices—the tendency seems to be the other way.

Valves and Compression Goods Remain Firm

Toronto.

VALVES AND COCKS. — No particular shortage is noticed in these brass goods and demand has been fair. Prices on the better known lines are given in the current market quotation pages.

Lead Products Firm, With Demand Steady

Toronto.

LEAD PRODUCTS. — Prices continue firm in lead and zinc products. Trading is a little light and supplies are generally fair. Solder is unchanged with demand steady.

The quotations on principal lines are:

Lead pipe, list, per lb.	0 17
Do., over 8 in., list, per lb.	0 19
Lead traps and bends	add 30%
Lead wool, lb.	0 16
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 13
Cut sheets ½ to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 43
Solder, strictly, lb.	0 35
Solder, commercial, lb.	0 33
Solder, guaranteed, lb.	0 39
Solder, wiping, lb.	0 33
Lead waste pipe, list, per lb.	0 18
Zinc sheets, per lb.	0 19

Gasoline and Coal Oil Unchanged

Toronto.

GASOLINE AND COAL OIL. — The prices of these remain unchanged and the standard grade of gasoline sells at 40 cents and Royalite at 29½ cents.

Lessened Dealing in Waste Materials

Toronto.

WASTE MATERIALS. — Trading is not reported as being as brisk as usual in waste materials and prices ruling are as follows:

DEALERS' BUYING PRICES

Pipe scrap	11 00
No. 2 busheling	13 00
Stove plate, per ton	28 00
Yellow brass	0 10
Red brass	0 15¾
Light brass	0 07
Med. brass	7 75
Scrap zinc	6 00
Heavy copper	0 17
Overshoes, lumbermens rubber boots	0 04
Bicycle tires	0 01½
Automobile tires	0 02½
Heavy lead pipe	0 05¾
Heavy melting steel	15 00
Light copper	0 14
Heavy copper	0 17
Aluminum	0 20
No. 1 machinery cast	33 00
Wrought iron, No. 1, per gr. ton	15 00
Tea Lead	0 05
Heavy lead pipe	0 06
Old rubbers, boots and shoes	0 06

Some Grades Gas Engine Cylinder Oil Changed

Toronto.

GARGOYLE MOBILOIL. — There has been a net advance of from 10 to 15 cents per gallon on different grades of Gargoyle Mobiloil and the following are new prices:

Gargoyle Mobiloil, Grade E and Arctic, $1.80; Grade B. $1.90; Grade BB, $1.95; Grade A, $1.60.

Ingot Metals Markets Quiet; Demand Light

Toronto.

INGOT METALS. — Trading this week is reported as very slow with slightly lessened quotations in some cases.

TIN.—Tin values have receded on London markets. Importers are quoting 56 cents per pound.

LEAD.—Lead continues fairly firm, with little activity and is quoted at ten cents.

SPELTER. — This was said to be steady but little trading was done at 10 3-4 cents per pound.

ANTIMONY. — This is reported at a lower level on New York markets. Little interest is shown and price quoted is 10 cents.

COPPER. — The market is said to be dull and stagnant but larger sales are anticipated on account of improved transportation and a desire to escape the increased freight rates. Price quoted for casting, 24 cents.

ALUMINUM. — Market dull, with no change in price of 37 cents.

LONDON MARKETS

LONDON, Ont., Aug. 12—Business continues good and in spite of many shortages the amount of sales is very satisfactory. Prices are ruling firm with many advances noted. Among the higher prices quoted are saw sets, ash sifters, gauge glasses, horseshoe nails, locks and lock sets, and, for all booking, snowshoes. Glass, putty and white lead in oil are unchanged, but linseed oil and turpentine are slightly lower and higher, respectively. Summer lines of hardware show lessened demand.

Turpentine Shows a Firmer Tone

London, Ont.

TURPENTINE. — A slightly firmer tone is noted in Turpentine this week and prices given are about five cents a gallon higher than last week's quotations. Supplies are plentiful.

Prices as follows:

1 bbl. lots	$2.65	per Imp. gal.
2 to 4 bbl. lots	2.64	" " "
5 gal. lots	2.80	" " "

Linseed Oil Slightly Easier

London, Ont.

LINSEED OIL. — There has been a fair seasonable sale here for Linseed Oil and the price is a little lower than last week's quotations. The following are prices asked:

	Raw	Boiled
1 to 2 bbls.	$2.12 gal.	$2.15 gal.
3 to 5 bbls.	2.11 "	2.14 "
6 to 9 bbls.	2.09 "	2.12 "

Less bbls. add 15 cents gal.

Snowshoes Will Cost More Next Season

London, Ont.

SNOWSHOES.—Higher prices for fall booking are noted on Snowshoes. This advance has been expected with the high prices ruling on lumber.

New prices are as follows:

	Pair
Boys', 10 in. x 33 in.	$2 65
Ladies', 11 in. x 36 in.	3 75
Tramping, 12 in. x 42 in.	4 40
Club, 14 in. x 42 in.	4 85
Shanty, 16 in. x 42 in.	5 25

Higher Prices on Saw Sets and Jointers

London, Ont.

SAW SETS AND JOINTERS.—Higher prices are asked on Cross Cut Saw Sets and on Saw Jointers. The following are latest quotations: Whiting Saw Sets, $8.25 doz.; Lincoln Saw Sets, $11.50 doz.; Perfect Saw Jointers, $4.00 doz.

Increased Price on Ash Sifters

London, Ont.

ASH SIFTERS.—The common wood side Ash Sifter is going to cost more this fall, and is now quoted at $3.75 per doz.

Nails Very Scarce, With Price Firm

London, Ont.

WIRE NAILS.—Are still reported as being very scarce. Stocks are low and

there is no expectation of conditions being any better for some time. Prices remain: For wire, $6.25 base, and for cut nails, $7.50.

Horseshoes Revised Prices

London, Ont.

HORSE SHOES.—The following are revised prices on Horse Shoes:

Iron sizes 2 and larger ...	$8.25	per keg
Iron sizes 1 and smaller...	8.50	" "
Steel sizes 2 and larger ..	8.70	" "
Steel sizes 1 and smaller..	8.95	" "

Scotch Gauge Glasses Are Now Higher

London, Ont.

GAUGE GLASSES. — Higher prices are quoted on Scotch gauge glasses, and the following are prices on the principal sizes:

½ in. x 12 in., $0.75 doz.; 9-16 in. x 12 in., $0.90; 9-16 in. x 14 in., $1.05; ⅝ in. x 10 in., $0.82; ⅝ in. x 12 in., $1.00; ⅝ in. x 14 in., $1.15; ⅝ in. x 16 in., $1.35; ¾ in. x 12 in., $1.25; ¾ in. x 14 in., $1.45; ¾ in. x 16 in., $1.65; ¾ in. x 18 in., $1.85.

Horseshoe Nails Capewell Brand Advance

London, Ont.

CAPEWELL HORSE SHOE NAILS. —Higher prices are in effect on these goods. The advance has been expected and is approximately $1.00 per 100 lbs. more.

The following are prices per lb. with 10 per cent. discount for 25 lb. boxes, and 5 per cent. off for smaller quantities:

No. 3, $1.57 lb.; No. 4, 57c; No. 5, 27c; No. 6, 26c; No. 7, 25c; No. 8, 24c; No. 9, 23c; No. 10, 23c; No. 11, 23c; No. 12, 23c.

Electric Goods Moving Freely

London, Ont.

ELECTRIC GOODS.—There is a good demand at present for electric goods such as electric irons, toasters, grills and stoves, stimulated doubtless by the recent warm weather.

The discount on the Canadian Beauty line is now 27½ per cent. off list.

Rope Sales Good in Harvest Sizes

London, Ont.

ROPE. — The demand for rope continues good, and harvest sizes are moving well with prices maintained. The business in binder twine is brisk.

Prices on rope below:

Pure manila, 35½c base; British manila, 28c; New Zealand hemp, 28c; Sisal, 22½c.

Seasonable Sale for White Lead

London, Ont.

WHITE LEAD.—A fair demand, considering the season, is reported in white lead in oil. Prices continue firm and are as follows: Pure, tons, $20.45 per 100 lbs.; less tons, $20.80; Elephant Genuine, tons, $20.95; less tons, $21.30.

Window Glass in Fair Demand

London, Ont.

WINDOW GLASS.—No change is reported in prices of window glass. The demand continues fair considering season and price remains at 15 per cent. off list for single and double diamond, and 40 per cent. off for cut lights.

Putty Firm and Unchanged in Price

London, Ont.

PUTTY.—Putty continues to be firm with prices unchanged. Quotations are for Standard, $8.30 and $8.55, and for pure, $10.80 and $11.05, for 100 lb. drums and 25 lb. irons respectively.

Summer Goods Show Slackened Demand

London, Ont.

SUMMER LINES.—The demand for summer goods such as poultry netting, screen wire cloth, doors and windows, lawn mowers, refrigerators, garden hose, etc., has slackened off, and sales for these lines are lighter, with no change in prices noted.

Good Demand for Auto Wheel Coasters

London, Ont.

COASTER WAGONS.—Auto Coaster Wagons are having a brisk sale at present, and are quoted at 35 per cent. off list.

Electric Washers Selling Well

London, Ont.

ELECTRIC WASHERS.—Despite recent advances in the cost of these machines business in them is reported as being good, and a good demand has also been observed for both the water motor and the regular hand power washer, as well as for wringers. The cost price of these is still 20 per cent. off list.

Knobs, Locks and Lock Sets Are Marked Up

London, Ont.

LOCK SETS.—Higher prices go into effect on some lines of lock sets, locks and knobs. The advances are from 5 to 10 per cent. higher.

WINNIPEG MARKETS

THERE does not seem to be any slackening as yet regarding higher prices on hardware commodities. This week brings many more advances, with two or three declines. Business is falling off a little, but the hardware jobbers are well satisfied for this time of the year. The worst trouble at present is the fact that goods from the factory are not coming through as they should. Of course this is partially due to poor railway service, strikes and the lack of raw material. There are some important changes this week, including a 10 per cent. advance on galvanized range boilers. Canada plate and wire nails are scarce and high, as are also black and galvanized sheets. Stoves and ranges are still scarce and the price is likely to remain high. Bamboo whips are very scarce and it is not probable that any further shipments will be received from the factory. Hellers' hammers have made a big advance, as also Hellers' horse rasps, horse tooth files and floats. Emery cloth has lower revised prices. Wrapping paper is still advancing in price. Wheelbarrows are in short supply and have again advanced in price. Conductor elbows, conductor shoes, eavestrough mitres, galvanized conductor pipe, galvanized eavestrough have all advanced in price. The price has also been changed upwards on metallic shingles, corrugated iron, steel figures, steel letters and cast iron soil pipe. A decline of ten per cent. is made on Bowman's lime.

Corrugated Iron Revised Upwards

Winnipeg.

CORRUGATED IRON. — The stocks of these are very scarce and what are on hand are being quoted as follows:

Galvanized		Painted	
28 gauge	$9 95	28 gauge	$8 20
26 gauge	11 03	26 gauge	9 45

Metallic Shingles Advance Slightly

Winnipeg.

METALLIC SHINGLES.—These have made a slight advance besires being hard to get. To-day's prices are, for galvanized $11.70 and for painted $9.00.

Steel Letters and Figures Advanced About 25 P.C.

Winnipeg.

STEEL FIGURES AND LETTERS. —A sharp advance has taken place in these, equivalent to about 25 per cent. and the following prices are quoted:

Steel Figures		Steel Letters	
⅛ in.	$1 10	⅛ in.	$3 15
¼ in.	1 80	¼ in.	5 40
⅜ in.	2 65	⅜ in.	8 00

Metallic Siding Advances 5 P.C.

Winnipeg.

METALLIC SIDING.—A further advance to the extent of 5 per cent is now asked for these and prices are: galvanized, medium, $10.13; painted, medium, $7.65.

Eavestrough and Conductor Pipe Higher

Winnipeg.

CONDUCTOR PIPE AND EAVESTROUGH. — Both galvanized conductor pipe and eavestrough have made stiff advances this week. Material is very scarce and supplies are short. No relief as to deliveries is in sight and present quotations, which are 10 per cent. above previous prices, are as follows:

Galvanized Conductor Pipe—2 in., $9.23 per 100 ft.; 3 in., $11.25; 4 in., $14.40; 5 in., $19.80.

Galvanized Eavestrough, O.G. Square Bead—8 in., $7.60 per 100 ft.; 10 in., $8.33; 12 in., $9.68; 15 in., $13.50.

Advances Made on Conductor Elbows

Winnipeg.

CONDUCTOR ELBOWS, AND SHOES AND EAVESTROUGH MITRES are all advanced and the following prices are in effect on these goods:

Conductor Elbows		Conductor Shoes		Eavestrough Mitres	
2 in.....	$ 2 70	2 in.....	$ 3 25	8 in.....	$0 26
3 in.....	3 02	3 in.....	3 78	10 in.....	0 45
4 in.....	4 73	4 in.....	5 63	12 in.....	0 54
5 in.....	12 60	5 in.....	14 95	15 in.....	0 63
6 in.....	14 85	6 in.....	16 20		

Old Dutch Cleanser Marked Up 10 P.C.

Winnipeg.

OLD DUTCH CLEANSER has advanced 10 per cent. and is to-day quoted at $5.10 per case.

Wheelbarrows on Upgrade Another 10% Asked

Winnipeg.

WHEELBARROWS. — All kinds, both steel and wood, are reported to be very scarce and 10 per cent. has been added to the cost. The general purpose now sells for $7.90 and the U.S. for $6.60.

Kraft Wrapping Paper Now Higher

Winnipeg.

WRAPPING PAPER. — The shortage of raw material has caused an advance in Kraft Wrapping Paper which is now quoted at 14 cents per pound.

Higher Prices Asked for Range Boilers

Winnipeg.

GALVANIZED RANGE BOILERS.—The scarcity of these goods combined with an advance made by manufacturers in the East is responsible for an increase in price of about 10 per cent., and the following prices are now quoted:

30 gal., $15.00; 35 gal., $17.50; 40 gal., $20.40; 52 gal., $27.20; 66 gal., $35.00; 82 gal., $48.00; 100 gal., $62.00; 120 gal., $77.00.

Emery Cloth Revised Downwards

Winnipeg.

EMERY CLOTH. — Slightly lower prices are quoted this week on emery cloth, it being one of the few lines to show a decline. To-day's quotations are about 10 per cent. less and are as follows:

Size	Price Ream	Quire
00	$45 00	$2 25
0	45 00	2 25
½	47 00	2 35
1	49 00	2 45
1½	51 00	2 55
2	55 00	2 75

Portable Forges Have Higher Tendency

Winnipeg.

PORTABLE FORGES. — The higher prices shown on heavy iron and steel goods is reflected in the advanced price asked for portable forges which have been marked up as follows:

No. 151, $12.50.

No. 0. $50.00.

Stiff Increases on Blacksmiths' Hammers

Winnipeg.

HAMMERS.—Heller's hammers have been marked up 20 per cent. These goods together with the same makes of horse rasps have been very hard to procure for some time past. Stocks are low and delivery uncertain.

The following are new prices on the better known lines:

No. 5, $27.00 per doz.; No. 6, $28.00; No. 7, $29.00; No. 65, $29.00; No. 64, $24.00; No. 62, $47.00; No. 61, $47.00 No. 60, $47.00.

New Prices on Horse Rasps, Horse Tooth Files

Winnipeg.

HORSE RASPS AND FILES. — New prices are quoted on Heller's Horse Rasps which are 10 per cent. higher. The new discount also applies to the Horse Tooth Rasps and to extra Floats, and is 55 per cent. off list.

Mitre Boxes Revised Upwards

Winnipeg.

MITRE BOXES.—The following numbers in Mitre Boxes have been advanced 10 per cent. and prices now are:

No. 244, $22.00; No. 264, $23.50; No. 285, $25.50; No. 305, $26.50; No. 306, $28.50.

Spades, Shovels and Scoops; Revised Prices

Winnipeg.

SPADES AND SHOVELS. — The following are revised prices on these goods:

D Handle Round Point Shovels—Olds, No. 2, $16.25 net; Jones, black, No. 3, $19.20; Jones, pol., No. 3, $20.20; Garry, blk., No. 2, $16.25; Garry, pol., No. 2, $16.25; Bull Dog, blk., No. 3, $19.20; Bull Dog, pol., No. 3, $20.20.

D Handle Square Point Shovels—Olds, No. 2, $16.25; Jones, blk., No. 2, $18.85; Jones, pol., No. 2, $19.85; Garry, blk., No. 2, $16.25; Garry, pol., No. 2, $16.25; Bull Dog, blk., No. 2, $18.85; Bull Dog, pol., No. 2, $19.85.

Sand Shovels—No. 4, $19.10; No. 5, $19.40.

Moulders' Shovels—No. 2, $19.20.

Long Handle Round Point Shovels—Olds, $16.25; Jones, $19.85; Garry, $16.25; Bull Dog, $19.85.

Long Handle Square Point—Olds, $16.25; Jones, $19.85; Garry, $16.25; Bull Dog, $19.85.

Spades, D Handle—Olds, $16.25; Jones, $19.85; Garry, $16.25; Bull Dog, $19.85.

Long Handle Spades—Olds, $16.25; Jones, $19.85; Garry, $16.25; Bull Dog, $19.85.

Scoops—Jones Socket, No. 4, $23.60; No. 6, $24.35; No. 8, $25.05; No. 10, $25.75. Gary, No. 4, $22.00; No. 6, $22.70; No. 8, $23.40; No. 10, $24.10.

PITTSBURGH MARKETS

PITTSBURGH, August 12. — Production of pig iron by the merchant blast furnaces was 2.9 per cent. lower rate in July than in June, while production by the steel works furnaces decreased 2.3 per cent., making a decrease in pig iron production as a whole of 2.5 per cent. This is a smaller decrease than usually occurs in July, the high humidity in the midsummer period causing a decrease in the output of furnaces individually. As the production of a furnace decreases from this cause, the consumption of coke per ton of pig iron made increases, and the probability is that coke consumption was at a higher rate in July than in June. Thus the slightest decline in pig iron production could hardly be ascribed directly to coke shortage, although it is a fact that there remains a coke shortage. If there were more coke, some furnaces that are banked or cold would resume operations.

Statistics of steel production in July are not available at this writing, but the presumption is that there was a decrease from the June rate of a very few per cent. The decrease in production of finished steel was greater, since not a few steel works have been accumulating semi-finished steel, fearing to put all their steel output in the finished form because the particular material rolled might not be acceptable to customers when shipped. The common rule among mills now is to put into finished form only the amount of steel that can be shipped with such cars as are available.

Transportation Improving

There has been a decided improvement in rail transportation conditions as affecting the blast furnaces and steel mills. The producers are unwilling to admit all of the improvement, fearing the admission would bring demands from customers for heavier deliveries. In fact, the producers have experienced difficulty for some time past in convincing customers that transporation conditions were as bad as they were. A difficulty not infrequently experienced is that of a given customer feeling that on account of his supposedly special condition he should receive special treatment.

The majority of mills now have an even break between their production of

finished steel and their shipments, and in some cases there have been slight reductions in stock of finished steel. On the whole, however, the steel that has accumulated during the past four months or so on account of transportation difficulties has still to be moved, a quantity somewhere in the neighborhood of 2,500,000 tons.

Unfinished Steel Easier

There are reports current of middlemen offering sheet bars at $68 a ton, and possibly even at $65, while the market for some time previous had been quotable at $70 to $75, and some important tonnages had brought the full $75. The mills themselves are indisposed to admit declines, and seek the highest prices possible, even when they have steel for early rolling.. Among buyers of slabs, billets and sheet bars, there is a disposition to hold off as far as possible, in expectation of lower prices, and thus those who come into the market are only those who must have early deliveries. The market is in the curious position of being supported by inability to ship all the steel produced, when at the same time there are some large accumulations of unfinished steel awaiting cars for shipment.

The pig iron and steel markets are extremely dull, but the dullness produces no particular comment, and is not necessarily an unfavorable feature since the markets are always dull in the two midsummer months, and the first fortnight of August is usually the dullest of the whole period.

Need Not Fear Hardware Chain Stores

Wholesaler Who Does Retail Trade is Unfair—Catalogue Houses Are Honorable Competitors—Price Cutting Shows Merchants' Inefficiency

THAT some so-called wholesalers are in reality retailers is evidenced by the fact that complaints of this character are brought up at nearly all hardware conventions. The so-called wholesaler that sells the retail merchant and then enters the same field in competition is neither fair nor just. There are many concerns of this character," said E. P. Babcock, addressing the Congress of the National Retail Hardware Association in Buffalo, N.Y.

"They sell the large or small contractors not only the goods incident to their business, but supply their personal wants as well as those of their friends.

"The country grocer that carries a few tin pails, tubs and oil cans can also supply his friends with guns and ammunition that he never intends to stock. The employees of these concerns buy at wholesale prices and supply not only themselves but others as well.

"The catalogue houses are honorable competitors and are entitled to our respect. If they use leaders or obtain special prices from the manufacturers they are not doing anything different from other large stores.

Harmful Discrimination

"We welcome special prices and try to make the best use of them, but it is up to us to see that we get all the special prices that are given our competitors, otherwise they will have an unfair advantage. I don't need to tell you that there has been discrimination detrimental to the retail merchants. You know it, and many of the manufacturers know it.

"The manufacturer that does not look out for the welfare of the retail merchant is passing up the best bet of his life. Sooner or later he will wake up to find that some other fellow has his business.

"Manufacturers depend almost entirely on the wholesalers to distribute their goods, with the result that the distribution is not always just.

"Most of the merchandise marketed to-day passes through the hands of the retail merchants.

"If the control of the distribution of merchandise should pass from the large number of retail merchants to a select few of the now privileged class the manufacturer that wanted to market his goods in the future would have to accept such prices as were offered him.

"We must make every possible effort to keep this stream of merchandise in the main channel, the channel of retail merchants. In this endeavor we should have the active support of the manufacturers.

How Some Retailers Solved the Problem

"A few years ago in the Middle West a few retail merchants got together to talk over their troubles. They came to the conclusion that the only way they could legitimately have anything to say about the distribution of the merchandise they were handling was to invest some money in the distribution plant. After some hard work and careful thought with the help of competent attorneys, they started what is now one of the most modern and up-to-date wholesale houses in the United States.

"It is needless to say that the trade evils incident to so many jobbing houses are not to be found with this concern, for its stock is owned entirely by retail merchants.

"The wonderful success of this concern is proof of what may be accomplished by men of the right calibre who are willing to unite their efforts for their mutual welfare.

"The Hardware Mutual Insurance is another fine example of united effort. This great body of retail merchants little realize the power that lies behind them.

Need Not Fear the Chain Stores

"We hear much of chain stores but the merchant that is up to the times and keeps his store in good order, his merchandise properly displayed, his windows trimmed, advertises and has a stock of goods which will meet the demands of his trade has little to fear from this source.

"Competent help is also essential to an up-to-date business. Men that have grown up in the mercantile business perform certain duties without giving it a thought. It is as natural for them as it is to breathe, while men not trained in this work have to give it studied attention, thus dividing their efforts and many times failing entirely to accomplish that which is expected of them.

"Where could one hire such men as are assembled here to-day? What wages would have to be paid! Could one expect the same earnest efforts that come from personal interest?

"Would you put aside the results of a life-long effort and introduce your customers to a line of goods which, once it was firmly established, might be withdrawn and given your competitors?

Should Control His Own Business

"The retail merchant should run and control his own business. It is his business to see that the manufacturers' goods reach the consumer with the least possible expense. There is no source of distribution anywhere near equal that of the retail merchant. Why then should we allow others to dictate our policy of doing business? We must work through our associations to overcome those things which are detrimental to the welfare of the retail trade.

"Merchants that do not share in the efforts of their associations for the betterment of trade conditions are in the same class as an American citizen that does not make use of his privileges as a freeman or share his country's burdens. Our Government deports such men or puts them in jail. What shall we do with the slackers?

"We should endeavor to help organize retailers in other lines and unite them in a concerted effort to correct trade evils. The old saying, "In unity there is strength," was never truer than it is to-day. There should be a national congress of associated merchants with permanent officers who would carry on the business. The possibilities of such an association are beyond calculation. We are in critical times, not only on account of trade policies but trade conditions.

"Constantly rising costs have a very

Continued on page 66

Improved Service in Spite of Advancing Costs

Paper Up 300%—Engravings, Wages, Mechanical Supplies, Etc., Have Made Big Jumps—Plans Laid for Further Development in Service to Subscribers.

DURING the past five or six years the retail trade has been faced with a long series of advances in costs, which meant many readjustments of selling prices to the consumer.

Newspapers, such as HARDWARE AND METAL, have had similar difficulties to contend with. Merchants know how cost of paper has advanced. They are large buyers of wrapping paper and paper bags themselves. Our experience indicates that paper has increased in price at least 300% during the above-mentioned period. The general world-shortage in paper and the big demand on Canadian pulp and paper mills has been one of the big reasons for this advance. In some of the Western Canadian cities there has at times been a famine in paper, and in the United States many periodicals have had to conserve it against their will. One large national United States weekly, for instance, has not been sending any papers to Canada for the news stands for many weeeks, and has had to be content with supplying the regular subscribers. In fact they are not going after new subscribers in Canada.

ENGRAVINGS UP 200%

The making of engravings for illustration purposes has increased an average of 200% in cost. All mechanical supplies such as ink, presses, type metal, etc., have gone up similarly.

An increase of 108% has been made in wages in the mechanical department of the MacLean publications.

There has been an increase in rentals of about 100%.

On January 1, next, the postal rate on papers like HARDWARE AND METAL will be increased 200% and in 1922 the increase will be 500% over what it is at present.

During the past year HARDWARE AND METAL has greatly increased its editorial service in spite of advancing costs. Market reports are now being received from practically all the large and important centres in Canada, many of them coming by wire. We have opened our own office in Vancouver in order to keep close to the trade and give our subscribers a better service. Our representatives are continually calling on merchants from one end of Canada to the other investigating their methods for conducting their businesses along aggressive lines. Plans in preparation include a still further development in editorial service in the future.

How I Developed My Paint Department

First Decision to Stock With One Brand of Paint That Would Not Fail in Any Respect — Well-Lighted Paint Section — Constant Message Through Local Newspaper

(Written for Hardware and Metal by a Western Canada Hardware Merchant)

(Continued from last issue)

"ON what did your success depend?" someone may ask. On four things, principally:

1.—Advertising.
2.—Methods of Display.
3.—Right Use of Dealer Helps.
4.—Personal Interest.

An analysis of these will doubtless be helpful, and they will be taken up in order.

Advertising

My first and most important consideration was the wise use of the daily or semi-weekly newspaper. Who does not read the home paper? Few, indeed, that are worthwhile citizens. And so, while direct results were hard to trace I felt that the consistent use of this advertising space was an investment. As a creator of interest in my business and a progenitor of good-will, I am sure it was a fully justified outlay.

Other forms of advertising consisted in the use of country sign boards. These I lettered myself, using a rich, yellow background sometimes and black letters, and sometimes an ultramarine blue ground and aluminum letters. These were effective and possessed the advantage of getting the farmers talking about me and my store. Sometimes I got up a novel float for the local trades' procession, and I nearly always displayed at the fall fair.

Methods of Display

I found a small table or counter near the front of the store an excellent trade developer. On this would be displayed some specialty goods put up so attractively by the paint maker. By pyramiding the various specialties, quite a number of lines may be shown in small or limited space, and a card or two will outline the advantages or price, or both.

Then the main stock I always insisted must be kept in the best of condition, neat, clean, and free from dust. This meant work for the salesmen, but it was time well spent.

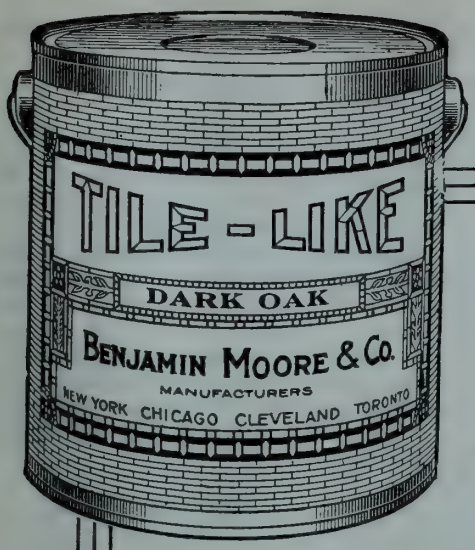
The window displays had my personal attention, as a rule. If I could not get the time for this important work during the day then I took the time at night. I am not an advocate of long hours (although I always worked on this plan myself), but the window display is so important, to my mind, that it should not be slighted, or relegated to a clerk who knows little or nothing about it. If you have a salesman who takes to it, then encourage him, but by all means see that windows are well dressed.

After planning a window, I tried to so arrange it that it was not over-crowded. The background was so important that I spent, if necessary, several hours on it; it paid. Then, when all was complete, I lettered a few plain cards, giving prices, and usually calling attention to the prime advantages of what was dis-

(Continued on page 62)

PAINT? PAINT? PAINT?

There's paint "that is," and there's paint "that aint."
Paint that's mixed with zinc and lead,
Pure linseed oil and a level head,
Is the paint "that is," and be sure of this.
It pays to buy the paint "that is."
Paint "that is" of course comes high,
Like everything else that is worth the buy;
But in the end it is far the best,
For it's there to stay, and your heart can rest.
Paint "that is," as its name implies,
Is paint for the good, the true and wise,
Whose hearts will carry a righteous mirth,
For they gladly pay what a thing is worth.
If for one-half, at the grocer's stand
They offer you sugar, be sure it's sand.
And you'll grit your teeth, when you've used the paint
You bought for "it is" and you found "it aint."
Paint "that is" has a purpose fair
To protect the surface from sun and air,
And while the ingredients now come high,
It's cheap in the end, and that's no lie.
But there's paint "that aint" at about half price,
Made from barytes and lime and rice,
Mixed with John D. and glue and soap,
By the devil's "shade," it's the devil's dope.
When first you buy it seems so nice,
"High grade" paint at about half price.
And you willingly pay a little more
To his "darkness" that spreads it on galore.
He opens the pail of emulsion thick,
And the John D. odor will make him sick
Unless his stomach is lined with brass
Like the dealer's cheek that could make it pass.
He mounts the ladder with buoyant air,
He covers the surface (here and there)
Tries to feel he is spreading paint,
But while he is, he knows he aint,
We could write much more in sad detail
Of the stuff that comes from that awful pail;
It will look quite well for a month or more
And then beware, for you'll be sore.
When your house begins to fade
On the sunny side and in the shade,
When it blisters and cracks, and curls and peels,
Then's the time that the buyer squeals.
But what can he say to his glue and rice,
He got his "High Grade" about half price.
And now my story is full well told,
'Twas not the paint but you that was sold.
So, friend, when you buy, be up to your biz,
Be sure to get the stuff "that is."
Whether it's sugar, clothing, or paint.
There's paint "that is," and there's paint "that aint."



"Save the surface and you save all"—*Paint & Varnish*

Tile-Like

The Ideal Household Stain

Tile-Like is fully established in the realm of the household. Housewives everywhere have acknowledged Tile-Like the most efficient stain on the market. Dealers know this to be true; they know that once a customer has been "sold" on Tile-Like she is a steady customer for all time. The housewife who buys this service-giving stain in your store has confidence in your stock, and repeat sales are sure to follow.

Beautiful Effects

are always obtained when Tile-Like is used on hard or soft wood floors. It erases all scratches and marred spots on old furniture, and gives the summer wicker and porch furniture a new appearance. Linoleum or oil cloth coated with Tile-Like wears longer; it will resist water, and never turns white. One coat of Tile-Like Dead Black applied to tarnished Chandeliers, Lamps or Fire Fronts makes a beautiful finish. These are some of the reasons why housewives buy Tile-Like, and will continue to do so. Think it over.

Educate Public on Surface Finishes

Little Attention Given by Buyer of Articles to Surface Finishes — Manufacturers Are to be Advised of Unsatisfactory Finishes—Dealers Can Help in Campaign to Own Advantage

CARL J. SCHUMANN, president of the National Varnish Makers' Association, in his addresses before a number of the "Save the Surface" salesmen's meetings throughout the country recently, emphasized the idea of including in the campaign work the industrial and finishing phases of the paint and varnish industry. He pointed out that people are daily buying articles on which surface finishes of one kind or another are used, and yet they give these finishes scarcely a thought.

By educating the public in these matters a more aggressive campaign is to be waged by the "Save the Surface" committee upon the makers of these products. Beginning with the December advertisement, and continuing throughout the 1921 advertisements, the "Save the Surface" campaign will directly stimulate a demand for more adequate finishes on manufactured articles of all kinds. Copies of the December advertisement are now ready at the bureau headquarters in this city.

In his address Mr. Schumann points out several common instances of poor finishes such as that often found on children's toys, bicycles, and office furniture. "In the past most people have kept silent in their disappointment, a few complained to the dealer who made good the best he could, but the manufacturer rarely heard a complaint," he said. campaign will result in crystallizing that dissatisfaction and the manufacturer will hear and will be compelled to correct the fault in his goods.

"Today, with few exceptions, finishes are bought on price with an eye to first appearance only, with no thought on the relation of the finish to the use or service expected. Finishes must fit a production schedule—goods to dry in the time set by the manufacturer, with no relation to the drying needs of quality goods.

"You know the present day arguments: ours is not a high-priced product; we cannot pay more than — cents a gallon; the buyer paints it over anyway; our enamel must dry in 2 1-2 hours; one coat is enough for our product; the buyers are crying for the goods, showing they are satisfied with our finish.

"You see the results of such policies on every hand: agricultural implements that rust and rot after one season in the field; machinery finishes that soften and come off from the cutting oils; wood furniture that mars and chips at the least knock; small tools that rust on the dealers' shelves; piano cases cracking within a year; automobiles with bodies dimmed after a few months' use; and many others easily named.

"Today is a sellers' market when anything goes; but tomorrow we will have a buyers' market and the buyers will be particular. The 'Save the Surface' campaign is educating people to realize that they have the right to demand finishes which do save the surface and the time is coming when people will insist on finishes which suit the use, and the manufacturer will listen and give what the people demand.

"You say it cannot be done? We have the best example that it can be done in our own industry. Who will question that any woman will buy a dining table today without insisting that the top be 'valsparred'? That word is no longer a trade-mark. It has entered into the common language of the country as a word which means a wear-resisting finish for table tops. If the advertising of one concern can accomplish that, what cannot be accomplished toward the use of finishes that save the surface of a manufactured product, when our whole industry is back of the campaign?

"With such co-operation the public soon will ask for and the manufacturer will furnish proper finishes for all kinds of articles. All salesmen can help by selling not merely paint and varnish, but preservation, the idea of finishing to save the surface and finishing with material which will stand up under the wear and tear to which that article will be subject in its daily use.

"Salesmen can urge customers to use finishes that do not mar or scratch readily; that do not bloom; sink away into the pores of open grained woods; chip; soften under a moderate heat; that are unaffected by oil; that keep the surface from rusting, finishes that are tough and will stand up under all kinds of wear; colored finishes which do not fade in the sunlight; and many others which will suggest themselves."

Paint Firm Treats Employees to Air Ride

Montreal.—Employees of Brandram-Henderson, Limited, held their twelfth Annual Picnic last Saturday to King Edward Park under ideal conditions. A large number of employees and their friends enjoyed the excursion down the river to this delightful spot. One of the unique attractions of the day was the arrival of the Brandram-Henderson Aeroplane and its subsequent performance of aerial feats in charge of Pilot F. M. Bradfield. This machine, which is owned by the firm, was the one used in the inauguration of the first aerial Paint Delivery service in Canada and has been conducting regular deliveries for the past three months to their agents. Several were given the opportunity of witnessing the beauty of the surrounding country from the air and all expressed themselves highly pleased with the sensation this provided.

One of the interesting items of a successful program was that of a tug-of-war (Lead Works vs. Paint Works.) Winners—Lead Works team.

After this event the winning team were challenged by the Grand Trunk Railway Accounting Office Staff and after a very exciting contest the Brandram-Henderson team were victorious.

Mr. George Henderson, president and general manager of the company, distributed the prizes to the successful competitors.

Pratt & Lambert Holds Convention

An address of welcome by Vice-President J. N. Welter opened the mid-year sales meeting, Western Division Pratt & Lambert salesmen at Hotel LaSalle, Chicago, August 2nd and 3rd. The Central Division, embracing Canadian and Buffalo territory, met August 5th and 6th, at Buffalo, while the Eastern Division assembled in New York, August 9th and 10th, with headquarters at the Vanderbilt Hotel. President J. H. McNulty, in reviewing business conditions for the past six months, stated that the period just passed was the largest in the company's history.

Dominion Oxygen Co. Plans Big Extensions

An important recent announcement is that of the Dominion Oxygen Company's promised erection of a chain of great oxygen plants for separating oxygen from the atmosphere. The first of these plants will be situated in five of the Dominion's industrial centres, and service stations will be established throughout Canada to supply oxygen users wherever there is a demand for the gas, either on or off the railroad.

The first of these plants has already been completed at Toronto. It will supply the Canadian market through an extensive warehousing system, pending the erection of the additional plants. The sites for these additional plants have been secured at Montreal, Winnipeg and other points, so that the work of construction may be proceeded with as rapidly as possible.

Canada to Buy 11,000,000 Lbs. Brass and Copper

The Bureau of Supplies and Accounts of the Navy announces that negotiations are under way with Canadian interests to dispose of 11,000,000 pounds of fabricated brass and copper now held by the Navy Department in excess of their requirements. If consummated this deal will amount to about $3,000,000. The material is made up into seamless brass and copper tubing, pipe, sheet and bar, and is distributed among the various navy yards.

The foundation that stands the weather test.

THE real test of paint comes when it faces the elements—the blazing sun of the Canadian Summer, the cold raw winds of Autumn, the 20 below zero frosts of Winter and the saturating rains of Spring.

Livingston Brand Linseed Oil—"the kind your grandfather used" makes a perfect foundation for paint. Its use ensures durability of the finished product. It stands the Canadian "weather test."

The Blue Barrel is the outward mark of the inward quality.

HOW I DEVELOPED MY PAINT DEPT.

(Continued from page 58)

played. This helped create decision on the part of prospects.

Dealer Helps—Personal Interest

It is almost a crime the way Dealer Helps are sometimes used. Prepared at great cost, these helps are well-designed to help create and develop sales. But they must be used. When mine were received with a paint shipment, or by mail or express, I carefully laid them aside until I wanted to dress a certain type of window. Then they were carefully used and when the window was being dismantled they were as carefully taken down and stored away for future use.

The plan in vogue during recent years—that of supplying the manufacturer with a select list of prospective paint users in one's district had a pretty strong hold on me—so strong that I always took advantage of it. Then, just before the spring painting season opened I had many prospects "sold" on my line of paint, and others were interested, so that they would, in all probability, be buyers when they did want paint. This co-operation on the part of the manufacturer I always considered excellent, and it is one of the best trade-getters I know for this product.

The personal element is so very important. For this reason: Many people come to buy paint and do not know what they require. Here is a great opportunity. How many there are, for instance, who do not realize that a tin of paint needs thinning for the first coat. This can be easily explained and this means an added sale of that much raw or boiled linseed oil or turpentine. For my part, I followed the plan of politely asking what the nature of the job was, the condition of the surface, whether a flat, enamelled or varnished effect was desired. One can always take these matters up tactfully, and win the customer's confidence. In the long run there is nothing so definite or sure a trade-builder. By putting myself in the customer's place I was usually able to get the right viewpoint, and when the sales were made they invariably totalled more than had I not taken that personal interest.

How Hardwaremen Advertise Paints--No. 20

A RATHER new plan is followed out in this paint advertisement by Hick-Sehl Hardware Co., Lethbridge, Alta., which asks the question, The Paint Brush or the Scrubbing Brush? It points out that the day of the dusty carpet, dirty floor and scrubbing brush is waning and that in place is the rug, which can be easily cleaned, and painted floors, which can be cleaned with a duster. Similar arguments may be applied to the use of hardwood floor finishes as sold in the paint department.

The Luxeberry Painter Says:

"SPARE THE VARNISH, SPOIL THE FINISH. Homebuilders should give the same thought to the choice of varnish as to the selection of woods for the interior trim. The finest interiors of natural woods can easily be spoiled by the use of poor or unsuitable finishes. I use Berry Brothers' Varnishes, Enamels and Stains because they produce the highest possibilities in artistic wood finishing."

"The "Berry" label is the only sales argument needed by most varnish buyers.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, August 12. — The paint markets this week are devoid of any outstanding changes in the matter of price, although a few revisions have been made. Linseed oil is, if anything, firmer, and this follows a strengthening of the seed market. October flax was quoted on Wednesday at $3.54 per bushel which is 20 points higher than the quotation of a week ago. English oil has strengthened in tone and in price and some state that it is now higher than available quotations on Canadian crushed oil. Basis of $1.85 per gallon for raw is still being quoted. Turpentine is somewhat freer, due to the arrival of larger supplies and is selling at $2.60 per gallon in barrel lots. There is considerable quiet with regard to both lines but manufacturers have no complaints to make of the seasonable volume of business which they are receiving. Dry colors are somewhat higher, ochres being advanced in some cases 2 cents per pound.

Somewhat Firmer But Unchanged Is Oil

Montreal.

LINSEED OIL.—The strengthening of the basis for flax seed nearly 20 points within the last two weeks has served to halt the lowering basis for oil. Prices are holding at $1.85 per gallon for raw oil and at $1.87½ for boiled. There is plenty of supply at present and orders are somewhat limited.

	Imp. Gal.
Raw—	
1 to 4 barrels	1 85
3 to 4 barrels	....
Boiled—	
1 to 4 barrels	1 87½
3 to 4 barrels	....

NOTE—Owing to fluctuations seed markets jobbers, generally, are not quoting.

More Turpentine in; Prices Take Tumble

Montreal.

TURPENTINE.—The arrival of more than required quantities of turpentine on this market and the limited sale to the trade has induced prices to lower considerably and the basis of $2.60 per gallon is now being quoted. Aside from manufacturing sales the demand from retail trade is limited.

Turpentine—	Imp. Gal.
Single barrels	2 60
Small lots	2 70

(Packages extra.)

Putty Still Holds; Sales Reported Fair

Montreal.

PUTTY.—There is a fair sale for putty which holds on an unchanged basis and supplies are quite ample to meet the needs of the trade. Though linseed oil prices have declined considerably the maintained high prices for English whiting will serve, doubtless, to offset that decline.

PUTTY—	5 ton	1 ton	ton
Bulk, in barrels	6 50	6 75	7 10
Do., ½ barrels	6 65	6 90	7 80
Do., 100 lbs.	7 35	7 60	7 95

Do., 12½ lbs.	7 85	8 10	8 45
3 and 5 lb. tins	9 60	9 85	10 30
1 and 3 lb. tins	11 10	11 35	11 70
Do., in 100 lbs. cases	8 35	8 60	8 95

Steady But Quieter Is White Lead in Oil

Montreal.

WHITE LEAD IN OIL. — No change of any kind has been made in the basis for white lead in oil which holds as follows for Government Standard Grades: Five ton lots per 100 pounds, $19.50; ton lots $20.00 and smaller than ton lots $20.35.

Varnish and Paint Move Fairly Well

Montreal.

PAINTS, VARNISHES. — The movement of prepared paints is as large as can be looked for at this season of the year and the undertone is steady and unchanged. Manufacturers state that there is still some difficulty in the way of obtaining adequate supplies of raw materials, although the small movement at this time of the year does not cause nearly as much concern as it would in the busy season. Containers are also hard to obtain and it has caused some anxiety in trade circles to realize that supplies are not forthcoming in necessary quantities

TORONTO

TORONTO, Aug. 12.—There has been a fair amount of business in mixed paints and varnishes and manufacturers report it as being well above the average, though this is a quiet time of the year.

Putty, white lead in oil, resin and shellacs are holding firm without change in price.

Paint brushes are not likely to be any cheaper next season as far as can be seen at present, as bristles are scarce and sources of supply limited.

Turpentine and Linseed Oil are steady, but outlook is for higher prices.

The glass situation for fall is not regarded as showing any improvement, although some breaks have been offered lately at slightly easier prices.

Putty Demand Normal; Stocks Not Heavy

Toronto.

PUTTY.—The demand for this is reported as being normal, and prices are firm with stocks only medium. Prices as per current market quotations.

White Lead in Oil Firm and Unchanged

Toronto.

WHITE LEAD IN OIL.— The demand for white lead is not quite so active, and prices are all on the same basis as last week, the cheap brands of pure being quoted at $20.35 per 100 pounds in ton lots, with usual higher prices for smaller quantities.

Demand For Prepared Paints Shows Improvement

Toronto.

PREPARED PAINTS. — Manufacturers and jobbers report sales of ready-mixed paints and varnishes, though quieter than a little while back, to be well above the average for this time of the year and appear to be well satisfied with amount of business being done.

Coal Tar and Roofing Pitch Sell Well

Toronto.

ROOFING PITCH AND COAL TAR. —The demand for these is good and prices quoted this week are:

Coal Tar Pitch, $1.30 per cwt.
Crude Coal Tar, $8.25 per barrel.
Refined Coal Tar, $9.50 per barrel.

Roofing Cement Moving Freely

Toronto.

ROOFING CEMENT. — A good business is reported in roofing cement and the wet weather of last month was no

In Year 'Round Demand

Glidden Flat Wall Finish is a product that is in demand the year 'round. It will help you during the months when your sales slow up. It will keep profits coming in every month in the year.

Like other Glidden products this Flat Wall Finish sets new standards for real quality. It does not lose its soft, rich tone through frequent washing. Glidden Flat Wall Finish comes in white and fourteen delicate shades. It is a most satisfactory finish for rough or smooth plaster, as well as wood, cloth, metal or wall board surfaces.

The Glidden Company's plan of *"all year 'round"* advertising will keep the subject of painting before your customers every month of the year. Put in a stock of Glidden products now and get your share of this business. Write for dealer proposal.

THE GLIDDEN COMPANY, Limited
Toronto, Ontario
Branches at **Montreal and Winnipeg**

doubt responsible for a large number of roofs being given a coating of cement.

Believed Shortage of Glass For Fall

Toronto.

WINDOW GLASS. — The situation in regard to window glass for fall delivery is not improved and despite a flurry caused by some dealers selling certain sizes at slightly easier prices no improvement in pieces or supplies for next season is considered likely by many importers. Information to hand tends to show that the largest manufacturers are only accepting orders from their older customers and then only on a basis of a percentage of last year's orders.

Reports are made of glass orders placed for last spring's delivery which are not yet shipped. Factories in some cases are starting up again but are unable in many cases to get cars or raw material.

Turpentine Firm, But Advances Likely

Toronto.

TURPENTINE. — The market report on turpentine shows firmness with a prospect of an increase in the present price.

Shipments of from three to four thousand barrels have been reported from Savannah but stocks are largely below the average.

Prices are as last week generally, namely:

1 barrel lots, $2.65 per gallon.

2 to 4 barrel lots, $2.64 per gallon.

Less quantities, 5 gallon lots, $2.68 per gallon.

Linseed Oil Weak; No Great Activity

Toronto.

LINSEED OIL. — The situation in linseed oil is practically the same as last week. The market is reported weak with no greater demand. The crushers' prices have advanced five cents and a firmer tone in seed is in evidence.

The price of paint oil is at the present time considerably lower than it has been for a long while, but with demand less not so much interest is shown by buyers as at normal times.

Prices ruling are as follows:

Linseed Oil—	
1 to 2 barrels, gal.	2 17
3 to 5 barrels, gal.	2 16
10 barrels and over, gal.	2 14
Boiled.	
1 to 2 barrels, gal.	2 20
3 to 5 barrels, gal.	2 19
10 barrels and over, gal.	2 17

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market; les sthan barrel lots are 15c per gal. higher than single barrel price.

ENGLISH AUTO ACCESSORIES WILL COME

Continued from page 43

a choice of two or three hot meats, vegetables, etc., for a few pence per meal. In this way production is made possible as it would not be under poor working conditions. Recreation is also arranged for."

Then, since the beginning of the war, when so many plants were commandeered, the expansion and erection of new plants has afforded the highest and most modern type of factory, with sanitary and lighting conditions and all other arrangements conducive to increased production. Mass production, too, Mr. Rose states, has been given a great deal of attention over there.

Increases Not Over Excessive

Asked as to the higher prices that are now obtaining for many manufactured goods, and particularly for those made of high-grade steel, copper, etc., Mr. Rose said that, although there had been increases, in some cases, of several hundred per cent., mass production and the better working conditions already outlined had served to offset advances very considerably. "In some instances where the manufacture of other lines has increased cost 400 per cent.," he said, "this line has not advanced more than probably 300 per cent."

"Great care is taken to make accessories according to specification. If a copper screw is called for, for instance, a workman knows that that material must be used for the purpose and no other. These mechanics cannot be induced, under any circumstances, to slight their work, or to use material that is inferior in any way. A high standard is maintained always."

Another point made was that the steel and various other materials required were to be had promptly in England. This was made possible through extensive and far-reaching connections that enabled the manufacturer to be independent, in some respects, of the open market.

NEED NOT FEAR HARDWARE CHAIN STORES

Continued from page 56

unsettled effect on a merchant's peace of mind. No subject is talked of more or understood less.

Illustrates Advance in Prices

"I have selected ten staple articles taken at random from 1917 bills and compared the prices with those billed in 1920, and find an approximate increase in value of 40 per cent. With this as a basis to work on I find that a merchant who was able to take care of his trade with a $10,000 stock of goods in 1917, must have a $14,000 stock in 1920 to render the same service.

"Let us take one item: in 1917 linseed oil cost 95 cents and in 1920 it cost $1.85.

"A buys oil in 1917 at 95 cents and sells three gallons at $1.25. In 1920 he buys oil again at $1.85. His actual investment in oil not counting his labor is $1.85 minus 90 cents profit or 95 cents.

B buys oil in 1917 at 95 cents and does not sell any, his investment is still 95 cents. Increase in the assets of a merchant does not necessarily mean that he has made a profit by the conduct of his business.

"B made as much on oil as A and did not do any business. This means that the merchant that has not kept his merchandise up to the market price, while he may have more dollars, has lost in the relative value of the merchandise. In other words, if he had locked his doors in 1917 with a $10,000 stock he would have a $14,000 stock in 1920.

Price-Cutter Usually Comes to Grief

"The best merchants have been unable to keep all their goods up to the market price but in so far as they have they saved that much, while the inefficient merchant has been a price-cutter and loser to that extent. A price-cutter usually comes to grief sooner or later. In this case he will be in a bad way when prices decline. On a declining market a merchant that keeps a well balanced stock and turns his goods often will be able to sell most of his merchandise at the prices he originally marked them. He can then replenish his stock at the lower prices. The declining market will demonstrate who are and who are not merchants.

"This is a time when credits should be looked after very carefully. One of the greatest reasons for failures to-day is the lack of understanding of credits. Most merchants are poor insurance men and need instructions along that line. Values to-day are so much higher that all insurance should be materially increased.

"The proper pricing of goods is also very essential. This is fairly well understood by most merchants, but there should be some way of maintaining established trade marked prices.

"A careful study should be made of the relative values of expense and sales. If the per cent. of increase in expenses is greater than that of sales the difference must be added to the mark-up to yield the same per cent. of profit.

"Last but not least: Meet your customers with a smile, a cheery word, a hearty hand shake. They also have their troubles and a word of cheer often works wonders. Be honest, just, sympathetic and accommodating but firm at all times.

"Remember that the Golden Rule is the best rule made and should be part of the stock of all hardware merchants."

Establishing the Reputation of a New Firm or Extending the Reputation of an Old One

When the shrewd, modern advertiser has successfully harnessed the great power of publicity to his business, his next operation is the selection of a definite objective. Perhaps one of the most familiar objectives that makes his continuous advertising productive and profitable is the establishing or extending of the firm's reputation by a regular weekly message to the whole hardware trade of Canada setting forth the claims and policies of the house. The trade invariably prefers to purchase from a concern that has become familiar in the pages of their favorite trade newspaper—HARDWARE AND METAL.

SIMONDS SAWS

Simonds Crescent Ground Cross-Cut Saws are the most economical saws to buy in the long run. They stand hard usage and wear exceptionally well, hold their cutting edge and temper longer than the ordinary saw and do not bind in the kerf. Lumbermen prefer the Simonds Crescent Ground Cross-Cut saw because they have proven that it will cut 10 per cent. more timber than other brands.

TIME SAVER

The BT Ready-To-Ship Pump No. 5

W. R. RIEF

Mr. W. R. Rief is one of our most successful hardware salesmen and works under direction of Montreal branch. He understands the Pump business very thoroughly and has met with specially good success in this line.

The Ideal Hot Weather Pumps

The Well Pump Trade always gets brisk in the hot summer months.

For all work demanding large capacity combined with easy pumping, sell the BT Ready-To-Ship Pump No. 5.

When the horses and other stock are extra thirsty, Mr. Farmer needs an easy-working pump of large capacity.

BT R.T.S. Pump No. 5

The BT No. 5 Pump is specially made for watering stock. It has a capacity of from 1,200 to 1,800 gallons per hour. One purchaser in the West watered sixty head of stock all through the summer with one of these pumps. It takes big capacity for this work.

The "No. 5" has three strokes to accommodate wells of different depths.

The standard is strong and heavy. Pins are extra large. Cylinder is 5 x 12 with brass valve seat.

All waterways are large. The handle bearer is designed so that no energy is wasted on side play.

Patented clip supplied on standard, so that junction of spout and suction pipe can easily be got at.

Supplied either force or lift.

This is the best stock pump made and is a favorite everywhere.

Write for catalogue and prices to our nearest branch.

TINKER TOM'S TALKS.

No. 272

ALL SHEET METAL WORKERS AND MANUFACTURERS

are cordially invited to call at the booth of **Peckover's, Ltd., Machinery Hall, Toronto National Exhibition,** where an exhibit of

TONCAN METAL

Galvanized Sheets is being made—

A mill representative will be there to consult with on sheet metal uses.

Plenty of Toncan Metal Advertising Matter on hand. Ask for a Toncan Metal Estimating Book —it's valuable.

TINKER TOM.

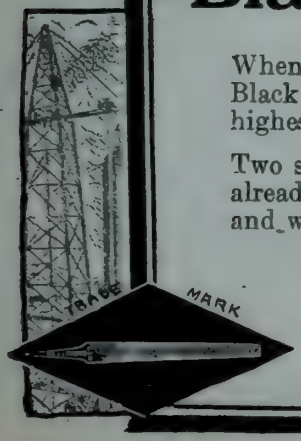
Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Stephens

Economy *Durability*

Barn **Paint**

Permanence *Spreading*

"Save the surface and you save all" *Paint & Varnish*

The Four Cardinal Points

of the many selling features of *Stephens* Barn Paint are shown above. The farmer to-day is not only painting to save the material but he wants his buildings to reflect credit on him.

The modern farmer is efficient and successful, and determined to have his building look efficient. He wants *Stephens* Barn Paint because it is reasonable in cost, durable under weather attacks, permanent in color and spreads easily, covering well. It stamps the barn owner as an alert, progressive farmer. There are many other selling points that help to close your sales.

An Agency will pay you—Ask about it

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND
ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

The "Sanitary"

Specially Constructed Dasher

A practically noiseless machine, due to the spiral cut gears. This efficient, dependable machine has many powerful selling points to impress your customers, such as a specially constructed dasher — more thorough, covered gears — safety; a lid with assisting springs—a labor-saving that appeals to women; a superior cover lock. While the "Sanitary" thoroughly and safely washes either delicate laces or the heaviest blankets, its splendid construction assures less wear than the old tub method.

Sanitary Diamond "A"

"Twiplex" Vacuum

"Twiplex"

Appeals to the Housewife

The vacuum cups force hot suds through the clothes on both upward and downward strokes, resulting in a thorough cleansing without the destructive wear that occurs in many other washers.

Smooth, quiet running, automatically cut gears are stowed away beneath the tub, safely out of the way. This gives balance and stability, beside eliminating the lifting of the heavy gears when the cover is raised. This labor-saving washer is operated by a wooden-handled lever, or by a foot stirrup provided to operate the machine while sitting.

The vacuum cups, shown in the cut, can be raised or lowered on the plunging shaft. This permits four different adjustments to suit large or small washings. This wonderful washer has been tested and proved. It's a sure and satisfactory seller. Write for information.

Defies Destruction

The Bristles in the SIMMS PAINT BRUSHES

are set in by a unique and exclusive process which has been developed by the expenditure of a large amount of money, and genuine hard work.
The setting is as strong as adamant, and cannot be destroyed.
This brush can be used for years in all kinds of paints, varnishes, oils, hot water, paint removers, etc. and never release a single bristle.

TRADE SIMMS SET IN RUBBER MARK

is the brush your painter customer wants. Stock it for him, and get his trade and appreciation.
For your general trade, we have the following line of high quality products—

BROOMS
WHISK BROOMS
LATHER BRUSHES
SHOE BRUSHES
STOVE BRUSHES
SCRUBBING BRUSHES

Communicate with our nearest branch, for prices, etc.

PICKS

No. 5

Made of best high-grade, open-hearth steel, hammer forged and correctly tempered. Finished in black with polished points.

THE WARREN TOOL & FORGE COMPANY
234 Griswold St. Warren, Ohio, U.S.A.

No. 1 Fire Pot
List Price, each $27.20
Ask for Discount

How to Save Gasoline

The No. 1 Fire Pot has the highest degree of heat generating power with the smallest consumption of fuel. The saving in gasoline alone will soon pay the cost of the Fire Pot. The No. 1 is the greatest general utility Fire Pot made and is favorably known to all mechanics. The tank is made of seamless drawn steel, with large funnel and filler plug, and the powerful burner is swiveled so that the flame can be placed where needed. Jobbers supply at factory price. Send for catalog.

Reed's Patent Plastic Asphalt Roof Cement

repairs cracked joints, nail holes and defective places on slate, metal, gravel and prepared roofs.

This cement will repair a roof WHERE SOLDER CANNOT BE USED.

It is VERY ADHESIVE and sticks firmly to anything forming a tough leather-like skin over the top; WILL NOT RUN or loosen from joints or cracks in Summer or Winter.

For twenty-five years, in all climates, this cement has given perfect satisfaction and its supreme usefulness makes it one of the best-selling items in a hardware store when properly displayed.

Put up in 1, 5, 10, 125 and 500 lb. containers

Model

BRITISH MADE

The same care and accuracy used in making the celebrated Martini target rifle is embodied in the making of this model.

Its accuracy on the target range is well known, and it is popular among small game hunters. A careful inspection is given every rifle before leaving our factory. The B. S. A. Guarantee insures satisfaction.

The extensive B. S. A. organization and plant are now fully occupied with the manufacture of various B. S. A. Rifles, and are in a position to give your inquiries prompt and efficient service.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

Unpainted Houses

How many in your locality?

Have you an outside salesman? Has he a list of the houses and other buildings in your vicinity that need painting? Has he called on the owners of these and talked "paint insurance" and improved appearance?

These owners can be "sold" by a properly-directed appeal to self-interest. Self-respect demands neat, well-painted buildings on anyone's property. A couple of coats of O.P.W. makes a house worth more money in appearance and in fact. Are we represented in your territory?

If there is no O.P.W. sign over your store now, we have news of interest to you

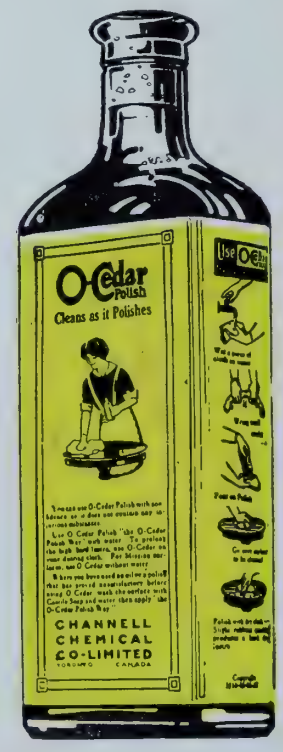
On Reflection



Most merchants will agree, that the following features are those most desirable in a product that is to bring them quick and profitable returns.

Quality—should be standard and uniform.

Selling points or uses—many and varied.

Sale — steady the year 'round.

Satisfaction—found in the use of the article — should make sales through recommendation.

Profit—a fair proportion of each sale.

Turnover — should be rapid.

It should be backed by dealer helps, signs, window cards, etc.

AND IT SHOULD BE WELL ADVERTISED

Now, consider O-Cedar Polish. Compare it with this list and see if it does not possess every one of the selling features mentioned above.

Order from Your Jobber

"The Trade Mark known in Every Home"

UNIVERSAL

Home Helps

Proof in Work—Not in Words

Anybody may claim that the moon is made of green cheese, but nobody ever ate it with crackers. Shallow claims do little in selling household appliances to the woman who thinks with her head and works with her hands.

Universal Home Needs are not objects of "Claims," but subjects of **work.** They render service that registers **results**—the kind that can be **seen, felt and tasted.**

When you sell Universal goods you can **prove in the home** what you claim in the store. You are dealing in work done—not merely words spoken. "UNIVERSALIZE YOUR KITCHEN" is widely advertised advice to women. Thousands are taking the advice, to their benefit. They are building business for "The Universalized Store."

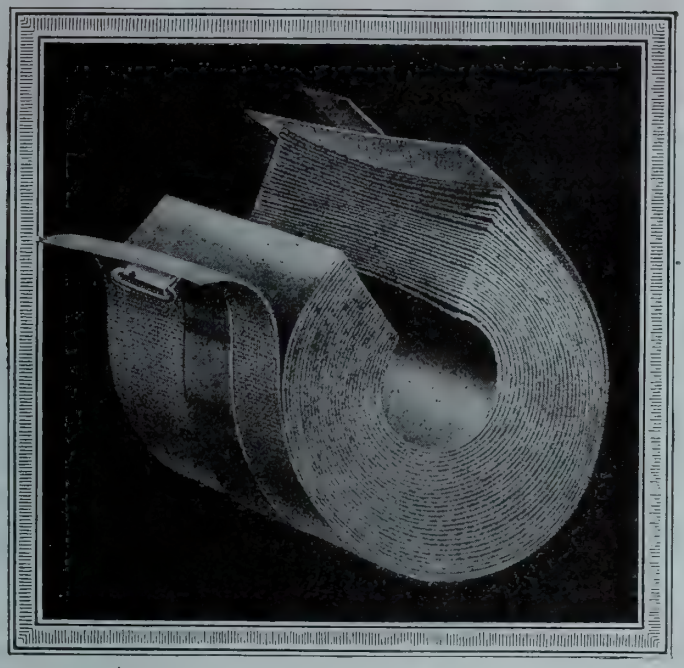
Asbesto-Sponge



SOMETHING NEW? Hardly! For instance, here's a case that can probably be equaled—maybe excelled—but only by another lot of Johns-Manville Asbesto-Sponge Felted Pipe Covering.

Back in the days when Cleveland was President; when Cuba was struggling to throw off the Spanish yoke; before automobiles were taken seriously by more than a few people and when aeroplanes were said to be "impossible," a certain firm put some Johns-Manville Asbesto-Sponge Felted Covering on its steam lines.

Twenty-two years later that Asbesto-Sponge Felted Covering was still giving the best of insulation service, but the piping had to be dismantled because of change in the layout.

—And after 22 years of hard service this Johns-Manville Asbesto-Sponge Felted Insulation had retained its original properties—and its insulation value was unimpaired.

So when we say Johns-Manville Asbesto-Sponge Felted is the best commercial insulation known, we're not talking about something new. We're telling you about a material of known value which has withstood the hard test of years of efficient service.

In our booklet there are more facts of value. Send for it.

WHAT SHALL I DO THIS FALL IN THE MATTER OF BUYING?

That is the question now before the Canadian hardware trade. It is a pertinent and important matter that means much to every buyer, be he retailer or jobber.

WHAT ARE THE FACTS?

For many months business has been good and sales have increased on both staple and special lines. The energetic hardware man has enjoyed better business than ever. And he has done so under the severe handicap of being unable, always, to obtain the goods he wanted, and which his trade demanded.

Shortages have been numerous, and still are. This applies in a special sense to manufactured products made of iron and steel, sold largely through the retail hardware trade. At this time there is nothing to indicate that this condition will soon be righted. Booked orders have piled higher and higher, and those who have ordered these goods want them and are not cancelling.

Building conditions have been active and immense quantities of hardware have been absorbed. Normal building activity still continues, and of one commodity alone—nails—there is not sufficient to meet the trade needs. This shortage but emphasizes the shortage of other steel and wire products.

"DECLINING PRICES IN A WORLD WHERE ALMOST EVERY IMPORTANT ARTICLE IS IN SCANT SUPPLY SEEM ALMOST IMPOSSIBLE."

This quotation from the monthly report of the Royal Bank of Canada comes from a representative financial institution. These banks usually act and speak conservatively, and in that brief statement there is food for thought. They say in the same report:—

"PERMANENTLY LOWER PRICES ARE HARD TO JUSTIFY"

Canada is growing—must grow apace, and with the opportunities at her command; with promise of big crop returns, and with every advantage at her disposal, there is reason for continued optimism.

IF YOU NEED HARDWARE BUY IT AND BE PREPARED. OUR STOCKS ARE ALWAYS LARGE; SELECT FROM THEM

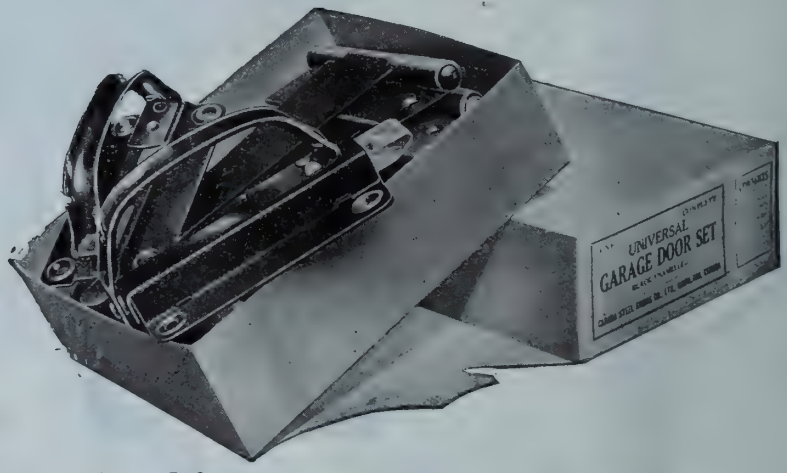
Universal Garage Door set

The Common Sense Set



Packing that Saves You Money

3—Pair 8 inch Extra Heavy Tee Hinges.

1—No. 1055 x 6 inch Wrought Steel Chain Bolt.

1—No. 1056 x 6 inch Wrought Steel Foot Bolt.

1—No. 1240 Wrought Steel Door Latch.

When you have to hunt up several parts, unwrap them, count the screws, etc., you consume your own selling time as well as trying your customers' patience.

This neat style of packing—the C. S. G. Co.'s Style—saves your time and the customers', and prevents mistakes in selecting parts.

The set weighs 10 lbs., packed 6 sets to a case.

Canada Hangers

Smooth Easy Runners

The Canada — a flexible steel hanger—is a splendid performer on the job. It runs smoothly and easily on anti-friction, steel roller bearings, using the same track as our popular National Hanger.

The Braced Rail is 1¼ x 3-16 inches and is furnished in lengths of 4, 6, 8 and 10 feet; 8 lengths to the bundle. "Canada" Hangers cannot jump the track. They come neatly and conveniently packed one pair in a box, complete with bolts. Be sure to include "Canada" in your order. It will pay you.

Sales and Profit in Builders' Hardware—

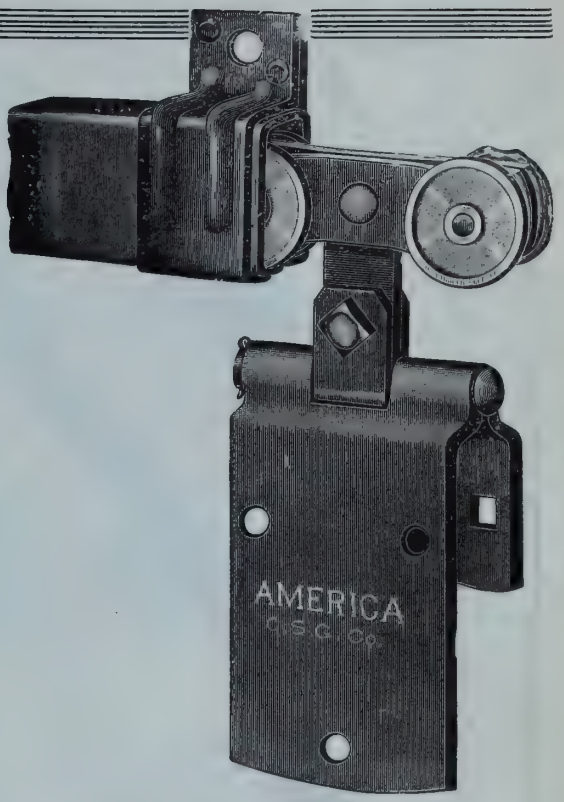
Steel Goods

THE HATCH GARAGE DOOR OUTFIT

Perfect Satisfaction at Low Cost

Exceptionally easy to "Put Up." Full directions are packed with each set. Slamming or sagging of the doors is impossible; nor can snow and ice interfere with their working easily and reliably.

The Hatch Garage Door Outfit is rich in selling points. Its performance is so reliable and satisfactory to the user that sales of Hatch Garage Door Outfits lead to more future sales and permanent business. It is not a "cheap" set but a good set. High cost is not necessary to obtain satisfaction in a garage set.



America Hangers

Canada's Best Seller

If you are not now sharing in the sales of this "best seller," and others of the popular Canada Steel Goods Line you are overlooking an opportunity for constant, profitable sales.

"America" is for warehouse, factory, garage and barn doors. It has tandem trucks, hardened roller bearings and an apron 6 in. long, 3¼ wide.

Adjustments simple. Anti-friction, forged steel yokes.

Each pair includes: 2 end caps; bolts for hangers, and lag screws for brackets. Packed one pair in a box complete with screws and bolts.

WHEN LINCOLN FREED THE SLAVES

BOURNE SPOONER was an overseer in a rope walk in New Orleans, employing slave labor exclusively. He was a northern man, a strong opponent of slavery. He saw the economic inefficiency of unpaid labor. He believed that better rope, at less cost, could be made in the north by free men. So he resigned his position and in 1824 came back to New England to prove his contention, choosing Plymouth as the site for his new rope walk.

When in 1863 Abraham Lincoln signed the historic document that struck from over a million black men the shackles holding them in bondage, this company had proven over a period of 39 years that slavery was an economic waste.

The rope made at Plymouth was good rope — so good that the old rope walk has expanded until the buildings of the company now house the largest rope works in the world.

Westclox

—that orange and buff salesman

WESTCLOX alarms show their colors. Folks have come to know them at a glance by the bright colored orange and buff, six-sided tag that each clock wears.

This mark helps your customers spot a good alarm clock at a distance—in your window or at the other end of the store. Close up, the name—*Westclox*—on the dial serves as an additional identification.

Both mean that the clock has that good Westclox construction that made the line famous.

Many a merchant recognizes our orange and buff tag as one of the best salesmen in his store. It brings in old customers and new ones. And it sells lots of merchandise besides alarm clocks for him.

Retails Profitably at a Popular Price

Probably a forked stick and hot stone were the first cooking utensils ever used. As civilization advanced, man improved his cooking devices. Now, in this twentieth century, aluminum is accepted as the ideal metal for kitchen utensils. It is durable, takes heat readily, holds it long, and neither chips nor cracks.

VIKO, The Popular Aluminum, is a better aluminum ware. Of improved design and sturdy construction, it not only sells readily but gives perfect satisfaction in use. And it can retail profitably at a popular price. There's a Viko utensil for every kitchen need. For dealer's proposition—

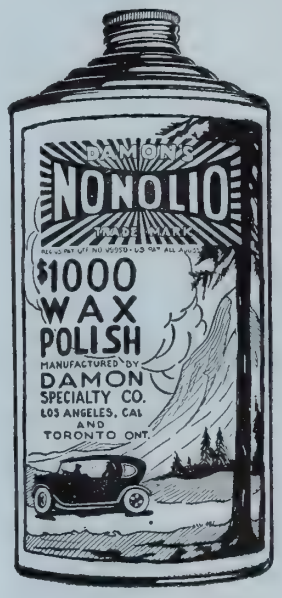
"NONOLIO"

(*No-Oil*)

-the Famous California Polish is Now Made in Canada



Hardware retailers and jobbers who know the reputation of "Nonolio" in the United States will welcome the announcement for it fills the need of Canadian motorists for a polish which not only gives a high permanent lustre, but preserves the finish for the life of the car.

"Nonolio" is backed by a $1,000 guarantee that it contains no acid, oil or alkali. It removes mud stains and protects the finish from mud and water spotting.

"Nonolio" is dust and waterproof and gives a lustre so hard and dry that it cannot be finger-marked.

Hundreds of Canadian motorists are to-day using "Nonolio" exclusively and back up every claim we make. You should be selling "Nonolio" in your district. Be the first in your town to show and demonstrate this famous automobile and furniture polish. It cleans as it polishes with only one operation.

View of interior of Russill Hardware Co.'s Store, Toronto, showing Dayton Hardware Scales recently installed

DAYTON SERVICE IN CANADA'S BIGGEST BUSIEST STORES

THERE is a reason why the live, progressive merchants prefer the Dayton Hardware Scale. For instance—

Aniline dye was selling at 25 cents an ounce. A Dayton salesman strolled in. "Try it on my machine," he suggested. The old scale had just been wheezing in its old-fashioned way: "One ounce." The Dayton said: "42 cents!"

The minute hand hadn't travelled far before the Dayton salesman was obeying Mr. Russill's summons: "Come up to my office!" And this is what he heard: "I don't want one of your machines. I want TWO."

Let the lesson of successful business men guide you. The Dayton is the real, high power machine of modern merchandising.

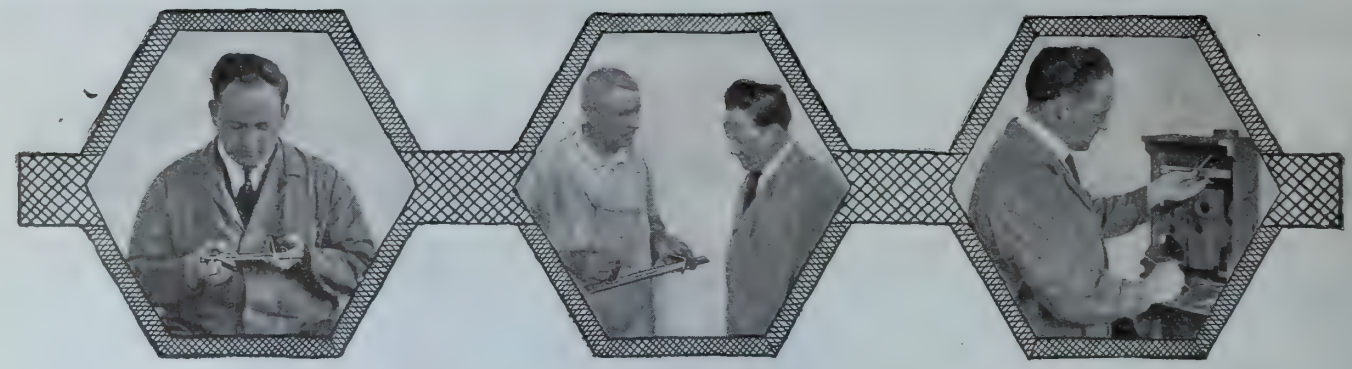
Ideal Toboggan Construction

Our No. 2 Toboggan is made exactly like our No. 1, with the exception of the hood, which has the two outside slats turned in under the hood, giving the toboggan a better looking shape and protecting the hood from breaking. This toboggan is made of seven clear birch slats, 2½ inches wide and ⅜-inch thick. The side ropes are of the best quality of cotton and 7-16-inch diameter. The hood and body are finest oil finish. Full width of toboggan, 17 inches; weight per lineal foot, 2 lbs. Lengths: 3 feet, 4 feet, 5 feet, 6 feet, 7 feet, 8 feet.



BROWN & SHARPE TOOLS

For three generations the choice of the best mechanics because of—

1 *APPEARANCE.* Every mechanic appreciates the fine finish of Brown & Sharpe tools. The clean-cut graduations, the nice balance, the careful adjustment of fitted parts —all appeal to his sense of mechanical excellence.

2 *REPUTATION.* For seventy years the signature "B & S Mfg. Co." has meant to the average mechanic accurate, reliable machinists' tools. He learns it as an apprentice, proves it as a journeyman and passes it on to his own apprentices.

3 *EXPERIENCE.* The strongest factor of the three. While appearances might deceive, reputation be the echo of another's opinion, actual, first-hand experience renders the final decision—that's why most mechanics ask for Brown & Sharpe tools. Do *you* carry them?

BUTTERFIELD

Butterfield for Accuracy

and for 'standing up to the work'

Mechanics everywhere and the responsible plant executives—purchasing agents especially—know Butterfield tools and have confidence in them. In fact, just a little more than confidence—mechanical men respect and admire Butterfield tools, because the way they do their work and stand up to severe requirements compels respect, admiration and esteem.

This attitude of mechanical men has long since led to sales for Butterfield's that command the respect of every hardware man who intends to have satisfied customers and repeat sales.

BRASS VALVES

"With the Composition Disc"

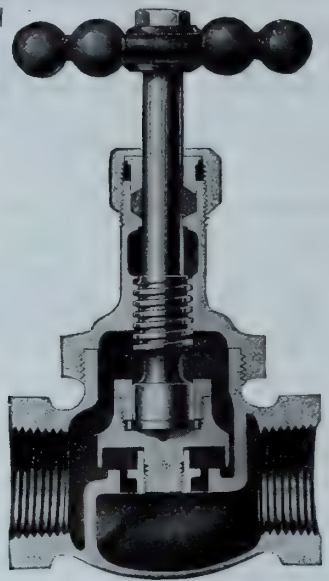

Fig. 550-S

"Outside Bonnet Construction"

The first improvement made in brass valve construction in generations past

Government Approved for 175 lbs. Steam Pressure.

What the outside bonnet construction means—
It prevents corrosion of threads. It prevents spreading or enlarging bonnet end of body when tightening down bonnet to place. It eliminates all strains or stripping of threads. It makes a more compact valve, consequently a stronger one. The discs used in these valves will give long life under severe conditions. Every valve is fitted with packing gland and follower. Workmanship and finish unequalled anywhere.

ARMCO
Ingot Iron ENAMELED PRODUCTS

What makes them so beautiful?

THE housewife strokes the polished surfaces of her Enameled Refrigerator, Kitchen Cabinet and Table Top, all of which are made of Armco Brand of American Ingot Iron. She runs her eye over the enameled parts of her kitchen stove made of the same metal, and marvels at the sleek perfection that she both sees and feels. Where are the usual rough places? Is the smoothly beautiful finish due to some new and wonderful process of enameling?

Enameling processes are improving all the time, but the real reason *is the remarkable purity and evenness of the metal underneath the enamel—American Ingot Iron.*

It is made so even and so free from occluded gases, seams, scars, cracks, spots, and other defects that commonly cause blemishes in enameled products, that the coating of enameling goes on smoothly and perfectly, and stays that way.

Many leading stove manufacturers have practically eliminated their "culls" because they now use Armco Brand of American Ingot Iron exclusively in the manufacture of their stoves, kitchen cabinets, and table tops. The Sanico Porcelain Range and the Leonard Cleanable Refrigerator, together with the Kitchen Cabinet and Table Top pictured in this advertisement, are made from American Ingot Iron of the well-known Armco purity and quality.

We are always glad to aid housewives in securing Enameled Products made of Armco Brand of American Ingot Iron for their homes. Write us.

THE AMERICAN ROLLING MILL CO.
Box 305, Middletown, Ohio

The trade-mark ARMCO carries the assurance that products bearing that mark are manufactured by The American Rolling Mill Company with the skill, intelligence, and fidelity associated with its products, and hence can be depended upon to possess in the highest degree the merit claimed for them. For Permanency and Attractiveness Label Your Goods With Canadian-Made

Decalcomania Transfer Name Plates

"W & B" Wrench Board

The Whitman & Barnes Manufacturing Company, St. Catharines, Ont., are putting out an attractive new board for displaying their drop-forged wrenches. The background, it is stated, is light golden oak, the display card is black with gold lettering.

The wrench board is designed, it is stated, to be of greatest assistance to both the dealer and the purchaser. Each wrench number is plainly marked in red, and wrenches, it is stated, may be had either semi-finished or black enameled finish. As the new board is only 8 inches wide by 28½ inches high, it may be used to advantage, it is claimed, in the window as well as in its more usual location on store column or walls.

The assortment of ten sizes of double-headed wrenches, three of each size, is not intended, it is stated, to be complete or to take the place of the dealer's regular stock. It includes the most popular sizes for general use, and so serve as a guide, it is claimed, to the purchaser as well as a silent, but effective, salesman and storekeeper for the dealer.

Reprinted from Hardware and Metal

The Hardware Dealer and his customers know that they are getting your goods when you have them labeled with

DECALCOMANIA
Transfer Name Plates

Every article which the manufacturer is not ashamed of should bear its own identification label—evidence that its maker is prepared to stand back of its quality.

A Decalcomania Transfer Name Plate is the only method of permanently marking wood and metal articles. It is easily and quickly applied and cannot be removed without showing intent, so safeguarding your product.

Your trade-mark can be reproduced in actual colors on your product, can be made as bright and attractive as you desire.

Decalcomania Transfer Name Plates—the genuine, are made in Canada by our company, and cost less than metal or celluloid markers and are supplied here in Canada for less than similar products can be imported from the U.S.A. We guarantee them fully as to quality of work **and give prompt delivery.**

We have an art department at your service. Give us an idea of your requirements—and we will be pleased to submit sketches and estimates free of charge.

MAXWELLS LIMITED, ST. MARYS, ONT.

If interested, tear out this page and keep with letters to be answered.

Why not use *salesmen* as "specialists"

WOULD it be considered a "stretch of imagination" if one were to picture a troubled superintendent or works manager telephoning a local jobber to "send up Stimson your salesman, as we're up against it on our threading job"?

Such a thing is quite possible.

Threading problems are increasing on account of the larger production and closer accuracy demanded in the screw-cutting industry.

Supply Houses who are "looking ahead" can see the benefit to be derived by having their salesmen educated as "specialists" in screw-cutting problems and are using GTD Threading Specialists as instructors.

Why?

Because GTD specialties such as the "*Gun*" Tap with its shearing-cut and the "*Acorn*" Die with its precision adjustment and increased production capacity are overcoming threading troubles wherever they are introduced, and are raising the prestige of the jobbing houses connected with "GTD" Tools, which means, of course—"more business."

Dealers carrying the GTD line of screw-cutting tools and specialties are entitled to the advice and instruction of GTD Threading Specialists for their sales staff, which enables them to "advise" on threading matters, command the respect and attention of their customers, and incidentally promote further trade.

CARBORUNDUM PRODUCTS

SHARPEN THE TOOLS OF THE WORLD

CARBORUNDUM Sharpening Stones, Grinders and Strops sharpen the tools of the world.

In the shop, the home and the field they are keeping the tools of the mechanic, the householder and the farmer on edge.

Carborundum is very hard and very sharp.

It cuts clean, free and fast, putting a keen true edge on the tool.

It is absolutely uniform in grit and hardness. There are no hard and soft spots or pits in Carborundum Sharpening stones. They wear evenly and last for years.

And there is a Carborundum Sharpening Stone for every sharpening need.

There is the knife sharpener for household use—a round or octagonal shaft of Carborundum, with wood or stag horn handle for household use.

The Carborundum Sharpening Stone, round or oblong for carpenters and mechanics use.

The Carborundum Razor Hone and Razor Strop—guaranteed to put the Razors in prime condition and keep them so.

The Carborundum Niagara Grinder for shop or home use—mechanically right, strong and durable, equipped with a fast-cutting Carborundum Wheel—made in four sizes.

The Carborundum Niagara Scythe Stones for the farmer and gardener.

Carborundum Sharpening Stones, Razor Strops and Grinders are sold by leading hardware dealers everywhere. If your dealer does not keep them write direct.

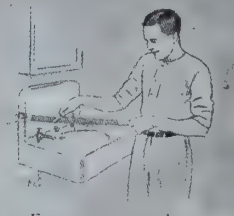
N. MACDONALD, 62 TEMPERANCE ST., TORONTO

The Carborundum Bench Stone is just as necessary to the manual training student's kit as a saw or hammer.

Carborundum gives the Carpenter's and Mechanic's Tools a better edge in less time.

A Carborundum Niagara Grinder for shop, home or farm.

The Carborundum Scythe Stone gives just the edge the Scythe should have.



For every man the Carborundum Razor Strop

Every Knife a Sharp Knife in the home that has a Carborundum Knife Sharpener.

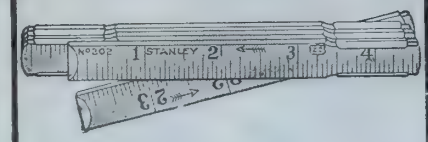
Stanley Tools



"Zig-Zag" Rules

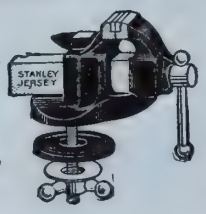
They might very properly be called "Folding Tapes". They, however, have the advantage that, as the joints are held open by springs, they can be used to measure across openings by supporting the end away from the user, where, with a tape, it would be necessary to have one person hold each end, or else hang the outboard end on a nail, necessitating additional climbing. In many cases, they are useful for measuring concave, convex and various uneven surfaces. When folded, they are compact and easily go in the pocket. A handy and convenient rule for mechanics and householders.

Stanley Plumbs and Levels

are made of thoroughly seasoned and selected stock, and have many valuable features which will appeal to every lover of good tools. Made in all styles for **Carpenters, Masons, Plumbers, Machinists, Millwrights, etc.**

Stanley Tools

Stanley "Jersey" Vises



A small vise is a mighty handy article for the shop or family tool chest

"Jersey" Vises are just what you need. They are small, but very strong and substantial. Made in a number of different sizes and styles.

Stanley Rule & Level Co.

"75-80% More Business

--with no additional labor"

says W. A. Michael, care Oakwood Hardware Co., Toronto

PHONE HILLCREST 4913 — 314 OAKWOOD AVENUE

OAKWOOD HARDWARE CO.

Glass, Paints, Oils, Crockery and Enamelware, Etc.

Toronto, July 12, 1920

Messrs. Cameron & Co.,
74 Logan Ave.,
Toronto, Ont.

Gentlemen:-

We have delayed writing to you in reference to the wall case which you installed for us, until we had a chance to really put it to a good test during the Spring rush.

The case has been installed about three months now, and has,we are pleased to state,met all our expectations and more. We have done between 75 and 80% more business this Spring than last and though we do not attribute this to your wall case, we do however, give it credit for enabling us to handle this increased volume of trade without adding to our own staff. It is a time, space, and labor saver as well as a convenient, attractive fixture.

The Cameron Case enables a customer to select what is wanted without knowing the technical name of the article. It enables us to know at all times what we have in stock.

In short we are pleased with our investment - The Cameron Service.

We are,

Yours truly,

OAKWOOD HARDWARE CO.
W. A. Michael

The Cameron Wall Case enables you to do more business without increasing your staff. Your customers can select their wants without the embarrassment of trying to describe articles, names of which are to them unfamiliar.

The Cameron Wall Case is a handsome fixture which keeps your stock in good shape and attractively displayed.

It may be made as the standard shown above or in any style to suit your particular requirement.

Write for particulars.

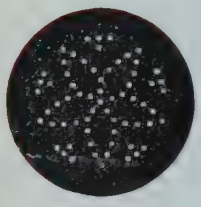
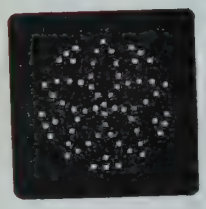
Water-Proof Cemented
Veneer Chair Seats



Round



Square

Ball Top

Strong Convincing Selling Points

Five staple patterns of well-made three-ply veneer chair seats that are sales- and profit-makers. The dealer finds them easy to sell because they are backed by strong, convincing selling points. We are the only manufacturers using waterproof cement. This prevents them from parting even under the severest weather test. This popular line of seats has rounded corners, the edges are smoothed, sandpapered, and finished with genuine, hard-drying coach varnish. A line that will afford you splendid profits.

Terms

Quotations subject to change without notice. Orders will be entered subject to the following conditions:

Strikes of operatives or any other unavoidable cause will relieve us from prompt fulfilment of contracts.

BURLINGTON STEEL FENCE POSTS

Make Strong — Permanent — Economical — Fireproof Fences

Special Advantages

Durable
Fireproof
Convenient
Economical
Will not rot
Rust resisting
Will not break
Drive easily
Last a generation.

Our experience in manufacturing special steel bars for reinforcements has been of untold value in the making of steel fence posts.

These Posts are made of the same high quality of steel as used for Concrete reinforcement and for other purposes where strength and rigidity are absolutely necessary.

The Special "U" Shape

The "U" shape is exclusive with our posts. It allows the post to be driven easily and straight. It makes it anchor firmly and prevents sagging or bending. No sharp points—no special devices needed to hold it in the ground. Can be set in place in a fraction of the time required to set wooden posts.

The Clip Fastener

fastens the clips quicker than staples can be driven. Clips hold the fence tight. It cannot slip.

Dealers

Nation wide advertising is placing the advantages of Burlington Steel Fence Posts before the farmers of Canada.

Our special book on Steel Fence Posts, or sample sections, mailed on request. Cash in on the demand in your locality. You sell wire fences—sell Burlington Steel Fence Posts. Immediate delivery from stock.

Display in window of The Warner Hardware Co., Minneapolis, Minn.

Build Up Your Profits With

LIQUID VENEER

MADE IN CANADA

A Window Display Will Do Wonders!

You can make an unusually beautiful and attractive window display, full of bright colors and drawing power, which will greatly **increase sales** on Liquid Veneer and the wonderful Liquid Veneer Mop.

You know the **big margin of profit** on these sterling articles. You know the power of the steady advertising behind them. You know the unequalled high quality that has built their wonderful reputation.

Do you fully realize the big business you can do on these articles by giving them an occasional display? Send us the size of your window and we will furnish, **entirely free,** a handsome display that will be a credit to your window. State whether you carry Liquid Veneer Mops or not.

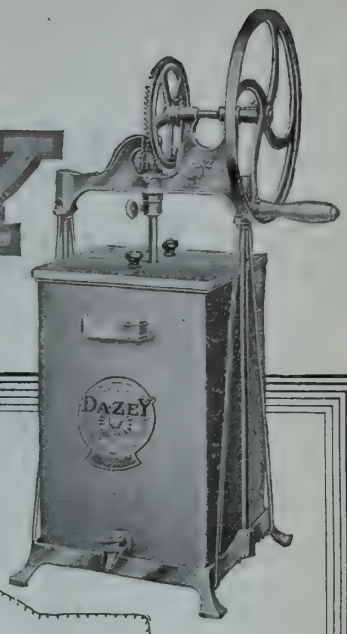
DAZEY CHURNS



Value Convincing Features

The DAZEY incorporates those essential features of a perfect butter-maker — those that are becoming more universally demanded every day.

Apologies are never necessary—but *facts* always.

There is REAL satisfaction in pointing out—

—the *dasher* which produces such powerful agitation that butter is made in 3 to 8 minutes—

—the all-metal *receptacle* which assures perfect sanitation—

—that in *cleaning* receptacle only has to be handled, and how convenient this is—

—then, too, that the DAZEY is substantially built of steel and iron which will last for years.

It is this combination of vital details of construction which goes to make up the DAZEY that appeals to the butter-makers, and that will sell a DAZEY to his neighbor.

National conversion to the "DAZEY SYSTEM" of making better butter means that enterprising dealers are profiting by the demand.

We are anxious to tell you more about the DAZEY and ask that you send for new catalogue showing Glass churns, 1 to 4 quart sizes, and Metal churns 1 to 28 gallon capacities, for hand and power.

"Seen these Starrett ads?"

"Sure—they're everywhere. You can't miss 'em."

That's the point. You can't miss Starrett national advertising. It's in all the principal papers that mechanics and their employers read. Every Starrett tool in use—and machinists have been buying them for forty years—is a Starrett advertisement.

That's why there is a steady, constantly-growing demand for Starrett Tools and Starrett Hack Saws. Why dealers sell more and more of them. They know that every Starrett tool will live up to the Starrett reputation for unvarying accuracy, unfailing quality and absolute utility.

HE WANTS A RAZOR THAT WILL SHAVE HIM

The same razor may not shave both Sam Jones and Bill Smith and do it cool and comfortably but there is a Genco razor that will satisfy the shaving needs of each of them. A broad, heavy beveled Genco for outdoors men with wiry beard and rugged skin—a delicate, full concaved Genco for skin that is easily chafed—and other Genco models for still other conditions.

Selling a Genco is more than selling a Razor, it is supplying your customer with shaving service. And remember we back you up with our guarantee:

"GENCO RAZORS MUST MAKE GOOD OR WE WILL"

Place a Genco Display Cabinet on your cutlery counter. It will attract attention and make sales. The cabinet is supplied with the Special Genco Display Assortments.

There are razors for every condition beard and skin in each assortment and brief but thorough selling helps for your salesmen always in sight.

Sell your customers the razors that will shave THEM.

Order an Assortment to-day. If your Jobber cannot supply you, write us.

GENCO WEEK
November 8 to 13

$1000 in Cash Prizes

Tell your window decorator to watch our advertisement in Hardware and Metal, September 18, for particulars. He can win one of the prizes and increase your sale of Genco Razors at the same time.

A Genco Display Assortment on your Cutlery Counter will help too. Order one now.

A tool is as good as its maker

WHETHER for the skilled mechanic, the master carpenter, or the every day job about the house, garage or barn, your tools are a gauge of your workmanship—your means of expressing your creative self.

This creative instinct that rules every man's heart is the guiding spirit of attainment in the Millers Falls factory. Here among New England's peaceful hills it has found full expression for over fifty years in the craftsmanship of skilled toolmakers. Here you may find father teaching son the lesson that painstaking care for details and respect for his work bring lasting rewards.

Ask your hardware dealer about Millers Falls Tools. Look at them, handle them,—bit braces, hand and breast drills, auger bits, automatic screw drivers, mitre boxes, hacksaw frames and others. They feel "right" in your hands—their perfect balance and fit tell you that they will be your reliable, lifelong friends.

In and out Screw Driver No. 41. An efficient, rapid working, powerful household and workshop tool, for quickly driving or withdrawing screws by repeated forward thrusts of the handle.

MILLERS FALLS COMPANY
MILLERS FALLS, MASS.

MILLERS FALLS TOOLS

In New England's Peaceful Hills

Millers Fall Tools make good customers for J. M. Kohlmeier, Third Ave. at 60th Street, New York City.

This advertisement helps too: Saturday Evening Post for July 24th

MILLERS FALLS TOOLS

If interested, tear out this page and keep with letters to be answered.

He Saw This Millers Falls Ad.

in the Saturday Evening Post and so he stopped in at the leading hardware store in his neighborhood. That No. 41 Screwdriver would be just the thing to use around his motorboat.

But the salesman didn't let his interest stop there. A little questioning—and out came a No. 12 Millers Falls Breast Drill. The customer tested its balance, felt the free run of its gears, admired its fine finish. A word and a touch showed how the gears were shifted —and the sale was made.

Alert hardware dealers know that the "talking points" of Millers Falls Tools make it easy to hold the attention of the craftsman, be he amateur or professional. They tell us that every Millers Falls tool in service is a salesman for its fellows. Bits, braces, hand and breast drills, mitre-boxes—each through its performance speaks of the merits of the entire line.

PREPARED Decorative Burlaps

Double Sized and Oil Coated
Made in Widths of 30, 36, 45, 54, 60, 72 and 90 inches and
All Standard Shades, in Lengths of 30 and 60 yards.

Why These Wall Coverings Sell Well

THEY are made from strong and heavy, specially selected Jute Canvas, which is carefully stretched and sized by latest machinery, then prepared with our odorless compounds.

This desirable line fills a long felt want in the way of an inexpensive wall covering. It is easily hung up, and once on practically requires no replacing. Used extensively for Dwelling Houses, Hotels, Public Buildings and Churches, for the finishing of which it has become a standard necessity.

There are prospects everywhere.

This beautiful burlap adds greatly to the appearance of a room or hall. Does not fade or shrink and can be repainted to any shade desired at little trouble or expense. Has no equal for covering defects in broken or cracked walls. For these reasons it is to be recommended in preference to Dyed Burlaps.

From a sanitary point of view it has many advantages, inasmuch as it keeps out Dust, Dampness, Drafts and Cold and its application to the wall insures the destruction of all insects and vermin which may have found a resting and breeding place behind the old-style Paper Covering. When soiled can be easily cleaned by passing damp cloth over surface.

These convincing selling points make it comparatively easy for merchants to close the sale with little argument or loss of valuable selling time.

Handled by all Leading Jobbers of Wall Papers,
Hardware, Paints, etc.

Sell Hose Satisfaction

GOODYEAR Cord Hose carries the definite guarantee of the Goodyear Tire & Rubber Company of Canada, Limited. It bears the word "Goodyear"—with all that this means to the customer in reputation and unquestioned quality.

Goodyear Cord Hose is built to give greater hose satisfaction. Built after the manner of the famous Goodyear Cord Tire—from pliable cords imbedded in rubber.

These cords prevent kinking and cracking—*give longer life at less cost.*

By selling Goodyear Cord Hose you sell satisfaction as well as hose. Satisfaction which means good will—increased business.

You can obtain Goodyear Cord Hose from your wholesaler or the nearest Goodyear branch.

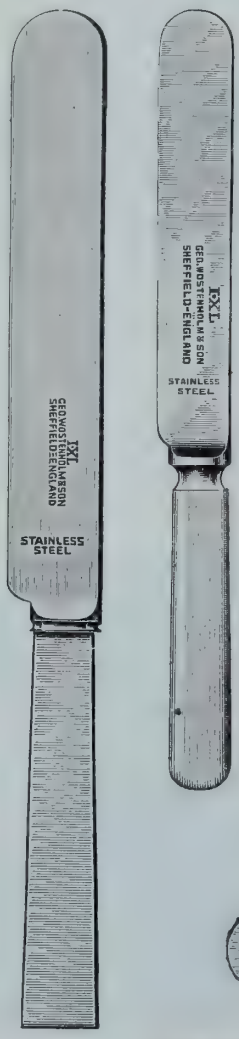
Stainless Steel Knives



have now become so popular that no up-to-date merchant can afford to be without them.

We are now making substantial shipments to all the leading jobbers throughout the Dominion and would urge every retailer to see that his clerks have them to offer when required.

Stainless steel is a boon to the housewife as it absolutely does away with the knife board or cleaning machine, yet is always clean and bright for the table.

After extensive experiments we have finally overcome the many technical difficulties in tempering and are now combining all the virtues of stainless steel with a wonderful cutting edge.

The Durabla Agency brings dollars in profits

Featuring Durabla products is bringing big business to hardware dealers.

The known dependability of Durabla Gauge Glass, and Durabla Sheet Packing makes them the choice wherever such goods are required.

Durabla Gauge Glass has withstood hydraulic pressure of over 2,000 pounds per square inch for two minutes without breaking. It's been submerged in oil at 350 deg. F., then dipped in water at 40 deg. F. without showing a crack.* Live steam at 100 pounds pressure has been passed through the glass for 96 hours without leaving any trace of erosion. It has given continuous service under pressure of 225 pounds where that pressure has been maintained day and night.

Durabla Gasket Packing makes and maintains permanently tight joints under steam operating conditions approximating 275 to 300 pounds. On oil pressure stills it has kept tight joints for over 160 runs where it's usually necessary to break the joint after each run. It's unexcelled for cylinder heads of gasoline engines and pumps. It gives efficient and lasting service with sulphuric and other acids that can be piped. On ammonia joints in both absorption and compression systems—and in air work on expansion and construction lines.

Durabla is a profitable line to handle. Write to us for the Durabla agency in your territory.

Co-operation

Around the name "FROST" is built an organization of keen, loyal, fair-minded Hardware Men.

Farmers have been quick to find that they can place confidence in the Frost Dealer. A square deal and a little extra service cost nothing to give but form one of the biggest advertising forces which can be brought into play.

This fact is ever before us and it is the purpose of the Company, in adding to its list of Dealers, to admit only men of this type into the Frost Organization, in justice to those who are and have been selling Frost Fence.

If you are in uncovered territory and would like to sell Frost Fence, write us to have our representative come and tell you about our proposition.

The Highest Achievements In Stove Quality and Value

Maple Leaf Emblem Square with Plain Warming Closet.

MAPLE LEAF Stoves, Ranges and Furnaces are well known in every section of Canada. For seventeen years they have been manufactured under the most rigid and exact requirements of any stove foundry in America.

During past seasons our plant has been taxed to capacity and arrangements have but only recently been brought to a successful issue whereby one of the largest Canadian foundry plants will be erected in order that the ever-increasing developments of the business of Beach Foundry, Limited, may be allowed to take full advantage of its natural growth.

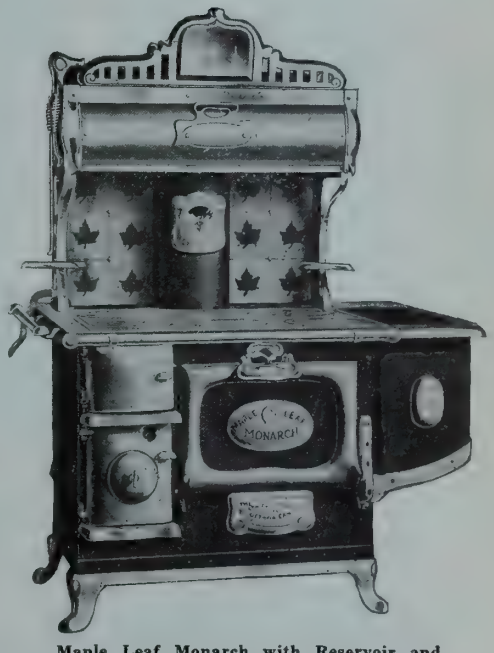
With great pride we submit the accompanying eight pages of illustrations that wide-awake Canadian dealers may readily become acquainted with our numerous lines. We will be pleased to supply further information upon shortest notice. Correspondence is solicited. We will appreciate investigation.

The Maple Leaf Emblem Range

is built of the same high-grade steel and iron as used in higher priced ranges but of lighter weight. The same care is given to its construction, while its finish is similar to that of more expensive lines. Its design is most modern and strictly sanitary. Its body is of best quality planished steel, asbestos protected, cast-iron reinforced. The firebox is large, equipped with duplex grates and heavily lined. The oven of heavy steel, 18 x 19 x 12½ inches, with top of two thicknesses asbestos interlined. Spring balanced oven door equipped with thermometer and non-heating rubberoid enamelled handle. Top in key plate type and sliding draft damper fully controls all heat units. Reservoir of heavy tinned copper and large, roomy warming closet, which can be had in various different styles.

The Maple Leaf Monarch Range

A Range of unusual value in plain, handsome design with large warming closet, key plate top with broiler lift, tubular towel bar, heavy polished steel body with heavy asbestos lining. The latest improved firebox, with heavy duplex grates for coal or wood, also made with special wood firebox—burning 27½ in. wood. 20 in. x 20 in. x 14 in. oven, made of heavy sheet steel, the top being made of double thick steel interlined with asbestos; oven thermometer for registering degrees of heat.



Maple Leaf Monarch with Reservoir and Special Warming Closet.

Manufactured Exclusively by **BEACH FOUNDRY, LIMITED**

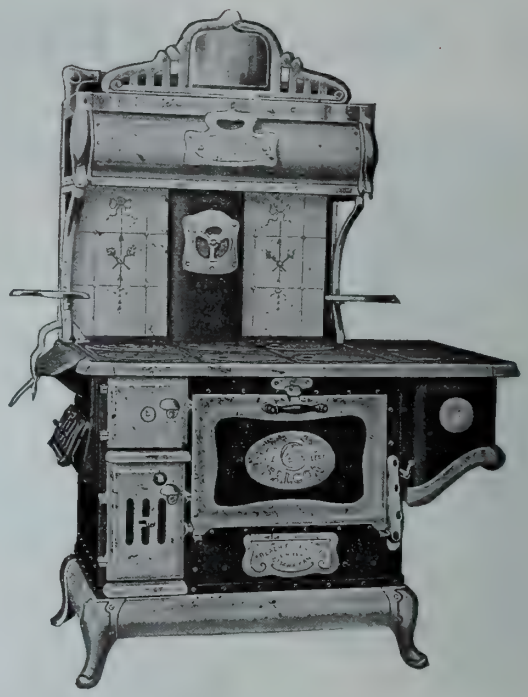
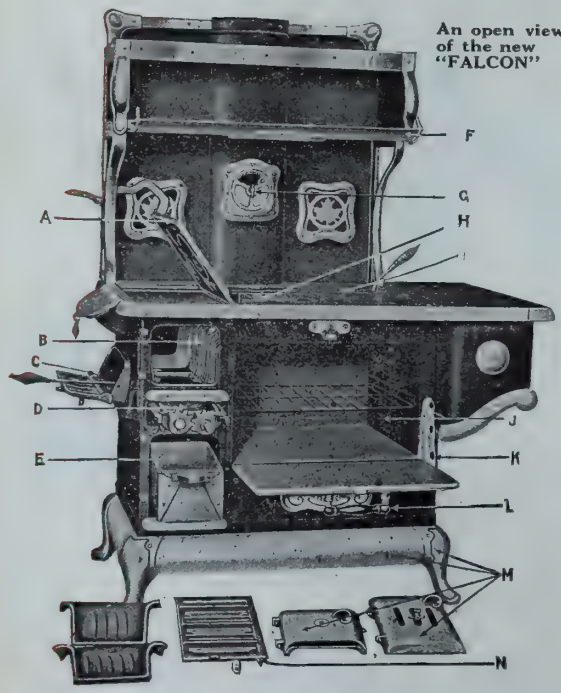
The Maple Leaf "Falcon"

Stands In A Class All Its Own

ARANGE that possesses every requirement a woman can desire. It has a durable duplex grate, large firebox with perpendicular linings, sliding direct draft damper, lift-up front key plate. Made in two sizes, 18″ and 20″ ovens. The "Falcon" heats quickly, evenly, and guarantees perfect cooking and baking at all times. Very handsomely designed with heavy, smooth nickel trimmings. It provides one of the most desirable kitchen ranges upon the market.





An open view of the new "FALCON"

A Few of the Construction Features of the "Falcon"

A.—Note height to which front key plate may be raised, allowing scuttle of coal to be emptied freely without use of shovel or poker.

B.—Heavy sectional perpendicular fireback. All other linings also heavy and almost perpendicular.

C.—Large combination draft and poker door opening.

D.—Duplex grates that may be removed through grate opening for replacing with wood grate (note letter N) or for any other purpose, without disturbing the firebox linings. Also note improved cog gudgeons.

E.—Very large ashpan.

F.—Drop closet door.

G.—Combination check draft with key to close off flue and opening for air intake.

H.—Improved sliding direct draft damper, giving full control of heat units to oven or chimney flue.

I.—Key plate top. Covers and short centres heavily ribbed. Sectional reducing cover.

J.—Large oven made in two sizes, 18 x 19 x 12½ in., or 20 x 19 x 12½ in.

K.—Improved attachment for spring oven door balance. Door held down by spring when open and held tight in place by spring when closed.

L.—Rubberoid oven door handle—always cool.

M.—All nickel parts plain, high finish, easily kept clean.

N.—Special wood grate replaces duplex grates for burning wood only.

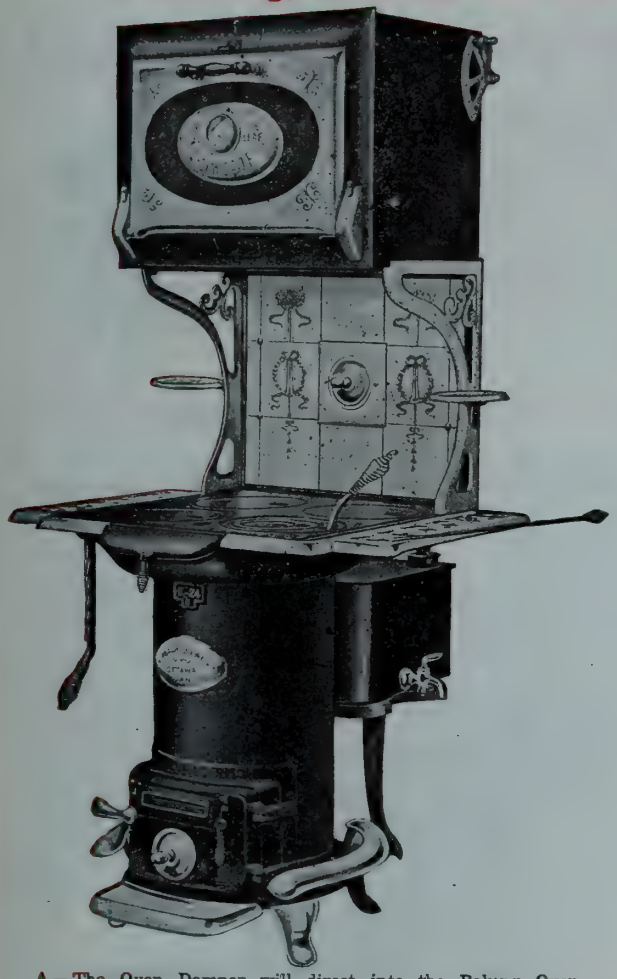
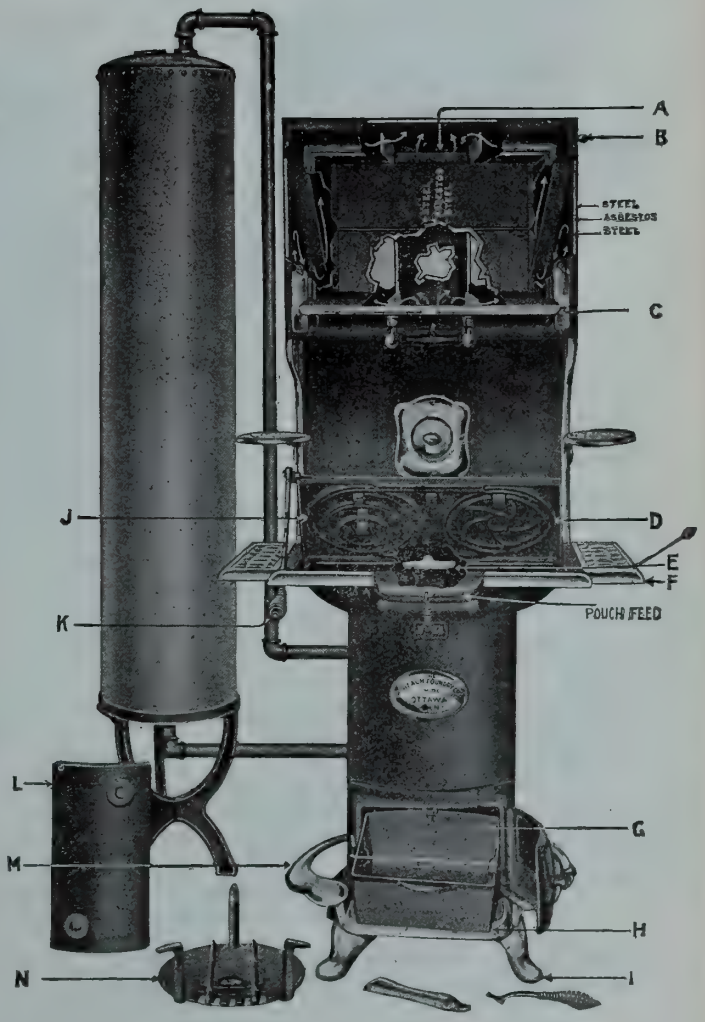
The Maple Leaf "Composite"

A Heating, Cooking and Baking Stove of Unique Excellence



UNDER the most exacting tests the "Composite" more than substantiates our claims. It is the last word in efficiency since it possesses all points which bespeak quality, economy and service. The rapid, increasing demand proves it has passed the experimental stage. Someone will sell them in your territory. Write now, to-day, for prices and special circular.

The "Composite" is a perfectly designed Heater, Cooker and Baker, and is alone on the market in its class. Undertop and heat spreader (the secret). Patented and copyrighted. Room to do the family cooking on the home heater.



A.—The Oven Damper will direct into the Baking Oven Flues all or any desired part of heat.
B.—The Ratchet Damper Handle can be set at points on the Damper Dial indicating desired positions of Oven Damper.
C.—The Drop Oven Door is balanced spring type—double-lined, equipped with thermometer and non-heating handle.
D.—Strongly ribbed lids and top sections.
E.—The Heat Spreader distributes heat evenly to the four holes.
F.—Removable nickelled side shelves and towel rod.
G.—Large Ash Pan, 10 x 12 x 4¼ inches.
H.—Removable nickelled Ash Tray.
I.—Front legs are nickel-plated.
J.—The Reducing Cover is in three sections.
K.—The Ratchet Lift with "Alaska" handle raises the front section for broiling and fueling.
L.—Powerful Water-section, replacing two firebricks, can be installed.
M.—Beautifully designed nickelled foot-rails.
N.—A Wood Grate suspends from the top of the fire chamber. For summer use this is excellent, giving cooking and baking power with the minimum heat.

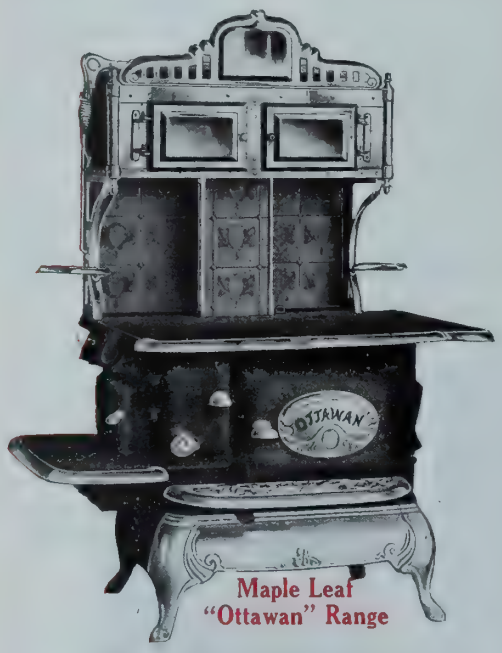
The Maple Leaf "Ottawan"

Is the Best Stove on the Market From a Quality Standpoint



Maple Leaf "Ottawan" Range

With Parisian Warming Closet — Square Style for coal or wood — Duplex Grates.

LIFELONG satisfaction is what every owner of a Maple Leaf "Ottawan" enjoys. Dealers placing the "Ottawan" on their list may be fully satisfied as to quality. The "Ottawan" is a heavy purpose cast range which recommends itself in every instance. No trouble or expense has been spared in perfecting the patterns for this range.

Special Features of the "Ottawan"

THE DESIGN—latest and most modern—smooth castings ornamented only by a delicate pattern—entire range correctly proportioned.

SQUARE OVEN—constructed on modern principles—well ventilated—flue construction specially designed to distribute heat evenly to all parts—perfect baking assured.

OVEN DOOR—with thermometer for registering degrees of heat.

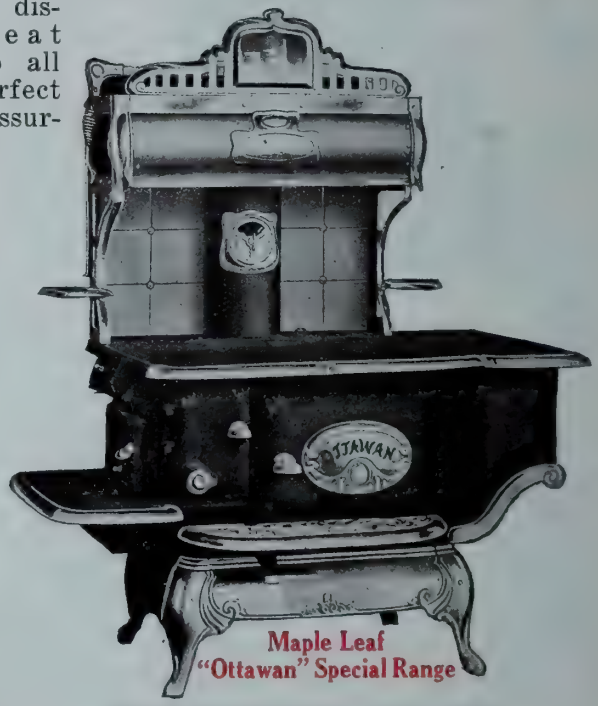
FIREBOX—latest and most approved—carefully proportioned to size of top-oven and flue spaces—made in sections and well ventilated. Duplex Grates for coal or wood—can be removed without use of tools or disturbing firebox linings.

TOP—unusually large and roomy—fitted in sections to not crack or warp.

RESERVOIR—heavy tinned copper wholly encased in cast iron. Reservoir damper enables large quantity of water to be heated in short time when not baknig.

NICKEL TRIMMINGS — plain design—removable for cleaning stove or polishing.

WARMING CLOSET—especially large and may be had in any one of four different styles.



Maple Leaf "Ottawan" Special Range

With Reservoir Tile Warming Closet, Nickel Drop Door and Cresting—Duplex Grates for coal or wood—Special Grate for wood only.

Dealers Will Find the Maple Leaf "Pride" a General Favorite Because of Its Lifelong Construction and Value.

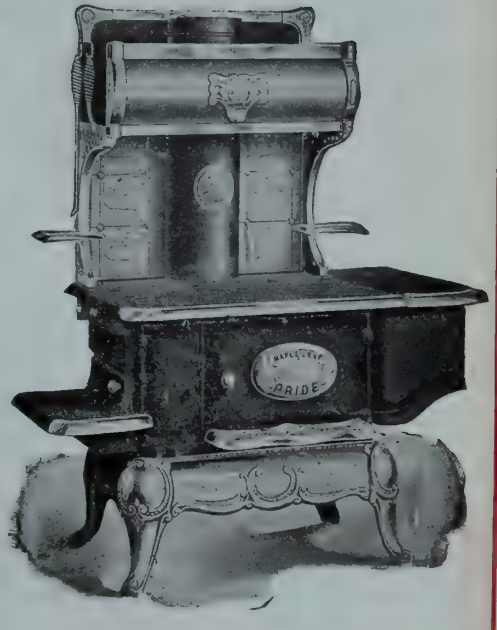
Maple Leaf "Pride" Range with Tea Shelf, burns coal or 19-inch wood.

FOR quick, perfect baking, the Maple Leaf "Pride" Range provides the equal of any range manufactured, and any dealer who will "bank his stove business upon the "Pride" for 1920-21 will not only earn substantial profits, but reap the benefits of a large, well-satisfied clientele in his community.

The Maple Leaf "Pride" Range

is compactly built, handsomely trimmed—firebox—grates and top of standard construction, while the heavy base and legs give the "Pride" a pleasing, substantial appearance. All who know and have had experience with the "Pride" testify to its splendid value and satisfactory performance.

Maple Leaf "Pride" Range with High Shelf. Several styles of closet and shelves to select from.



Maple Leaf "Pride" Range with Reservoir and Tile Closet and Nickel Roller. An ornament to any home.

Wanted, Dealers Everywhere

THE manufacture of Maple Leaf Stoves, Ranges and Furnaces, is only in its infancy—every year our business has gone ahead by leaps and bounds—our trade already extends from coast to coast—but there are still many towns and places we are not as yet represented in. Write us to-day. Maple Leaf Products sell wherever shown and one sale has always brought many more.

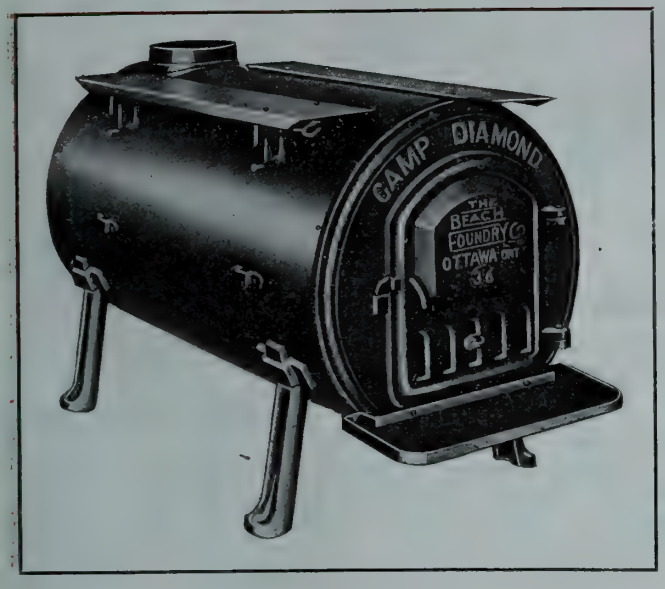
Maple Leaf Shanty Ranges and Heaters

Sell From Coast to Coast



Lumbermen's Heaters

The Camp Diamond with heavy steel plate body and with cast iron ends is unexcelled for durability. Useful for heating large buildings such as public halls, schools, lumber, mining and construction camps where wood is used as fuel.

Perfect combustion is at all times assured by the close riveting and air tight bolted heavy steel plates.

Maple Leaf Shanty Ranges

as illustrated below are used in hundreds—yes, thousands of lumbering and construction camps all across the Dominion of Canada.

Specially made of heavy steel plate, extra strong and durable. It has no superior for baking and is fully guaranteed to suit all occasions. The oven is specially adapted to fulfill the needs of fifty to seventy-five men, while the firebox is extra large with fire door and ash pan to correspond. Can be furnished with high or flush reservoir and warming closet and with or without feet. Further information will be supplied upon shortest notice.

Cottage and Lackawanna Warm Air Furnaces

Noted for Economy of Fuel And High Heating Powers

Cottage Furnace with Casing

Cottage Furnaces

Maple Leaf Cottage Furnaces have been specially designed for small houses and homes with shallow cellars to provide a maximum pitch to the warm air pipes. Will burn hard or soft coal with equal combustion, heating 5,500 to 9,000 cubic feet, according to cold air supply and weather conditions.

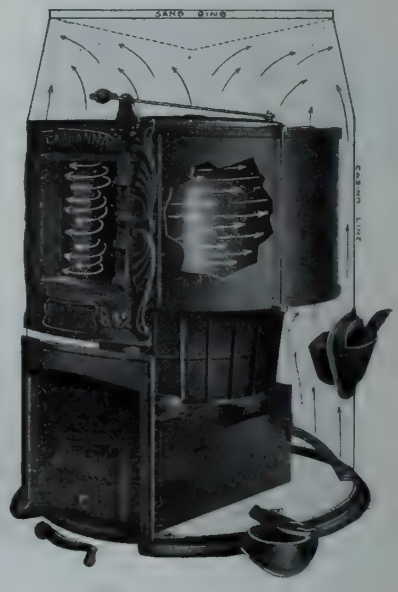
The radiator of elliptical form with combustion chamber well to front of firepot and close to feed door. Products of combustion therefore pass simultaneously backward and upward through opposite openings, entering the smokepipe low down at back of radiator, thoroughly warming the air passing through the radiator. The ashpit is of regular height, while the corrugated firepot is much stronger and has more radiating surface than is usual.

Radiator body is of heavy steel with cast iron top and bottom plates. Large feed door. Water heater may be introduced without drilling.

Front is cast iron and grates of the revolving type.

Lackawanna Furnaces

Here we illustrate our Maple Leaf Lackawanna Furnace, sectional view showing outline of casing. The Lackawanna is of low-down construction. Note how the arrows indicate the currents of draft, as to how the products of combustion travel to the front of the radiator, then divide to go around both sides to smoke outlet at back. A direct draft damper is provided for convenience in starting fire. A vapor pan sufficiently large to keep the atmosphere in a healthy condition is provided.



The Lackawanna is built for all occasions and has a heating capacity of nine to seventy thousand cubic feet, according to size, weather and building, whether it be residence, church, hall, store, etc.

THE RADIATOR of the Lackawanna has horseshoe-shaped flues—the ashpit is exceptionally large with square back, and the grates are triangular anti-clinker type, extra strong, and will not become clogged or immovable.

Creating Greater Production Facilities

Our Problem

MANUFACTURING conditions and the tremendous shortage of Household utensils has created an unprecedented situation in retail selling.

Dealers, have unfortunately been unable to maintain their stocks, and customers, in some instances, have been compelled to choose from a very limited display.

Our Efforts

To meet these conditions McCLARY'S have strained every nerve to increase production, reduce wastage and facilitate deliveries through added efficiency. The pack has been re-shuffled—men and machinery have been adjusted to produce more and more. Every resource has been developed to breaking point. Time, labor and money all consolidated to strengthen the bond of loyalty between our dealers and ourselves.

McClary's

"Make Good Stoves and Cooking Utensils"

Factories at:

London, Montreal and Brantford

If interested tear out this page and place with letters to be answered.

To Give Adequate Service From 9 Distributing Centres

Our Solution

Necessity has driven us to unusual practices. Despite building difficulties we have largely extended our Factories so that we are producing this year far in excess of any previous year. In addition we have purchased the Buck Stove Company, of Brantford. Behind this old established organization we will force all the producing resources of McClary's. No radical change is anticipated. Buck service and McClary's service will be combined on a new basis of service to all dealers alike—nothing is lost, a great deal gained.

Our Promise

Trust McCLARY'S, the intelligence and experience gained during 73 years will be centred upon production and distribution as never before. Everything humanly possible will be done to satisfy all demands.

Our nearest Branch will be pleased to explain our latest production plans—

Pilot Superior Pipeless

burns hard and soft coal, coke, wood, or natural gas. The construction with inner and outer casings and asbestos linings keeps cold out and heat in. Unsatisfactory furnace installations are no longer excusable since the Pilot came. Easy and inexpensive to install, only one opening to be cut in floor; no network of pipes. This dependable furnace takes the cold air from the house—not the cellar—keeping fresh, warm air circulating, a guarantee against colds and coughs, keeps the floors warm for children's play and the cellar cool for storage. The house is heated throughout with abundance of heat, saving 25 per cent. on fuel bill. The most sanitary and up-to-date heating system on the market. A very profitable line for the dealer.

A Hearty Welcome to All

TRADE FiReCo MARK REG.

Ranges and Heaters
Will Better Your Fall Trade

because customers recognize in Fireco ranges and heaters the latest up-to-date stove construction. No other stoves on the market have the Fireco principle. Dealers are finding them creaters of sales and business.

Fireco saves fuel because it conserves heat; makes combustion complete; prevents flues being filled with soot; gives absolute control of the fire and no gas can escape from the range; it requires 50 per cent. less labor to operate with 50 per cent. less ashes to struggle with and it gives its delighted owners 100 per cent. more cooking and heating satisfaction.

Your customers will welcome with open pocket books, this combination of efficiency, economy, sanitation and simplicity.

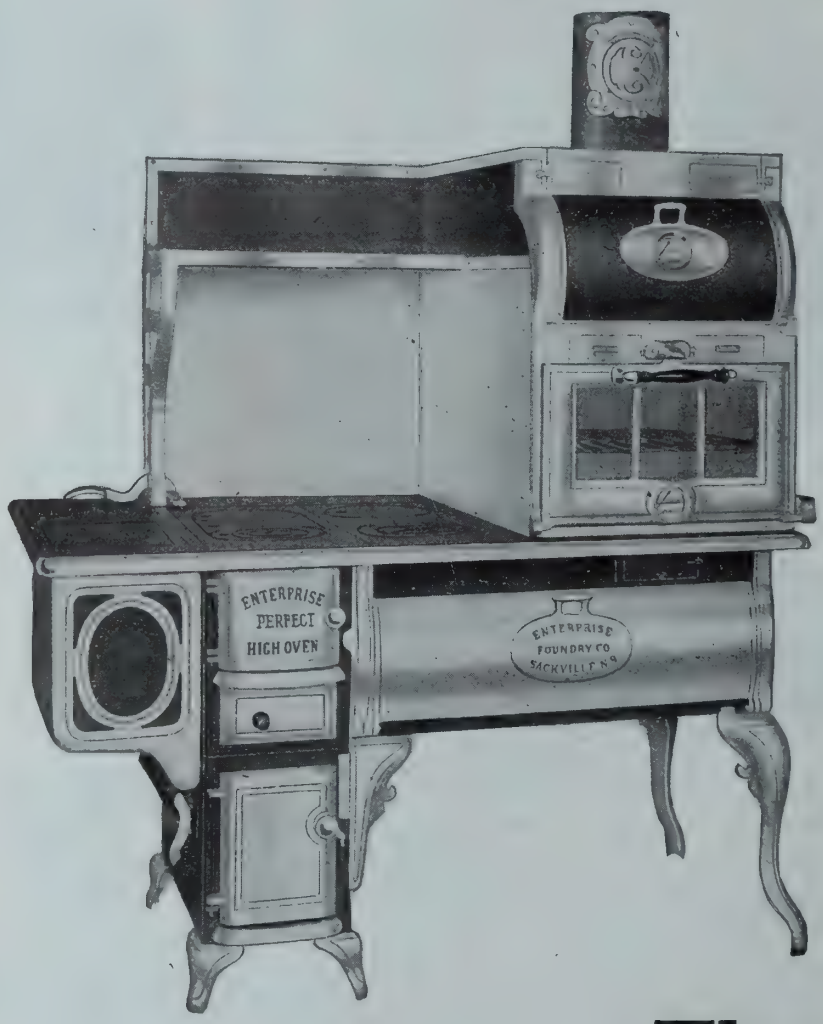
We will demonstrate this sales-making range in your store—then you can "talk it" with first hand knowledge.

Company Limited, Hespeler

Vancouver

ENTER

Like many new departures, the high oven range when first put on the market met with much doubt and some ridicule. But its merits could not long remain unappreciated and its worth was soon proven. Only about five years has it been in existence but during that short period has scored a distinct success and each day sees increased demand.



The Enterprise "PERFECT" *DOUBLE High Oven Range*

has **two** large 20" ovens. Not merely one oven and a warming closet but **two big fine ovens** for baking and roasting and both equally good. There is a roomy warming oven besides. The special flue construction ensures perfect satisfaction with all fuels. Finished in spotless white enamel and lustrous nickel it is truly a range "de luxe." The name Enterprise which it bears is its guarantee of quality and efficiency.

Write for booklet and full information.

PRISE

"Furnace heat for every home." That's what the Enterprise Blazer Pipeless Furnace makes possible by means of its simplicity and reasonable cost. Think of the wide-open market—almost every householder a prospect. Mr. Furnace Dealer, the pushing by you of this tested furnace will result in a remarkable increase in your furnace business and bring excellent profits.

The Enterprise "BLAZER" *PIPELESS* *Furnace*

distributes pure, warm, healthful air to every nook and corner of the house. It costs less to operate and produces a greater volume of heat considering the fuel consumed than any other system of heating. Owing to the novel triple casing and special double cast iron casing rings, the installation of this furnace is made doubly easy. It is made in three sizes and with either cast iron or steel radiator.

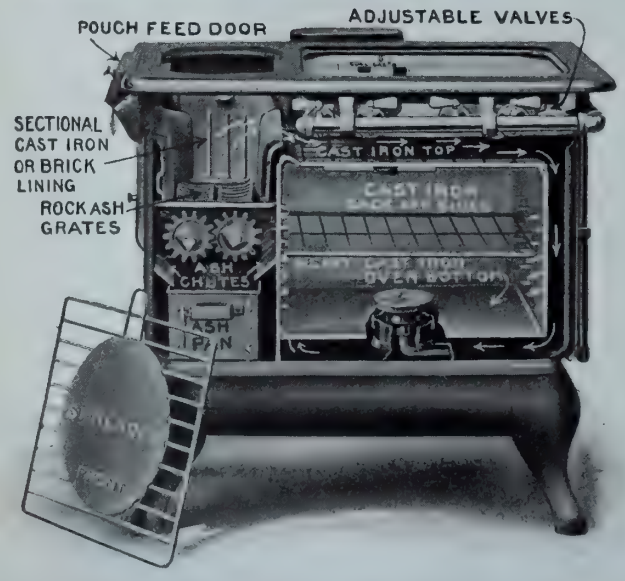
"Dinner served on time"

Just another reason why your customers will prefer the

Banner
Combination
Range

SPECIAL FEATURES:

1. Simple in operation.
2. Single oven for gas, coal or wood.
3. Removable top burners.
4. Visible oven burners.
5. Four gas griddles; two coal griddles.
6. Has nothing to get out of order.
7. Made in enough styles to suit a varied demand.
8. Burns either gas or coal economically.



WE don't just like to use that good, overworked word "efficient," but if we were looking for something that would adequately describe the Banner Combination Range, that's the one we'd choose. For the Banner is efficient in the way it cooks. It is efficient in its simplicity of operation. It is efficient in its absence of intricate parts; and it is efficient in the manner in which it burns coal, wood or gas. Its square oven accurately proportioned to the firebox avoids waste of fuel and makes every unit of heat do its work in cooking or baking.

But what has all this to do with getting meals on time? Just this: Isn't it reasonable to suppose that any woman is more likely to be punctual with a Banner than with a range that requires "coaxing," "fussing with" or "fixing" before it gets started? We think so; and we believe your customer will, too, after you have demonstrated the Banner to her.

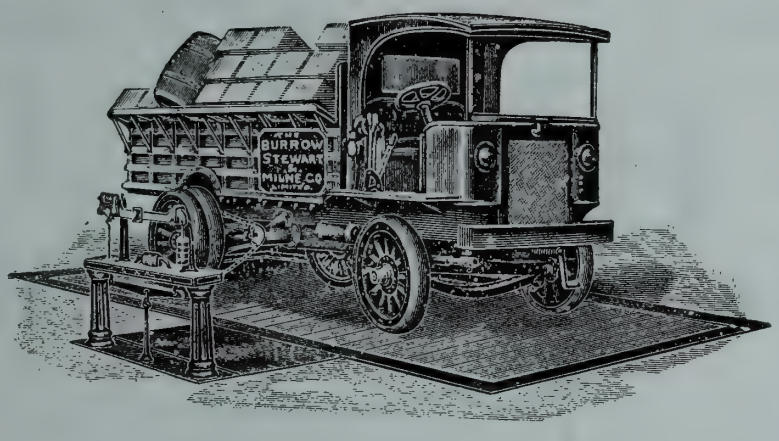
THE EXHIBITION

Imperial Standard and Champion Jewel Scales of the Better Line

We make Scales of capacities ranging from ¼ ounce to 150 tons.

Unlimited styles and designs.

Letter Scales.
Parcel Scales.
Chemists' Scales.
Counter Scales.
Platform Scales.
Warehouse Scales.
Abattoir Scales.
Express Office and Railway Depot Scales.
Grain Elevator Hopper and Dump Scales.
Wagon Scales.
Stock Scales.
Railway Track Scales.



Our line of Scales are used by all Railways operating in the Dominion, by most Express and other transportation companies, by the leading abattoirs and packing houses, by a large percentage of the municipalities, the leading Creameries and Cheese Factories, Western Canada Grain Elevator Companies, Farmers, Coal Dealers, Manufacturers of all kinds, Merchants of all kinds, and by thousands of housewives.

We have recently equipped the Post Offices throughout the Dominion of Canada with Parcel Post Scales.

We Make Them

We call your attention particularly to the fact that every Scale which we offer for sale and every Scale that bears our name is **Our** manufacture.

We do not only assemble—we do not buy our castings from others and depend upon their goodness to supply the proper materials—we do not buy any parts entering into the manufacture of our line—**we make them** and by so doing we know absolutely the grades of material used, the class of workmanship and all things which we should know to be able to offer you our line of Scales as the **best** and under the fullest guarantee.

For more than **Half a Century** we have been making and putting on the market the largest and most complete line of the highest grade and most accurate weighing machines obtainable.

The **Imperial Standard** and **Champion Jewel** Scales of our manufacture are known and used from Coast to Coast, and are sold by all the leading jobbing houses throughout the Dominion. The unbounded success with which they have met in these many years is due entirely to their superior working qualities, their durable construction and neatness in design.

The modern method of manufacture, the employment of none but skilled mechanics and the use of only the highest grade materials enables us to state without hesitancy that our line of Scales are not only unsurpassed, but **unequalled.**

No orders too large for our capacity. None too small for our most careful attention. Write us for prices and compare them with others.

The Greatest Selling Arguments in the Furnace World:

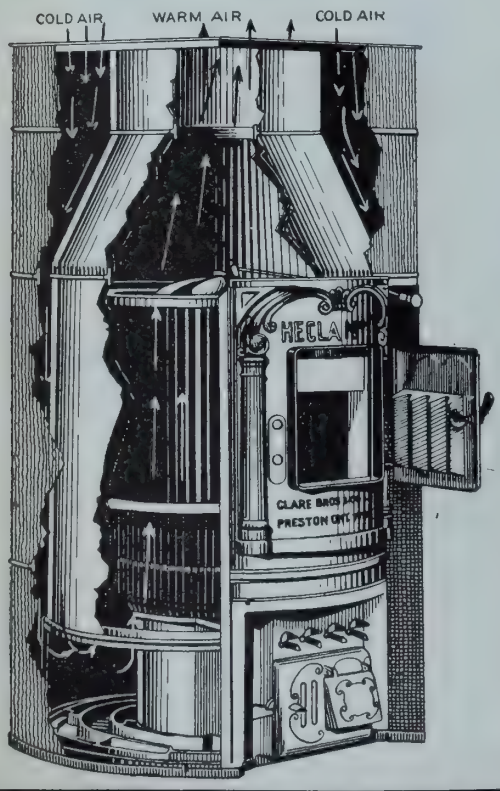
Better Heating Satisfaction with Less Fuel

That's the Record of the

HECLA

PIPELESS FURNACE

Get in early. Establish yourself as the Hecla Pipeless dealer. You will find us ready to co-operate with you—to help you advertise—to keep you selling. Make this your biggest furnace year. Let us show you how.



IN selling your customers a Hecla Pipeless Furnace you sell them a heating system that can be installed in one day. That saves expense as well as time in installing. That does away with the need for tearing up floors and mutilating walls, ceilings and partitions. That makes the air in every room as cosy, comfortable, healthful and warm as a June day!

A heating system that does all these things more satisfactorily and with a saving in fuel over other furnaces!

Pipeless Idea Taking Firm Hold

The pipeless idea is the biggest success that has been registered in the furnace business in years. 60 per cent. of the furnace business in the United States is pipeless business. It will take as firm a hold in Canada. Already hundreds of Hecla Pipeless Furnaces are giving 100 per cent. satisfaction. Hecla Pipeless Furnaces open up wonderful selling fields. Reap your share of the harvest of sales which will come.

Owners Are Enthusiastic!

J. G. Karn, Woodstock, Ont., says: "Your No. 122 Pipeless Furnace installed in my store is giving perfect satisfaction. It saves coal and also room in my cellar."

Luke Bros., Oshawa, Ont.: "We desire to inform you how much pleased we are with the new Pipeless Furnace installed in our premises this winter. We find it particularly good as regards the coolness of our cellar, even when the fires are very heavy."

J. E. Johnston, Fort Erie, Ont.: "The downstairs we have no difficulty in keeping at 76 degrees Fahrenheit—upstairs is 4 or 5 degrees cooler."

Louis Weber, Zurich, Ont.: "My cellar is as cool as if it never had a furnace. I can heat my house up to 75 degrees in the coldest days."

If interested, tear out this page and keep with letters to be answered.

The Most Popular Range To-day

High Oven Does Away with Stooping Saves Hours of Housework

The Range You Should Sell—

CLARE BROS.

LIGHTER DAY RANGE

CLARE BROS.' Lighter Day Ranges sell easily because they are **modern.** They clean easily—for they are finished with porcelain-enamel panels. They have **plain** nickel parts—and polished tops. They are easy to "fire up" and "shake down." Grates work smoothly—without sticking—without buckling—without loss of coal.

In the Lighter Day Range, the oven has been brought up to standing height. It does away with all tiresome stooping. It is so important to women that it is sweeping aside all the sentiment they held for their favorite ranges.

The Clare Bros. Line of Ranges is Complete.

There is a modern Clare Bros. Range in the exact size any customer will want, and with whatever equipment she desires. They can be supplied with Warming Closets, Hot Water Reservoirs or Hot Water Connections for the boiler.

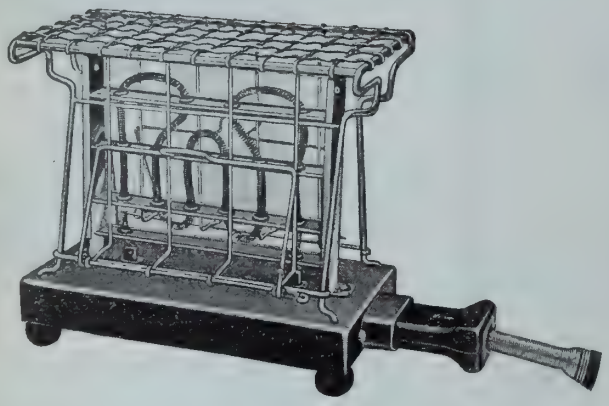
TWO NEW LEADERS

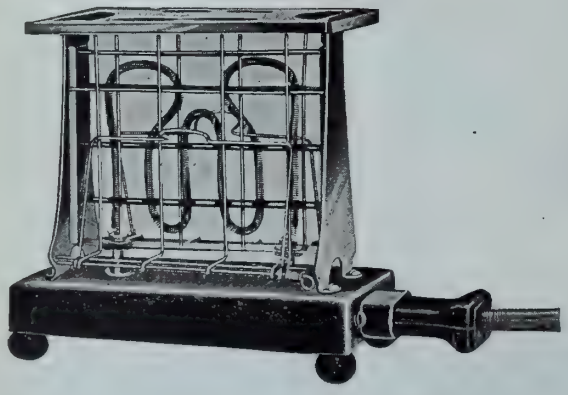
A New Idea in Construction



Catalogue W600, $5.00

Catalogue W600—A wire-constructed upright toaster mounted on enameled base. Well designed, light but rugged; has pleasing appearance and well finished.

This design allows us to place on the market a toaster much below the prices now asked. A toaster more efficient, heats quickly, toasts evenly two pieces of bread at same time. Equipped with toast holder and regular attachment cord.



Catalogue N610, $6.50

Catalogue N610 is a sheet metal toaster of new design mounted on enameled base, with very pleasing appearance. It will appeal particularly to the purchaser of a toaster as a present which can be used in the most particular homes.

The helical form of heater allows of all heat to be used. The glowing coils are a feature that must be seen to be appreciated. Heating element is easily replaced by removing two screws.

The contrast of black enameled base and highly polished nickel body is very dainty.

To be seen at the Toronto Exhibition at our booth in Machinery Hall.

Do Batteries Ever Sell Themselves?

Reliable Batteries do. That's what dealers claim to be the greatest feature of Reliable Flashlights and Batteries.

Most customers rely on the dealer's recommendation when purchasing their first battery.

But it's the second and succeeding purchases that count. Here's where Reliable sells itself and saves dealers' time and energy.

A customer once having used Reliable will always ask for Reliable because THAT BIG BRASS CAP (a special feature of Reliable Ignition Batteries) concentrates all the energy into fast, hot, flashing sparks that never fail in their purpose. Perfect satisfaction is always assured because every Reliable Battery is tested 3 times before reaching the customer.

You will find it profitable to feature the entire Reliable line of flashlights, Flashlight Batteries, Ignition Units and Ignition Batteries. What applies to one of them applies to all. Reliable batteries DO sell themselves.

The Dominion Battery Co., Limited

TORONTO CANADA

Let Us Introduce—

A Godsend to Housewives

A Gold Mine to Dealers

Our Motto—"Efficient Service"

With your first shipment we will send you some attractive window transfers to identify your store as "Miss Simplicity" Headquarters. How soon may we send yours?

Dealers handling "Miss Simplicity" can have a supply of attractive 4-color folders imprinted with their name and address. Tell us how many you can use to advantage.

Welcome In Every Home

RIGHT there is your opportunity. Housewives are realizing to-day as never before the wonderful advantages of electrical appliances in the home. That is why you should handle Miss Simplicity of Canada. It is just what housewives are longing for.

Of course, we are enthusiastic about Miss Simplicity. So would you be. And so you **will** be as soon as you know all about this electric washing machine and the terms we offer you.

Miss Simplicity is a boon in the home. It actually does the work it is intended to do—dollies out the dirt, relieves the housewife from the back-aching drudgery of the scrub board and gives more time for other duties while the work is going on. Miss Simplicity means cleaner clothes, more leisure time and happier, pleasanter homes.

Miss Simplicity means real money to dealers, just as much as it means greater happiness and freedom for the housewife. Miss Simplicity sells at an attractive price and there is a good dealer margin.

And back of Miss Simplicity is our unconditional guarantee. Why not write now for our dealer proposition?

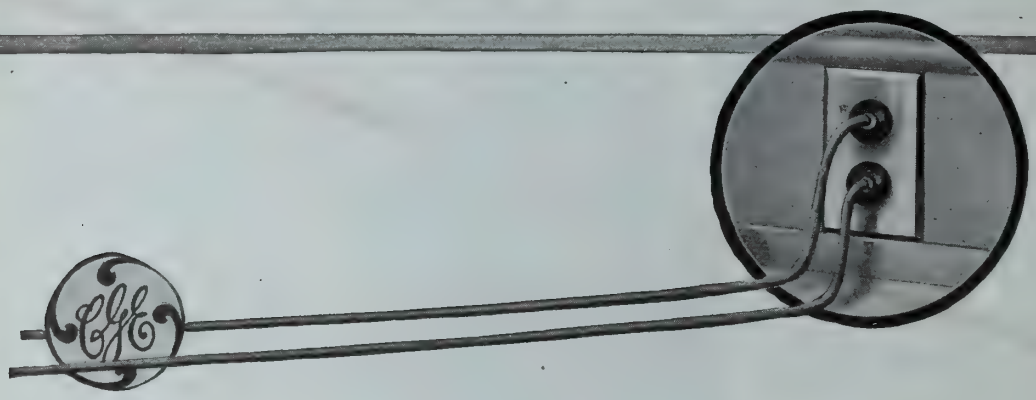
To appreciate the full convenience of Electricity, it is essential to have plenty of suitable outlets.



Added Convenience

An Electrical installation is not complete, or even adequate, unless provision is made for connecting portables such as:

Electric Fans,
Heating Devices,
Desk or Table Lamps,
Small Motor Driven Appliances, etc.

Plenty of C. G. E. Baseboard and Wall receptacles are necessary for convenience, and prove an economy in the long run.

Thor Electric Washer "32"

IN presenting *The New Thor 32* to hardware jobbers, dealers and users, we believe you will feel the same pride in this remarkably handsome and practical electric washing machine that we do in being its manufacturers and designers. This machine is the result of fourteen years of effort in developing and designing that which would appeal to the mechanical and artistic eye of jobber, dealer and user.

Ninety-eight per cent. of the machine is steel. It is equipped with a specially designed ball-bearing swinging wringer of our own manufacture. The interior body is of galvanized steel or copper, with either wooden or copper cylinder as desired. The entire machine is beautifully enameled in Thor gray.

The New Thor 32 is a reversing-cylinder type machine and will wash 10 sheets, which is 10 per cent. more than the No. 27 accommodates, though it takes up the same floor space and shipping space as the No. 25.

The New Thor 32 is now in production and we will be ready to make some deliveries September 1, 1920.

These are the Hubbell Plug Caps

with standard "Tandem" or "Parallel" Blades

TANDEM BLADES: Here the two brass contact blades are "in line" or tandem, and may be pushed into any plug base or receptacle of *any* make having standard tandem slots.

PARALLEL BLADES: In this type of cap the contact blades are parallel. Also of standard size and spacing, they may be pushed into any plug base or receptacle of *any* make having standard parallel slots.

HUBBELL (PATENTED) T-SLOT: This is a combination of the standard parallel and tandem slots, and is a patented feature of all Hubbell Receptacles and Current Taps. Thus a Hubbell Receptacle or Current Tap will take both types of Hubbell and *any standard* plug cap of *any other make*, whether its blades are parallel or tandem.

This commonsense construction is ably reinforced by highest quality in material and workmanship; all of which assure your permanent satisfaction. *Write for literature.*

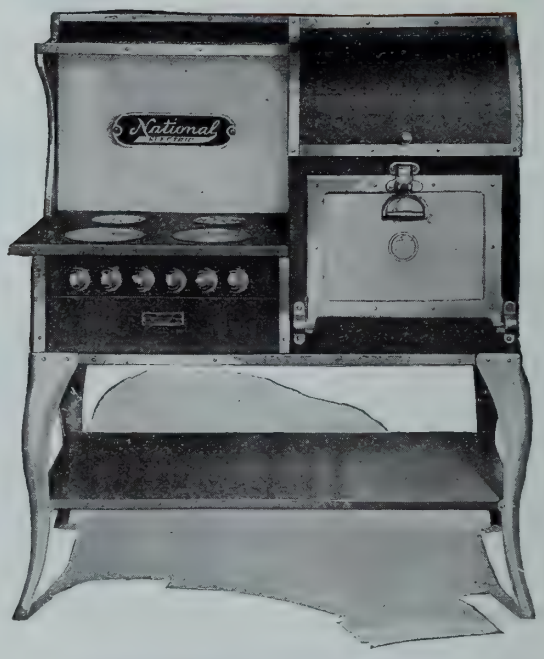
National ELECTRIC

Electric Appliances are an all-year staple. National Appliances are all-year sales-makers.



Model C6 Range

National Electric Appliances are built for service and they give it in the highest degree.

Why the National Line Sells

The National line of Electric Appliances is a quality line and sells on a quality basis. Electric appliances are used 365 days a year. New homes, etc., are opening every day, and the modern housewife demands the best in electric utensils. She buys these appliances with the National trademark of quality and service.

The National Electric Heating Co., Limited
Toronto: Canada

An Advertisement to Dealers in Electrical Goods

YEARS ago it was considered clever salesmanship and good business to "put it over" the inexperienced or ignorant customer—to get as much as possible for every article, regardless of its quality. This practice produced the motto "Caveat emptor" —or "Let the Buyer beware!"

How many merchants to-day would willingly adopt this system?

When such cases do occur in modern business, they usually result from lack of knowledge, or from a supposition of thus being able to sell the customer something "just as good" at a lower price. Few and far between are the cases where substitution is intentional and merely based on a better "margin"— for such a policy is almost universally known to spell commercial suicide. But substitution *does* exist to-day—hence, this advertisement. The definite instance that concerns us is this:

It is known that some dealers, particularly in certain sections, have been misled or persuaded into stocking imitations of the BENJAMIN Two-Way Plug, and are, in due course, passing these on to their customers.

Now, we do not seek to dictate to any man what he should or should not sell, but we do ask the trade to protect their own interests as well as the good name of BENJAMIN, by being careful not to sell a *foreign made* plug as a *BENJAMIN.*

Most of these cheap and imported plugs are *mechanically and electrically far below the recognized standard—are often dangerous to use,* and will very likely cause the dealer who sells them no end of trouble.

We feel sure you will realize, with us, how detrimental to *both* our interests it is should a customer obtain from your store a so-called "Two-Way Plug" *inferior* in quality, yet so closely *copied in appearance* from the Benjamin—that this customer actually believes he has obtained the genuine article.

Imagine his feeling towards us both when he discovers the inferiority of the plug he has bought!

Our advice to you is to beware of inferior "two-way plugs," examine them for yourself, note the mechanical differences between them and the BENJAMIN. Remember that each and every one of these is nothing more than an *imitation of the genuine, original Two-Way Plug invented by Benjamin.*

Furthermore, as some dealers have been known to prominently display a Benjamin sign near inferior products, we strongly advise the discarding of all Benjamin advertising cards, display cards, etc., if you are offering a foreign-made plug—don't let your patrons be deceived, either innocently or intentionally by such a practice as mentioned above.

It will pay you to buy and sell the genuine BENJAMIN "92" Two-Way Plug. It is proven mechanically and electrically perfect. It travels under its *own name on its own merits.* You are not dealing through a jobber with an unknown maker—where satisfaction is of no consequence and adjustments are impossible—but with a manufacturer whose name and reputation are behind every article produced.

BENJAMIN PRODUCTS

The following are divisions of Benjamin products on which we will be glad to send information:

Industrial Lighting Division
Electrical Division (including Benjamin Two-Way Plug)
Pressed Steel Products Division
Enameled Products Division
Starrett Panel Board Division

Insist on BENJAMIN products—Made in Canada by

Eveready "Flashlight Battery" Month

The Eveready "Flashlight Battery" Advertising Campaign begins in August starting a battery sales boom which will last through September.

The first message will be sent broadcast through leading newspapers, and ads will follow thereafter through September and October. These ads will not only feature Eveready Tungsten Batteries but will give names and addresses of Eveready Dealers in cities and towns where fresh batteries may be bought.

Many thousands of flashlights are distributed through Canada. Many thousands of batteries will be required to keep these lights alive.

This means record-breaking turnovers all Autumn for this Eveready Tungsten Battery drive comes at the exact season when battery sales increase.

Special window material and sales helps are being sent to all Eveready Team Workers. Dealers who are not already enrolled in the great "Eveready Double Sales" list should send at once for the Battery Month material. It's the first big drive for renewal sales of flashlight batteries—a regular typhoon of profits.

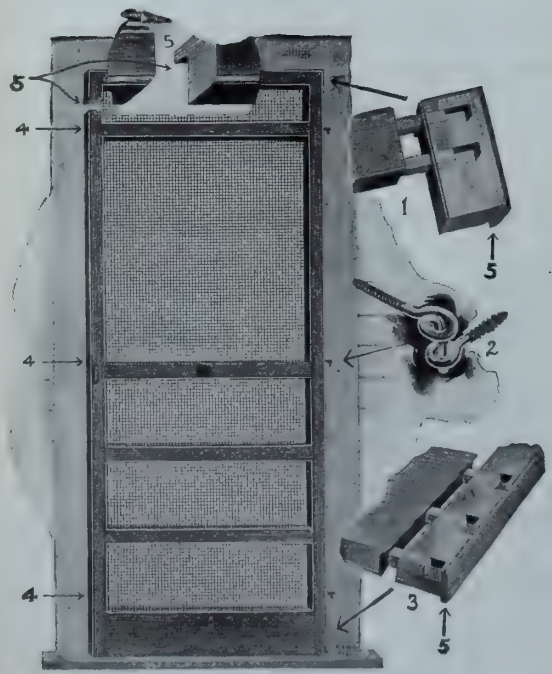
"Kasement" Screen Doors



Strongest and Lightest Doors Made

"Kasement" doors have twenty-six genuine mortise-and-tenon joints as shown in illustration. These joints are positively guaranteed not to pull apart. "Kasement" doors are *guaranteed not to sag.*

Complete hardware sets are supplied with each door, put up in neat cartons all ready to hand out.

"Kasement" doors cost no more than the better grade of old-style doors, and are by far the cheapest in the long run. They wear longer—require only a few minutes to put up, and can be taken down in a jiffy. No planing down of the sides necessary—they fit against the door casing, not in between.

For the season 1921 we are doubling our capacity in order to keep pace with the ever-increasing demand for "Kasement" doors. Write us at once and we will give you full particulars, and if possible have one of our salesmen call on you.

—*a dominant Washer for dominant Dealers*

WHEN we say that BlueBird is "The Aristocrat of Washing Machines" we are well within the facts.

For BlueBird is not designed or built on a competitive basis—it is the *de luxe* product of the industry, as well in its outward dress as in the inner details of its construction—a wonderful triumph of Canadian mechanical genius and manufacturing ability.

But—do not let this statement convey to you the idea that BlueBird is an "exclusive" class product in the matter of sales. BlueBird is made for the *best* trade—whether it be the home of the millionaire or the mechanic; made for those people in every walk who appreciate that only *Quality* truly represents *Value*. (As a matter of fact, our sales records demonstrate that it is in the home of moderate means—where the woman of the house is brought most directly in contact with washday drudgery—that the BlueBird Washer and Wringer is most quickly appreciated and most readily bought).

The fact is, BlueBird is *not* built to meet a pre-supposed investing power of the individual—it is built to last a lifetime and to perform the most efficient work in the shortest time and in the most economical way. It is built to meet the demand that exists in every community for just such a quality product.

It is built with the idea of enabling the dealer who handles the BlueBird line—whether it be the BlueBird Electric Clothes Washer or any other household appliance from the Canadian BlueBird factory—to *dominate* his market.

The BlueBird sales policy recognizes that the dealer is entitled to fullest possible compensation for his efforts. The BlueBird dealer works in direct contact with the factory—and BlueBird discounts go to only one selling agency: the dealer himself.

Write to-day for a booklet entitled "Pay Dirt," that will open your eyes to the tremendous possibilities of the Household Appliance business.

Since 1881 our ivy-clad factory building on King Street West, Toronto, has been used for the making of fine Silverplate. To people in every part of Canada the trade names 'Heirloom' and 'Rogers 1881' bring again to memory their visit to Toronto.

Many Jewellers have visited the Display Room formerly at the Factory. This Display Room is now located in the Kent Building, on Yonge Street, at the corner of Richmond. It was removed to the downtown address two years ago for the greater convenience of Jewellers visiting the City.

When in Toronto, be sure to come in and view the display of Flatware and Hollow Ware. We know of nothing finer or more interesting to the trade.

The famous "Red Star" Washer

A Washer You Can Sell

The Red Star Washer has been one of the greatest successes in the Hardware Line in recent years.

Dealers are selling them everywhere, in towns, cities, villages and farm homes; not only in Canada but abroad as well.

Dealers who have once tried them keep on ordering. They find there is a good margin of profit, quick turnover, no "service" expense and no complaints.

The Red Star is most attractively finished and carefully built in every detail. Directly customers try the machine in the store and see how easily and quietly it works they are "good prospects."

The Red Star is backed by a big organization and has ideals of service built right into it.

Tub is made of cypress. The dolly shaft works on two sets of bicycle ball bearings. All working parts depend on a solid iron bed plate and remain in adjustment for years. The machine is assembled in a moment and takes up very little space in your store or warehouse. Working parts are sent inside tub to save space.

If you are handling the Red Star, it is a profitable line to display in window or store. If you have not yet joined the ranks of Red Star dealers, get one right away and test its selling qualities for your own trade.

Best Quality Pumps at Lowest Prices

The BT "Ready-to-Ship" line of well pumps is designed to cover the requirements of the well pump trade.

There is a pump for every purpose—whether it is needed to pump small quantities of drinking water for the house or water 60 head of stock. There are pumps for forcing water underground or for filling attic tanks.

Every pump is supplied with a range of cylinders and selection of strokes to adapt it to different conditions.

By concentrating on these particular pumps and cutting out a lot of useless designs we have been able to put the maximum quality into them at the lowest possible cost.

There are seven pumps in the BT Ready-to-Ship line, and with these you can carry a complete stock. This is good, profitable business and it is within the reach of every hardware dealer.

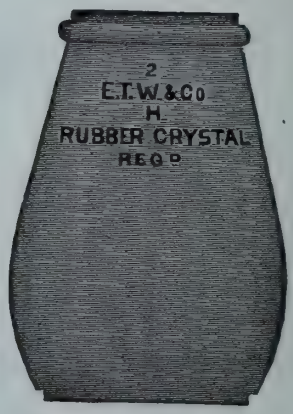
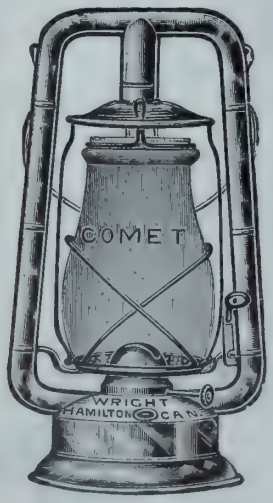
MANUFACTURERS OF COLD BLAST LANTERNS OF WORLD-WIDE REPUTATION

Our Cold Blast Lanterns are known not only within the Dominion, but throughout the whole world, for their superior burning qualities, excellent light-giving properties, and strong durable construction, which three exclusive features are due to our knowledge and experience of over 37 years as Lantern Manufacturers. They represent the last word in up-to-date scientific Lantern construction, and are absolutely unrivalled in appearance, utility and price.



"RUBBER CRYSTAL" Cold Blast Globes

These are not ordinary brittle glass, but a special composition, which is perfectly transparent, but introduces an element of resiliency, thus making the globe proof against changes of temperature, hard knocks or rain drops. These globes are frequently dropped on the floor without breaking. Hence the name, which is your safeguard—"RUBBER CRYSTAL."



"COMET" Hot Blast Lanterns

This little Lantern has the same care and attention given to every detail, and is very popular, particularly as an export line.

If you want lantern satisfaction—ask for Wright's Lanterns and "Rubber Crystal" Globes.

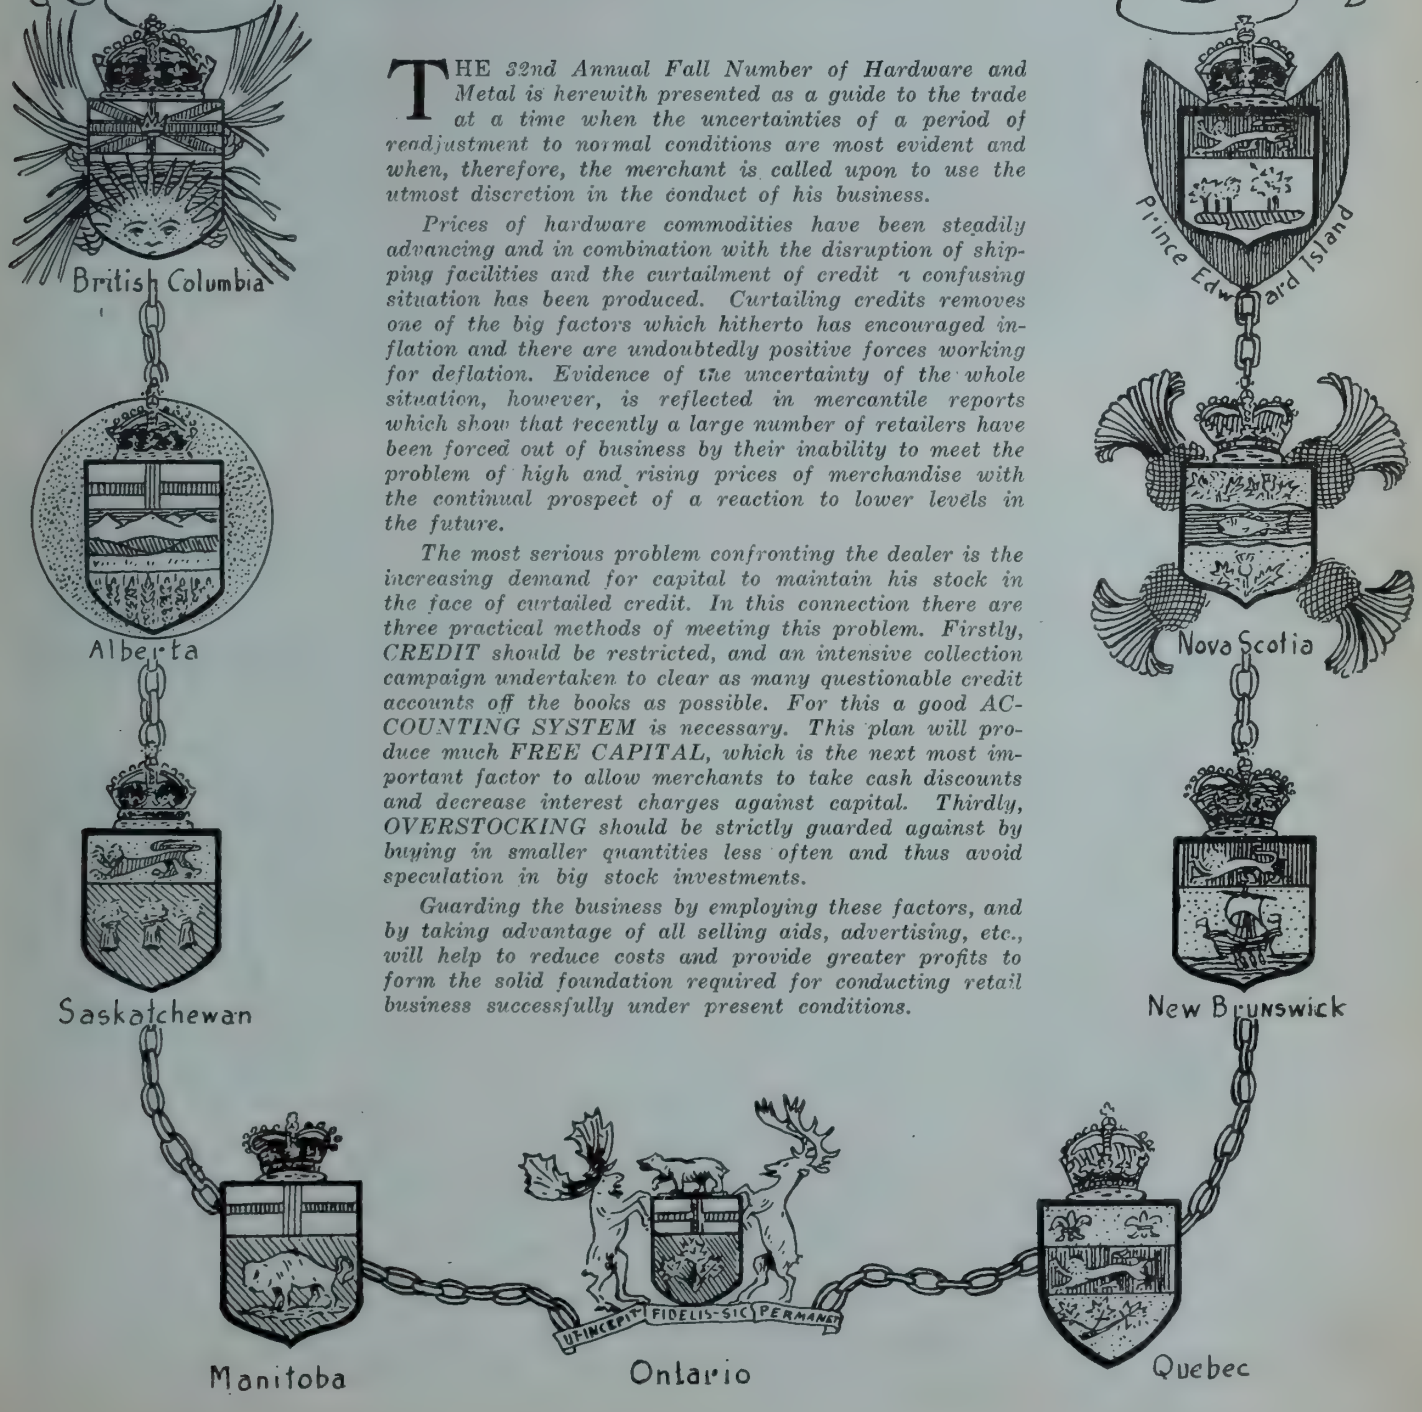
Canada's National Hardware Weekly

HARDWARE AND METAL

Published Every Saturday Since 1888

Vol. XXXII. TORONTO, AUGUST 21, 1920 No. 34

Fall Outlook Demands Merchandising Skill



THE 32nd Annual Fall Number of Hardware and Metal is herewith presented as a guide to the trade at a time when the uncertainties of a period of readjustment to normal conditions are most evident and when, therefore, the merchant is called upon to use the utmost discretion in the conduct of his business.

Prices of hardware commodities have been steadily advancing and in combination with the disruption of shipping facilities and the curtailment of credit a confusing situation has been produced. Curtailing credits removes one of the big factors which hitherto has encouraged inflation and there are undoubtedly positive forces working for deflation. Evidence of the uncertainty of the whole situation, however, is reflected in mercantile reports which show that recently a large number of retailers have been forced out of business by their inability to meet the problem of high and rising prices of merchandise with the continual prospect of a reaction to lower levels in the future.

The most serious problem confronting the dealer is the increasing demand for capital to maintain his stock in the face of curtailed credit. In this connection there are three practical methods of meeting this problem. Firstly, CREDIT should be restricted, and an intensive collection campaign undertaken to clear as many questionable credit accounts off the books as possible. For this a good ACCOUNTING SYSTEM is necessary. This plan will produce much FREE CAPITAL, which is the next most important factor to allow merchants to take cash discounts and decrease interest charges against capital. Thirdly, OVERSTOCKING should be strictly guarded against by buying in smaller quantities less often and thus avoid speculation in big stock investments.

Guarding the business by employing these factors, and by taking advantage of all selling aids, advertising, etc., will help to reduce costs and provide greater profits to form the solid foundation required for conducting retail business successfully under present conditions.

EVERYTHING WHERE CUSTOMER CAN SEE IT

"Everything where the customer can see it," the underlying idea of the store fixtures outlined in the story, is well demonstrated in these interior views of the W. H. Thorne & Co. store.

In the view shown above there are wall shelves with cabinets below and drawers. Samples of lines pertaining to each department are prominently displayed in an attractive manner. The display cases also bear out the idea.

A section of the automobile accessory display is shown. The Thorne store was one of the first in the Maritimes to adopt accessories and the department has been a success from the start. The services of an experienced automobile man were secured to take charge of the accessories and a complete catalogue of lines has been found to be a splendid business getter.

The front and other side of this case demonstrate percolators, toasters, grills, etc., and it will be noted a display of similar lines appears in the wall cases opposite. Thus the department stands as a unit and both sides of the aisle reflect similar lines on display.

"Greatest Reward to Hold

Says Senator Thorne, President of W. H. Thorne & Co., Ltd., St. John, N.B.—He Started as a Clerk Fifty-Nine Years Ago and Has Since Built Up Important Maritime Institution, Despite Early Setbacks

JUST as the fabulous bird Phoenix rose from its ashes to become virtually more powerful, so unto it may be likened the history of the W. H. Thorne & Company's hardware business of St. John, N. B., which despite the setbacks attendant with the days of destruction by fire in St. John (1877) and subsequent loss by fire in the store in 1915, the business has reared itself and developed with steady and persistent growth until to-day it is one of the most influential retail hardware stores in the Maritime Provinces.

The past forty-three years have marked the growth of the W. H. Thorne & Co.'s business from the two-storey frame structure occupied on Market Street in 1877 to the present imposing store with its several distinct departments, each with its complete stock, and the whole store replete with the most up-to-date fixtures and facilities to aid its customers in the selection of merchandise.

For fifty-three years the Thorne Company have been engaged in the hardware business and its development has been achieved under the guiding hand of Hon. W. H. Thorne, president of the company. Other officials of the company as at present constituted include S. E. Fisher, general manager of the retail department, whose service with the company dates back to 1893; John F. Tilton, who has just recently taken over the position of buyer, having been with the company for thirty-seven years, and W. H. McBride, manager of the Paint and Glass department, whose record dates from 1902.

While, as a matter of experience, some of the older established businesses are inclined to be conservative and less apt to adopt the up-to-date methods of modern merchandising, yet this is not the case with W. H. Thorne & Co. The head of the firm credits much of the success of the enterprise to the fact that they have always kept abreast of the

Confidence of Customers"

W. H. Thorne Store Reflects Most Up-to-Date Methods of Merchandising With Best Facilities for Shopping—Some Good Suggestions for Fall and Winter Trade in Its Ten Distinct Departments

times in respect to merchandising methods.

Ten Distinct Departments—Each Has Its Manager

There are ten distinct departments in the retail store, and a manager is in charge of each department. There is the silverware and fancy goods department; tools and draftsmen's supplies; builders' hardware; kitchen utensils; paints, oil and glass; mill rope and deep sea fishing supplies; sporting goods; toys, phonographs; automobile accessories.

Store Fittings Put Goods Where Customer Can See Them

Throughout each of these departments, the most modern display facilities are employed. The management are fully alive to the importance of placing the goods where the customer can see them, and though these installations cost many thousands of dollars the expenditure is now felt to have been well justified by the impetus that is given trade and the prestige which high class fittings lend to any store interior.

The installations referred to consist of glass fronted wall cases under which are shown samples of the stock of various shelf lines. Carrying out the general plan twenty showcases have been placed throughout the departments, these containing further displays of lines to those shown in the wall cases where the two fixtures come within range of one department.

The idea of the management in so planning the store was that the customer on entering could see at a glance where the article required was for sale, and various grades of that article were grouped for comparison on the basis of price and quality.

Special Attractions to Draw Customers

S. E. Fisher, general manager of the retail department, who started with the firm as a boy, twenty-seven years ago,

EXPENSIVE FIXTURES BRING BIG RETURNS

Here is the other side of the store, and the same plan of display in wall cabinets, shelves, drawers and display cases is carried out.

The front case contains a display of safety razor outfits with a case of fountain pens on the top glass. Numerous other lines have their place in each cabinet.

It will be noted in this picture that a cash carrying system is used. This is another feature of the up-to-dateness of the store fittings.

The installations of fixtures cost many thousands of dollars, but the management feel that the outlay has been fully justified by the results it has produced in raising the prestige of the business and the impetus which has been given trade.

Twenty of these showcases are used in the main store, and articles are grouped according to price and quality.

The store manager is very much in favor of demonstrations, believing that a customer appreciates definite information on the use of various articles. When demonstrations are not in progress, the nearest approach is to have the goods well displayed and have clerks who are well enough posted to be able to give full information to customers.

is a firm believer in arranging special attractions in order to bring customers to the store.

"One of the biggest boosters," he says, "is a demonstration." Supporting his statement, he added: "Just before Christmas we had a special sale of aluminum ware, with a demonstrator from the factory in attendance. During the two weeks in which the demonstration was being carried on, our kitchenware department was crowded, resulting not only in completely clearing out our stock of the special line being advertised, but also greatly increasing sales of other lines as result of getting people into the store to buy.

"We found that the demand for other aluminum goods almost came up to the demand for the special, as well as a big increase being experienced in the sale of other lines.

"We have had a good many demonstrations during past year, and cannot speak too highly of them."

Automobile Accessory Department was a Success from the Start

Ever on the alert for the possibilities of developing new branches of business, W. H. Thorne & Co., Ltd., were one of the first hardware merchants in St. John to enter upon the sale of automobile accessories as a regular feature of their established hardware business.

In making a start, of this department, the services of an experienced automobile man were secured, and a well chosen stock of accessories and tires purchased.

The accessory department was a success from the start, to use the words of the management, and everyone was enthusiastic over the measure of success which has attended its operation. Not long after the start of the department, it was found that a catalogue could be of great assistance to customers in keeping before them in complete and compact form, a listing of the various accessories for lightening labor, for improving the appearance of the car,

SENATOR W. H. THORNE

or for facilitating its operation. It was felt that an automobile accessory catalogue was something that a motor car owner would be interested in for reference during his leisure, and it would therefore act as an efficient salesman and a splendid advertisement for the store. Hence it was not long before practically every automobile owner in the district had a Thorne Automobile Accessory catalogue in his possession. The manager of the department states that the catalogue has proved to be an effective business getter. This year the firm is putting out a catalogue of accessories which is double the size of the first one issued. It is some indication of the development of the accessory trade when it is found necessary to double the size of the catalogue to accommodate the increased variety of stock to be shown and described. Each accessory is listed with complete information and prices, and the majority of the lines are well illustrated to assist the customer in his selection.

A feature of the selling method employed in the automobile accessory department is that numbered among the best customers are many garages. A salesman is at all times in touch with them as to accessory requirements.

One window of the store is constantly devoted to displays of accessories and during the motoring season a quarter page advertisement is run in the local newspapers with the intention of stirring up and maintaining enthusiasm in connection with that department of the store trade.

One of the Best Equipped Sporting Goods Departments in Canada

Having been remodelled in 1915, after a serious fire in the store, the sporting goods department is now conducted with the utmost efficiency and is considered to be one of the best equipped departments to be found in any hardware store in Canada.

Here, too, are found special features in regard to selling methods, all destined to create interest, enthusiasm and resultant business for the store. Salesmen of the sporting goods department make it a point to keep in touch with all the clubs, associations, baseball leagues, churches, and all other organizations where sporting goods are apt to be required and where good-sized orders generally result from such efforts. The large amount of business secured by the store in such goods is ample evidence of the success of the plan.

Poultry supplies are handled in conjunction with the sporting goods department, and during the spring and summer months many poultry fanciers make Thorne's their headquarters for supplies.

Every line of sport is well represented in the department and effective displays of seasonable lines are always to be found. The policy followed by the manager of the department is to get in a little ahead of the other fellow. He realizes that it takes a little while to awaken people from their natural inertia at the time of a change in the seasons, and he therefore finds it a successful plan to have seasonable sporting goods on display for a short time before the season actually opens for that class of goods.

As an instance tennis goods will be displayed some weeks before the tennis season actually commences so that the

After the big fire in St. John in 1877, many of the merchants had to start all over again. Temporary structures were built in order for the merchants to carry on their business. The picture shown is the structure built by Messrs. W. H. Thorne & Co. in the Market Square. Other St. John merchants put up similar buildings and, in spite of great hardships, carried on, with "business as usual" for their slogan. Nothing could stop the men who were building up St. John.

customers become accustomed to seeing the goods displayed in the store, and then when the season arrives and they begin to dig up their last season's togs, rackets, balls, etc., and find some parts of their outfits needs replacing, their mind links up the display they have but recently seen with the things they require, and the great chance is that they will go back to the display to make their purchases. There is a certain psychology about this linking up of thought, but successful selling methods to-day are more than ever taking into consideration the human traits and how to play up to them successfully.

Phonograph Business Has Grown Rapidly

One of the later additions to the Thorne business is the phonograph department the growth of which, during the past few years has been so rapid as to bring it to-day to the place where it ranks as one of the most important in the enterprise.

The phonograph department comes under the personal supervision of J. C. Harrison, secretary-treasurer of the firm, and to him goes the credit for developing the department from a small beginning to a business of such proportions that a staff of seven employees is required to handle the trade.

The demonstration parlor in connection with the phonograph department is the last word in comfort, being furnished with comfortable lounges, arm chairs and heavy floor rugs. Two sound-proof booths have been constructed in order that a number of machines can be used at one time without causing annoyance. The atmosphere of the department is one of comfort, where store patrons may come at their leisure and make their selections of records after hearing them played on a high-grade machine. The indirect lighting effect of the department with beamed ceiling and walls combined with the pictures hung and the use of ornaments gives a homelike appearance which is very appealing.

Private Recitals in Guest Hall

Private recitals are arranged periodically by the firm, and a main hall seating nearly two hundred guests is available for this use.

Speaking of the methods used to develop the phonograph business, Mr. Harrison says: "At different times we have hired the leading theatre of St. John for the purpose of holding a so-called 'tone-test,' or direct comparison of the voice of a singer with the mechanical reproduction of the same voice."

Admission to these recitals is by ticket, and these are obtained from the phonograph department, the name and supply of seats are always on hand for customers' use.

"In this way it is possible for us to keep in touch with all the music lovers in the city," says Mr. Harrison.

LUXURY AND COMFORT IN PHONOGRAPH DEPARTMENT

This department of the Thorne business has grown to great proportions though it is one of the later departmental additions.

Luxury and comfort is reflected by the use of homelike furnishings and the customer at once feels at ease. Here one may relax from the fatigue of shopping and leisurely make a choice of selections by favorite artists. Complete catalogs of latest records are available and two private soundproof booths are provided so that more than one customer may be accommodated at one time.

A feature of the selling methods employed in this department is the holding of private recitals. These are largely attended and the name of each guest is retained as a prospect. A hall seating nearly two hundred people is used for this purpose.

The name and address of every caller in this department is also kept, to be used as a mailing list for record suggestions. Instruments are placed in the customer's home on a free trial basis if desired.

Courtesy on the part of salesmen in the department is a big feature owing to the class of trade which is served. The clerks endeavor to keep in mind the name of each customer so as to become better acquainted with them. The department attracts a large number of the music lovers of the city.

"We find that many of the patrons who are not successful in securing a ticket of admission come to the store the following day to hear the artist's voice on the phonograph, and others who were present at the recital come to hear other selections by the same singer."

No detail is overlooked in the conduct of the phonograph department which might have any bearing on the service rendered, comfort of customers and the provision of facilities for making satisfactory purchases. The name and address of every caller in the department is recorded. It is the endeavor of all the salesmen to know the customers by name and to make them feel welcome and at ease. Any customer who so desires can have an instrument placed in their home on trial without being under any obligation to buy. The courteous manner of the salesmen combined with the generous offer result in a large percentage of sales.

AUTO ACCESSORIES SUCCESSFUL FROM THE START

One of the first hardware merchants in St. John to open a department for the sale of automobile accessories was W. H. Thorne & Co. An experienced automobile man was employed as manager and many unique selling features have been introduced in the sale of accessories. Every automobile owner in the district now gets a copy of the Thorne auto accessory catalog and this is found to be an energetic worker for bigger sales.

has been found that the ability to give real definite information and make suggestions to customers in regard to decorating, are the important factors in securing and holding the customer's trade, for there is too little of it done

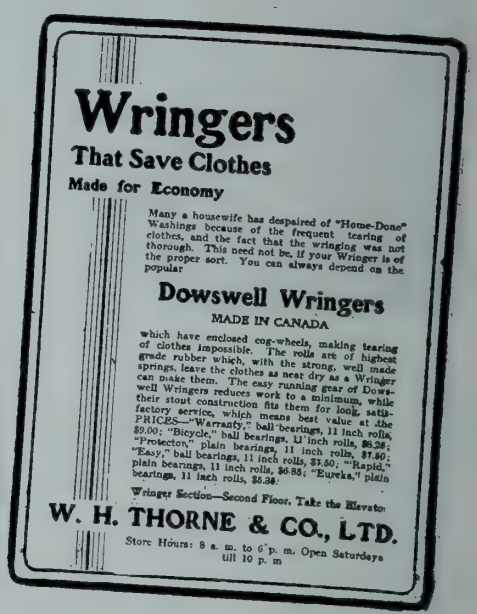
the captains of steamers. Every steamer coming into the port of St. John is met by one of these travellers and a large volume of business is secured from the shipping industry.

Window Displays are Important Feature

Window displays and advertising are special features. An expert window trimmer and show-card writer is on the staff and it is his duty to change the windows every week. There are nine windows in the Thorne stores and is therefore kept busy. Every window trim is accompanied by neatly written showcards, calling special attention to different articles and inviting patrons to come inside and inspect the stock.

Special Advertising Man

The newspaper advertising calls for the services of a special advertising man. There are four daily papers in



The Paint and Glass Department is a Hive of Industry

The paint and glass department is looked upon as the outstanding feature of the Thorne business. A busy scene is always presented in this department. Speaking with the manager of this department, Mr. W. H. McBride, another long-service man, we find that he is a firm believer in the importance of getting orders out promptly.

"When a painter telephones in an order, he wants it right away," he says, "and the firm who supplies him most promptly is the one that will get his business."

With the householder, too, the utmost consideration is given. The staff of salesmen in the paint department are thoroughly acquainted with the stock carried, the best grades for various classes of work, and can give well-founded advice as to color schemes, etc. It and there are too many clerks who are not thoroughly enough acquainted with details of the manufacture of paints and how to use them most effectively.

Mr. McBride does not believe in bargain sales in selling paint.

"Supposing we have a few odds and ends" he says "and clean them out at bargain prices, somebody starts a job and finds they have not enough paint to finish it—back they come, and the chances are that we have no more of that particular stock, or if we have the price is higher. In either case the customer leaves the store feeling dissatisfied, and immediately a wrong impression is created. Good service and a thorough knowledge of your goods will get you more business than any clean-up sales."

Business From the Shipping Industry

The firm employs three city travellers who call upon builders, contractors and

St. John, and each one carries the store advertisements. Mr. S. E. Fisher believes in making the window displays and the newspaper advertising work together. When automobile supplies are being advertised there will be a special display of these goods in the windows. Whatever goods are seen advertised will also be seen in the store windows as long as the ad. is running.

President Started as a Clerk Fifty-Nine Years Ago

Senator Thorne, the president of W. H. Thorne & Co., Ltd., is a man who started his career as a clerk fifty-nine years ago, and the great mercantile concern which he has created stands as a monument to the ability, the energy, and the persistence of one man. Furthermore, it is in itself a substantial tribute to another phase of his character—his ability to arouse the enthusiasm and loy-

ONE OF THE BEST EQUIPPED SPORTING GOODS DEPARTMENTS IN CANADA

This is the record which is held by this department in the Thorne store. Here again will be noted the large and complete stock, and the splendid display facilities as followed out in the other departments.

A sample of every line in stock is on display and within the customers' reach. Several sections of the wall cabinets are used for displaying rifles, the boxes of ammunition being kept on adjoining shelves. Hockey boots, skates, bicycles and other sporting lines are all shown. Poultry supplies are also a popular line in the Thorne business.

The salesmen of this department are in touch with all local clubs, associations, baseball leagues and other organizations which are prospective customers for sporting goods. Much business is secured from this source.

The display of lines a short time ahead of their season, as may be noted in this illustration, bears out the plan followed by the department manager in getting in a little ahead of the other fellow. He realizes that it takes time to stir people up when the seasons change. This is another case of having a knowledge of human peculiarities and playing on them to good advantage.

alty of those with whom he has come in contact.

Speaking on business conditions of to-day as compared with conditions of fifty-two years ago, Senator Thorne says:

"One cannot help but look back with amazement at the changes that have taken place, not only in methods, but in the personnel of customers. Old methods have gone and old customers have disappeared, while new ideas and younger merchants have taken their place.

"Few proper accounting systems prevailed in those days. Our methods generally were loose, with no fixed system in either accounting or the granting of credits. To-day credits are shortened and business is done chiefly on a cash basis.

"In former years traders as a rule visited the city twice a year for the purpose of purchasing their season's requirements. Every clerk in those days was a salesman and had to put up his own orders, and much of the work was of a character such as the salesman of to-day would not be called upon to do. The handling of putty, ochres, oils and paints was, if possible, shirked by all clerks. The hours were much longer, and the work harder.

"During the busy seasons we seldom left the store before midnight, and in many cases worked into the 'wee sma'' hours.

"To look back over fifty-three years and know that the confidence of the customers has been retained, is the greatest reward a business man can have."

Peak in Sheffield Iron Prices Reached

The conditions in the steel trade at Sheffield are not so favorable as they were some months ago. Offers in England and on the Continent of large tonnage of semisteel bars and plates from the United States at prices below British quotations has had a depressing effect. It is reported that a good quantity of orders has been given to the United States manufacturers. This competition and some cancellations of foreign orders have weakened somewhat the position of British makers. It is said the premiums on basis prices asked here have been modified. The tendency of costs is, however, in an upward direction. In finished steel there is a decrease in inquiries and new business, and while makers have sufficient orders to keep them busy for the remainder of the year the prospects for the new year are not bright.

There is a great scarcity of all descriptions of pig iron. West coast hematite costs about £16 (77.86 at normal exchange) per ton delivered to local stations. Foundry iron is about £13 10s. ($65.79) per ton and in extreme cases £14 ($68.13). Makers of finished iron can dispose of their output as fast as they can make deliveries.

Fall and Winter Adv. Suggestions

The reproduction of some sample advertisements herewith will give some idea of the lines being advertised by others in the trade in all parts of Canada, and will impart some ideas or suggestions which others may incorporate in their local advertising for fall and winter.

THERE are a great many seasonable hardware lines during the fall and winter months which lend themselves to effective treatment through the medium of advertising. Many of the lines can form the basis of a strong appeal from the utilitarian standpoint for cool weather, and others from the standpoint of personal comfort and usefulness to the user. Herewith are reproduced a number of fall and winter advertisements which contain some merit and which might suggest something to the dealer framing ads. at this time of year, and help him to derive better results from his advertising.

Don't Be Caught Napping With An Inefficient Heating Plant

Stoves are one of the important lines for fall trade and a number of splendid stove advertisements are shown herewith. An ad. by Emerson & Fisher, Ltd., St. John, N.B., says: "Don't let cold weather catch you napping—With the thought of cold weather comes the query: 'Is my heating plant in condition to do the winter's work. If not, your best plan is to see our full line of heating stoves. Whatever the size we will demonstrate to you the actual money saving of buying stoves with reputation.'"

Oil Stove Makes a "Warm, Cosy Welcome."

Another stove advertisement by W. H. Thorne & Co., Ltd., St. John, N.B., contains a nice layout illustrating an oil stove and stating as follows: "A Warm, Cosy Welcome." "The comfort of an oil heater means a warm welcome indeed on extra cold days—and a home really comfortable for grandma and everyone else when extra heat is needed. Easily carried about—ten hours heat on a gallon of kerosene oil. A big coal saver. Come in and see one—you'll take it."

This ad. is personal in its appeal and is also specific. It mentions an experience which practically everyone has had, and appeals strongly to the sense of comfort which goes with a warm home.

Oil Stove Makes the Home "Livable" on Autumn Days

Another stove ad. by the same firm, directed along somewhat different lines, reads: "Make the home 'livable' these chilly autumn days." Continuing it states: "However hot and good the dinner may be—a chilly dining-room spoils it; a cold bedroom is anything but pleasant in the morning and at night it removes all pleasure of rest; a chilly bathroom is unbearable; and the living room—the heart of the family circle—must be cheery and warm. You don't need coal fires just now; and what better than an oil heater. And not only in homes is the oil heater found; in offices, restaurants, hotels, clubs, indeed it is welcome everywhere. Think of it. With an oil heater you can convert, in a jiffy, the coldest spot of the coldest room in your house to radiant warmth and "livability."

A wide use for oil stoves is outlined in this ad. and its appeal is directed toward conditions as they affect every room in the house, and its uses apart from the home. It is an ad. designed for this time of the year before the coal grate fire season starts.

"Don't Put Off Buying Stove Until Last Minute"

A warning that it is not a good policy to put off buying the stove until the last minute is very timely in view of the conditions existing in the stove industry. It is there-

fore a point well taken in the ad. by the Manville Hardware Co., Ltd., Prince Albert, Sask. Continuing, it says: "Most people keep putting off their buying until the last minute, which is not the best thing to do at the present time owing to the unsettled conditions of the markets—for in many instances goods that we have on our floor today cannot be replaced at anywhere near the price they were bought for a few months ago."

In the same advertisement mention is made of the fact that now is the time to have storm sash repaired.

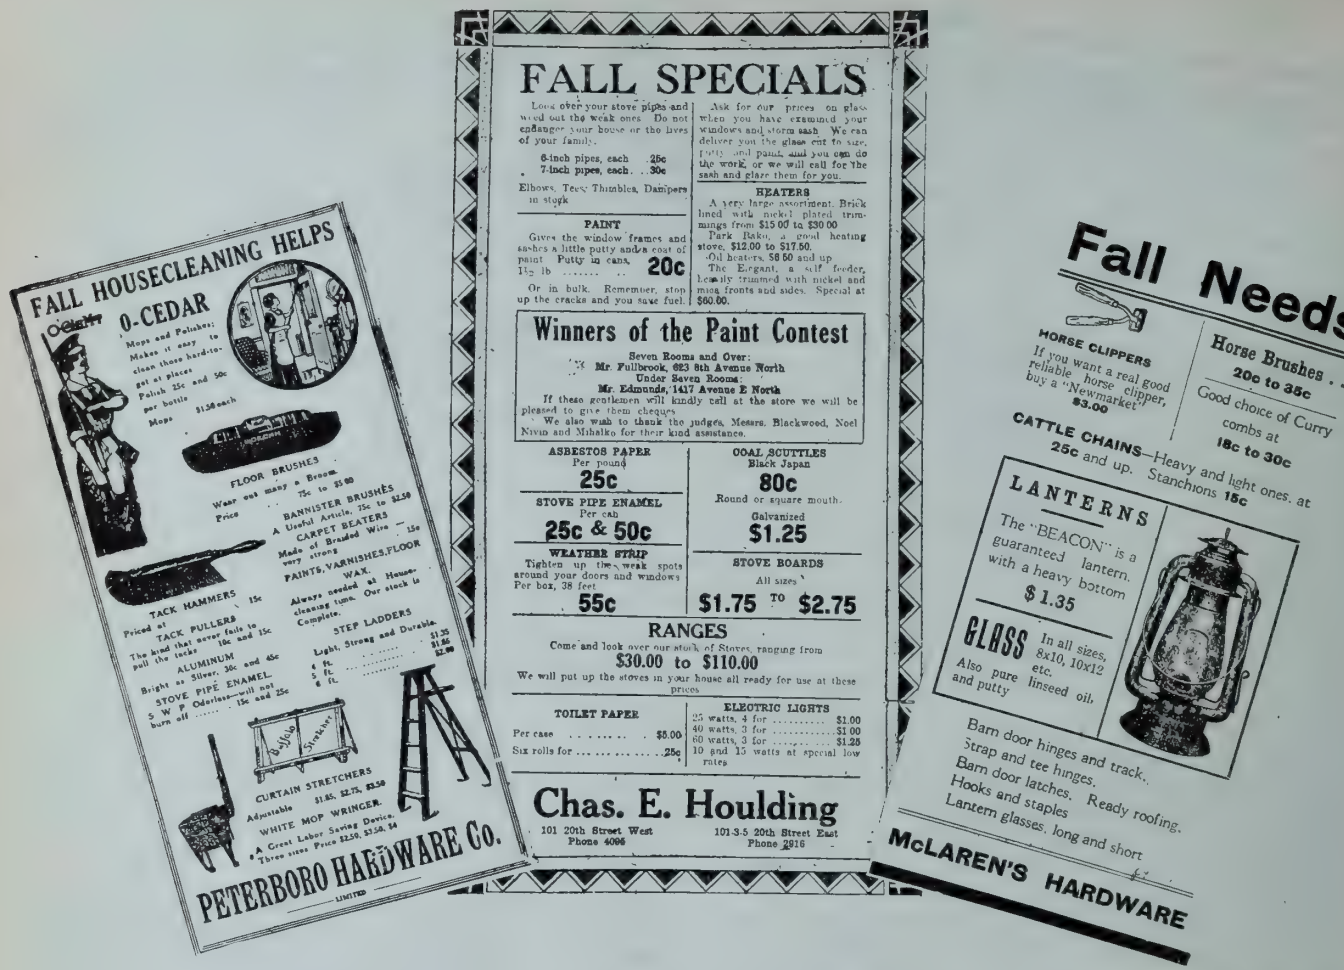
"Keep Home Comfortable During Long Winter"

"You will soon need that heating stove," says an ad. by Whyte & Orr, Ltd., Daysland, Alta., "which will keep your house cosy and comfortable during the long winter soon to be here. You had better pick it out of our well-assorted range of styles right away, as we believe stoves will be very scarce before December and you might be disappointed if you let it go too long."

Ash Sifters, etc., to be advertised simultaneously with Stoves

Other lines which are accessories to the heating system of the house, and which can well be advertised at the same time as stoves include mantels, fire irons, ash sifters, etc.

An ad. on ash sifters by Mills Hardware Co., Ltd., Hamilton, Ont., says: "Coal is dear, and likely to be dearer—that's one of the most important reasons why you should sift your ashes and save every scrap of coal, thereby getting the maximum amount of value out of your fuel sup-



ply. This and other illustrated ads. on ash sifters are shown herewith.

Mantels

An ad. on wood mantels, also seasonable at this time of year, is shown. It is by W. H. Thorne & Co., Ltd., St. John, N.B., and reads: "As the hearthstone is the gathering place of the family circle during fall and winter evenings, the mantel is naturally the most prominent in the furnishings and should be the most attractive. Our fine display of wood mantels comprises an excellent range of prevailing effects in oak, mahogany, and colonial white, suitable for living-room, dining-room, hallway, den or bedroom."

Fireplace Furnishings

Another ad. by the same firm emphasizes fireplace furnishings with an illustration of a fender. It reads, "Open fires, so grateful these chilly days, naturally suggest fireplace furnishings, which we offer in ample variety, including fenders, andirons, spark guards. The fenders and andirons are shown largely in the popular black effect in which we also have fire iron sets consisting of tongs, poker, shovel and hearth brush."

Flash Lights

With the approach of cold weather with its long evenings, flashlights, lanterns, etc., come into greater usefulness. An ad. by the Rogers Hardware Co., Ltd., says: "Flashlights are a necessity." "Flashlights are admitted to be the only satisfactory medium for obtaining a quick, strong concentrated light that is always ready."

A suggestion for increasing the effectiveness of advertisements on this line is to link up the appeal with some specific usefulness of a flashlight in order to make the appeal more personal and direct.

Thermos Bottles

Cold weather also brings on a period of seasonable demand for thermos bottles and thermos lunch kits. An ad. by Thompson & Sutherland, Ltd., New Glasgow, N.S., reads: "The man who carries his lunch appreciates the advantage of a good thermos bottle when the thermometer is below zero and he needs a hot invigorating drink."

Another ad. on thermos lunch kits by Emerson & Fisher, Ltd., St. John, N.B., reads: "Home prepared liquid refreshments kept piping hot as you desire and wherever you go. Double the pleasures of sleighing and skating parties."

Thermometers

Thermometers are also in demand with the approach of winter and one or two advertisement suggestions are shown herewith. The ad. by McAvity's, St. John, N.B., states, "What's the temperature this morning? The question usually asked on a very cold day. Our reliable, clear-reading window thermometers will tell you. We have thermometers for all purposes, outdoor, indoor, home, bath, dairy and candy thermometers."

The thermometer ad. by Consumers' Hardware & Supply Company states the thermometer is something needed every day in the year and offers a wide assortment at various prices.

Builders' Supplies

Before the cold weather sets in there is much repair work to be done to houses and barns throughout the country and this offers a fruitful field to the dealer who goes after this business. An ad. by Bridge Bros., Thessalon, Ont., reads: "Builders—it's time to fix up for the winter." The ad. is illustrated and advertises roofing, building paper, cement, nails, hinges, locks, latches, paints, door hangers, etc., which represent the chief requirements of this trade.

Sporting Goods

The big field of winter sporting goods should not be overlooked in the advertising schedule and an early start to arouse enthusiasm will do much to bring a good winter's business. A seasonable ad. by Rice Lewis & Son, Ltd., Toronto, reads: "For your health's sake enjoy winter

FIREPLACE FURNISHING DEPARTMENT
W. H. THORNE & CO., LTD.

A VIEW OF THE MAIN STORE

A glimpse through the main store of J. S. Mitchell & Co., Ltd., where well lighted offices are located. Well polished plate-glass, silent salesmen are arranged in squares throughout each department. The floor and wall cases also carry out the same plan of display. The stairway to the second floor is visible, also the automatic sprinkler system and the electrically operated cash-carrying system. The effect is rather that of a high-class jewellery store, and puts the hardware business on a slightly higher plane than is generally recognized.

How a Broad Vision

Remarkable Strides Made by J. S. Mitchell & Company, Sherbrooke, Quebec—Spacious Block Built on solid Rock—Mining and Mill Supplies Are Important Department of Trade

J. S. MITCHELL & CO., LTD., Sherbrooke, Que., have enjoyed great expansion since the founding of their hardware business in 1876. Doubtless it was sound vision which the late J. S. Mitchell had when he entered business life those forty-four years ago. In the centre of a richly-blessed agricultural and timber and mining area, why should this—then small town—not enjoy a growth that would bring to the budding hardware firm a share of the success that was to be apportioned among the optimistic business generation of half a century ago? But success comes to the energetic and those whose initiative brings its own reward. In consequence of this, the Mitchell business can well be proud that adherence to these cardinal points has brought to them distinction, as well as success, being, as they are, one of the most widely known and most highly respected firms in the whole of the Eastern Townships.

Shed Swaddling Clothes

There comes a time when, within the old and circumscribed walls of many business enterprises, the demands require that if progress is to be maintained, the swaddling clothes of early beginnings must be discarded. In connection with the growth of the Mitchell business this was perhaps hastened through the destruction by fire of the old premises on Wellington Street. Nothing daunted, the firm set to work on the erection of a large business block of its own. Nothing was considered too sound for this business which had attained such status of permanence. Only a large, well-lighted, and well-located store would suffice. For this reason expense was not spared. This gave the firm, when completed, a store and warehouse capacity which has been a source of pride to them for eleven years. In 1909 the larger store was erected. Its

Built a Big Business

Unique Store Fixtures Give an Air of Individuality—Elevates the Customer's Appreciation of Hardware Trade by Use of Up-to-date Fixtures and High-class Appointments—Reducing Insurance Charges

location is central and is one of the best in Sherbrooke.

Perhaps the very things which the first store lacked were the best guides toward suggesting to the management those improvements which would give them such appointments as would reduce labor to the minimum; make serving of customer speedy and pleasing, and afford, for the stock, the best arrangement and surest protection. In any event the appointments are unique and have that "different" air about them which gives the Mitchell store an atmosphere of individuality.

Glass-Panelled Cases

As one enters the store the very first point of interest, and particularly to the observant customer, is that of the special floor cases. These contain a wide variety of goods, including tools, silverware, plated wares, cut glass, etc., and possess some advantages that are worthy of special reference.

These special cases are approximately 6 feet long, 6 feet high, and 3 feet wide. The capacious proportions of the floor make possible the use of cases such as these. Advantage attaches to these cases in that with a floor expanse of probably 3,000 to 3,500 square feet, they may be placed, as they are, so that there is no crowding. Another advantage is that some of the cases have two facings. Goods may thus be displayed both ways; the glass-panelled doors keep out the dust, as well as enhancing the appearance of all displays made.

Cases are adjustable to any desired type of goods. Plated ware, cut glass, china, nickel-plated wares, tools, vacuum bottles, and many other lines are displayed to the best possible advantage, are readily seen by the customer and easily accessible by the salesmen. "There

A SECTION OF THE MAIN STORE

Herewith is a view of one of the sections of the store, showing how well the cases are employed to display such lines as crockery and silver-plated ware. A close-up view shows how the wall cases are used to supplement the display plan as carried out by means of the silent salesmen. A complete stock is indicated, and the goods are kept in the best condition though on full view. Electric lamps on the showcases and other specialties are to be noted, which combine to give a much-desired effect.

is one improvement that I would make, however," said Mr. Malcolm Mitchell to the representative of Hardware and Metal, "and that is that such cases would be better if they were not quite so high. If 6 inches or a foot lower they would enable one to have an unobstructed view all over the store."

Other Good Fixtures

The main wall case for shelf hardware is to the left of the entrance as one enters. Here, this fixture, beginning very near the front of the building and immediately back of the display window, affords a comprehensive display, and thousands of samples are readily available. For the most part the original packages are maintained, and in order that full advantage may be taken of the height from floor to ceiling, a staging or mezzanine floor effect has been provided midway between floor and ceiling. Space is thus secured that would be of much less value, were is possible only to reach these goods by ladder. The customer may ascend and view the goods with a minimum loss of time.

All fixtures are uniformly stained, and the finish is thus pleasing to the eye. The fixtures were made for the Mitchell Company according to their own ideas, and for this reason they are decidedly well suited to the purposes for which they were made.

The floor cases, or silent salesmen, are well adapted to the tools, cutlery, flatware, cut glass, hand-painted china, etc., which they contain. By such means sales are the more readily effected, and in a general way the effect they help to create for the store as a whole, is most pleasing.

Reference to the photographs herewith will give a good impression of the use which is made of other sections of the store. High-backed wall cases are used for cut glass, china, brassware, electrical goods and various kinds of jewelry. Particular note should be taken of the U-shaped case enclosure at the front of the store. This idea, particularly in a large and spacious store, is always worth the rather considerable outlay this arrangement entails.

The Bigger Vision

While there must needs be a beginning to every business, it is imperative for the business man who would be successful, that there be a steady and satisfactory growth. With the Mitchell business, for instance, the larger and broader vision was grasped many years ago. While hardware was being offered and sold extensively to the trade, Mr. Mitchell believed that was no reason why other lines could not be sold, and sold profitably. Such an idea, developed, has meant great growth for J. S. Mitchell & Co., Ltd.

It was with real satisfaction that the late Mr. Mitchell stated to Hardware and Metal that he had brought into Sherbrooke the first car of anthracite coal that had reached that district. The good old box stove was doomed, to a great extent at least, once the populace learned to make use of the new fuel, and this meant the development of needs for new hardware lines, gradually being manufactured from year to year to supply new needs. It also meant development and increased sale for these very goods. Thus, the larger outlook and broader vision enabled the Mitchell Company to cast aside the raiment in which they were necessarily clad until this bigger programme started to work out in an extensive manner.

Two Other Directions

But this was not all. There were rich resources in the Eastern Townships that nature had left. These would be tapped. They would give wealth to the capital that developed them and wages to the hundreds who assisted in relieving Mother Earth of her hidden treasure. But before this wealth could be reaped the tools and implements, supplies and equipment for securing such wealth must be available. Here, then, was the Mitchell Company's opportunity for developing a trade in mining and mill supplies, and in these directions an active trade has been built up. To-day a very heavy percentage of the annual business is made up of mill and mining supplies and explosives, and the company specializes in these. They can therefore command orders for any quantity, be it for one article, a dozen, or a hundred. In thus going after this business in this way the trade of the small user and that of the largest consumer can be catered to successfully and profitably.

Another development of rather more recent dating is that of the sale, to large companies and others, of pulp mill supplies. This is an active department at the present time, and all these developments indicate how important it is for the retail hardware man to look ahead with a clear vision and a broad outlook.

Know Your Community

It is of great importance to know one's customers. How is one to know them? There are ways many, but here is surely a suggestion worth while.

"I like to read the local paper," remarked Mr. Malcolm Mitchell to Hardware and Metal, in commenting on the value of newspaper advertising. "There is always something to be gleaned about what is doing in the district, or elsewhere." Someone may be erecting a new barn or house. It gives us a chance to

MUST KNOW ALL LOCAL DOINGS TO GET MOST OUT OF PROSPECTIVE TRADE

The importance of keeping in close touch with doings in the local community, as a factor in getting the largest volume of business possible, is emphasized by Mr. Mitchell. Someone may be erecting a new barn or house. Whenever an election takes place there is work to be done in securing a share of local improvements to be executed in the ensuing year. It is only when such information as this is secured that the greatest effect can be secured through the medium of newspaper advertising and other publicity. When you know the needs of the market then you are in position to go after it by the most direct route. This is briefly the creed followed in this store.

MAKING THE MOST OF LOCAL TRADE OPPORTUNITIES

Making the most out of the particular class of trade which characterizes the country in which the merchant is located is another creed to follow. It is wise to concentrate upon the possibilities of that trade. It may be a class of trade which few other hardware merchants have ever experienced and there may be no precedent to act upon. Then it requires all the resourcefulness at the retailer's command to make the most of his possibilities.

J. S. Mitchell & Co., starting in Sherbrooke, Que., were the first firm to bring anthracite coal to the district and immediately the death knell of the old box stove was sounded. This started a movement toward the adoption of progressive ideals in other spheres. There were rich resources in the Eastern townships to be tapped in order to provide the wealth to carry on business, and tools were necessary in large quantities. By giving the ball a start, it has kept on rolling until now the Mitchell Company is making the most of its opportunity for developing a trade in mining and mill supplies. Pulp mill supplies are now being handled to a large extent as well, owing to the development of this industry in the Province of Quebec.

For retail trade, paints are stocked as shown, one of the centre floor cases being employed to carry a variety of shades in the various sizes. In the distance, on the wall of the store, will be seen various hardware, in the original packages, and which is easily accessible from the suspended staging, or floor, elsewhere described. Color cards and other helps to customers are always kept within easy reach and these specialties are rendered more effective by the co-operation of the salesmen in this department, who are always ready to advise a customer as to his requirements.

get after the order for material. Even in the case of the election of a new local improvement council, the various councillors may be communicated with regarding their requirements for the coming season."

Very important observations these, and coupled with the message from the store through its advertising space, they make for business friendship that endures. If there is a new device for the farm or the home, Mr. Mitchell believes that the proper thing to do is to make this known through the regular weekly paper to the farmers and citizens generally. They cannot be informed unless the store thus takes an interest in them by giving the facts, and generally the price.

Reducing Insurance

A low rate of insurance on the Mitchell stock and building has been secured through the installation of a sprinkler system of fire protection. It has secured a rate of less than one quarter of one per cent. for the firm, and this is a very low rate indeed. In addition to this, the feeling of security this system brings to the management is worth much and is looked upon as an investment.

To the rear of the store is a spacious iron house, where pipe and iron are stored. Not a cent of insurance is necessary on this as far as fire in concerned. The place is built of iron beams and supports, and being covered with metal there is absolutely no necessity of carrying insurance. Pipe, for some of the supports, is used, and altogether this idea has worked out well.

One thing of which the firm is specially proud is the flood of light that is obtainable from the well-lighted windows. The expanse of glass, both front and rear, makes the use of incandescent lamps unnecessary for the greater part of the day. The windows are large and easily accessible.

Satisfaction to Reflect Upon Early Days and Subsequent Growth

It would be safe to say, perhaps, that the beginnings of the average Canadian hardware merchant have been modest. Some, but they are in the minority, have been born with the proverbial silver spoon in their mouth. That may or may not be a fortunate thing. But when a business dates its growth away back to the seventies, and when this beginning was modest, how great a satisfaction to reflect upon those early days and make mental recall of the stages through which one passed along the pathway to commercial success, and through it all to carry a host of business friends who have been loyal at all times.

USEFUL SUGGESTIONS FOR FALL

With the summer outing season now over, it is a good time to get the machinery moving for the sale of phonographs, victrolas, etc., which are much in demand during the cool months for indoor entertainment. This is a profitable line for the hardware merchant and an increasing number of them are being sold through this trade each year. Here is a good display of phonographs in an Ontario hardware dealer's store showing the splendid department fixed up for the purpose.

All the housecleaning is not done in the spring either, by those who only houseclean once a year, and then there are the large number of housewives who are extra particular and believe in cleaning up twice a year. The cool weather of fall is looked forward to as a favorable opportunity to get the house in shape for the winter months, and the dealer should not overlook the trade possibilities in housecleaning lines at this time. Here is a timely display of brushes, mops, brooms, etc.

WINDOW AND STORE DISPLAYS

Much attention should be paid to the arrangement of effective window and store displays of stoves, ranges, grates, etc., during the fall season, for it is then that the housewife's mind turns to thoughts of that new outfit she has been promised. The above shows a good display of stoves and kindred lines, all well polished and the whole display well laid out.

Here is a window which will help to stir up enthusiasm at this time of year. It is a realistic scene and very true to life. The tent is there with the gun, cooker, utensils, trees and leaves scattered around to carry out the effect of fall. The only unnatural thing is that the object of the hunt is a little closer than usual and a little too close for safety. ***Window by Capital City Hardware & Sporting Goods Co., Regina.***

How About a Slogan for Your Store?

Store Slogan Idea Developing Among Hardware Trade in Canada —Many Advantages of a Good Trade-Mark Accrue to Store with a Good Slogan if it is Lived Up to—Some Slogans Now Used by Canadian Hardware Stores.

A GOOD slogan for the retail hardware store has many of the advantages which a good trade-mark brings to the wholesaler or manufacturer. For many years past there has been a growing tendency on the part of wholesalers and manufacturers towards the adoption of a trade name for their line of goods which will identify it at all times and thereby emphasize the qualities which are claimed for it and which give it a place in the market in competition with other lines. This is a movement which originated in mediaeval times and which has been brought to a stage of perfection within this generation.

The store slogan will convey to the minds of your customers the service or standard you are endeavoring to attain and in adopting such a slogan it should be kept in mind that inability to live up to the slogan will greatly depreciate the standing of the merchant in his community.

Store slogans are being adopted on a broader scale to-day than at any time in the past. Some of these are based on service, others on quality, reliability, complete stocks, wide selection, guarantee, courtesy, etc. There are a number of points which can form the basis of the slogan, and when one is adopted it is wise to use it at every opportunity. The slogan should be on the window, on the advertisements, on the stationery and bill-heads. Every medium should be used for impressing the slogan upon the minds of customers and prospective customers, providing, of course, the slogan is one which is worthy of such attention.

For the benefit of dealers who may be considering the adoption of a store slogan the following slogans, as adopted by various retail hardware stores in all parts of Canada, will be helpful:—

"It Pays to Deal at May's"
May Bros., West Toronto, Ont.

"Fredericton's Big Hardware Store"
J. S. Neill & Sons, Ltd., Fredericton, N.B.

"The Old Reliable Hardware"
F. P. Turner, Pt. Colborne, Ont.

"The People's Hardware"
G. R. McLean, Waskada, Man., and J. R. Yeoman & Son, Thamesville, Ont.

"The Red Front Hardware"
S. McIntyre, Durham, Ont.

"It Pays to Pay Cash Here"
J. H. Lee, Oakville, Ont.

"The Five Points Hardware Store"
Otton Hardware Co., Barrie, Ont.

"The Store with a Stock"
Cowan Hardware, Ltd., London, Ont.

"The West End Hardware"
F. W. Karn, Woodstock, Ont.

"The Leading Hardware"
Bridge Bros., Thessalon, Ont.

"The Big Cash Hardware Store"
T. Squire, Brantford, Ont.

"Everything Worth While in Hardware"
C. R. De Witt, Carleton, Ont.

"If It's Hardware Get It at Moore's"
H. E. Moore, Oakville, Ont.

"The Hardware People"
R. Chestnut & Sons, Fredericton, N.B.

"The Up-to-date Hardware Store"
J. Aitchison, Southampton, Ont.

"If It Comes From Herity's It Must be Right"
Herity Hardware Co., Kerrobert, Sask.

"The Reliable Hardware"
Lacroix Bros. & Co., Prince Albert, Sask.

"The Big, Busy Hardware"
McKelvey & Birch, Kingston, Ont.
Latham's, Moose Jaw, Sask.

"We Have What You Want"
Bond Hardware Co., Guelph, Ont.

"Our Motto Is Service"
Rouleau Hardware Co., Rouleau, Sask.

"Everything We Sell We Guarantee"
Waite's Hardware, Orillia, Ont.

"Quality Lingers Long After the Price Is Forgotten"
B. F. Morris Hardware Co., Leduc, Alta.

"You Can Get It at McAvity's"
T. McAvity & Son, Ltd., St. John, N.B.

(Continued on page 202.)

Planning for Annual Stock Inventory

Many Dealers Unfamiliar with Best Methods to Take Stock with Least Inconvenience—Accuracy an Important Factor if Result is to be Reliable—Present Business Conditions Make More Necessary an Accurate Business Record—Plan Followed by A. Workman & Co., Ottawa.

A system of stocktaking, as followed out by A. Workman & Co., Ottawa, and which avoids the necessity of closing the store during this period, is to employ night shifts of some of the employees in conjunction with a special accounting plan. The first operation is to start men where packages are full, in the reserve stock section. A book listing "Goods sold from stock taken" is opened, as well as a book listing "Goods sold from stock not taken." By keeping an accurate record in these books of the movement of every piece of stock after stock-taking has started, it is a simple matter at the conclusion of the operation to arrive at a fairly accurate statement by a little deduction.

HAVING received several enquiries from hardware dealers as to the best method of taking the annual inventory with a minimum of inconvenience to the store's trading, the experience of a number of dealers, as outlined herewith, may suggest some new point of value in this undertaking to other dealers.

Under present circumstances where price fluctuations are numerous it is imperative that every hardware merchant should know just where he stands, what merchandise is making profits and what is stagnating on the shelves. In order to get a good start with a clean sheet early in the new year, the dealer should give this matter attention and now is a good time to revise the best means of carrying out this undertaking.

One hardware merchant explains that he always fixes the actual date on which the inventory is to be written up. "I begin by marking out the work fully a month before hand, and we make a start by grouping everything together in our cellar and storeroom, keeping a sharp eye on the actual conditions of the various goods, so that if it should happen that anything is out of order when the day of writing up the stock arrives, the real value of the goods will be noted. In this way one is in a position of knowing clearly and correctly the actual value of the stock.

"At this time, or rather just before it, I take care to buy as little as possible from the wholesaler, so that it makes it easier for my assistants to carry out their part of the work properly. All containers should have a label placed on them showing the contents of the receptacle in each case, and marginal space left so that in the interval if anything is taken from stock it may be noted accordingly. Thus, by the time stocktaking day arrives everything outside and within the store, is in good shape in the writing up of stock.

Goes Over Stock Thoroughly at Night

"In the evening, after the store is closed, we proceed in earnest at writing down everything in the store, great care and system being taken so that no small corners are missed. This might mean quite a considerable loss in the final total if not carefully checked up. I always begin right in one corner of the store, close to the front, and go over the stock shelf by shelf, beginning at the top shelf and coming right down to the floor."

Slip in Each Drawer

It is very necessary to have a slip in each drawer with a sufficient margin to mark off any goods sold in the interval. In the case of shelving where there are no boxes it is well to decide on either the left or right hand end of the shelf, for placing the sheet containing the list and carry out this system throughout the store and thus eliminate counting some stock twice, and in other cases missing it entirely. It often happens that several cases of the same article have been opened and some of the goods removed. It is well to go over all such cases and fill as many as possible to count at the last minute.

Stocktaking is almost invariably done during the quiet seasons, and it should be a house-cleaning time as well. A good suggestion is to house clean first, starting a few weeks in advance, to clean out shelves, bins and drawers, etc., laying aside any articles that are slow sellers, shop-worn or the tail end of a line of goods, etc.

Will be Surprised at Amount of Capital Tied up in Dead Stock

Following out this plan will surprise many merchants at the amount of cash tied up in dead stock. A succesful idea has been to put this line of accumulated stock out on display and advertise it, either in the local paper or by table or window display. It will be found that it is not always necessary to greatly reduce the price. Some merchants state that if this plan is carried out before starting to count the stock that the clerks and the boss himself will take more interest in trying to push the sales of these old lines with the final result that the new fiscal year will be started off on a paying basis with all clean and up-to-date stock.

Record Sections of Store Separately

In entering goods in the stock book it is a good idea to have sections of each portion of the store recorded separately for the convenience of reference later, or in case of fire or burglary. It might be necessary to check up for any one of the foregoing reasons at any time and this separate recording of various parts of the stock would thus be of value.

The actual stocktaking is not all the work that is necessary by any means. There remains much office work to be done and this should be tackled immediately. Books must be posted right up to date. Great care should be taken as to the exact amount of cash on hand and in the bank, it being fully verified right away so as to avoid any error.

Once all the data of the wholesale and retail ledgers is ascertained, the work of making extensions of the stock can be proceeded with a little more leisurely, and all the work leading up to the final balance is done at one's own convenience. The aim is, of course, to price every article at the amount it would cost to purchase at the time of stocktaking and always allowing for discounts where they are allowed.

Taking the Inventory

Accuracy always is the keynote of inventorying. The object is to ascertain, beyond the slightest doubt or reasonable question, just what mechandise and other things you have. The count must be right. Nothing else will do. Where it is necessary to estimate, like when we have a barrel of oil partly used, the estimate must be conservative. If it looks somewhere between 15 and 20 gallons put it down at 15. Get on the inside always where there is a doubt. Otherwise, where it is possible to weigh or count, get down the exact amount of saleable

goods. If there are damaged items, put them in below the sound ones, indicating as nearly as you can, what they are worth.

These are rules always to be observed; but if ever there was a time when one should be extra conservative, that time is right now. Things have been advancing rather steadily for a long time. Men have become a little liberal, sometimes reckless, about ordering. They have felt that everything was "a safe buy" until some are loaded up heavily. Nothing is "good property" which does not turn normally. Some lines have the disadvantage that they deteriorate steadily.

Now, I am going to prophesy that things are due for a slump. It is always foolish to prophesy and right now it is absolutely superfluous, for one mighty cogent reason—this:

Loss and Shrinkage There Already!

That on such goods as you have in excess of normal current requirements, you have sustained the loss already, regardless of the market! Get that? Every day you keep goods on hand costs money. Therefore, any goods you hold beyond the normal time of turnover have piled up against them an abnormal expense. When this extends beyond a certain very narrow limit, your loss is just bound to exceed any advantage that can possibly accrue from what you like to call "good buying."

There is, as a matter of fact, just ONE kind of good buying. That is underbuying. That makes for the quick turn, and the quick turn is the whole law and profits in retailing.

So there is no use trying to sidestep the fact that excess stocks stand you a loss; that the loss is there now, whether you admit it or not. So we need not speculate on what the market is going to do in that connection.

How Shall We Price Our Stocks

All these factors influence the value of your stock on hand. If you have goods enough to cover your normal sales for five months ahead, that stock should be taken in at not more than 80 per cent. of its replacement value, and 75 per cent. would be better. Such facing of plain facts may cause you to slow up on liberal buying for a long time. If you slow up as a permanent habit you will make more real money out of your business!

These are hints at how to price your goods. How far you will go on other lines depends on your own circumstances and environment; but a hint or two from some very successful people always must be of value.

Here's One Plan

In one big jobbing house the practice is this way: In case of goods which have advanced since they were purchased, the value is put in on original cost. Where goods have declined since they were bought they are priced on the basis of replacement costs. This, you see is working against the stock with a vengeance, but this is done by a very successful concern.

Remember, too, that whatever value you put into your inventory you will not change the actual value of the merchandise. If, therefore, you value it too high, the stock will not pan out and you will be badly fooled. If you undervalue it the stock will come up better than you calculated. That is the only kind of self-fooling that you can afford to have around your shop.

What will you do when you have the lists completed? Obviously, you yourself must work nights and at every odd moment pricing and totalling the sheets so you can balance your books. This work always is most valuable to every thoughtful merchant, for it will show him precisely where he has too much stock—and practically all of us are subject to this weakness.

This is the finest time of the year to see just how much more than you should have is in stock. As a preliminary, you might figure out what you should have, based on your sales.

Keep It Normal

Having set down that kind of figure for your own business, you will be astonished to find how much you have in excess of what you should have. Then, when you have found this out you will begin to reduce stocks. It is not so desirable that you make a cut-price sale, though you may have to reduce some items to clean them out, as it is that you stop buying. Cut every order down to just what you must have. When you have reduced stock to normal, keep it there. That is perhaps as valuable a result as you can expect to get out of the habit of taking an inventory.

But take the inventory anyway. Know where you stand at least once annually.

Some Illuminating Statistics

Canada's Growth, 1867-1919

	1867-8	1919-20.
Paid-up bank capital	$ 30,289,048	$ 124,712,670

Lifts Hardware Business to High Plane

W. G. Edge Ltd., Ottawa, Bring Years of Experience in Plumbing and Kindred Business on Entering Broader Field of Hardware Trade—Separate Women's Department Caters for Their Trade—Prize Contest at Store Opening—Saleswomen Sell Household Goods, Advertise Recipes—Unique Stock-Keeping System.

THE new hardware store of W. G. Edge, Limited, opened in Ottawa early this year, has been a source of considerable interest since its opening. The inaugural proceedings held in April last were successful in securing favorable recognition of the hardware business which has evolved from an old established business formerly restricted to plumbing and kindred lines. While discussing matters pertaining to the hardware trade in Ottawa with various merchants, the statement was made to the representative of Hardware and Metal: "If you want to see a hardware store where a woman may shop without fear of soiling her best dress, go to Edge's." We went and found confirmation of this opinion for the Edge, Ltd., store has a neat and well arranged appearance and everything is kept spick and span. This fact is evidenced by the views of the store shown herewith.

Women are shopping to such an extent in the present day, and the development of the hardware business has brought within its range such a multiplicity of lines in which women are interested, that the Edge Company thought it well worth while to take steps to appeal to this class of trade, though of course not overlooking possibilities in other directions.

The system of management and of showing stock is perhaps a novel one in Ottawa, being a combination of that used in many stores throughout the country and adopted as best for the class of trade this store is desirous of cultivating. Throughout the store all the goods are in full view and marked with plain price figures. This applies to the show windows and to interior displays, and this practice is quite evident to the customer on entering the store. The view shown looking from the front to the rear of the main store shows up-to-date showcases constituting two complete sections on either side of the main aisle which extends to the stairway at the rear. Halfway between this floor and the one above, at the rear of the store, is the office of the store manager and other staff. A glass sign hanging prominently in the stairway indicates that the Household Goods department is on the next floor above.

Herewith is a view of the store front of the W. G. Edge Ltd. store, Ottawa, Ont., showing the great expanse of window space available for display. The various departments are mentioned above and below the downstairs windows, and they are arranged at an angle, meeting at the store entrance. The upstairs windows give ample room for the display of goods carried in the Women's Department. The window trims are frequently changed so as to take best advantage of their value in bringing business and are changed to correspond with lines advertised in the daily newspaper.

The Women's Department of the W. G. Edge Ltd. store, Ottawa, showing a wide range of household goods, including kitchen and laundry utensils, oil stoves, refrigerators, washers, electrical table appliances, floor polishing outfits, hammocks, vacuum cleaners, bird cages, etc. Saleswomen are employed exclusively in this department, as it is found they are better fitted to make suggestions for the use of such articles in the home. Recipes are advertised to help sell utensils required in their making. Thus 1,030 preserving kettles were sold in a recent sale.

How to Make Store Opening a Success

The store was opened on April 17th last with a staff of fourteen, and a complete stock of shelf and heavy hardware, builders' supplies, silverware, bicycles and accessories, electrical and automobile accessories and plumbers' supplies. W. G. Edge, president, started in the plumbing business in 1907, since which time a large connection with architects, contractors and others has been built up. This connection is looked to as a source for considerable trade now that a complete hardware line has been added to the original business. On the second floor in addition to the household goods department, is the section devoted to builders' hardware. Access to these departments is either by way of the stairway or an elevator which is located to the left of the store entrance.

Unique Stock-Keeping System

The stock-keeping system in the Edge store is unique, and the management is very proud of the success they have achieved in so arranging stock that a new clerk can within an hour be so fully conversant with the location of the goods that he will have no difficulty putting his hand on whatever is required.

Reference to the view of the main store will indicate that wall cases painted a nile green bear samples of the lines contained therein. Below these cabinets are drawers, and above the cabinets are shelves. Above the shelving will be noted a letter of the alphabet for each section. This is the key to the stock-keeping system. The stock records show the goods in alphabetical order, and the number of the cabinet containing them. Any overflow from one cabinet is placed in another and an entry made on the stock sheet. A surplus of stock is kept on shelves or drawers in each section. This plan extends throughout the whole length of the store and offers a very great expanse of shelf room to supplement the displays in the showcases.

Not a Counter—Twenty-Eight Showcases

Not a single counter is to be found in the Edge store, to mar the clean-cut effect of well polished glass display cases, and no expense has been spared in completely furnishing the store with the most up-to-date fixtures. There are twenty-eight showcases on the main floor and a cash register located in the centre of each section. A special rack for bicycles is placed at the rear of the store near the stairway.

The front showcase on the left contains a display of silverware and flatware. Other cases in this circle contain displays of planes, automobile accessories, thermos bottles, watches, compasses, etc., horse clippers, vises, etc. The circle on the right contains displays of sporting goods, braces and bits, whetstones, oilstones, emery wheels, oil cans, roller skates, fishing tackle, automobile accessories. An indirect lighting system is used throughout the store, and lends a very pleasing effect in keeping with the whole arrangement.

Absolute Courtesy from Every Clerk

Absolute courtesy from every clerk is required in the Edge store. "No clerk is so valuable that the store can afford to lose customers through any incivility on their part," says Mr. D. S. Burrows, manager of the store. The staff work on a salary and commission basis and each is held responsible for selling a set quota. A drawer is provided in the cash registers for each clerk so as to preclude any possibility of confusion and to keep the record of each clerk separate for checking purposes.

Pleased Women are Good Advertisers

Prior to the opening of the store a letter was sent out to a selected list of women in the community, offering articles of kitchenware for purchases of a certain amount, and announcing the opening of the store. Though the elevator was not running at that time the

Looking from front to the rear of the main store of W. G. Edge Ltd., Ottawa, Ont. The two circles of up-to-date showcases, twenty-eight in number, are shown, as is also the plan followed in wall fixtures. The wall cabinets are painted a nile green and samples of lines stocked therein are shown on the door. Above the cabinets are four shelves and below the cabinets are drawers. Each section goes under a letter of the alphabet, which corresponds with a record on the stock-sheet. Thus a new clerk has immediately a complete index to the stock of the store. The raised flooring at the rear is the office, and a stairway leading from the landing shown gives access to the Household Goods Department on the next floor. To the left at the entrance to the store is a passenger elevator for the convenience of customers.

enthusiasm of the women who visited the store and the department on the 2nd floor was not dampened and the opening was a great success. The management know that women are good advertisers for anything which pleases them, and the fact that here was a hardware store catering for their trade was sufficient to carry the news far and wide. It is estimated that over a thousand women visited the store on the Saturday of its opening. A large percentage of Ottawa people became acquainted with the store during the first few days.

The view of the household goods department as shown herewith shows the various utensils well displayed on tables and wall shelves. Electric washers, oil stoves, vacuum cleaners, refrigerators, carpet sweepers, hammocks, bird cages, laundry utensils, electrical table appliances, and floor polishing outfits are also shown in this display. A cash register similar to those on the main floor is also located in this department.

Saleswomen Best in this Department

A feature of this department is that women are to be employed exclusively to sell household goods. The management feel that women, if naturally good salesclerks, are more successful in work of this nature. They are better acquainted with the various uses to which these goods are put in the home and are therefore better able to offer suggestions which increase the utility of the lines carried.

Advertise Recipes

A novel plan being followed out is to advertise certain recipes of puddings, cakes, etc., and simultaneously advertise the pot or pan required for it. This plan has only been tried a few times since the opening of the store, but so successful has it been that Mr. Burrowes plans to make it a regular feature when his organization is complete. The salesgirls in this department will then be exclusive from the rest of the store trade and such practice as clerks from the main store bringing customers to the household goods department and selling them goods on their own account is to be eliminated. Following out the plan above mentioned it is significant that at a recent sale 1030 preserving kettles were sold through this department.

Big Pipe Trade in Plumbing Department

The plumbing department is now established in the main store, it being the last to be incorporated on account of the necessity of removing it from the original plumbing store. As previously mentioned plumbing supples have formed the basis of the Edge business for some years, and a large clientele has been established not only in Ottawa, but in Montreal and Toronto as well. At the present time the company employs in the neighborhood of 35 men in each of these three cities.

A department at the rear of the main store is set aside for the plumbing goods and a display in keeping with the store is shown at all times. A feature of the present trade in the plumbing department is the quantity of pipe being sold to people who are doing odd jobs around their homes. For this class of trade two pipe machines have been installed in the department. A constant connection is mantained with contractors, architects and others as to developments in building construction.

Best Use of Window Displays

To advertise all departments of the business the very best use is made of every medium. The windows are a study in themselves. A glance at the picture of the store front, as shown herewith, shows a great expanse of window display. The downstairs windows are arranged at an angle, meeting at the doorway to the store. Above and below the windows are listed the names of the various store departments. Upstairs the windows are a constant advertisement of the Women's department, and a display of lines sold in this section is constantly shown. The trim in all windows is changed frequently in order to make the very best use of them.

Use Trade Mark and Slogan In Newspaper Ads.

Newspaper advertising is also used quite extensively by the Edge store. A feature of their advertising is the use of a trade mark represented by an owl. The store slogan, "The Hardware Store with a Service," is also reproduced in all advertising. Some samples of ads. used in local papers by this store indicate that practically the same size space and design is followed in each case. This plan has the effect of acquainting readers with the plan always followed, so that a glance over the paper will indicate to the reader that when his eye scans this advertisement he knows immediately whose it is without looking at the name. Each advertisement is well illustrated and prices are plainly shown on each article. The advertisement used to indicate the winners in a contest held on opening day is reproduced herewith along with some other regular ads. The first prize was $20 worth of kitchenware, $10, second, and $5 third. These handsome prizes were given to the ladies selecting the best range of kitchen ware in either aluminum, glass, tin or agate, not to exceed $35 in cost, and to be sufficient for a family of two. The supervisor of Domestic Science of the Ottawa public schools decided the winners. Much interest centered around the contest and it was largely responsible for the enthusiasm which was developed in connection with the store opening.

Premises Entirely Remodelled

The store occupied by W. G. Edge, Ltd. is the store formerly used by R. M. McMorran. The premises were entirely remodelled, a new front was put in and a passenger elevator installed. The underlying idea in the planning of the store has been to have the most modern arrangements in order to secure best service at a minimum of labor.

Store Manager Has Good Record

The company has been fortunate in securing as manager the services of Mr. Harold des Rivieres, formerly of the W. A. Rankin Company, Ottawa. He was connected with Graves Bros., for a period of five years, from 1900 to 1905, and later with the Butterworth Company until 1908, at which time he was affiliated with the W. A. Rankin Co., until becoming a member of the Edge, Ltd. organization. He has always been aggressive and most anxious to secure and adopt the newest ideas in the hardware business.

The accounting and invoicing of the organization is handled by the original staff of W. G. Edge, Ltd., with some additions. The record of the original company was a standard of giving the best satisfaction to all its clients at all times, and the same motive underlies the augmented organization which is now well entered upon trade in a larger sphere.

FALL AND WINTER ADVERTISING SUGGESTIONS

Continued from page 187

house-owner to look over the windows and storm sash preparatory to the advent of cold weather. It reminds him that stopping up cracks with paint or putty will save fuel. Other lines advertised include asbestos paper, stovepipe enamel, weather strip, coal scuttles, oil heaters, stove boards, ranges, electric lights.

An ad. by McLaren Hardware, Pt. Elgin, Ont., also advertises fall requirements in a general way, including lanterns, glass, and builders' requirements.

Working Gloves, Mitts, Etc., For Cold Weather

An ad. on this line is shown by B. O. Parker & Co., stating as follows: "Now that the cold weather is here every man who has an outside job will require a pair of good working mitts." Other lines included are robes, horse blankets, etc.

Some samples of advertisements as used by W. G. Edge Ltd., Ottawa, in local newspapers. The plan is followed of using approximately the same size space on each insertion. The same design is followed out and the trade-mark appears in each ad. Thus a person who has once become acquainted with the appearance of this store's ads. will recognize them on glancing over the paper hurriedly. The slogan, "The Hardware Store with a Service," is used in each advertisement, and the window trims of the store are changed to correspond to the lines advertised in the newspapers. Each ad. is well illustrated, contains just enough description and mentions prices prominently on each article.

Develop Special Features of Local Trade

Certain Classes of Trade Peculiar to Each Community Offer Best Field for Development—Van Tuyl and Fairbank, Petrolea, Ont., Specialize on Oil Drilling Supplies—Have Built Up an International Trade—Service and Aggressiveness in All Departments—Keep in Touch with Building Operations for Sale of Cement, Etc.

VERY few hardware merchants, especially those in towns of 4,000, have a connection which extends outside of their province. Still fewer have a trade that is Dominion wide, and very, very few have an international business.

One of these latter is the hardware firm of Van Tuyl and Fairbank at Petrolea, Ont. They sell throughout the world.

It is a common thing to receive an order from such a remote spot as Borneo. It is just as common for an order to come from South America. Orders are received regularly from distant parts of Europe, from China and Japan, in fact from every part of the globe where there is any oil drilling or prospecting going on.

Send Big Shipments

Many of these orders are substantial ones. When it is remembered that it costs anywhere from $15,000 to $50,000 to sink an oil well, and that literally thousands of such wells are being sunk in all parts of the world in an effort to keep pace with the demand for oil and gasoline and lubricating oils, some idea may be gained of the business that is done.

Some of the business is right at their back door. More of it is only a few miles out in the townships. Not long ago the firm was sending $20,000 worth of supplies a month into one small section around Glencoe where prospecting was going on.

Service is Aim

No matter though whether the shipment is for the oil men who are working within a stone's throw of the store, or whether the goods are going half way around the globe to some prospector ten or fifteen thousand miles away, the store policy is the same. The merchandise must be right and the customer must be satisfied.

It is because oil men have found in years of experience that Van Tuyl and Fairbanks not only keep everything that is required, but keep dependable merchandise, that permanent connections are made in a business way. The man who is drilling this summer in the Peace River district may be drilling in India next year, and in South America two years from now. It is a tribute to the firm's policy that these men, no matter where they go, never forget the hardware firm back in the little Canadian town.

Holding the Trade

Some of these men make good, some of them don't. Some of them make huge fortunes in oil. Some of them lose all they have and have to go to work for some other chap. Some of them become officials in the big oil companies, and this is where another valuable connection is often formed for Van Tuyl and Fairbank, based on previous dependability and good service. This is the only way to account for orders from England, from the United States, and other countries for car load after car load of the merchandise required in prospecting oil and for handling it after it is obtained.

The firms orders for piping alone run into large figures. The orders for drilling equipment are another big item. The mere item of parts for repairs for oil equipment of one kind and another means a business every year that exceeds a quarter of a million dollars.

In the hardware store of Van Tuyl & Fairbank, at Petrolea, Ont., interior display is a feature. The illustration shows one of a battery of silent salesmen. Note the wall display also. Down the centre of the store is a string of five display tables.

Other Business Too

It might be imagined from the foregoing that the business of Van Tuyl and Fairbank centers in oil drilling equipment and supplies alone. Such is not the case.

The firm is just as particular to see that the smallest child in town, sent to the store for a package of tacks, gets good tacks, as to see that the firm in Shanghai or Buenos Aires gets good oil drilling equipment. It is just as anxious that the farmer's wife, who drives in twenty miles to take home a washing machine, gets a good washer and is satisfied, as to make certain that the oil company whose capital runs into millions, gets what it ordered.

It is this idea of service that is behind the whole institution. Service, plus aggressiveness, plus a good stock of good merchandise is the secret of success, says Thomas Rainsbury, manager of the company.

Makes no Difference

"It makes no difference," said Mr. Rainsbury to Hardware and Metal, "whether a store is located in a small town or a big city. If it gives its customers service and dependable goods, the business will come. By that I do not mean that it does not pay to have window displays and store displays and to advertise in the newspapers. We do all of these things and we get good results from them all."

Apropos of the firm's window displays it might be mentioned that the two display windows are changed regularly every week, and that seasonable merchandise is always kept before the local buying public.

The window displays are backed by advertising in the local paper. Every week the year round the firm runs a double column advertisement. A generous use is made of illustrations. The advertisement is alway to be found in the same place on the same page in the paper and the farmers for 20 miles around Petrolia know exactly where to look for the offerings of Van Tuyl and Fairbank.

How They Plan It

"Our window displays are not put in haphazard," said Mr. Rainsbury to Hardware and Metal. "They are carefully planned. For instance we find that it always pays to show bicycles with sporting goods. One helps to sell the other."

Mr. Rainsbury says it is important to keep the windows looking their best, well cleaned and filled with a nice clean assortment of new goods. People, he says, do not like to look over a showing of merchandise that obviously has been knocking around in the store for goodness knows how long, and bears marks of much handling and more or less rough usage.

"We get splendid results from our window displays," he said. "No matter when they are put in they always increase sales in whatever lines are shown."

Store Displays Also

"We get most satisfactory results also," he said, "from our store displays. We find that people are keenly interested in looking over merchandise and we aim to keep as much of it out where they can see it all the time as possible."

It might be mentioned here that the firm has a battery of silent salesmen ranged along the left hand side of the store as one enters. Right up at the front as may be seen from the illustration is a silent salesman filled with cut glass. This is kept there all the year around and has paid for itself in sales many times over. At Christmas time and in the month of June when weddings are numerous, and gift buyers are trying to decide what they will give, this show case is the center of attraction, that keeps the bell in the cash register ringing up profits. Mr. Rainsbury says he is satisfied with the

HOW ABOUT A SLOGAN FOR YOUR STORE?

(Continued from page 194.)

"The Quality Hardware and Harness Store"
Horsee & Loree, Ltd., Naicam, Sask.

"Everything in Hardware"
A. Watson, Stayner, Ont.

"If It's Hardware You Want We Have It"
Gravenhurst Hardware Co., Gravenhurst, Ont.

"Headquarters for Hardware"
Robert Jones, Cobden, Ont.

"It Pays to Deal With Us, We Serve You Right"
The Adamson Hardware Co., Orangeville, Ont.

"Our Hardware Is the Best—It Stands the Test"
J. E. Clipsham & Sons, Gravenhurst, Ont.

"Intelligent Service—Prompt Delivery"
The Russill Hardware Co., Toronto, Ont.

"We Guarantee Satisfaction"
The Watt Hardware Co., Innisfail, Alta.

"The Store of 1,001 Things"
Baldwin's Hardware, Grimsby, Ont.

"The Big Store with a Big Stock to Choose From"
Farmers Hardware, Ltd., Castor, Alta.

"No Trouble to Show the Goods"
H. W. Wilson, Paris, Ont.

"The Store with a Service"
Matthias & McBrine, Castor, Alta.

"Often the Cheapest—Always the Best"
F. D. Maundrell, Whitby, Ont.

"The Store of Quality and Service"
Morris & Taylor, Camrose, Alta.

"The Hardware Store with a Service"
W. G. Edge, Ltd., Ottawa, Ont.

"Quality Our Aim"
McGregor & Co., Grand River, Sask.

"Get the Habit of Dealing Here"
Hodson Hardware Co., Ltd., Maple Creek, Sask.

"The House for Service"
Jackson Bros., Ltd., Pincher Creek, Alta.

"Satisfaction and Service First"
Gryde's Hardware, Leader, Sask.

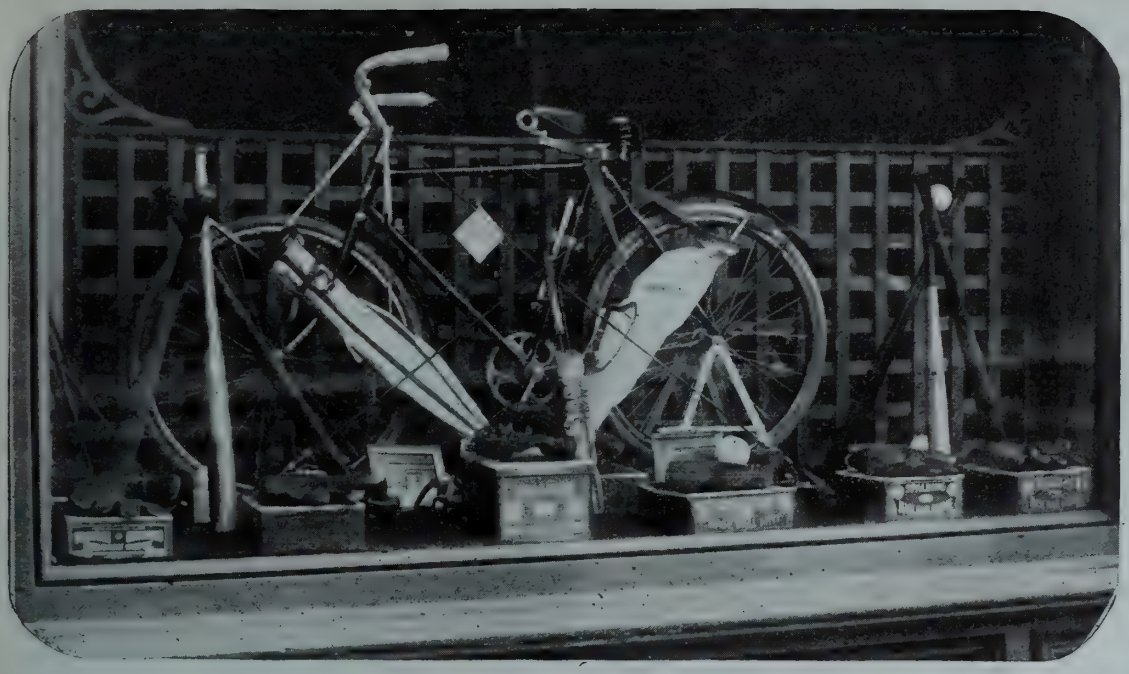
"The Busy Hardware Store"

"Anything and Everything in Hardware"

"Hardware for Hard Wear"

"Little Better Quality—Save the Difference

"Little Less Price—Save the Difference"



"We always find that it pays to show bicycles and sporting goods together, as one helps sell the other," says Thomas Rainsbury, manager of the Van Tuyl & Fairbank Hardware, at Petrolea, Ont. The firm's windows are changed regularly every week the year round and seasonable lines are kept before the people.

business that it brings all the year through and that is why it stays there.

Wall Displays Too

Back of the silent salesmen are the wall displays and there a fine assortment of various lines is on view.

Down the center of the store is a series of display tables containing aluminum ware and various small articles.

"One of the best selling forces we have," said Mr. Rainsbury in reference to the tables. "They save our time in selling and they are a source of real interest to those who come into the store, women especially. The tables are frequently emptied in a short time and we are frequently surprised to find that assortments of stock we thought would last for some time are cleared out by placing them out on the tables."

Right After Business

An indication of the aggressive manner in which the Petrolea firm goes after trade is shown in its sales of cement to the farmers. Sales of cement average fifty car loads a year and have run as high as seventy-five. This is a considerable amount of cement for a hardware in a town of 4,000 to handle, but by keeping in touch with the farmers who are making improvements to their houses and barns by putting new foundations under them, building silos and other structures the firm gets away with car load after car load. Its sales of roofing are also large and business in wire fencing will run six cars a year.

Plumbing Department

The firm also has a plumbing department which keeps three men busy throughout the year. Mr. Rainsbury says that farmers all through the country are learning more and more that they simply cannot afford to be without conveniences. Every bathroom that is put in is an advertisement for the firm because it means satisfied people who never tire of talking about it to those who have not a bath room. The women, Mr. Rainsbury says, are especially keen on boosting for home conveniences. They want plenty of water in the home and usually he says it is the woman who initiates the movement which results in conveniences being installed. There is, he says, a big and growing field for the firms who go after this business, and one of the quickest ways of getting results is to get the farmer's wife interested.

All Winchester Store Fronts Like This

A similar scheme of arrangement to that shown herewith from an exterior standpoint will be carried out in all the Winchester stores operating as part of the chain established by the Winchester Repeating Arms Company of New Haven, Conn. In cities of less than 50,000 population, throughout the United States, the company is selecting the ablest and best equipped hardware dealer to operate the Winchester agency, and in cities over 50,000 population the company is establishing its own stores. The front view shown herewith is of the Providence, R.I., Winchester store, and the same plan is to be duplicated in all other stores of the chain.

Fall Fair as a Hardware Trade Puller

This is the Place to Show Yourself a Mixer and Get in With the Farmers—Does the Exhibit Pay? Many Novel Ideas Worked Out by Enterprising Merchant—Sends a Letter Before Fair Opens

ONE of the great advantages of the Fall Fair to the hardware merchant is the displays which he may make at small cost. When compared with the returns, actual and prospective, this outlay is a small one. The Fall Fair advertising opportunity gives the hardware merchant a chance that is well worth improving, and an honest try at display usually brings results.

Last year, at Bridgewater, Nova Scotia, Robert Dawson and Sons featured stoves at the local exhibition, and the reproduction of this showing indicates how effectively they displayed two lines that are big sellers with them—stoves and paints. The noteworthy feature of this display is that it "brought home the bacon," for there are "Sold" signs on most of the stoves and heaters shown in the photograph.

A touch of freshness is given the display through the use of flags and bunting. This always is in the best of taste on such an occasion. The gala decorations about the fair grounds serve to impart a holiday spirit, and advantage of this may as well be improved by "fixin' up" the display booth with like decorations.

Big Sales Made

The Dawson Company has a big sale for paint. This display serves to impress the townsfolk and the country visitors with the importance of paint and paint specialities. It is one of the very best seasons of the year in which to stimulate, in the customer's mind, the advantage and necessity of painting. Fall is a good time to paint. The absence of flies, bugs and insects is an impetus to swinging the brush. Through the judicious use—as in this case—of some of the excellent helps given by the manufacturer to the dealer, a lasting impression upon the prospect is made possible.

Probably one of the best evidences of the worth of display at the Fall Fair is furnished in this object lesson of the Dawson firm. With at least four direct sales of stoves, the profit would far more than pay the cost of transporting these goods to the grounds. Then, the sales that doubtless were recorded later, as a result of the seed sown at the Fall Fair, repaid, many times, the work undertaken

George W. McDonald, hardware merchant, of North Bay, Ont., is another dealer who utilizes the local Fall Fair to good advantage. Actual baking and cooking is a feature of his exhibit and he sends out a letter before the Fair opens, advising prospective customers that hot biscuits and other dainties cooked at the exhibit will be provided them "while they are told of the merits of the various lines exhibited." Flags, bunting, leaves and banners bearing the words "Made in Canada" are in evidence in this exhibit.

Another view of the George McDonald exhibit at the North Bay Fall Fair, indicating that good use has been made of the space available to make a most effective showing of stoves, washing machines, paints, kitchen utensils, etc. The front of the booth is attractively decorated with flags and bunting. Four sales of oil cook stoves were made from this exhibit and the firm is confident that much subsequent business could have been traced to enthusiasm stirred up by the showing made at the Fair.

in fitting up the booth. The bold, neat sign above the display helped draw the crowds to the display.

Many hardware merchants in as many different parts of Canada have improved the opportunity afforded by these important community events by making a special bid for custom and goodwill; and just as surely as effort and time are expended in this way, just as certainly do results follow, measured only by the interest taken by the display man in "fixin' up" his booth to create interest and demand the attention and comment of sightseers.

This Man Paved The Way

George W. McDonald, hardware merchant of North Bay, Ontario, has found these Fall Fairs to afford an excellent opportunity for meeting and renewing old acquaintances, as well as for shaking hands with newcomers and extending them a welcome to make his store their headquarters when in town. In his case he has gone farther. Preparing a suitable circular letter, this was mailed to a selected mailing list, just at the time when all were thinking of the Fall Fair, so that his message would make the best possible impression.

Last year, under date of September 15th, the letter circulated through the mails made special mention of a particular oil stove then being featured by the firm. Outlining, briefly, the features and advantages of this stove, reference was made to the fact that many users in the surrounding country were well satisfied with stoves previously bought by them from the McDonald firm. And a paragraph read as follows:

"Actual baking and cooking will be demonstrated by our representative, Mr. W. E. Cassidy, who will supply you with prices and full information." Thus the appeal left with the prospective customer receiving this circular, a desire to, at least, sample the cooking, affording the desired opportunity to explain, in detail, the advantages of the stoves. Who would not go out of the way to enjoy a hot biscuit?

Plenty of Good Display

One of the advantages in making a display at Fall Fairs is that one may usually command, if the matter is taken in hand early enough) a generous space. At that season of the year it is, of course, desirable to display ranges, for with cold weather approaching, the housewife will be thinking more or less deeply of "that range I wanted George to buy last year." Here is the opportunity for alert hardware men to supply the necessary "setting" to pave the way for a direct sale to Mrs. Jones, and the possibilities suggest that it is well worth while, as before stated, to give thought and care, and to spend time in arranging such displays.

"How did the plan work out last year?" asked Hardware and Metal of Mr. Cassidy, who made the display, and in whose care it was left during the progress of the fair.

"It stimulated range sales, and, as well, we made four sales of oil cook stoves."

There was, in addition, the advertising of the firm's name, impressions being made upon the visitors to the booth which would later develop into actual sales. Probably this advantage is even greater than that of the sales made at the time. Through it all, there is the great advantage of creating and cement-

ing goodwill, without which even the smallest business may fare poorly. Herein is one of the advantages and secrets of successful display making at the Fall Fair.

The Signs to Use

There is every opportunity of showing what can be done in swinging the "lettering brush," in making signs for these displays. In the very nature of the display it must be temporary. That is no excuse for merely throwing the stuff into the space secured from the Fair authorities. It will be as well to not make the display if care is not taken to make a booth neat and attractive. And, if planned a little ahead of time, and measurements taken, the display can be even set up, so that when the "grounds" are reached only a minimum of valuable time will be necessary in making the best possible showing.

With the platform erected on which to display the stoves and ranges, refrigerators, paints and varnishes, etc., and with a neat railing erected of gas pipe or chain, tinted with aluminum or gold paint, with the goods in place, it is then "up to" the store artist to put the finishing touches on his work. That is to say, at the top of the display — above the front, a long space will require to be filled in with that which will add finish to the whole layout. In other words, a good bold sign, with the name of the firm distinctly shown, will be so outstanding as to tell those at a distance just who is occupying the particular space or booth.

Smaller signs may be arranged, specially drawing attention to the advantages of a range, a furnace, grade of paint or varnish, stain, electrical washing machine or other electric appliance. Altogether, with one's mind on the matter, unique and trade-winning displays are possible and they will well repay the time spent. Have you tried it?

The letter sent out by Mr. McDonald read as follows:

"We invite you to visit our exhibit in the Rink Building, where we are showing and demonstrating the most complete line of OIL STOVES, STEEL RANGES and the latest model of ELECTRIC WASHERS.

"The oil stove is the most complete and up-to-date oil stove yet devised, embodying every modern feature known to science and manufacturers.

"The burners produce an intense blue flame gas which is free from odor and smoke. The burners are WICKLESS, VALVELESS and ODORLESS—simple, economical and effective—not only unsurpassed but unequalled.

"The merit of this stove is attested to by the demand, the volume of the demand is evidenced by the large number of satisfied users throughout the north country. We have shipped oil stoves to towns such as Englehart, Parry Sound, South River, Cobalt and Sturgeon Falls.

"And when the demand, year after year, steadily attains immense proportions—then it is conclusively demonstrated by the absolute confidence of the vast army of satisfied users in the excellence, worth and reliability of the stove.

"Actual baking and cooking will be demonstrated by our representative, Mr. W. E. Cassidy, who will supply you with prices and all information.

"Yours truly,
G. W. McDONALD."

Fall Fair Dates in Canadian Provinces

DATES of fall fairs to be held throughout the various provinces of the Dominion this season are given herewith:

ONTARIO

Town	Date of Fair
Aberfoyle	Oct. 5
Abingdon	Oct. 1,2
Acton	Sept. 21, 22
Agincourt (Scarboro)	Sept. 24, 25
Ailso Craig	Sept. 22, 23
Alexandria	Sept. 7, 8
Alfred	Sept. 14, 15
Alliston	Sept. 30, Oct. 1
Almonte	Sept. 28-30
Alvinston	Oct. 12, 13
Amherstburg	Oct. 1, 2
Ancaster	Sept. 28, 29
Arden	Oct. 5
Arnprior	Sept. 13-15
Arthur	Oct. 5, 6
Ashworth	Oct. 1
Atwood	Sept. 20, 21
Avonmore	Sept. 21, 22
Aylmer	Sept. 15-17
Bancroft	Oct. 7, 8
Barrie	Sept. 20-22
Bayfield	Sept. 29, 30
Baysville	Sept. 30
Beachburg	Sept. 27-29
Beamville	Sept. 16-18
Beaverton	Sept. 27-29
Beeton	Oct. 12, 13
Belleville	Sept. 6-8
Berwick	Sept. 7, 8
Binbrook	Oct. 4, 5
Blackstock	Sept. 28, 29
Blenheim	Oct. 7, 8
Blyth	Sept. 21, 22
Bobcageon	Sept. 30, Oct. 1
Bolton	Sept. 24, 25
Bonfield	Sept. 21
Bothwell's Corners	Sept. 21, 22
Bowmanville	Sept. 21, 22
Bradford	Oct. 12, 13
Bracebridge	Sept. 23, 24
Brampton	Oct, 1, 2
Brigden	Oct. 5
Brighton	Sept. 9, 10
Brockville	Sept. 21-24
Bruce Mines	Sept. 22
Brussels	Sept. 14, 15
Burk's Falls	Sept. 30, Oct. 1
Burford	Oct. 5, 6
Burlington	Thanksgiving
Caledon	Sept. 23, 24
Caledonia	Oct. 7, 8
Campbellford	Sept. 21, 22
Carp	Sept. 28, 29
Castleton	Oct. 5, 6
Cayuga	Sept. 21, 22
Centreville	Sept. 18
Charlton	Sept. 15
Chatham	Sept. 21-24
Chatsworth	Oct. 7, 8
Chelmsford	Sept. 28, 29
Chesley	Sept. 30, Oct. 1
Clarence Creek	Sept. 23
Clarksburg	Sept. 21, 22
Cobden	Sept. 30, Oct. 1
Cochrane	Sept. 23, 24
Coe Hill	Sept. 28, 29
Colborne	Sept. 24, 25
Coldwater	Sept. 23, 24
Collingwood	Sept. 14-17
Comber	Oct. 1, 2
Cookstown	Oct. 5, 6
Cooksville	Oct. 6
Cornwall	Sept. 1, 4
Delaware	Oct. 13
Delta	Sept. 13-15
Demorestville	Sept. 25
Desboro	Sept. 23, 24
Dorchester Station	Oct. 6
Drayton	Oct. 5, 6
Dresden	Sept. 30, Oct. 1
Drumbo	Sept. 28, 29
Dryden	Sept. 29, 30

Stove and paint display by Robert Dawson & Sons, Bridgewater, Nova Scotia, at the local Fall Fair. The display brought splendid results as evidenced by the fact that the majority of the stoves and heaters are bearing the "sold" sign. Flags and bunting, combined with the judicious use of hand-lettered cards bearing a brief but effective message, play a big part in making an attractive exhibit. Fall Fair displays will help to stimulate that interest in fall painting which is apt to lag about this time of year. It is but another way of keeping enthusiasm at a high pitch in order to "cash in" on this business.

Proper Use of Advertising Reaches Existing Demand

As Well as Creating New Demands—Conservative Attitude of Many Established Dealers Loses Custom from Newcomers to Community Importance of Seasonable Advertising.

Written for Hardware and Metal by A. L. McCREADY

ADVERTISING may or may not create a demand, but, with proper usage, it will reach whatever demand exists. And every day there is a certain demand for the commodities or services of those having such to offer.

The merchant or tradesman prepared to meet this demand takes certain means to make known that he is in the field to offer his wares or services. One of these means is his daily ad. in the newspaper.

His ad. may be a quarter column or a quarter page—just in proportion to the value he places in it. But the man with the daily space, no matter what size, has an appreciation of the value gained by keeping his name continually before the public.

Firms and Residents

The man who says, "I have been in business for fifteen years, and everybody knows me," is apt to be catering to a very small trade. Residents change considerably in fifteen years, or ten years, or five years, and the new ones arriving may never have heard of Mr. Fifteen-Year Businessman. But the new residents will, from reading the local paper, become unconsciously familiar with the names of the firms who advertise, and when in need of the wares or services thus advertised, the reader will be drawn to deal with the firms whose ads. invite him.

The daily advertiser knows this and pays attention to the messages printed in his ads. That is the advertiser alive to the merit of advertising, and not the one who advertises simply because he wishes to patronize the owner of the paper, or because the paper carrying his ad. voices the same political views as himself. Such an advertiser is apt to be careless in the messages he gives—merely a summary of his business, or a statement about some slow-moving stock at a prohibitive price that dynamite wouldn't move, much less printer's ink. That is not advertising—it's not even a hobby. It's merely playing up to the printer.

Faithful Advertisers

The other class of advertiser—the 100 per cent. efficient sort, is the one who cares for his ad. as faithfully as he posts his ledger. He changes his ad. regularly—not spasmodically. Each message features a point, and aims to a point—the consumer. He may not use high-sounding words in his ads.; he believes in getting down to "brass tacks," and if it's brass tacks he wishes to sell, he says so, even to the price.

He may not be an expert ad-writer, but he can read. He knows which ads. of other firms appeal to him. He analyzes them and learns why they appeal.

Perhaps the appearance caught his eye! Such an ad. seemed well-balanced—was neither crowded nor skimped. It invited a reading. Or it may have been an illustration that drew his attention. The illustration urged that he read the message connected.

In the well-proportioned ad. he found that the reading matter was equal in space to the illustration. It may have been more, but seldom less. In some other ad. a catchy headline attracted him, or the price in large figures. He makes mental note of all these things and more, and incorporates these features in his ads. He takes an interest in writing his ads. and considers their production with the same pride that a poet does his poems. Instead of a task, the writing of his ads. becomes a pleasure.

The Seasonable Ad.

To the attentive advertiser, the writing of seasonable ads. is a motto. By seasonable ads. it is not merely meant ads. relative to the Christmas season, winter time, spring time and summer time, in course, but a more far-reaching phase of the term "seasonable advertising."

There are certain times and circumstances in each of the four calendar seasons that tend to the making of seasonable advertising.

Taking Advantage of Rain

An instance of this class of advertising is afforded by the custom of a certain small city hardware man who invariably takes advantage of a night rain to feature roofing in his ad. for the following day. The heading he uses is quite in keeping when he starts out with the query, "Did Your Roof Leak Last Night?" Then he goes on to state that he has the roofing to replace that leaky one, or to patch it, whichever is desired. And under the introduction he comes out with the names of the roofing carried, and the prices.

Up the street from this merchant is a gent's furnishing store. Its proprietor, too, believes in taking advantage of a rainy day to feature raincoats or umbrellas. "Raincoats For Rainy Days," he heads his ad., which greets the eye on the evening of a day when some raincoatless pedestrian received an uncomfortable wetting.

In the body of the ad. is an illustration of a raincoat, and the message beside it comments on the uncertainty of the weather and the penalty of unpreparedness. It greets the eye of the ill-fared reader while the incident of his morning wetting is still fresh on his mind, and the ad. creates a greater impression than it would when the need was not so apparent.

Incidents With a Point

One facetious plumber grasped the

SOMETHING TO THINK ABOUT

Advertising to-day is a necessity and an asset.

Advertising has been hurt by emotional appropriations.

Merchants must figure advertising cost in their budgets just as essential as rent or labor.

It has been stated that before the war only one hundred Americans had an international vision.

Trade journals enable business men to keep a finger on the pulse of every industry.

It is as important to know the cost of distribution as to know production costs. The Government should make a survey of our Jobbers and Retailers and their merchandising costs.

American production exceeds home consumption one hundred per cent.

Systematic and forceful advertising should be employed to picture the importance of American-owned Merchant Marine.

Only twenty per cent. of our business men vote.

significance carried in the event of a particularly hot July night. Next day his ad. appeared with an illustration of a bath tub with a grinning youngster's head and shoulders exposed above its brim. Underneath the illustration were the words "He Didn't Mind the Heat Last Night; He Took a Plunge in One of Smith's Bath Tubs." The heading carried a touch of humor, and the plumber followed it up with a piece of logic in inviting the reader to be ready for the next warm night by having that long-deferred bath tub installed.

A hardware merchant utilized the event of a shortage of gas supply in severe winter weather to give the following advice: "Cuddle Up to a ——— ———. This wording stared from his ad. in good large letters, and on first glance it might seem a bit of light advice to bashful lovers, but the wording of the ad. beneath made plain the comfort to be derived from having a ——— ——— oil stove on the job if the weather was cold. And he sold them, too!

Reaching the Reader

These instances are but a few of the many that may be grasped to make seasonable advertising for nearly every line of business. Our Christmas ads., our housecleaning ads. and the ads. for all the set periods of the calendar, are common knowledge to everybody, and the reader knows when to expect them; but it is the little incidents in between that may be grasped and make real live ads.

Some incident or eccentricity of nature which gives us our variety of weather and climate, afford the ad-writer inspiration for ads. that are above the prosaic, and carry the punch. At no time is the prospective customer so receptive as at the time that some incident has created a demand or desire for a certain commodity or service. This is where the writer of seasonable ads. heads the van and makes the sales. He knows when to reach the consumer, and makes use of his knowledge.

SMALL DISCOUNT ON PURCHASES

By way of getting as much business in the first part of the day as possible; rather than in the afternoon, and a short time before closing as is sometimes the case, one merchant who conducts a large trade offers a small discount on all purchases made before ten o'clock in the morning. The discount not only distributes sales better, but brings in a much larger volume of business. A customer arriving at the store early is likely to remain longer and make a greater number of purchases.

A glance through the main store of the Armstrong, Smyth and Dowswell hardware business, Regina. Interior and window displays are the important factors in this store: the former being well demonstrated by the arrangement of stock, up-to-date fixtures and general layout as shown herewith.

Step by Step With Western Progress

Armstrong, Smyth & Dowswell, Regina, Sask., Have Experienced the Fluctuations of Western Business Conditions During Past Fifteen Years—From Small Beginning Have Developed to Prominent Retail Hardware Business in Western Canada—Sound Policy Has Guided This Enterprise

CAREFULLY prepared interior and window displays have played no small part in the successful development of the Armstrong, Smyth & Dowswell business at Regina. It has been the firm's policy to change the trim very frequently. The windows are looked upon as an important factor in advertising the store and its merchandise, and they receive much attention. A stationary background of rosewood has been constructed at the rear of each display window and the whole layout has been planned with a view to facilitating a change of trim.

This hardware business is one of the retail stores of the Western prairies which has progressed step by step with the development of "the land of opportunity." The past fifteen years since this business was established in Regina have seen some remarkable changes in Western Canada, and the steady growth of this firm's trade has been accomplished despite setbacks caused by loss through fire. In 1911 the store was completely gutted by fire and again in 1917, a considerable loss through fire was sustained, but by co-operation and the following of a far-sighted policy in management, the members of the firm have succeeded in building a most substantial retail hardware business.

A glance through the main store, as illustrated herewith, indicates a neatly kept and well arranged stock. Everything is within reach and can soon be located by the customer on entering the store. It will be noticed that the fullest use is made of up-to-date store fixtures. A curved showcase opposite the entrance contains a display of watches, balls, etc., and two rows of showcases extend down the centre of the store nearly to the rear. Small tools and other such lines are given prominence in these cases. On the walls there are glass-fronted display cases for saws and such lines, over which are a series of drawers with samples of what they contain shown on the front of each. Another series of drawers at the base of the wall fixtures complete the arrangement which keeps the stock within easy reach and yet gives the store a neat appearance.

Much the same design in wall fixtures is carried out on the other side of the store, though in place of the long glass cabinets for saws and such tools, there are smaller drawers with glass fronts for displaying cutlery and other household requirements. At the rear of the store is a rack for displaying harvest tools and garden implements. An up-to-date cash carrying system and ladders

on a rail for reaching the upper shelves are also used in the store.

Some changes, having for their object the improvement of the store's appearance, were made this spring. These included the replacing of a large nail counter with a wrapping counter provided underneath with bins for hinges, etc. This alteration provided considerably more space and allowed the installation of a small tool rack which, the management states, has more than paid for itself already. Formerly the store salesman had to go to the basement for tools and take the customer as well. Under the new arrangement the salesman can wait on one customer while the other is picking out his garden tools or any such tools whch he may require and which are all grouped in the one department.

Small Goods Counter Stimulates Business

The use of a small goods counter at set prices of 5, 10 and 15 cents, has given a distinct impetus to trade in such lines in this store. Tables are provided on which are baskets containing articles of these prices and plainly marked with price tickets. It has been the experience that customers will interest themselves in the lines thus displayed, being interested in inexpensive articles for use in the home.

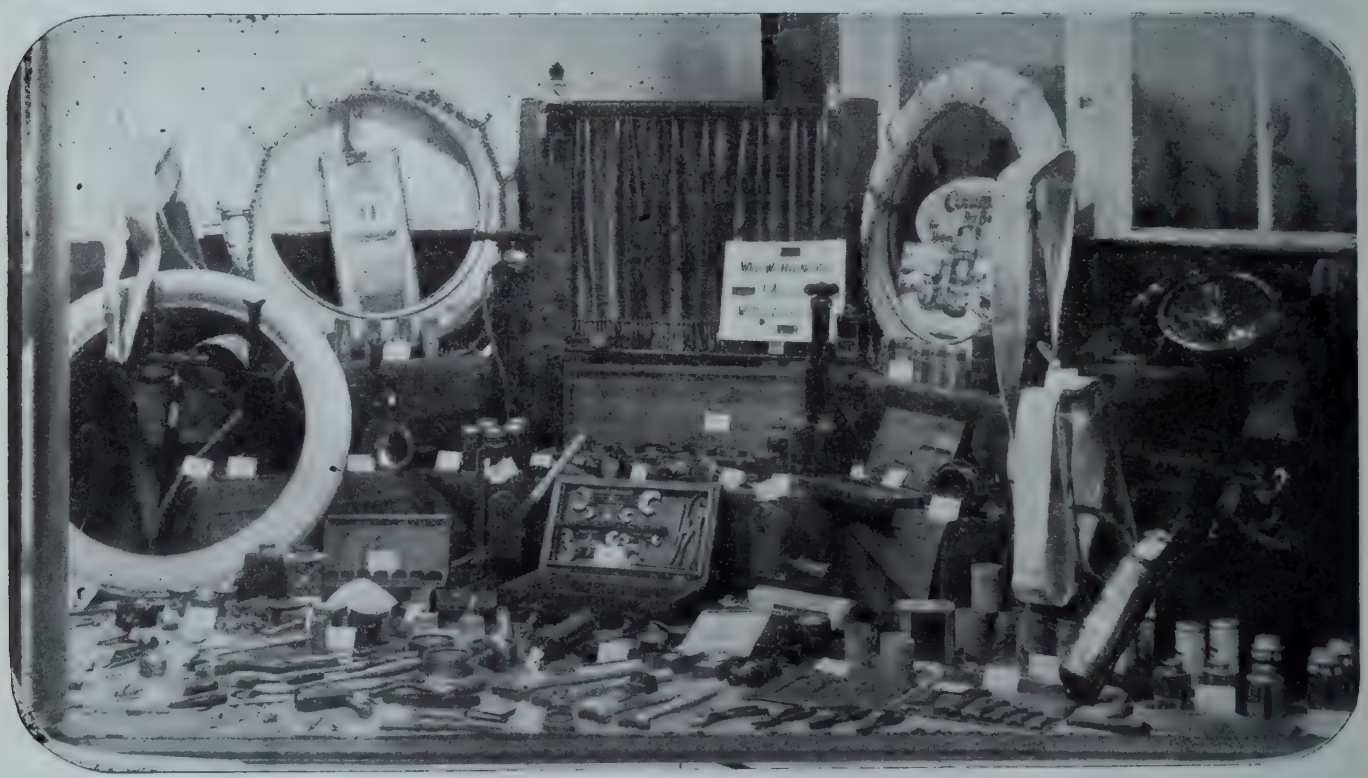
Stoves, Refrigerators, Washing Machines in Separate Dept.

Extensive alterations were also carried out recently on the second floor of the store. Stock shelves which extended on both sides of the store, from the front to about twenty feet from the back, have been taken out and a commodious display room is the result. As can be noted in the illustration this room is used for the display of stoves, refrigerators, washing machines, coaster wagons, lawn mowers and a few other specialties. At the rear is a case of builders' hardware with cupboards provided for butts of all kinds and shelves for the locks.

This department is used for the display of seasonable lines and it has been found that the location of the department has stimulated sales of such lines as are shown. It will be noted that with one or two exceptions these lines are ones which run into considerable money, and ones which the customer does not decide on as readily as in the case of more inexpensive articles. The idea of having this department so situated is that the customer is away from the noise of the main store and there are no distracting influences to act on either customer or salesman. The stock can also be kept in better condition because there is little traffic through this department, and it therefore shows up to better advantage. Furthermore there is plenty of room to give a thorough examination of the stoves, washers, refrigerators or other lines, and the customer is not so inclined to make a hasty and unjust decision. The effect is to make the customer feel at home and while in that mood he or she is in a better frame of mind for buying.

Demonstration Draws Trade

The management of this store are greatly in favor of the use of demonstrations for stimulating sales of seasonable lines. They believe that the showing of the various lines of household goods in actual use is an important factor in selling and the best use is made of this medium. Recently a very successful demonstration of refrigerators was carried on. Two refrigerators were shown in the store window throughout one week. On Monday morning the ice chambers were filled with 150 lbs. of ice and a variety of perishable goods, such as milk, butter, salt, sliced bananas, oranges, grape fruit, onions, meat, cheese, cabbage, lettuce, salmon, cigars, etc., was placed on the shelves. The refrigerator was then sealed in the presence of the mayor and another official at 2 p.m. on Monday. On the following Thursday afternoon at 3 p.m. the seal was broken in the presence of the same men, with crowds of citizens looking on, and every article was found to be in perfect condition with a



The sale of automobile accessories has been made profitable in this store largely through the intelligent use of the windows. In four years the accessory business in this store has developed from a small assortment of very necessary lines to a complete stock of practically everything in the accessory category, and a separate department is required to handle the business. It is felt by the management that a good deal of enthusiasm is necessary in the sale of accessories, and as the windows are an important factor in advertising their value should not be overlooked in achieving this result. Note that each article bears a price ticket.

This is the second floor of the Armstrong, Smyth & Dowswell store in Regina. Extensive alterations were recently carried out in order to give room for a commodious display of household lines such as stoves, refrigerators, washing machines, lawn mowers, screen doors, ladders, clothes horses, fire grate appurtenances, etc. Moving this department to the second floor, where it is away from the noise and traffic of the main store, has proved a great stimulant for sales of these lines. Customers appreciate the removal of distracting influences when contemplating the purchase of lines such as these which, as a rule, call for a considerable outlay. The stock can also be kept in better shape and, therefore, shows to good advantage.

temperature of less than 36 degrees above zero in the refrigerator.

Get Customers' Opinions Before Demonstrations

Expressions of opinion from customers prior to the demonstration, were that such a feat was an impossibility. The test proved that it was not impossible and also showed that the particular line of refrigerators as carried by this store were of a high quality. Many customers have now been convinced that a good refrigerator is the cheapest in the end, in the saving it effects in ice bills throughout the warm weather, and the result of the demonstration has been to greatly increase sales of that particular line.

Similar success has attended demonstration of other lines in this store, and the management have found that the actual showing of what certain articles will accomplish in household use, goes a long way in disposing of them. They make a point of learning how customers are disposed towards certain lines, and if there is any misapprehension as to the use of such lines, a demonstration is arranged for to clear up the difficulty. It is realized that showing the articles in actual use will appeal to the customer much stronger than the best sales talk ever given. It is at least a good supplement to the sales talk.

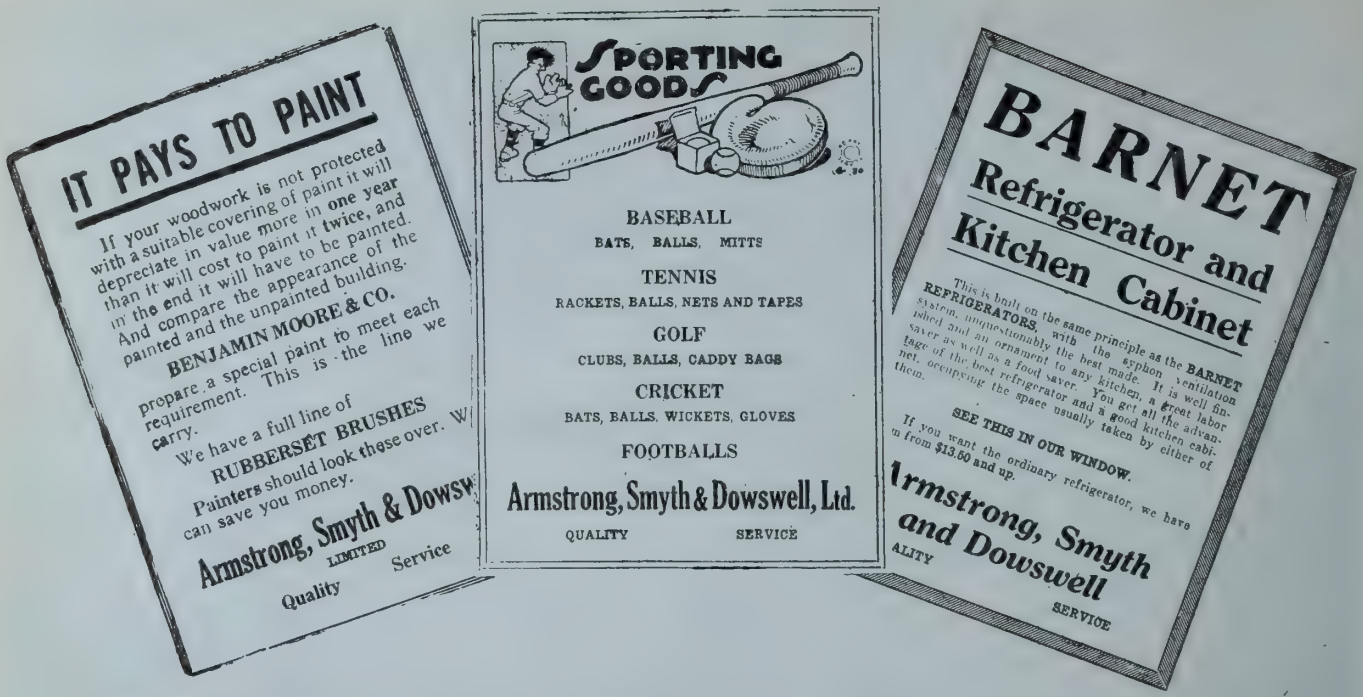
Auto Accessories Highly Profitable

Automobile accessories have been found to be a hghly profitable line in the store's trade. Four years ago a small assortment of accessories was put in stock, and development has been so rapid that to-day a regular department is devoted to the sale of this line. The splendid window display shown herewith indicates that there is some real enthusiasm behind the sale of accessories in this district. If not, it is not the store's fault. The management of this store appreciate highly the advertising value of well dressed windows, and auto accessories get a very fair share of the publicity through this medium.

Testing the Value of Window Display

In order to test out the value of the windows in displaying accessories the management watched sales very closely during the period the window was in and compared these with sales made when the window was being devoted to some other line. They found the record highly in favor of displays in the window as a stimulant for sales of accessories in the store. It has been found that in some communities there is still a slight tendency to overlook the fact that hardware stores are selling accessories. The motorist generally start out to head for the local garage unless he has already been introduced to accessories through the medium of the hardware store. Therefore a good display in the window will be a big help in arresting the motorist's attention. There is no question the hardware dealer has a big lead over the average garage when it comes to window displays, for the hardware store is generally kept in better shape and the windows lend themselves more to attractive displays of accessories.

The window shown herewith indicates a well arranged display of a great many accessory lines. Small tools, tires, repair kits, pumps, etc., are prominently shown. Suggestion is an important factor in the sale of accessories in view of the fact that there are so many new lines constantly coming on the market. The motorist is unable to keep track of all the new devices which are manufactured for use on his car, and it is only when he sees such lines on display that he is influenced. And right here it might be stated that every motorist has a hobby for fixing up his car with the most useful accessories available, and while there are many unimportant lines produced from time to time yet there are constantly being marketed articles which have a distinct value in increasing the comfort aud utility of the motor car, and the motorist is interested in any display of accessories



Some samples of advertisements used by Armstrong, Smyth & Dowswell, Ltd., Regina, to carry forward the general plan combining the use of store windows and interior displays. Practically the same size space is used each time and a uniform style of set-up and readers are more readily familiarized with the distinctive appearance of this store's ads.

Window displays have helped to make builders' tools a fast-moving line in the Armstrong, Smyth & Dowswell store. The management keeps a finger on the pulse of business and arranges displays and other publicity to meet changing conditions. At the present time there is a revival of building in Western Canada, and, therefore, builders' tools are frequently displayed. A well-arranged window, representing a very complete stock of tools for carpenters and masons, is illustrated herewith. Each article is plainly marked with a price ticket.

because it gives him his only opportunity of seeing "what is new."

Auto Accessories in the Store

A showcase is devoted to auto accessories in the store during the period from the first of March until November of each year. While the goods are on display in the showcase or in the window, each article is prominently marked with price tickets in order to facilitate the customer's selection. When asked as to whether the devotion of a complete showcase to accessories during the period mentioned, brought returns in proportion, the management replied, "It certaily does pay in dollars and cents." In the store, in addition to the showcase, the stock of accessories is carried in shelves on the wall near the centre of the store, and a wall case is used for displaying small accessory lines.

Builders' Tools and Hardware

Builder's tools are a fast moving line in the store trade as well, and here too the windows are used to good advantage. Building conditions are rapidly reviving in Western Canada, following the stagnation of the past few years due to rising costs and scarcity of help and material. With the changed outlook the hardware trade are taking steps to "cash in" on the sale of builder's tools and hardware. The window shown herewith indicates an attractive and effective arrangement comprising saws, levels, planes, rules, hatchets, hammers, screw drivers, braces and bits, tape measures, etc. Here, too, the idea of plainly marking each article with a neat price ticket is carried out to a good advantage. The use of windows for the display of these lines has been found to be a distinct help to sales of tools in this store.

Study Local Requirements in Sporting Goods

Sporting goods receive much attention in the store's trade, and during the past three years sales have largely increased as result of this attention. This department was started similarly to the auto accessories, with a small stock, and by the study of local requirements, the sources of business and the methods of drawing that trade to the store, the department has now grown until it commands the attention of a qualified sporting goods salesman and the department stands by itself. One showcase is devoted to the display of sporting goods throughout the year, the seasonable lines being changed periodically. The stock is carried on shelves near the showcase so that the various articles are within easy reach. A wide range of sporting goods for golf, tennis, cricket, football and baseball are carried. Golf clubs are given a special rack at the front of the store inside the door, as it has been found in the case of this particular line that golf players are interested when the articles for playing the game are put directly before them and they are allowed to handle and test out the various clubs. Perhaps in certain other communities the local sporting fans may have a stronger leaning toward some other form of sport and if their te dencies to handle the goods are as strong as those of the golfers in Regina district, then the thing to do is to place the goods within their reach and let them stir up their own enthusiasm by handling the various articles. It is an important factor in the sale of this line of goods, and one which can be utilized to great advantage by the resourceful dealer.

Every Store Should Have a Rest Room

So Says Dominion President J. A. Banfield of the R.M.A. —A Feature which Has Attracted Many Women Shoppers—A Class of Trade Well Worth Developing—Women's Rest Room as Standardized in Winchester Chain of Hardware Stores.

At the recent convention of Western members of the Retail Merchants' Association in Moose Jaw, J. A. Banfield, president of the Retail Merchants' Association of Canada, suggested that every merchant should have a rest room in his store. He described the store of a retailer in a small town in Manitoba where there is a small rest room fitted up with a rug, a writing desk and a few comfortable chairs. "There is never a day passes in the store but what some committee of women in connection with local churches or other organizations meets in the rest room. Can you beat that for advertising?" asked Mr. Banfield. "Try it."

For the benefit of those hardware merchants who might be considering the question of a rest room in their stores, herewith is shown the rest room adopted as a standard for all the chain of Winchester stores throughout the United States. There is no question women are doing a larger proportion of the shopping in hardware stores to-day than in the past. Certain stores are catering to this class of trade and find it is profitable.

For the comfort and convenience of its women patrons the Winchester stores have fitted up this rest room, which is to be found on the balcony. These rest rooms are beautifully furnished in wicker furniture of comfortable and stylish pattern and desks with stationery, magazines, etc., are installed. This feature indicates thoughtfulness on the part of the store proprietor and is one of the little conveniences which women shoppers like to have extended to them. There is little doubt of its paying good returns judging by the response made by women in stores where the feature has been adopted.

What Represents a Fair Business Profit?

A Review of Conditions Which Have Led Up to Present Merchandising Conditions—Cold, Common-sense Leads Back to Conclusions That Are Lost Sight of in Modern Business—By What is Profit-Fixing Governed?—Other Interesting Points Dealt With

By W. R. Basset in "Printers' Ink"

NO QUESTION at all exists as to what is an unfair profit. An unfair profit is the profit which the other fellow makes. The profit which you make cannot be unfair—and you will explain exactly why it is not unfair as long as anyone will listen. In fact, if you are allowed to talk long enough you will make out a case against yourself, even if none in the first place existed.

But what is a fair profit?

And who should determine the profit? Are we really talking about profit or about price? Does a high price mean a high profit, and does a low price mean a low profit? Is there any connection at all between price and profit? Does the buyer or seller make the price, or is the price made by an outside force over which neither has any control?

An endless number of questions arise when one starts to talk about prices and profits. We get into the same morass of trouble as when we talk of wages being high or low without reference to what is being given in return for the wages.

And in addition we have the complications of currency inflation, and on top of that the problem of scarcity, which resolves itself more or less into a discussion of what a crust of bread is worth to a millionaire who is starving.

The word profiteer is a glib and ready one that springs easily from the lips whenever we think we have been overcharged or—what amounts to the same thing—cheated. Our resentment unconsciously leads us to take an entirely unbusinesslike view of the whole situation—a view which we would not ordinarily take.

If, for instance, I sell a suit of clothes to a second-hand dealer, I shall not get what the suit is worth. I hope to get more than it is worth, but expect to get less. Really, I do not know what the garment is worth for resale, because I am without knowledge of the market. The man who buys from me will, on the other hand, know the market, and will refuse to pay me a sum greater than he can easily resell it for at a profit.

Today, both buyers and sellers are in the position of the man selling to the old-clothes man—none of us knows what anything is worth. And that is why I say it is easy for any man to convince himself that whatever prices he charges are fair. For every man who sells also buys, and his sales prices are often but a reflection of the impotence that he feels in buying. This all leads to a general looseness of thought and expression and to other short-comings.

To-day both buyers and sellers are in the position of the man selling to the old clothes man—none of us know what anything is worth.

* * *

The buyer who goes away from us feeling that he has been cheated is the seed of our future bankruptcy.

* * *

It is unnecessarily expensive to put the profiteer in jail.

* * *

In discussion of capital and labor you would imagine that only the laborer worked and never had any work done for him, and that likewise the owner of capital only buys services and never has his own for sale. This is nonsense.

The Hard Path of the Profiteer

We are all of us too prone to forget that the buyer who goes away from us feeling that he has been cheated is the seed of our future bankruptcy. The man who declares that he will "get his now while the getting is good" never does get his, for the short-sighted greed that prompts his action never knows where to stop, and the end is financial shipwreck. In pushing forward to get more, he does not see that the conditions which permitted him to make his killing have changed, until all at once he is brought up with a sharp turn and everything is taken away from him.

What punishment shall be meted out to the man who profiteers? If we think of him as a cheat, then it is unnecessarily expensive to put him in jail; the laws of nature will take care of him. Indeed, jailing him may well be a kindness, for not otherwise would he have a chance to conserve his resources!

Take the profiteer as he is today luridly conceived. Let us pursue the animal. We recently had a judicial formula handed down which may be used as a description and prevent dragging in the wrong beast. A Federal judge has said that a just and reasonable retail profit must be determined on the wholesale cost of merchandise at the time of purchase and not at all upon the market value at the time of sale.

This is an interesting thought which prompts one to reflect whether a fair profit means that sellers should not make money or that buyers should secure a low price.

For instance, I might, by the exercise of foresight, have bought in 1915 a stock of some commodity in Japan and have been unable until 1920 to get it across the ocean on account of the shipping regulations. Let us say that the goods stand me ten dollars a unit in my American warehouse. The man across the street buys his stock in 1920; it stands him thirty dollars a unit, and he offers it at retail at fifty dollars. If I offer mine at forty, I am profiteering—even though the public pays less than it would have had I not had foresight. On the other hand, if I sell my stock at retail at thirty, I am accused of cutting business from under the feet of my competitor, and also I realize so little money that when the old stock is exhausted I shall not, in spite of my profit, have money enough to replenish at the then market price.

If I follow the logical sequence of the rule as laid down, my only course, if I am condemned with a forehanded disposition, is not to make a price but, on the contrary, send all of my stock to auction and let the public make its own price.

Exigencies of Selling

Or again suppose that I have a badly chosen stock that will not move out as a whole. A sudden demand arises for some article which I happen to have had in stock for a long time but which had practically gone off the market. I sell out that one article at a profit of one thousand per cent., but the profit on that single article is not enough to meet the going expenses of my shop and I am forced into bankruptcy. Can I be both a profiteer and a bankrupt?

Or turn to manufacturing. If I have a well-managed plant and planned production, I can surely turn out goods at a lower cost than a competitor who has an ill-managed plant and whose production planning could scarcely be dignified by that name. If I sell at his price then I am a profiteer. If I sell on costs at a low profit in order to get the trade, shortly I shall be so large

that I shall be charged with unfair competition and price-cutting. We have laws to prevent manufacturers sending goods to our shores on almost that identical basis.

Or leave the question of profit per sale and take the year's profit on invested capital. I may keep my capital working through every day of the year, and by frequent turnovers at a low profit per turnover make a very high profit on my invested capital. I shall have performed a high public service, but, according to the governmental notions of business, I shall be a profiteer. I could purge myself of the accusation of impurity only by chucking my knowledge of business out of the window and raising my prices sufficiently to slacken the turnover, and, although making a larger profit per sale, make less on my invested capital.

Or I might increase my capital. Of course I shall, against my will, have to charge the public more for my goods. This is not only business but social lunacy. But unless I try to act like a lunatic I am apt to be put into jail. Witness the case of the Brooklyn haberdasher who was arrested as a profiteer by agents of the Department of Justice because he made (including his salary) a profit of 19 per cent. on sales which happened to be 60 per cent. upon his invested capital. That poor fellow committed suicide in his disgrace.

"But," someone will immediately ask, "would you take the lid off profits and let every man charge exactly what he chooses? How, then, could you curb the greedy? Would not the public then be at the mercy of the profiteers? Should we not soon be paying $75 for a pair of shoes and $5 a pound for beefsteak?"

And there unfolds a dreadful picture of a world peopled by only two classes —profiteers and their victims. Here again we have a delightful assumption growing out of the loose thinking of the times. In discussions of capital and labor you would imagine that only the laborer worked and never had any work done for him, and that likewise the owner of capital only buys services and never has his own for sale. This is nonsense.

There are no such abstract entities. This is a world of human beings, and it is impossible, for instance, to conceive of a shoe-dealer whose sole activity in life consists in selling shoes for many times what everyone else thinks he should sell them for. For that shoe-dealer in spite of his bad disposition, cannot get on without buying food, clothing and shelter. Even landlords require food and clothing. And this brings us to the extraordinary belief which now seems to prevail that if a dealer refuses to sell his shoes for less than $75 a pair, or the butcher refuses to sell his beefsteaks at less than $5 a pound, there is somewhere some compulsion on the part of the buyer to buy at that price.

Situations can be imagined in which one might have to buy a few commodities at any price in order to preserve life. But such situations are rare. They have no more to do with business than has the salvage of a ship at sea to do with the ordinary routine of the merchant marine. And again it is presupposed that in this dire emergency the buyer has the money with which to pay the so-called exorbitant price.

In other days, when there was not so much money, people did not quarrel about prices. If the prices were too high they did not buy and the seller reduced his prices until he reached a level where he could find buyers. That is precisely what would happen today if prices were to go as high as the popular imagination sends them.

The Buying Power of Money

What we forget is that very frequently we do not know when a price is high or low or how high or low a price is because of the drop in the purchasing power of money. If $75 has the relative buying power of $6 or $7 in 1914, then $75 is not too much for a pair of shoes. If, on the contrary, $75 retains the purchasing power of $75 in 1914 (using 1914 as the last year in which values had relations we can comprehend), then $75 would be too much for a pair of shoes, which would be demonstrated by the fact that no one would buy them, and the shoe-dealer would not be a seller, but merely an exhibitor of footwear. You would not say that he was a profiteering merchant because he charged so much for shoes. You would say that a purchaser was a fool for paying so much.

Or take another case: Say that a fair meal may be bought in the dining-cars of a certain railroad for $2. A train carrying one of these diners becomes stuck in a snowbank, miles away from any habitation. Thereupon the steward of the dining car raises the prices to a point where the $2 meal costs $20. Would you prosecute that steward as a profiteer or would you send him to an insane aslyum? If you kept your head level, you would send him to an asylum, because his passion for the near dollar would probably go far toward breaking up the passenger traffic of that railroad.

Now we begin to see where lies the difficulty in deciding what is a fair profit. We are, in effect, trying to measure milk with a yard-stick instead of a quartern. We are presupposing that the seller and not the buyer makes the price, and that there is some connection between philanthropy and business.

There is no such connection: philanthropy has no place whatsoever in business, which is not at all a condemnation but rather a praising of business and a lifting it out of the paternalistic mire. Let us get rid of any confusion between benevolence and business practice. Let us strip business of everything approaching cant.

Take the familiar instance of a merchant granting credit to a young man starting in business and who has no tangible assets, which in the card-index theory of credit-granting would warrant an extension of credit. The merchant says:

"This is a nice young man. I think he will do well, and therefore I shall take a chance on his account." And then he smiles benignly in his self-satisfaction.

That merchant has not performed a charitable act—although he thinks he has. He has advanced those goods on the character of the man, and character is the only really first-class asset that is to be considered in the extension of credit.

Or again, take the many manufacturers, among whom Henry Ford is perhaps the most prominent, who have many times said, in effect, "I will send my goods to the market at prices so low as to put them into the possession of every man, woman and child." Ford exhibits himself as a public benefactor and is performing the highest possible

Strange to say, every business in this country that has attempted a monopoly has found its largest success after it has abandoned all notion of capturing the market other than by giving a large service at a low price.

* * *

An attempt at monopoly usually brings in competitors who evolve substitutes that take the place of the monopolized article and the monopoly breaks of its own weight.

* * *

Fixing profits is infinitely more viciously destructive of economic life than fixing prices.

Very frequently we do not know when a price is high or low or how high or low a price is because of the drop in the purchasing power of money.

* * *

We are presupposing that the seller and not the buyer makes the price.

* * *

Any attempt to fix profits or wages or any of the workings of business on a basis that human beings shall not be selfish is bound to fail

service to the public, but also he is making more money than all the people together who think they are charging high prices; for consciously or unconsciously he has hit upon exactly the right way of doing business. If he had, on the contrary, selected a different course and, as the phrase goes, "taken advantage of the public," the immediate effect would have been a reduction of his sales by half, and in consequence a partially idle plant, a disrupted organization, and a red figure on his balance-sheet.

The talk about fair and unfair prices is quite beside the real point. It is not at all necessary to surround the matter of prices with a mist of sentiment. The charging of extraordinarily high prices may or may not be immoral. That, too, is beside the point. Low prices may also be immoral. And if we lug philanthropy into business, what are we going to do with the man who gets perfectly hipped on the notion of selling things cheaply to the public, and in his ardor forgets to pay his probably less emotional creditors? Is he an idealist or a crook?

But are we to admit impotence in regulating profits? Shall we allow human greed to run amuck? Running amuck is not a diversion that can long be sustained. Usually one hits a stone wall or otherwise demonstrates the physical phenomenon that two solid bodies cannot occupy precisely the same space at the same time.

Let us go back to our shoe-dealer. Fifty years ago most workmen went barefooted in summer because shoes were considered too expensive to be worn heedlessly. There is abundant evidence to sustain the conclusion that feet were made primarily to stand on rather than to give aid and comfort to shoemakers. But to-day very few people think of going barefooted at any time of the year. We have grown into the habit of wearing shoes and most people have several pairs. We took up the shoe-wearing habit not because our feet had changed, but because shoes became cheaper. Now, if shoes are held at such a price that the ordinary person cannot buy a pair, then he will go barefooted, and although at first going barefooted may roughly use the tender foot, the makers of shoes will suffer more than the owners of feet.

The Moral Issue in Business

We can discuss the morality of prices, and we can shed long, salt tears as we pay our bills, and, if we possess sufficient imagination, we can carry on our sorrow into the process of passing the additional cost on to those whom we sell, but really are we getting anywhere with all of this self-deception about prices? Is it not better to recognize right off that good business is founded upon enlightened selfishness and go forward on that principle?

It is not at all necessary to introduce the moral issue into business. A successful business man must have character; he must also meet his financial engagements. Or put it another way: a business man cannot be successful unless he has character. But any attempt to fix profits or wages or any of the workings of business on a basis that human beings shall not be selfish is bound to fail.

Price fixing leads through the socialistic state into the communistic state. Profit fixing leads to chaos.

* * *

The only possible method by which lower prices can be achieved is a method which stimulates production—that which gives more to distribute.

* * *

People have gone astray on this whole matter of profits and prices because they forget the yesterday when the producer was beseeching the consumer to buy.

* * *

The seller does not fix the price. The buyer is ordinarily and especially to-day the ultimate price fixer.

It is the fashion these days to predicate reforms upon bringing about a quicker change in human nature. It would seem to the writer to be better to identify service to the public with self-interest; then those who are amused by being self-righteous may take their diversion on the side and not interfere with the orderly conduct of human affairs.

We are witnessing to-day the large changes which the introduction of labor-saving machinery has made in the conduct of industry, especially in the direction of making prohibitive the cost of an idle plant. But a plant will not be idle if its production is put within the reach of almost everybody. The wants of man are infinite. It is up to the man who desires to supply some of those wants to put his articles on the market at such a price that they may be bought in ever-increasing quantities by a constantly growing number of people. That is the best way to serve humanity, but it also happens to be the way to make the largest profit; a particularly forunte provision of nature, since if in best serving the public one also best serves oneself, one will not become tired of serving the public.

From the owner's standpoint, it is not the percentage of profit per sale that counts, but the annual profit, and it is growing increasingly evident that the business which has a large annual profit on a comparatively small number of sales or turnovers of capital at a large margin per sale is not nearly so stable as the business which gains a larger annual profit by a great number of turnovers at a small profit per turn.

It is always the first thought of monopoly that it will gain the largest profit, first, by shutting out all competitors; second, by charging the largest possible price the public will pay. But, strange to say, every business in this country that has attempted a monopoly has found its largest success after it has abandoned all notion of capturing the market other than by giving a large service at a low price. A monopoly founded on service is a legitimate monopoly.

Take the automobile trade. Under the Selden Patents, it was thought that, by a system of licensing, the number of people permitted to make automobiles could be restricted, and all danger of glutting the market be removed. But the great progress in the automobile industry has been since that patent expired! To-day it never occurs to the owners of an automobile factory to try to monopolize the market. What they try to do is to turn out a good car at a fair margin of profit. All the combinations of companies in the industry, and there are several such, are successful only in the degree that they tend to increase production and at the same time decrease prices.

Monopoly Breaks Its Own Weight

An attempt at monopoly usually brings in competitors who evolve substitutes that take the place of the monopolized article. An interesting illustration of this was lately given by the manufacturers of an automobile horn. In the beginning they thought they were protected by patents and charged a high price for their product, with the idea that they had the market at their mercy. Other men saw the possibilities, were attracted by the field, attacked the patents and broke them and the company. The company which devoted so much of its energy to forming a monopoly has now a heartbreakingly low profit on its capital. A die-casting company gave itself up to the guarding of its secret process and sold a small number of castings at high prices. It was noised about that the process was a regular gold mine. Other companies were formed; they gained a knowledge of the process, and now the original company must fight hard to keep pace with its too many competitors. Camel's-hair cloth was put on the market at a very high price; it became popular, and now so many substitutes, which only an expert can distinguish from the real thing, are offered that the market for the genuine cloth is shattered.

A fair profit, then, to go back to that term, is not a figure which may be settled by any outside authority, and it has nothing at all to do with invested capital. It is fair that a premium should go to the man who can so turn capital as to make the largest possible percentage upon it. The whole trend of scien-

(Continued on page 232.)

Important Data Concerning New Taxes

Stamps to be Used Shortly

Reports from the Inland Revenue Offices are that stamps for luxury taxes are not likely to be used until September 1. A system is being arranged for rebate on cancelled stamps at shops where returned articles are numerous. There are also many other phases of the question which require attention and which have delayed the enforcement of this process of collection.

Revenue stamps will be provided in denominations of from one to ten cents inclusive, 13 cents, 15 cents and all multiples of 10 cents up to $1. In addition there will be one, two, three, four, five and ten dollar stamps.

If a person buys an article worth $200 on which the tax is 10 per cent., or $20, the procedure will be for the salesman to affix two $10 stamps to the sales slip or invoice and collect $20 from the purchaser, the stamps acting as evidence that the tax has been paid. The stamps will have to be defaced so that they cannot be used again.

Stamps used for this purpose would have a value equal to that of bank notes or Dominion bills for a similar amount, and a great deal of attention is, therefore, being given to the question of having the stamps so defaced that they cannot be "raised" or used again. The use of punches is likely to be adopted for this purpose.

The use of stamps will obviate the necessity of keeping duplicate sales slips and making semi-monthly returns. When ready, supplies of these stamps will be placed in the hands of Collectors and Sub-Collectors of Inland Revenue at the Divisional and Out Offices and also in the hands of Collectors and Sub-Collectors of Customs Ports and Outports.

Tax Rulings

CREDIT SALES.—When selling goods on credit the full amount of the tax must be collected in cash at the time of sale.

* * *

1% SALES TAX.—This tax is paid by manufacturers, wholesalers and jobbers and, unless absorbed, must be shown separately on invoice from manufacturer to wholesaler and invoice from wholesaler to retailer.

* * *

2% SALES TAX.—When buying direct from manufacturer or importer the retailer will be invoiced with a total sales tax of two per cent., though the manufacturer may bear one per cent. himself and only show one per cent. on the invoice.

* * *

RETAILERS' RETURNS.—Luxury Tax returns must be made on the 1st and 15th of each month to the Inland Revenue Office controlling your district.

* * *

MEDIUM OF MAKING RETURNS.—Until such time as the tax stamps are issued invoices must be made out in triplicate, two copies to be used as before and the third for the information of the Government. Where duplicate forms are in use a sheet of paper might be slipped into the counter book to make the third copy.

* * *

SEPARATE BILLS FOR TAXABLE AND NON-TAXABLE ARTICLES.—To keep records clear some merchants have found it advisable to make out separate bills for taxable and non-taxable goods. On taxable goods sale slips must be made out for cash as well as credit sales. The list for the Tax Department must be made out in tabular form in duplicate.

* * *

SWORN DECLARATION ON STATEMENT.—At the foot of the statement issued by the dealer to the Tax Department a sworn statement as to its correctness must appear and the statement sent in duplicate with the copies of the bills for the taxable goods attached, to the nearest Inland Revenue Office, accompanied by cash or a certified cheque for the amount of the tax.

* * *

FORM OF RETURN.—A form can be made out by any merchant, this being made in four columns, first giving the name of the merchant or firm, second place of business, street and number, third, description of tax, fourth, amount of tax collected. These columns should be filled out. At the bottom of the sheet the following statement should appear: I, We.....do solemnly swear that the above amount correctly represents all the tax accruing upon sales of merchandise sold by me as imposed by the law.

Signed.....

* * *

TAX ON CONTAINERS.—At the present time a two per cent. sales tax is charged on the value of containers as used by paint and oil companies. Credit is given on return of the container, though if the container is not returnable as in the case of the usual five gallon cans or those which are lithographed, no credit is given. (See ruling re Returnable Packages.)

* * *

WHAT PROOF NEEDED TO SHOW CANOES USED FOR COMMERCIAL PURPOSES.—Canoes are exempt if used for commercial purposes, and a sworn statement from the dealer that certain canoes will not be used for anything but this purpose will be required to avoid the tax. The onus is then on the dealer to see that the canoe is sold for the purpose named. (Canoe paddles are not exempt even if used in a canoe required for commercial purposes.)

* * *

RETURNS OF MANUFACTURERS AND WHOLESALERS.—Temporary regulations require that these returns be made on the 1st of each month for the preceding month. But a delay of at least 30 days will be allowed within which to file these returns.

* * *

RETURNS MADE BY ATTORNEY. — Where an employee files the tax returns such employee requires Power of Attorney in order to enable him to act.

* * *

LICENSES. — Ordinary retailers will not require licenses for the present. Manufacturers' and wholesalers' licenses will be $5.00 each when the license forms are printed and the regulation enforced.

Firms doing both wholesale and retail trade will not be considered a wholesaler unless the wholesale and retail branches are segregated, pending the is-

suance of licenses; and if the wholesale and retail branches are not segregated they will be regarded as retailers for the purpose of the Act.

Notice will be given when licenses are to be required, and they will be renewable each year, at the end of the fiscal year March 31.

* * *

PENALTY FOR NON-PAYMENT.—The penalty for non-payment of the sales tax is the payment of not more than ten times such duty, and in no case less than $50.

* * *

MANUFACTURER'S SALES DIRECT TO CONSUMER.—If a manufacturer who ordinarily sells to the wholesale trade should sell direct to the retailer or consumer the Sales Tax is two per cent. where the goods have been manufactured by him, and one per cent. where the goods have been purchased by him for re-sale.

* * *

SALES BY WHOLESALER OR JOBBER TO CONSUMER.—If a wholesaler or jobber who ordinarily sells to other wholesalers or to the retail trade should sell direct to the consumer the Sales Tax is one per cent.,—the same as though the sale had been made to a retailer

The wholesaler or jobber, will also in such a case (selling to a consumer), where the goods are subject to the so-called Luxury Tax when sold by the retail merchant to the consumer, be required to collect the amount of the Luxury Tax to which the article is subject.

The Sales Tax and the Luxury Tax will each be payable separately on the selling price of the article.

* * *

RETURNED GOODS.—Articles supplied in exchange for those returned as unsatisfactory or damaged are not taxable unless the articles supplied in exchange are of a greater or increased value, in which case the tax is to be collected on the difference in value.

If goods are returned as unsatisfactory or damaged, and are not replaced, it will be proper for the vendor to refund or issue a credit for the tax collected or charged. If in the meantime the tax has been paid to the Government credit may be taken on the next return.

* * *

CASH DISCOUNTS.—Where goods are sold by a firm, say "Net 60 days, or five per cent. discount for cash in 30 days," the Sales Tax is chargeable on the bona fide net selling price. If the consumer subsequently takes advantage of the cash discount it will be in order for the vendor to credit the customer with the tax charged on the amount of the cash discount. If the tax has in the meantime been paid to the Government, credit may be taken on the next return for the amount creditd to the purchaser.

Where a cash discount is actually allowed and deducted by the seller on his invoice to the consumer, the Sales Tax is only to be charged on the net selling price.

* * *

FRACTIONAL SALES.—A recent ruling of the Department of Customs and Inland Revenue states that on all sales of $1.00 and under the Sales Tax will be payable on the basis of $1.00, and on sales of over $1.00 and up to and including $2.00 the Sales Tax will be payable on the basis of $2.00, and so on.

* * *

REPAIRS.—Bona fide repair work (not including replacement parts) has been ruled to be not subject to the Sales Tax. But where a **manufacturer** undertakes to do repair work and furnishes material of his own manufacture, e.g., new parts in connection with the repairs, then the Sales Tax of two per cent. applies on the value of the material furnished, unless the work is done for a wholesaler who will sell the repaired goods or a manufacturer who will in his factory incorporate the repaired article into other goods for sale, when the Sales Tax will be one per cent. on the value of the material furnished, but there is no Sales Tax applicable on the charge made for the labor. The manufacturer should in such cases charge separately on his invoice for the material and for the labor.

Repair parts sold by a manufacturer or wholesaler in the usual course of business are subject to the Sales Tax.

* * *

GOODS EXPORTED OR MATERIALS USED IN GOODS EXPORTED—DRAWBACK.—The Act provides for payment of a drawback of all Sales Taxes paid on goods exported or on materials used, wrought into or attached to articles exported.

* * *

TAX MUST NOT BE INCLUDED IN THE MANUFACTURER'S OR WHOLESALER'S COSTS ON WHICH PROFIT IS CALCULATED.—Sub-section 1 of Section 19-BBB of the Act respecting excise taxes, in dealing with the Sales Tax, reads in part as follows:

"That the purchaser shall be furnished with a written invoice of any sale, which invoice shall state separately the amount of such tax to at least the extent of one per cent., but such tax must not be included in the manufacturer's or wholesaler's costs on which profit is calculated."

Thus, the selling price of the manufacturer or wholesaler is not to include profit on the Sales Tax which he itemizes on his invoice to his customer.

* * *

MANUFACTURERS OPERATING RETAIL STORES.—Where a concern manufacturing articles subject to the so-called Luxury Taxes provided for in Section 19-BB, Sub-sections 1 and 2 (taxes applicable on sales to ultimate consumer), and sells the same through its own retail stores the Luxury Taxes will apply on the retailer's selling prices to the consumer. Also the manufacturer when selling these goods direct to his retail stores will require to collect the two per cent. Sales Tax.

Similarly, where a firm manufactures goods subject to the excise manufacturing taxes and sells the goods through its own retail stores, such firm being a manufacturer will be obligated to the Government for the excise manufacturing taxes provided in Sub-section 4, and also for the Sales Tax of two per cent., when such goods are sold direct from the factory to the retail establishment.

A manufacturer operating his own retail stores and selling goods not subject to the excise taxes provided, will nevertheless be obligated to account to the Government for a two per cent. Sales Tax on all goods which he manufactures and bills to these retail establishments.

* * *

BONA FIDE BRANCHES. — Where a manufacturer carries his products in warehouses or with bona fide branch houses at different points in Canada and sells his goods from these warehouses and branch houses instead of from his factory only, the Department of Customs and Inland Revenue states that shipments by the parent company to the branch warehouses or branch offices may be treated as transfers—not sales.

In such a case the Sales Tax and the Excise Manufacturing Tax, if any, are collectable when the sale is made from or by such branch warehouses or branch offices on the selling price to the customers.

If the manufacturer, however, actually sells his goods to the branch warehouses or branch offices, the Excise Manufacturing Tax, if any, will be payable by the manufacturer at the time of sale to such branch houses. The Sales Tax chargeable by the manufacturer in such case would be 1 per cent., and the branch house, in turn, when selling, would charge another one per cent. Sales Tax on such sales.

Continued on next page

IMPORTED GOODS.—The Sales Tax of one per cent. or two per cent. payable on all imported goods, not specifically exempted from the Sales Tax, is payable on the duty-paid value—that is, on a value represented by the value of the imported goods for duty purposes plus the Customs duty payable thereon.

On imported goods the Sales Tax is one per cent. where the importer is a wholesaler or where the importer is a manufacturer importing material to be in his factory remanufactured for sale. The Sales Tax is two per cent. where the importer is a retailer or consumer.

* * *

MANUFACTURERS WHO PURCHASE GOODS FOR RE-SALE are considered by the Department of Customs and Inland Revenue for the purposes of the Act, to be wholesalers or jobbers. The department has ruled that where a manufacturer purchases supplies or other articles for re-sale, such goods when sold will be subject to a Sales Tax of one per cent., whether sold to wholesalers, retailers or direct to consumers.

* * *

CONTRACTS ENTERED INTO PRIOR TO MAY 19th, 1920.—On contracts entered into prior to May 19th, 1920, for the delivery of goods or materials, and which contracts had not on that date been completed by delivery, the Department of Customs and Inland Revenue has ruled that the Sales Tax will apply in respect of all shipments or deliveries made on and after that date.

Note.—The following exceptions should be noted to the above ruling. Where the goods were fully paid for before May 19th the Sales Tax does not apply; also where the goods were completely manufactured prior to that date and delivery made to the customer the Sales Tax will not apply even though the goods have not been paid for before May 19th, 1920.

Bill Stamp Tax, 1920

EFFECTIVE JULY 1st, 1920. — (1) The following stamp taxes on negotiable instruments are effective July 1st, 1920.

* * *

CHEQUES 2c. EACH.—(2) Each cheque, irrespective of the amount, is subject to a 2c. tax, the stamp to be affixed by maker of the cheque.

* * *

BANK DRAFTS, MONEY ORDERS, ETC., 2c. EACH.—(3) Each bank draft, bank money order, traveller's cheque and Express Company money order payable on demand or presentation, irrespective of the amount, is subject to a 2c. tax, the stamp to be affixed by the issuing bank or express company.

* * *

SHORT TERM BILLS 2c. EACH. — (4) Bills of exchange lodged with a bank for discount or collection payable (a) on demand; (b) at sight; (c) within three days after date or sight, are only subject to a 2c. tax, irrespective of amount; stamp to be affixed by the drawer.

* * *

LONG TERM B/E & NOTES 2c. FOR EACH $100.—(5) Every bill of exchange and promissory note (other than short term bills) (Sec. 4) discounted by a bank or lodged for collection or as collateral security is subject to a tax of 2c. for every $100 or fraction thereof; the stamps to be affixed by the customer at the time such bills or notes are lodged with the bank.

* * *

DEMAND NOTES. 2c. FOR EACH $100 PAYABLE QUARTERLY.—(6) Each promissory note payable on demand **discounted** by the bank, shall have affixed thereto (by the customer) when delivered to the bank, a 2c. stamp, and on the last day of March, June, September and December in each year (or within five days thereafter) the bank must prepare a statement for each customer showing the maximum amount of advances against demand notes outstanding at any time during the quarter then ended, the amount of stamp tax on such maximum amount being 2c. for every $100 or fraction thereof by which such maximum amount exceeds $100—the original 2c. stamp affixed to the bill when lodged with the bank providing for the first $100. The bank must affix the requisite stamps to the statement before delivery thereof and collect the amount from the customer when the statement is rendered. If **all** advances against demand notes are paid prior to the close of the quarterly periods mentioned, the bank must prepare the statement and render same with stamps affixed **at the time** the demand notes are paid.

Note.—If it is customary for a bank to collect interest on demand loans on dates other than at the quarterly periods mentioned, the quarterly statement may be retained as a voucher and the stamps affixed and collected at interest periods.

* * *

OVERDRAFTS.—(7) An overdraft for three consecutive days or less (i.e., an overdraft created **any time** on, say, the 5th of the month and covered **any time** on the 8th) is **not** taxable. Overdrafts in excess of three days are taxable at the rate of 2c. for every $100 or fraction thereof, computed on the **maximum** amount of the overdraft outstanding at any time during the month. The bank must render the customer a statement at the end of each month (or within five days thereafter) showing the maximum overdraft, and affix thereto the necessary stamps, which shall be paid for by the customer.

If an overdraft (four days and over) is covered during the month and the customer's account **closed** the bank must render the statement to the customer forthwith duly stamped.

* * *

TEMPORARY OVERDRAFTS.—If the overdraft is covered and the account remains in credit the stamp tax on the **maximum** of one or more temporary overdrafts (not exceeding three days each) created and covered during the month may be collected from the customer at or after the end of each month.

* * *

FORMS OF STATEMENT.—The monthly statements may be rendered to the customer in the ordinary current account pass-book or on current account statement forms and the stamps affixed to either. The stamps may be paid for in cash or under written authority from the customer; the cost thereof may be debited each month to customer's current account, the voucher for such debit being exempt from the stamp tax.

* * *

ADVANCES ON LOAN AGREEMENTS. — (8) Advances which are evidenced by a loan agreement or document containing a promise to pay, in respect of which **no** promissory note or bill of exchange is negotiated are subject to the stamp tax at the rate of 2c. on every $100 or fraction thereof, the tax to be computed on the **maximum** amount of the advances outstanding during the quarterly periods ending on the last day of March, June, September and December in each year. Quarterly statements must be rendered customer similar to those in connection with demand notes.

* * *

CHEQUES AND BILLS MADE OUTSIDE OF CANADA, PAYABLE IN CANADA.—(9) Every promissory note, cheque, bank draft or other bill of exchange made or drawn outside of Canada, payable on demand, at sight or three days after sight or date, provided such bill is payable in Canada, must have affixed thereto a 2c. stamp, collectible from the remitting bank, corporation or person.

Continued on next page

Every bill of exchange or note drawn for a term exceeding three days date or sight by a bank, corporation or person outside of Canada upon a bank, corporation or person in Canada, is subject to a stamp tax at the rate of 2c. on every $100 or fraction thereof, such tax to be collectible from the bank, corporation or person entitled to the proceeds of the bill or note.

* * *

BILLS NEGOTIATED OUTSIDE BANK NOT TAXABLE.—Bill stamp taxes only apply to bills and notes passing through a bank; bills and notes passing between individuals or corporations being exempt from the tax.

* * *

STAMPS.—(10) Postage stamps may be used pending issuance of Inland Revenue stamps.

* * *

PENALTIES.—(11) Every individual or corporation neglecting to affix the necessary stamps to cheques, promissory notes and bills of exchange is liable to a penalty not exceeding Fifty Dollars ($50).

Item 2—Playing Cards. A tax on playing cards for every 54 cards or fraction of 54 in each package; when selling at $24 or less per gross package, 15 cents per package; when selling in excess of $24 per gross packages but not in excess of $36 per gross packages, 25 cents per pack; when selling in excess of $36 per gross packages, 50 cents per pack.

DON'T BE A SPACE WASTER

The advertising manager of the W. W. Cooper Co. implores merchants to put a stop to the great wastage of time and money which results from merely "filling" the advertising space instead of writing ads which will bring results. The newspaper space which you buy should be capitalized as an integral factor in your business. It is not an expense but an investment providing it is given a fair chance to bring in returns. Too often advertising is blamed for the purchaser's only neglect in not making the best use of it.

"The Business that

W. W. Cooper Company, Swift Current, Sask., Follows a Definite Advertising Policy which Has Proved Successful in Drawing Business Even in the Lean Years of Poor Crops.

"THE business that advertising built," is a term which might well be applied to that of W. W. Cooper Company, Swift Current, Sask., in view of the multifarious methods which have been adopted by the store officials in their effort to obtain the maximum amount of high class publicity.

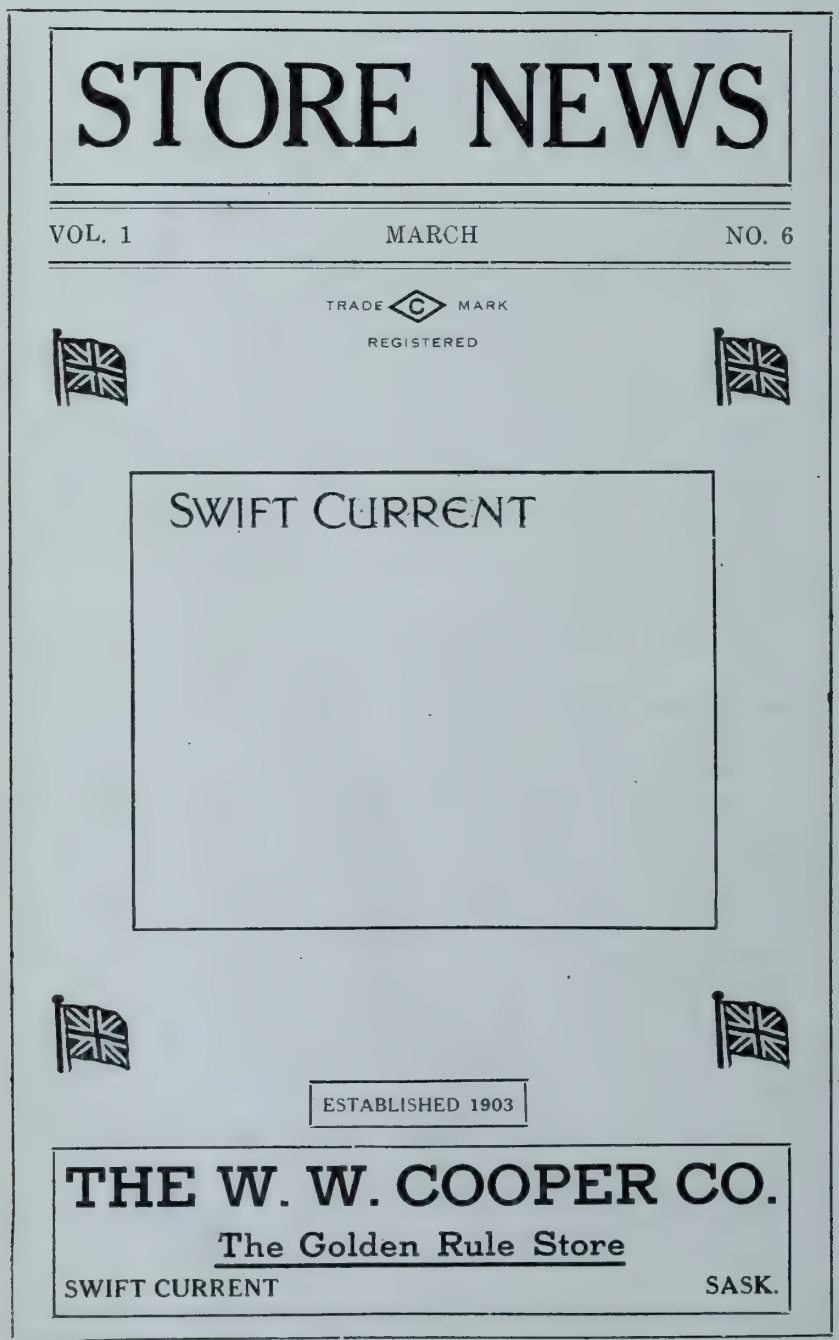
Though crops have been poor in the district for the past three years, the Cooper store has continued operations with steady growth largely through the continuance of judicious advertising. "Advertising is the one item on which we have not tried to economize," stated the advertising manager to the representative of Hardware and Metal on a recent visit to Swift Current.

W. W. Cooper, the proprietor, is one of the pioneers of the Western prairies as far as the hardware business is concerned. He left Lindsay, Ont., thirty years ago and turned his steps toward the West in the search of an opening for business. Conditions in those thirty years have changed a great deal. From his small beginning Mr. Cooper, as a business man, has attained a high degree of popularity in his community. His activities reflect a public spirited individual and there are few local organizations in which he is not interested. Mr. Cooper is honorary president of the local gun club, and is also the first president of the local branch of the Rotary Club. Mr. Cooper has found that making himself an important individual in the local activities has helped a great deal in his business, both directly and indirectly. It is merely another phase of the great question of advertising which can be employed in so many different ways.

Throughout his sojourn on the prairies Mr. Cooper has followed out certain basic principles of business which have been responsible for building his trade to its present high standing in that section.

Judicious Use of Advertising

A realization of the great possibilities involved in the judicious use of advertising matter, coupled with good sound business judgment and a desire to extend the fairest of treatment to employees in order to encourage their loyalty, are among the prime factors involved in the successful conduct of the Cooper business. Bearing out the good relation which exists between himself and his staff it is interesting to note that Mr. Cooper has made it a point to give a banquet for the staff each year since his business was sufficiently large to justify a staff of employees. As a further evidence of his consideration he has provided a rest room with a piano, phonograph and easy chairs on the second floor of the store for the use of customers. It is found that this department is a very important one in connection with the store trade. Customers appreciate such facilities in a downtown store, where every effort is made to create a homelike atmosphere. It is incidentally a good thing for business because in the first place customers are attracted to the store, and secondly after



Advertising Built"

Advertising Manager Makes Best Use of House Organ, Pamphlets and Local Newspaper—Proprietor is Popular Personage in Local Organizations as Well.

a rest and refreshment they are generally in a better humor for shopping.

As already indicated, advertising has been a very important matter in the development of the Cooper store trade, and in view of the importance attached thereto it is interesting to note the plans followed to secure maximum results from publicity. One of the chief mediums used is a booklet known as "Cooper's Store News," a front cover of which is reproduced herewith. This booklet generally covers eight pages and comprises an editorial page, a page headed "Food for Reflection," a page of jokes and the back cover is headed "The Boss Says." Stories concerning the success of prominent business men are reproduced as a guide for employees; news items concerning developments in the community, the province, or the country at large are reproduced providing they have educational value. The final page gives a straight talk to the employees from the Boss concerning their relations, plans for their mutual welfare, etc. These booklets are issued by the Cooper store each month and are mailed free to the farmers of the district. A complete mailing list is kept for the purpose and revised frequently in order to secure the maximum results from such effort. Stencilling and other machines of an up-to-date character are employed in the forwarding of these booklets. The store operates its own printing plant as well in which are printed all the stationery, posters, etc., used in the business. A local printing plant was purchased by Mr. Cooper about one year ago for this purpose.

Pamphlets Also Distributed

In addition to the monthly publication of the Store News, pamphlets and printed periodically for distribution. These deal with some particular subject of interest to customers at the time. A recent pamphlet dealt with the cause of high prices, pointing out that the condition was brought about through a shortage of goods and too much money.

"The cause of high prices is not some mysterious, complex thing, but perfectly simple," states the pamphlet. "In buying and selling there are two elements. First, the number of things there are to sell; second, the amount of money there is to pay for them. If there are plenty of things and little money, things naturally will be cheap. If there are few things and much money, things will be dear. This is a natural law. Neither statutes nor regulations of Government can affect it to any great extent."

So continues the reading matter explaining the situation. It will be noted that the simplest of language and expression is used in the pamphlet in order that what is generally looked upon as a complex matter and quite above the understanding of the average farmer and inhabitant of the towns and rural districts, is reproduced in a clear straightforward manner and rendered so simple as to be easily understood. Customers of the Cooper store appreciate the information extended to them through this medium, and it is an important help to the store trade for customers unconsciously are led to put great faith in the judgment and integrity of a firm which extends to them such information.

Extensive Newspaper Advertising Done

These mediums of advertising are altogether apart from the usual form of

PIONEER OF THE PRAIRIES

A pioneer of the Western Prairies is W. W. Cooper, proprietor of W. W. Cooper & Co., Swift Current, Sask. Thirty years ago he left Lindsay, Ont., for the much heralded land of golden opportunity. Since that time he has steadily developed his business until to-day it is looked upon as one of the well established stores in the Prairie Provinces. Details of the plan he has followed are outlined in this article, emphasis being laid on his appreciation of publicity and the treatment accorded employees.

Mr. Cooper to-day is a prominent personage in the community, being a member of a number of local organizations, thus demonstrating his public spiritedness.

newspaper advertising, which is also followed by the Cooper store with regularity. Harold E. Cooper is the advertising manager, although he is no relation of the head of the firm. It is his duty to attend to the writing of copy for local newspaper advertising, arrange all store sales, and superintend the dressing of the windows.

Judging from the sample full page advertisement as reproduced herewith from the local newspaper of Swift Current, the Cooper Company believe in doing their advertising in an imposing and forceful manner. The page advertisement is well written, carries an abundance of clear cut illustrations and is a good sample for the use of other dealers.

This advertisement was used in connection with a sale of hardware to decrease a heavy stock, and marked a change of management in the hardware department. The store is advertised as "Cooper's — The Golden Rule Store," and as such is known throughout the district. Various lines of household and farm requirements are outlined, each being fully described, priced and illustrated.

"Some Advertising Principles," by the Advertising Manager

H. E. Cooper, the advertising manager believes that there is a great amount of wastefulness in the average advertisement as written by the retail hardware dealer. In view of the importance of advertising as a factor in building up the Cooper business it is interesting to note some of his observations on the subject as follows:

"Never before did advertising play such an important part in successful merchandising as it does to-day. The public are thoroughly educated to buying advertised goods—it must be advertised before they have the confidence in the article that is bought. The war taught us the full value of advertising; many merchants who were skeptical about laying money out for advertising are now thoroughly convinced of its real value. Never before was there so much money spent on advertising merchandise as we have to-day, and never before was there so much good money absolutely wasted on poor advertising, indifferent advertising and thoughtless advertising. A condition that constitutes a crime in business because it is preventable.

"A glance through any newspaper will tell the story of wasteful advertising. They are full of examples. One is sure to find something which is worthless and which had no chance of drawing any business whatever. One can tell at a glance that the lay-out, general construction and wording has never been thought of. There is absolutely no excuse for this. Time spent on advertising wares is positively the best and most profitable time ever spent. The chances of big returns are brighter than anything else you can do—providing time and thought is taken in preparing copy. Some merchants pay good money for the privilege of placing their name before the public and allow it to go over, or under some ridiculous piece of word-muddling that will do the merchant more harm than good.

"The average merchant cannot afford the services of an advertising expert.

Merchant Need Not be an Advertising Expert

The small merchant is practically forced to attempt to write his own ads.. It is not necessary for the small merchant to be an expert on advertising.

"Advertisements that run in the

Price Tags Sell Goods Despite Argument Against Them

The main argument advanced against the use of price tags in the store and the mention of prices in advertisements is that people are more interested in quality than in cost. Theoretically, this sounds plausible. In practice, however, it does not conform to the mind of the folk. It is conceivable that a millionaire whose money is piling up faster than he can spend it may not take much interest in a difference of a dollar or two in the price which he has to pay for a commodity which he desires to possess. But the average run of people—even in these prosperous days—are under the necessity of counting the pennies in every dollar. In the big cities they frequently find the same article selling at different prices in different stores. Naturally, they buy it in the store which offers it at the lowest figure. The quality being the same, the difference in price is quite a factor in the sale.

No doubt, it is true that quality is a prime consideration in the merchandising of commodities. The argument of quality does not lose strength by being frankly connected with statement of prices. On the contrary, the desirability of an article is enhanced, if, in addition to persuasive presentation of its quality, there is given an explicit quotation of a price which has the appearance of being reasonable.

The process of vanity and allied emotions does not operate in the merchandising of hardware. Mechanics, contractors, householders, and others who buy tools, kitchen utensils, vacuum cleaners, or automobile accessories, have in mind, first and foremost, utility and service rather than vanity and display. They are strongly susceptible to the appeal of quality. In fact, they insist upon getting trustworthy material and workmanship in the things which they buy in a hardware store. Also, they want to know the prices in advance of purchase. This is a reasonable state of mind. No one cares to trade in a store where favoritism is shown, and the suspicion of favoritism is strong in the minds of those who trade at a store where none of the goods has a price mark. Naturally, they imagine that different prices are quoted to different customers for the purpose of effecting difficult sales.

All this is obviated by the use of price tags. Price tags help sell goods. Some retailers object to the placing of price tags on the articles in their store for the reason that it reveals their prices to competitors. This is a flimsy objection.

STUDY PROVED METHODS SAYS ADVERTISING MANAGER

Harold E. Cooper, advertising manager—head of one of the most important departments in the W. W. Cooper Company business—believes that there is a great deal of worthless advertising done, and much money wasted in this manner by retail merchants who could greatly improve their advertising by a very little study of proved methods. Mr. Cooper is largely responsible for the success which has been brought to the Cooper business through the medium of advertising, and therefore his remarks on the subject of retail merchants' advertising are of interest.

The ad. writer should know merchandise and be a man of experience and should know type and layout, says Mr. Cooper.

country papers for three, four and even five months without change are quite common. A little time, a little thought and frequent studying of what other advertisers are doing in the larger cities, will clearly show a way to write a fairly good ad. Change the ads as often as you can, get the habit of doing it every issue and you will be an enthusiastic believer in the value of advertising.

Some Large Stores Commit Bigger Crimes

"Some of the biggest crimes in retail advertising to-day are committed by the larger stores. We have stores who spend huge sums of money in order to be up-to-date and progressive in their merchandising policies; big concerns with the latest and best equipment, who sadly fall down in their advertising. They decide to appropriate a large sum on advertising and leave the rest to a man who has neither experience nor the ability to imagine the customer's point of view. This man is given "free rope" to spend this appropriation, and thinks, because he is buying space, here, there and everywhere, that the publicity department is doing its utmost to draw business. A real department store advertising man is a peculiar product, and like diamonds they are rare. An advertising manager for "Blankety-Blank Soap Co.," or "Rainbow Paint Manufacturers," could not be expected to function properly in a department store.

"The store owner or clerk who writes the ads. must know merchandise—for if he doesn't, how can he expect to write intelligently on the subject? He must be a man of experience in store work; a man who has gone through the mill, and knows, from personal observation, what the public want. He must know type and how to use it to advantage. He must know the value of proper lay-out, too little time is given to this end of advertising. These and many more things must be known to the man who would write forceful ads. He should study the subject,—devote a reasonable amount of time and careful attention to his lay-out. Don't be a "space-waster." Capitalize the value of the newspaper. Don't consider advertising an expense, it is the best investment you ever make providing you give it the proper chance to bring in the returns."

ADVERTISING FACTORS USED

Throughout seasons of poor crops and consequent dull business the W. W. Cooper store has "stuck to its guns" as far as advertising is concerned, realizing that publicity has cumulative effect if continued persistently. The result is to-day that the management in looking back over past years attributes to judicious advertising much of the success which has been achieved.

"Store News" is the title of a booklet published monthly in the store's own printing plant, and which is distributed widely throughout the local district. Pamphlets are circulated dealing with business conditions and dominating space is used in the local newspapers. These are the advertising factors most used by the management.

An interior view of the hardware department of the W. W. Cooper Co. store, Swift Current, Sask.

Big Season for Electrical

Big Sale for Many Lines of Electrical Goods Which Are Especially Useful During the Fall and Winter Months—Electrical Goods Highly Popular Owing to Continued Developments

FALL is the time when the sale of many seasonable lines of electrical goods becomes heavy and an early start this fall will help to reap big rewards from this profitable end of the hardware dealer's business.

Electrical goods are highly popular at the present time. It is doubtful if developments of this age in any other field have been as vast and far-reaching as those made in furthering the uses of electricity. The use of power has lightened labor and has added much to the comfort of modern homes. One of the biggest projects of the day is the contemplated deepening of the St. Lawrence river in order to allow ocean-going vessels to reach the inland lakes of Canada. Simultaneously with this development will be the production of a great deal of electric power. It is stated that if the project is carried out sufficient electricity will be produced each year to equal the heat value of 80,000,000 tons of coal. This is surely a remarkable development and indicates the unlimited prospects of this industry in Canada.

Electrical Heating of Homes Contemplated

The approach of fall and winter, with long dark evenings, brings electric devices for lighting purposes to the forefront. Fixtures, flashlights, etc., will be in great demand. Already the partial heating of homes by electricity is being attempted by the use of miniature heaters which have become very popular in this climate. Then, too, there is a greater use for labor saving devices in the winter. Washing and ironing, cleaning of carpets, etc., will be undertaken by the housewife in the fall in connection with the semi-annual housecleaning and electrical devices are provided to lighten the physical labor attendant upon each. There is plenty of scope for showing the customer very pointedly how he or she may apply each device to their own advantage. Attractive window displays combined with good advertising are big helps in showing prospective customers how they might benefit by the use of such appliances as are of proven value in the home. There are many people, whose means will allow them to take advantage of the most modern devices, who are skeptical of such developments because there are so many of them constantly coming on the market. The dealer can do much to put their fears at rest in this regard by showing only lines which are of established value, and by selling only accepted brands, which the manufacturer will guarantee.

Revival of Building Helps Sale of Electrical Goods

Building in Canada is now rapidly assuming normal proportions after some years of stagnation. This offers a fruitful field to the dealer for the sale of electrical fixtures and other appliances for use in the home. This is a good class of business and it has unlimited possibilities for the dealer who goes after it energetically. For the first time in some years hardware dealers are now having the experience of being approached by men who are building good homes and being asked to supply all the fixtures required. This runs into considerable money and is a nice class of business to handle. Many dealers are getting orders of this kind regularly and are finding that it pays to have a good assortment of fixtures on hand and show that you are able to give as good a selection as the larger stores to which the customer will otherwise turn.

Have Good Stock Assortment

Electric ceiling and wall fixtures, table lamps, etc., are lines in which it is necessary to have a good selection. No matter how high class the individual pieces may be, if the selection is small the customer will be inclined to go to the store where there are more to choose from, even though the fixture finally decided upon may not be any better. For this purpose it is wise for the dealer to have a good display room and have it located well in the store.

One Ontario dealer, who is doing a large business in electrical fixtures with home builders, has fitted up right in the front of his store an electrical section. There are many different classes of trade which must be catered to and it raises a question in the minds of some dealers who are taking on electrical goods on a large scale for the first time as to what class of goods should be stocked in order to best meet all demands. In this connection it can be noted that from the experience of the dealer herewith referred to, it is best to carry a line of good quality medium priced fixtures. It should be the aim of every dealer to try to encourage his customers to buy as good quality fixtures as their pockets will allow. He can

WHAT ONE CENT'S WORTH OF POWER DOES IN THE HOME

Figuring the cost of electricity at four cents per kilowatt hour, one cent's worth in the home will:

Operate a six-pound flat-iron for 30 minutes.

Drive an electric vacuum cleaner long enough to clean 900 square feet of carpet.

Run a sewing machine for three hours.

Run a 12-inch fan for three hours.

Keep a heating pad hot for four hours.

Clean a tub-full of clothes.

Operate a 16-candle power lamp for eight hours.

Appliances Approaching

Labor-Saving Devices Much in Demand Now Owing to Shortage of Domestic Help—Experimenting With Use of Electricity for Heating of Homes—Big Future for Canadian Power Development

TIMELY TIPS FOR FALL ELECTRICAL ADVERTISING

DON'T SAY "MY WASH DAY"—After this let it be ————day, and just watch how this sturdy electric clothes washer romps through your washing in an hour or so. Long before noon your clothes will be out drying. Put away your previous ideas of old washing machines that merely wet the clothes and often tore them to pieces.

Seeing is believing and we invite you to call on us and we will be delighted to give you a complete demonstration. To do so will place you under no obligation.

also point out that it is poor economy for them to buy cheap fixtures, which will become useless prematurely. A little judicious sales talk will put many of those who come to buy cheap fixtures into the class who will buy medium priced appliances. Then if perchance a millionaire comes to the store to buy electric goods and wants something better than the line carried possibly he can be sold goods from catalog, which are not carried in stock. The chances are all in favor of the medium priced stock being the best selling quality and once the stock has been reduced to this basis it can be handled much more efficiently.

Show Fixtures in Actual Use

It is well to show electrical fixtures as they will appear when in actual use. For this purpose it will be necessary to have them attached to the ceiling or wall and connected with wires and a switch. A home-like atmosphere can be created by the construction of a temporary wall around the department and the addition of a few other articlés, such as a table, some rugs and a few easy chairs.

There are instances where dealers who have followed out the salient points as outlined are doing a remarkable business for the communities which they serve. Some are even getting a larger share of local business than Hydro and other stores, representative of corporations which supply power, and of electrical dealers exclusively. One of the most surprising results of the keen competition put up by organized corporations to secure a corner on electrical fixture trade is that their efforts have brought about a larger appreciation and usage of electrical fixtures and everyone has benefited as a result.

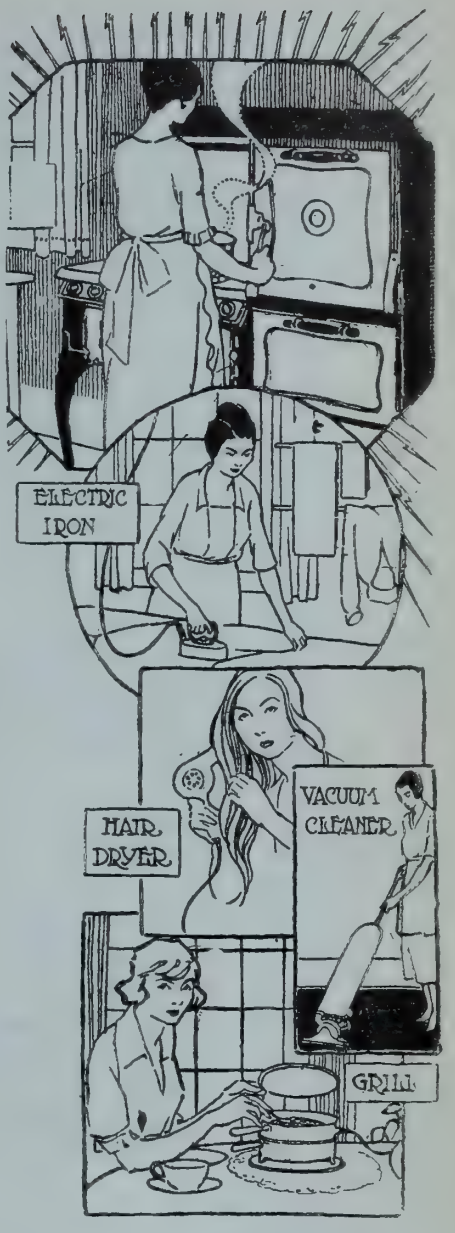
Overcomes Keen Competition

One hardware dealer who has put up a winning fight against such competition attributes his success entirely to his aggressive methods. He was not afraid even with a Hydro shop in town, to go right out after the business. He put in a stock that is equal to, if not superior to, the Hydro store and then he advertised freely and backed up his advertising with window displays. The result is that he is more than holding his own. His electrical goods showroom is known not only in his home town, but for miles around, and hundreds of people from towns and villages around come to him for their fixtures. Give the people something to talk about and you get a great volume of free advertising. This is one of the principles which brought success to this particular dealer.

Not only have recent figures shown a remarkable improvement in the amount of building being done, but prospects are that accommodation is required to such an extent that an extensive building campaign will be undertaken next Spring despite the high costs of material. This activity spells opportunity to the hardware dealer. Thousands of the new dwellings to be erected will be lighted by electricity and the hardware merchant has as good a chance as any to supply the equipment. It is essential to buy the class of fixtures that are suitable for the locality.

Installation Men Help Sale

Having a man to do installation work is a service which very often pays in connection with the electrical department. This largely depends upon the



WHAT ONE CENT'S WORTH OF POWER DOES ON THE FARM

Figuring the cost of electricity at four cents per kilowatt hour, one cent's worth on the farm will:

Lift 200 gallons of water 100 feet.

Run a buffer and grinder for two hours.

Shell 12 bushels of corn.

Cut 350 pounds of fodder.

Cut 500 pounds of ensilage.

Thresh two bushels of barley.

Separate 100 gallons of milk.

Churn 60 pounds of butter.

Groom three horses.

Stuff 350 pounds of sausage.

class of work to be undertaken. If there is likely to be a great deal of building done in the district a man to do wiring and fixture installing might be very useful and bring much business to the store. On the other hand if it is an old district where fixtures are only bought when they are to replace ones which are to be discarded, and where appliances other than fixtures form the bulk of sales, it might not pay to have a man engaged on such work exclusively.

Fall Housecleaning and September Brides' Business

Fall housecleaning and September bride gifts are two fall events which provide an opportunity for special sales of electrical goods. For housecleaning vacuum cleaners are one of the most important lines and the dealer who does not have the modern substitute for work and worry, and eliminating dust and dirt, loses one of the greatest recurring opportunities of the year. Vacuum cleaners sell all the year round, but their place in the household is pre-eminent in the fall and spring. The dealer may say that the housewife wants a vacuum cleaner all the year, but she feels its necessity above cost or anything else in the dirt and confusion of spring and fall.

Sanitation also is an important point in the sale of vacuum cleaners. The world has learned the lesson of sanitation and cleanliness and the damage that lurks in flying dust and accumulated household rubbish. It is also learning, through the drastic teaching of servantless housework, to take the

TIMELY TIPS FOR FALL ELECTRICAL ADVERTISING

DO YOU REALLY VALUE MONEY, TIME, COMFORT? If you're washing in the modern electric way, you do. Otherwise you're wasting money, time, labor. Because it is costing you more to be without the many advantages of the electric washer than to make use of its services.

For the dealer who sells electric washers on time payments the following paragraph can be added.

A small initial payment puts a washer in your home and you commence at once to save money, time, labor and fuel. You pay for the washer while enjoying those advantages and savings. So why not a demonstration of these facts any time —TO-DAY for instance?

Some samples of effective advertising of electrical appliances. It will be noted in the ad. by the Manville Hardware Co., Prince Albert, Sask., that the appeal is based on the labor-saving importance of electrical appliances. It then emphasizes irons, grills, ranges, fans, toasters, percolators, etc. The ad. by W. H. Thorne & Co., Ltd., St. John, N.B., makes a Fall appeal for the use of table lamps to lend a "homey" atmosphere to the living room in the chilly weather. The other advertisement, by McAvity's, St. John, deals with the giving of electrical gifts to the September bride—an important factor in Fall sales of this line of goods.

Herewith is an attractive display of electrical fixtures arranged in a separate room from the main store. As pointed out in the article this plan, if feasible, offers the greatest opportunity for bringing results because it shows customers how the fixtures will look in their own home. Even if fixtures are connected with electricity, they do not look the same in a bare store as they do in a section set apart and provided with a few "homey" effects, such as rugs, chairs, table, etc.

ounce of prevention instead of the pound of drudgery. One of the best selling points of the vacuum cleaner is the fact that it not only makes the place clean, it keeps it clean, and when the dust has been removed instead of being swept into the air to settle again, it is a plain unmistakable fact that it does not need sweeping again nearly so often.

Talk Sanitation in Vacuum Cleaner Selling

Germs lie patiently biding their time in the corners, in the tufts of furniture, the folds of draperies, and many other hiding places, where only the all-searching, ruthless breath of the vacuum cleaner can reach and suck them out. A room cleaned by the vacuum process not only looks clean, it is clean.

There is nothing so convincing as the real thing, and the window display of vacuum cleaners with either a demonstration or plain practical cards stating results will talk in words that everyone in the passing crowd can understand.

The same direct plan should be followed in window displays of other electrical appliances. In the cold weather a well arranged window showing a table set for dinner, with electric broilers, grills, toasters, percolators, etc., shown in actual use will attract much attention. Then the message on the window cards can carry itself home to the minds of the onlookers. Give them an invitation to visit the electrical department. Use the advertisements in a forceful manner and then link up the appeal with the window displays and the results will be very satisfying.

Steel Shipments Now Said to Exceed Production

"With the effect of traffic restrictions varying widely in various sections of the country it still is impossible to generalize the situation," says The Iron Trade Review. "Steel of all kinds is being piled in the Pittsburgh district, but in Youngstown and Chicago, recent shipments have cut down the tonnage of accumulated material. Several large pig iron producers report that since Aug. 1 shipments have exceeded production. Ore is moving from lower lake ports to interior furnaces more freely than heretofore."

CANADIAN ELECTRICAL GOODS WANTED BY OTHER COUNTRIES

The great increase in the price of coal throughout the world has made fuel economy a most pressing problem. Reports indicate a tremendous opportunity for the Canadian manufacturing industry in supplying the needs of these countries which are now forced to develop their electrical power to the utmost.

Extensive electrification projects are soon to be carried out in Italy and South America. Portugal will probably follow in Italy's foot-steps. Many of the South American countries are studying this problem, and Bolivia has just declared as public domain the water-sheds of the rivers having sufficient power for the purpose. Throughout Chile many power plants are being built.

WHAT IS A FAIR PROFIT?

(Continued from page 218.)

tific business is to make capital small in proportion to sales, and then make that capital move rapidly. The capital may have to be large—for the best business is done with the best facilities, and these cost money—but, consistent with the sales, the capital should be as small as possible.

The profit upon capital as evidenced, say, by dividends is a matter of circumstances. In a growing business with large profits it may be unwise to declare any dividend at all, and wise to put all of the earnings back into future equipment; or it may be good policy to establish reserves against a fall in prices or hard times, and thus by bookkeeping take away any profit on capital. Profit on capital is never to be reckoned as the whole sum left after subtracting outgo from income. This would jeopardize capital for the sake of profit—which is hardly business. Profit is money that can be safely taken out of the busines—it is not a surplus to be gained only by liquidation.

The moment we attempt to limit the amount which may be earned by the capital invested in business we put a premium upon waste and inefficiency and tend to lessen the production of goods.

There are, to be sure, usury laws which say that a man may not lend money for more than a certain per cent. —in the Eastern States usually 6 per cent., and in some of the Western and Southern States as high as 12 per cent. These laws have obtained for many years, but if you will examine economic conditions you will discover that these laws are only declaratory of the common practice in lending long-time money. That is why they are higher in some States than in others. They were passed in the high-limit States at times when money could not have been obtained at a lower figure.

Kansas might well have passed a law declaring that the rate for money loaned on mortgages should not exceed 3 per cent., but then Kansas would not have been able to borrow money to develop her farms. The people with money could have loaned it elsewhere at 3 per cent. with safer collateral. And in spite of all the laws, the man who needs money pays the price that the lender asks up to the point where he knows that he will lose by borrowing—that he will not be able to make money on the money borrowed. Money used in security transactions on the New York Stock Exchange is in a somewhat different position.

The result is the same, whether we try to fix a price or a profit. Taking the fixing of prices, if the constituted authorities fix a price based upon the average cost of production, the consumer will have to pay too much and a premium will be put upon inefficient manufacturing and selling. If the price is fixed on the basis of the most efficient production, those who are least efficient will be forced to go out of business, the market will become short of that particular commodity, and it will not be obtainable at the Government price. That is what always happens when prices are fixed too low.

Suppose a fair and equitable price could be fixed. That price could be maintained on a fair basis only by fixing the price of every factor which entered into the fixed price, and these in their ramifications would include the price of nearly every article used by humanity. That is not all. A necessary corollary to price fixing is the fixing of demand. The next step is rationing, and the next communism. For when you say that an article must be sold at a certain price and ordain that each individual can buy only a certain amount of that article, and by necessity extend that process to all articles, you have communism in fact if not in name, for the State and not the individual will then be controlling consumption, distribution and expenditure.

Profit Fixing and Where It Leads

But if we cannot fix a price, can we not fix a profit?

It is very easy to talk about fixing profits, and, at first glance, it seems quite logical to regulate profits in manufacturing on a basis whereby the money invested in an enterprise can be considered and the profit held down to an agreed percentage. This is the method favored by law-makers chiefly because it is the mode of first impression and requires no knowledge of business for its application.

But fixing profits is infinitely more viciously destructive of economic life than fixing prices. Price fixing leads through the socialistic state into the communistic state. Profit fixing leads to chaos.

It would seem that the experiences during the war should provide a lesson for those who unthinkingly talk of fixing profits. You can fix profits only by a broad extension of the cost-plus system, or by an excess profits tax, or, if you want to make absolutely certain of confusion, you can combine both methods as they were combined during the war. Or there may be some who would also advocate profit regulation on the basis of invested capital.

Take the three methods. The cost-plus system does not lower prices to the community, which is presumably the end sought. On the contrary, it raises these prices because the less efficient the manufacturer the more money he will make. The excess profits tax, by which it was ingenuously thought that a man who made too high a profit would be required to turn the excess back into the coffers of the State, also helps prices to soar, because the man who finds himself making so large a profit as to incur a heavy tax will wastefully increase his cost of doing business. It is not human nature cheerfully to turn over a large part of what one earns to someone else, and extravagance tends always to limit production.

The third method—that by which profits are limited according to capital invested—is again a deterrent to production, penalizing as it does the most vigorous use of capital by encouraging waste of capital. The regulation of prices or profits does not result in lower prices. On the contrary, it restricts production and raises prices.

You cannot animate by law; you can only restrain. And every restraint lessens and limits production.

The only possible method by which lower prices can be achieved is a method which stimulates production—that which gives more to distribute. The more you have to distribute, the lower will be the price. If some form of tax could be devised which would be practically confiscatory to the man who is inefficient in business, then we should stimulate production and thus lower prices. But that is a thought which has not as yet been developed.

Most of those who talk at length on the subject of profits are not and never have been in business. They are, as a rule, wholly unacquainted with natural laws as opposed to man-made laws. They do not understand what capital is or how and why it functions. The result is that this whole matter of prices is approached as if it were almost a phase of criminality—as if the making of profits were a habit that must be stamped out, or at least given institutional treatment.

We do not as yet, however, hail as wholly virtuous the man who does not know how to make a profit. No distinguished service medals have, to my knowledge, been struck off and awarded exclusively to bankrupts. The fact is, if a man is incapable of making a profit, he cannot remain in business. If the State forbids him to make and prevents him from making profits, it will drive him into bankruptcy.

People have gone astray on the whole matter of profits and prices because they forget the yesterday when the producer was beseeching the consumer to buy. Checking their memories, they have come to think that prices, and consequently profits, are exclusively fixed by the seller—that the buyer is in the way of being a patient under ether, with the seller as a surgeon who will operate as fancy leads.

What Determines Demand?

The seller does not fix the price. The buyer is ordinarily and especially today the ultimate price fixer. Day-to-day demand as compared with the supply is the arbiter. But the demand is not an urge that is clamorously insistent and ceaseless until satisfied. The demand is rarely one of necessity; more likely it is one of habit which we translate into necessity. And habits are as liable to change as the profits they make possible are bound to fluctuate.

If silk stockings could be bought at five cents a pair, they would be worn or not, according to the comfort and convenience of the wearer. The element of style would not enter into their pur-

(Continued on page 240.)

Winter Auto Accessories More Popular

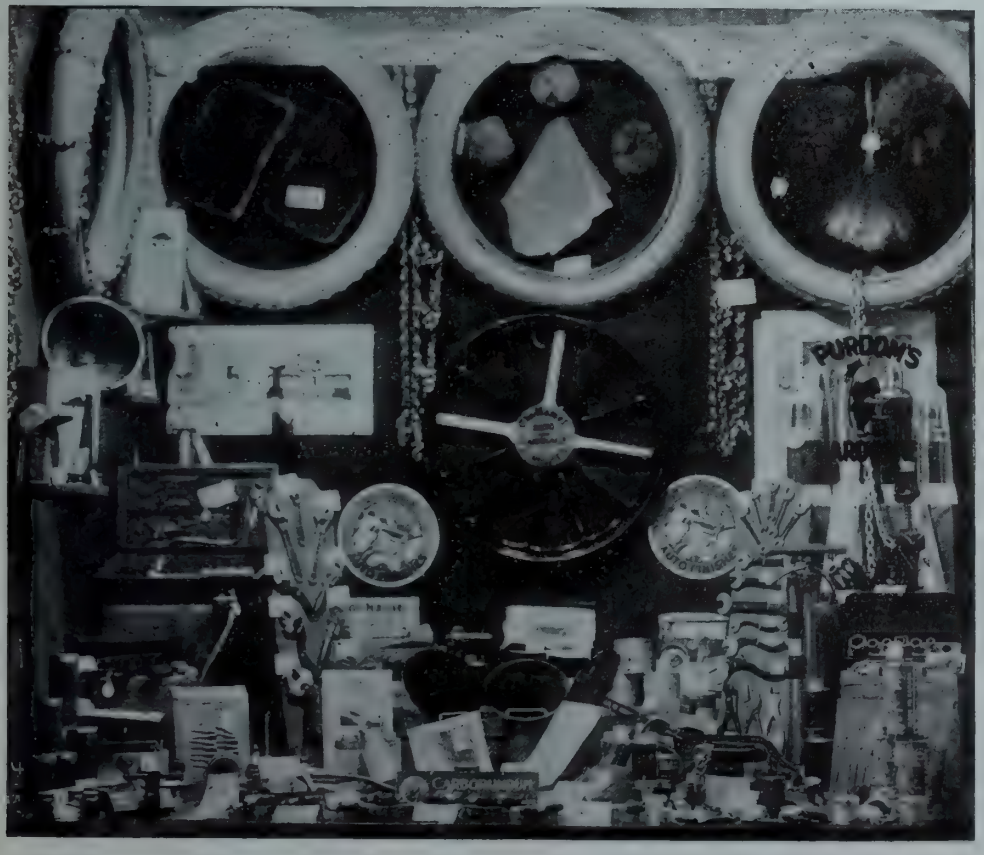
Winter Driving on the Increase Through Wider Usefulness of Motor Car—Accessory Department Should be Kept at Store Front During Cold Weather—Use the Ads. and Windows to Stimulate Interest—Fall Season Good for Touring—Many Profitable Devices to Increase Comfort and Minimize Winter Engine Troubles

GREAT developments have been made during the past few years in the direction of improving motor cars so that winter driving may be indulged in with no great discomfort. To this end, many automobile manufacturers have increased their production of closed-in cars for all weather use, and in many other cases permanent tops are being built on automobiles and storm-proof curtains provided as part of the equipment. In addition to this, many new accessories coming on the market to-day have for their object the comfort of winter motorists. These devices are of large number and many of them have good merit for their purpose. They range all the way from electrically heated warmers on the steering wheels to keep the hands warm and the fingers nimble while driving in the cold weather, to foot warmers connected with the exhaust of the engine and including some new devices for warming the water circulation of the engine by means of electricity while the car is standing, either in the garage or on the street.

So popular is winter driving in many parts of Canada that steps are being taken by civic bodies to lend their aid to decreasing the handicaps which have formerly existed. One Ontario city has provided outlets on street lamps from which power may be secured through

maintains heat in the engine while standing, thus eliminating danger of freezing during the cold weather. A special license is secured to take advantage of the outlet and a special key is necessary in order to take advantage of it.

These and other developments which the attaching of a plug to a device which



A suggestion for a fall window display of automobile accessories. This trim features tires and chains for wet roads, tire repair outfits which are in great demand just now while tire costs are so high, enamels and other body finishes to protect the car against fall rains and winter snows. Tools for the amateur mechanic who believes in giving his own car a thorough overhauling during the cold weather are also shown. This display makes good use of limited space by showing a good range of accessories which are seasonable and by concentrating on such lines.

have been taking place recently in the motoring world indicate that winter motoring is in future to be the rule rather than the exception, as it has been during the past. This means that what has formerly been a fruitful field of business for the hardware dealer, is to be extended to an all-season business. Of course, it may be some time before there will be as much motoring done in the winter as in the summer, perhaps there will never be quite as much, but the fact remains that the tendency is distinctly toward more winter driving, not so much for pleasure perhaps as for business. It must be kept in mind that the motor car has greatly enlarged its function within the past few years, and due in some part to its great value in the war is now looked upon not so much as a medium of pleasure but as a necessity in business. As such it will come in for greater use during the cold weather.

Don't Move Accessory Department to the Rear When Cold Weather Comes

It therefore behooves the hardware merchant who has developed a good trade in accessories throughout his local community to do all possible to retain interest in motoring during the cold weather. The accessory department should not be moved to the rear of the store for the winter months and the windows should still be used to show that the hardware merchant for one does not believe in laying up for the winter months of the year. The use of local advertisements and windows will help to keep interest alive in your community.

There are many points about a car which should be given special attention for winter driving. Apart from the sale of articles such as robes, warmers, driving gauntlets, non-freezing radiator mixtures, etc., there are many devices having for their object the elimination of winter driving troubles which can be recommended by the dealer who is acquainted with the requirements.

With good management, the early winter months should be banner ones for the hardware dealers' accessories department. School has commenced or will shortly; consequently those families who spend the summer in the country have returned home and with them came the family automobile, which after a summer of hard service will usually need a lot of new accessories to replace those worn out so the machine will be in good shape for autumn trips. This is prospective business no merchant can afford to neglect; he should be on the lookout for his returning customers and inquire after the welfare of the returned family and incidentally "how those accessories held up I sold you before you took your car away for the summer?" This will lead to an inquiry as to whether any more are needed and whether any of those sold at the beginning of the season have proved unsatisfactory. If the latter be the case, then there is an opportunity of removing the cause of the dissatisfaction.

Fall Season Ideal for Touring

Vacationists who left their cars at home will take to automobiling with added zest, and these are prospective customers. The fall season is ideal for touring: it is neither too hot nor yet too cold and those stay-at-homes who found it too warm and dusty for motoring during the heat of the summer will be out on every possible occasion. Toward the end of the month the leaves will begin to turn dressing the hillsides and all outdoors in beautiful autumn colors. It is a most beautiful season and the call to be out and enjoy it irresis-

STANDARD SIZES OF TIRES SOUGHT

The tire industry is working toward a final standardization of tire sizes, under a plan of action outlined by the Rubber Association of America.

Before the war the idea of discontinuing the manufacture of tires of odd sizes met with approval from tire manufacturers and when the United States Government, in the midst of the war, announced that to conserve rubber, the gradual elimination of unusual sizes would begin, there was commendation both from the manufacturers and dealers.

At the conclusion of the war the manufacturers, rim makers and car builders continued to co-operate with a view to reducing the number of sizes from more than 250 to the smallest possible number compatible with giving adequate service. Under their plans all owners of cars, using tires of unusual sizes, will be able to get tires for their cars as long as the cars last, but no new cars will be made calling for any except the standard sizes.

The tire sizes selected for perpetuation are as follows: Pneumatic Automobile Tires—30x3½ Clincher; 32x3½ Straight Side; 31x4 CL; 32x4 SS; 33x4 SS; 32x4½ 55; 33x4½ SS; 34x4½ SS; 35x5 SS.

The unstinted use of illustrations combined with good layout is responsible for the attractiveness of this automobile accessory ad. by Bruce, McKay & Co., Ltd., Summerside, P.E.I., and is a splendid illustration of the up-to-date methods adopted by the Maritime hardware merchants for getting a share of the accessory business during the fall and winter months. This ad. was run in three-column space, nearly one page in length, and the use of such space at this season of the year is largely responsible for bringing in the splendid accessory business conducted by this firm.

Here is another window offering some suggestions for fall window trims of automobile accessories. Tires of the non-skid type and chains are shown as recognized equipment for fall and winter driving. Gaskets for insulating engine joints to increase power and a complete line of tools which appeal to the amateur mechanic who overhauls his car each winter are shown in the display as well as lamps, steering wheels, extra radius rods to strengthen the car for driving over rough roads, such as are experienced at this season of the year; spark plugs, etc. Each article is plainly marked with price tickets.

tible. These country auto trips are usually joyous affairs: friends are often taken along and opens up the possibility of sales to non-owners of such personal accessories as goggles and similar articles.

Great Year for Tires

Economy, superinduced by present conditions, has undoubtedly made this the greatest tire accessory selling year in the history of the auto industry. The records of one of the largest manufacturers show a tremendous gain in sales in its tire accessories department over last year for the corresponding period. The experts in charge of the service department of a certain large tire manufacturing concern who have watched tire performance records for years state that the additional mileage obtained from tires this season over last is indeed gratifying. They say this surprising increase—obtained in one season—is due to a combination of more care in driving and to keeping tires in a constant state of repair by the frequent use of accessories. It is claimed if this practice becomes universal, motorists will save $25,000,000 annually on the first cost of tires alone. At present it is not so much a matter of saving money as it is of conserving skilled labor and materials.

Tire Accessories Have Big Sale

A perusal of the advertisements in almost any popular magazine will quickly prove that most manufacturers are awake to the opportunities in selling accessories to conserve tires—they occupy almost as prominent a position as tires, and this helps educate and intelligently direct the motorists' demands. These educational campaigns conducted by manufacturers and jobbers, together with the growing shortage of skilled tire repairmen, has induced an immense consumption of blow-out patches, tire sleeves, tube patches, and putties or plastics for repairing casing cuts and similar injuries. And this demand seems likely to show no diminution for the present season at least. Tire plastic or putty is one of the most popular and easily applied conservers of auto tires on the market. If tires are inspected frequently and all small cuts in the tread filled as soon as they appear, hundreds, sometimes thousands, of miles can be added to the life of casings. Another popular and probably the biggest selling accessory is the inside blow-out patch which makes it possible to make a quick roadside repair of an ordinary blow-out in case the driver has no spare tire along. Sometimes it is only a small break in the inside fabric that pinches and punctures the inner tube; then a blow-out patch comes in handy.

The retailer who watches every opportunity for busines can take advantage of this circumstance.

Size Up Customers' Motor Cars

When a customer of a retail hardware store drives up in his automobile a field for more business is immediately offered the merchant.

It is a chance to size up the machine for lacking accessories and a chance that should not be overlooked.

Tire Insurance

Has the owner a spare tire on his car? A spare tire is a necessity if a driver wants to have some sort of insurance that he will get back to his garage in case of a possible blowout or other tire accident.

Are the wheels running true? Are the front wheels properly trued and angled? It is an easy thing to show the owner of the car how he can save tire money by having his axles trued up. It may save tires for the driver, but it makes a friend for the hardware man and cinches that particular man's accessory business.

How are the head and tail lights? Does the car need a new tail or new reflectors, or new lens? Is there a proper kind of a horn attached? Is the windshield all shot to pieces? How about a little polish to make the car look better than it does after a season's rough washing?

Train the Eyes

It is a shrewd merchant that trains himself to take in all the features of every automobile that drives up or passes. It is a sort of a game. Pass a show window and glance in. Go to one side and see how many articles you can name in that window. Go back and

Two other good samples of Fall and Winter advertising of auto accessories are shown herewith. The one by W. H. Thorne & Co., Ltd., St. John, N.B., emphasizes the point that the most efficiency during the winter season can only be had from a car provided with proper equipment. A number of lines mostly in demand for winter motoring are then listed. The ad. by Consumers' Hardware & Supply Company, Lethbridge, Alta., shows how Western dealers are keeping interest alive for Fall and Winter accessory trade.

---

see how many you overlooked. Try it on another window. After this process is repeated often the owner of that pair of eyes will begin to notice that his attention is developing, that he is becoming more alert, and that training can be tuned to a commercial use. The retail merchant in hardware will discover that he can find a lot of things missing that it would profit the owner of a car to buy and put on his machine.

Just now is the time to sell warming accessories, radiator non-freeze compounds or prescriptions. Robes, robe rails, blankets, radiator covers, gloves, tops, new mica windows, anti-rattlers, shock absorbers. All these are timely. As the roads get rougher shock absorbers properly applied are a blessing to the people who have to ride in automobiles. It is a godsend to them to have every attachment that will keep them warm while driving. Foot warmers are in demand. Warm driving gloves or mittens are a necessity. All season car attachments are saleable, tops that will make a car an all-season driver, so that whatever the weather or the temperature the adjustable top can be regulated to suit the occasion.

Substitute Money Maker

If various lines of hardware are falling down in sale, say builders' lines in this period of restricted construction, money can be made up in sale of the profitable accessory lines for motor cars, motorcycles, trucks and tractors.

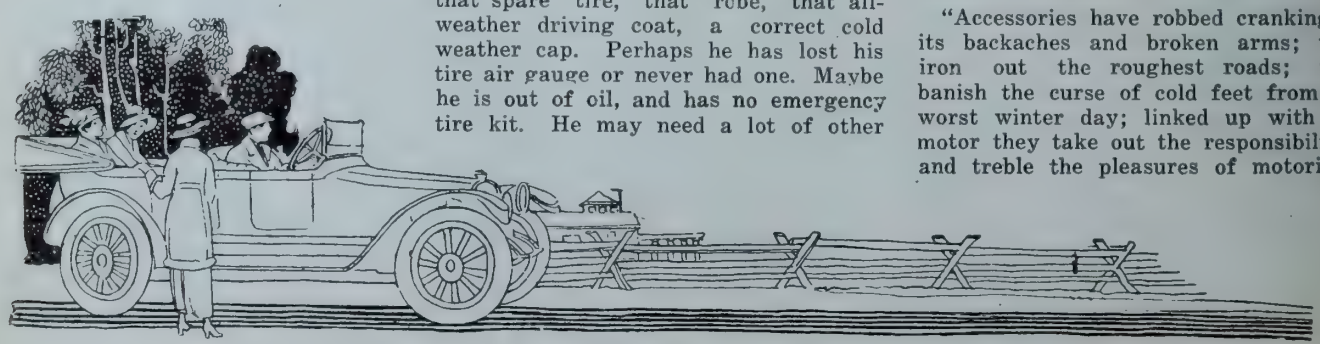
The next man that drives up for gas may be a profitable supplies customer if he is approached right. See if he has that spare tire, that robe, that all-weather driving coat, a correct cold weather cap. Perhaps he has lost his tire air gauge or never had one. Maybe he is out of oil, and has no emergency tire kit. He may need a lot of other things that he has been intending for a long time to purchase but has been short of time, or has forgotten it at the right moment. If he is in need of these goods, and has the money to buy them, he is going to buy them from the man that takes the trouble to sell them, undoubtedly.

Automobile accessories are now in the million dollar class of the nation's businesses. Build up an accessories window and sell the goods. A supplies window in a timely all-winter display mode.

What Accessories Do

"The basic principles of the automobile have hardly changed—it is the little extras that have made of the car an intelligent companion that insinuates itself into your affections like a pet bulldog," writes W. W. Sellew in The Nation's Business.

"Accessories have robbed cranking of its backaches and broken arms; they iron out the roughest roads; they banish the curse of cold feet from the worst winter day; linked up with the motor they take out the responsibilities and treble the pleasures of motoring."



The Brush Department

The Qualities of a Lather Brush

Written for Hardware and Metal by S. D. Purdy

THE dictionary may define a lather brush as an implement used to generate a lather to soften and lubricate the beard before shaving, yet while technically correct, this definition does not apply even remotely to the question, "What is a Lather Brush?" A lather brush, as offered to the public to-day, may be an implement of torture, a dish mop, a breeder of germs, an irritant, a means to suicide or in fact anything except a generator of lather.

The average man is very exact in his requirements of a razor. It must conform exactly to his idea of balance, angle, cutting edge, etc., and he is firmly convinced that he uses the only shaving soap suited to a gentleman of discriminating tastes, but his brush—well, we have heard it stated in the brush trade that a prominent New York skyscraper was built with profits on lather brush sales made to this same discriminating class at a few cents each.

Careless Selection

The average buyer, handed a tray of lather brushes to select from, will pick out a big, husky, soft, mouth-topped brush with no enquiry from the sales clerk as to its lather-generating qualities. This predisposition on the part of the lather-brush-buying public has resulted in the market being flooded with brushes made of soft goat hair of varying grades and kinds, but all of them absolutely worthless as a lather developer, and a positive danger to the user as they are a common source of anthrax infection, a loathsome and almost invariably fatal disease that of late has become noticeably common.

Another material extensively used and almost as worthless and dangerous as goat hair is Chinese and Japanese horse hair, a soft, kinky hair of different colors that tangles up into an inseparable mass about the fourth time it is used, and thereafter is more effective as a massaging instrument than as a generator of lather.

Both goat hair and horse hair are frequently dyed with a dark streak near the top in imitation of real badger hair and to the inexpert it appears the same. French bristles are sometimes blended with these two hairs to increase the elasticity and thereby more nearly imitate real badger.

An advertisement in the local newspaper confined to the subject of Brushes, can be made interesting and will bring results if linked up with some special effort. This brush ad by Ingram & Davey, Ltd., St. Thomas, Ont., takes advantage of the general ignorance of the wide range of brushes which are available for labor saving in the home. A special week of brush sales was conducted and the ads were used in conjunction with window displays. Details of what each brush is used for, prices, etc., are shown.

The only materials yet discovered by the brushmaker inherently suited to the making of lather brushes are pigs' bristles and real badger hair, and under even these headings is grouped a multitude of sins.

Pigs' bristles vary from the soft, kinky, woolly kind, produced by some of the American domesic pigs, up to the winter coat of the wild and semi-wild Siberian boar which reaches a length

Next Year Expected to Break Previous

Montreal Manufacturer Has Made Close Examination of Paint Trade Possibilities for the Next Year and Says Outlook is Very Encouraging—Deals With Business Conditions Existing Throughout the Western Provinces

ALTHOUGH the demands of the trade in Canada for prepared paints, varnishes and other kindred products have been the greatest in the history of the industry, 1921 promises to be equally as good a year, in the opinion of W. S. Fallis, Managing Director of the Sherwin-Williams Company of Canada, Limited. Mr. Fallis returned from an extended trip throughout the Western Section of Canada, and made a close examination of conditions pertaining to the trade, as well as a general estimate of the probable demands of the country for the products above mentioned.

"Conditions there are very encouraging," said Mr. Fallis to Hardware and Metal. "I believe that the 1921 crop, in actual value, will be one of the best, if not the best, yet harvested. At the high prices ruling the value of the crop will be very great.

"Manitoba is promising well, generally. Saskatchewan is good, and Alberta, south of Calgary, is fair. From Edmonton to near Saskatoon the yield will be a large one. The rains in the Calgary district around the 10th of July were the heaviest they had in 20 years. After that there was a spell of very hot weather, followed by more rain. The outlook over the whole country is most encouraging."

Crying Need for Paint

Although hundreds of tons more of paint have been disposed of this year in excess of the outturn of other years, Mr. Fallis states that the demands will continue. "There is much need of paint throughout the country and in one town I visited I noticed a solid oak door, one which would now cost around $40, almost ruined because of the neglect to use a couple of dollars' worth of material and labor. This is but typical of many instances elsewhere," Mr. Fallis stated.

Asked as to whether the average prospect had begun to realize the great value that paints and other finishes possessed as a protective and preservative agent, Mr. Fallis stated that he believed they had. This, if widespread enough, will naturally mean that the demand will steadily and surely increase, and it is the best advice, Mr. Fallis thinks, to plan for a continued big sale for paint, and work to that plan. There are Western places in particular where much paint is needed, and in one big Western city the need of paint is particularly striking. "It impresses one as he steps into this city; it needs paint very much indeed," was Mr. Fallis' comment. This need will exist for a long time, unquestionably, and property everywhere will have to be kept in good repair.

Costs Remain High

Asked as to the conditions relative to price, Mr. Fallis stated that most raw materials were costing as much as they have been for a long time; many of them are costing more. Wage demands have been steadily maintained and the range of wages has not been reduced but advanced, rather. Wages will remain high in all probability. With perhaps a single exception, there has been no reduction in the cost of the average raw material. Linseed oil prices have been lower in recent weeks. This has been induced through the arrival of seed from the Argentine. This seed was purchased long ago and while in transit to the Canadian market various strike difficulties so seriously impeded delivery

Records in Volume of Paint Sales Made

Crying Need of Paint in Prairie Towns Which Will Now Prosper Through Marketing of Bumper Crop—Higher Freight Rates, Labor and Costs of Most Materials Will Keep Prices Up—Linseed the Only Raw Material to Show Decline in Price

RENDER REAL SERVICE

Selling a patron his first bill of paint may not be such a difficult task for some dealers as selling the same patron the second bill. The buying public has been educated to service. They have learned that they are paying for service and naturally expect to get what they pay for. When a customer enters a paint store and asks for a certain brand of paint for a stated purpose, it remains for the dealer to see that he gets the paint best suited to the purpose for which it is bought.

Paint men who know their business, as a rule have sufficient interest in their patrons to see that this is done, but here and there are men who give little attention to the business, and who hand the customer the first can of paint they see.

If the job is a failure, the customer blames both the paint and the dealer.

The paint man who does not have sufficient interest in the welfare of his patrons to see that they get the kind of paint they should have, is a detriment to his own business.

through New York that, for many weeks, no seed could be obtained. Difficulties grew and transportation became acute. Eventually this seed was released and the market became somewhat flush of flax seed supplies. Meanwhile manufacturers had to fall back on English oil, for oil had to be obtained to complete the manufacture of products that were urgently needed. The arrival of the Argentine supplies in recent weeks induced speculative elements, in particular, to unload. Had this not been the case oil prices would not, very probably, have declined nearly so much as they have.

Two Important Factors

There are two factors of outstanding importance at the present time, that of the likelihood of increased freight rates, and the other that of the effect, on prices, or the probable effect, of wheat decontrol.

"The freight situation, as pertaining to increased rates," said Mr. Fallis, "is bound to have an effect on the cost of manufactured products, and this is a big item. Then the lifting of the control over wheat prices will perhaps mean that prices may be higher." If enough capital can be secured to control the purchase of the wheat crop it is evident that this will affect the price.

Doubtless the higher prices for wheat, if they become manifest, will be beneficial in some respects. The farmer will receive an added return for his yield, and he will naturally be a better prospect for the products of the retailer. In line with this the hardware merchant has every reason to look forward to another heavy selling season for paints, varnishes, and products closely related. Asked as to the financial conditions of the country—particularly those of the West—Mr. Fallis said that they are satisfactory. Payments are being met and in view of the fact that both gallonage and the actual money involved have shown such increases this year, this condition is highly encouraging.

THE QUALITIES OF A LATHER BRUSH

Continued from page 237.

sometimes of from twelve to fourteen inches and is so coarse and stiff at the butt that a short section can be driven like a nail into a white pine board. Naturally neither the first nor the last of these is suited to the making of lather brushes.

The white bristles required in the making of good lather brushes comes mostly from France, where the art of seltction and preparation are further developed. All bristles have a curve in them due to the thatched effect in the hair growth on the pig necessary as a protection from the elements. This curve is removed by tying the bristles up in a small bundle against the sides of straight sticks and boiling them for from four to eight hours. Black bristles are mostly a product of the Chinese domestic pig and when properly selected and prepared make most wonderful lather producers. The public, however, does not take kindly to the color of them.

The Serviceable Brush

High-grade bristles mixed with pure badger hair make most serviceable and satisfactory lather brushes. Size and style vary with the taste of the individual, but a square-topped brush is always a better lather producer than one with a round or French dome.

Real badger hair, the most expensive material from which lather brushes are made, varies greatly in quality. To get the snap required in a high-grade brush, the animal must be killed in winter and must be an inhabitant of a cold country such as Siberia and Northern China. The stiffer hairs are had from over the shoulders and down along the spine. The hair picked from the sides is of proper grade and that from the belly is soft and woolley. This hair is picked, sorted, sized, washed and blended and the labor entailed in this is exacting and expensive. Pure badger lather brushes are fine lather producers and are soft, yet elastic. They are used by the man who shaves himself, as the barber never uses a badger hair brush, preferring those made of selected pigs' bristles.

In past years lather brushes used to be held in the ferrule with pine pitch, shellac, or similar gum cements, some of the lower priced ones are still made that way. These brushes are, sooner or later, apt to shed hair like a patient with the fever, so to-day all of the better grade of lather brushes are set in vulcanized rubber. This setting is impervious to the action of hot water or anything else; this permits of the sterilizing of the brush in boiling water and insures the holding of the bristles in the ferrule until the brush is worn out.

Intelligent Selection

The reader is probably wondering how, with all the camouflage around the making of lather brushes, he can be expected to make an intelligent selection. We will, therefore, note here a few precautions that, if followed, will be apt to insure this:

Do not select a soft, mushy brush.

Do not select one with long, rounded top.

Do not select one without snap in the hair.

If you want a low-priced brush, buy one of bristles rather than of imitation badger.

Bear in mind that while bristles appear quite stiff when dry, they get soft and silky when used in lather, while a brush too soft when dry becomes worthless when softened in lather.

Buy a brush of medium or short length with a square or semi-square top.

The stiffer the beard, the stiffer the brush required.

The color of the bristles is no indication of their quality.

Last but not least, buy one with the name of some reputable manufacturer plainly stamped on it, and when you do get a good one, take care of it.

While the hardware clerk is usually well-informed on hardware, paints, and other staples of the hardware trade, his knowledge of lather brushes is sometimes limited to size and price, and he is often misinformed as to actual intrinsic values. Some brushmakers, we are sorry to say, offer brushes either stamped or tagged "guaranteed pure badger" in which not one single hair of real badger can be found. They are usually made of goat hair or Chinese horse hair dyed to imitate badger and mixed with a small per cent. of bristles to give the required snap.

Note These Qualities

Perhaps giving here the peculiar characteristics of the different hairs may help the hardware clerk in the determining of real value.

Goat hair is fine, lifeless and woolly and stretches like an elastic band, especially when wet. Unsupported, the single hair will not hold up to its own weight.

Horse hair is apt to be slightly curly; is the same diameter at the butt as at the tips which are never split and are coarser to the feel than goat hair.

Pigs' bristles are always larger at the butt than at the tip, tapering noticeably, and the tips are usually divided in two or more separate split ends. They are frequently dyed in imitation of badger but can be detected by the tapers and split ends.

Badger hair has a pronounced dark brown streak of varying width beginning about ¾ inches from the tip which is pure white with one single sharp end like the point of a pin. The individual hair is smaller in diameter at the butt than it is half an inch from the top, which is the opposite to bristle.

With a little real application the hardware clerk can readily familiarize himself with these characteristics and detect adulteration: it, however, requires an expert to tell the percentage of adulteration—a most important factor—and even the expert is not infallible in this.

WHAT IS A FAIR PROFIT?

Continued from page 232.

chase any more than it entered into the old ten-cent sock. Cotton stockings would then be more fashionable and silk would be at a discount. If the cotton-gin had not been invented, silk would to-day probably be far less fashionable than cotton.

Not so very long ago a really fashionable man had to wear a wig, and a bald pate was a comfort. Laws had to be passed preventing those whom the social mentors did not consider eligible to the bewigged class from shaving their heads and putting on wigs. That fashion passed away, and to-day a man wears a wig only from dire necessity. Yet a wig was at one time a class necessity. A man might better then have gone without his trousers than without his wig.

The necessity of to-day is not the necessity of yesterday or to-morrow; we hate to give up our necessities; we will kick and bite and scream—and then, suddenly, with our eyes closed and walking backward, we change. Once we had to have linen paper; to-day, we have to have wood-pulp paper; to-morrow, it will be some other kind of paper that we need. The point is that the moment any so-called necessity is so restricted in distribution, either by lack of quantity or height of price, that it cannot be bought by even a small fraction of the people who formerly used it, then the necessity for that commodity disappears.

The buyer makes the price only up to a certain mark, and at that mark he ceases to bid. He will bay at the moon for so long and no longer. We have already seen an indication of this in the idea—and practice—of wearing old clothing or overalls—which is only another manifestation of the same spirit that took men from peacock coats and knickerbockers into, by comparison, drab clothing.

In the new order of business there is, however, a method by which the seller may in a degree fix the price. This he can do by so planning his schedules of production at his price (and in price it is necessary to consider quality, for that forms a part of price) is always under that of the market made by the inefficient—the general market. In the new order of business, the manufacturer will fix his prices upon costs; with planned production, the seller will not have to sit around waiting for a demand or crying because a demand has dwindled or changed. He will drive steadily through the market and create a demand which efficient, planned production will enable him to fill.

When the demand exceeds the supply, as has been the case to the present, it is difficult to take this larger view of business. All of us are not — indeed, comparatively few of us are—awake to the fact that a new order is verily here, or if not here, almost due.

Quadrupled Paint and Varnish Department

Montreal Hardware Firm Sells More Paint and Varnish Than Before War—Carry Four Times as Much Stock as When Business Started

"ONE-THIRD of our business is done in paints and varnishes. When we bought this business seven years ago the department was very small, and not one-quarter the size it is now. We hope to do nearly ten thousands dollars' worth of business this year in our paint department."

In thus describing the development of their paint department to a representative of Hardware and Metal, J. A. Lecavalier of the firm of Duquette and Lecavalier, 2799 St. Hubert street, Montreal, it was emphasized that this part of the business is one of the most important, if not the best department in the whole store. Within that short space of seven years, most of which time covered the period of the great war, the growth of paint sales has been remarkable, and to the energetic members of the firm must credit be assigned for the growth which has taken place. Business rarely develops so fast of its own accord; there must be energy and push behind it, and to the vision held and the initiative exerted can be attributed this big growth.

A Heavy Stock

Much argument has been indulged in regarding the size of one's stock and the wisdom of carrying a large or small one. The investment made by Duquette and Lecavalier is a heavy one, but it is more because they carry so wide a variety of finishes and products than because of heavy stocking of any one line that this transpires. "We stock the whole line," said Mr. Lecavalier in referring to the products which they are seling. "It is an excellent product all through and it is most satisfactory to handle."

When customers come to buy they often do not know just what they require or what should be used for a given purpose. Here is where it is well to have the variety. "We can advise a customer as to just what she needs by having many different finishes. They appreciate this and with our advice they get the best results."

This brought out another observation from Mr. Lecavalier. "It is not a good plan to try too hard to sell a customer something they do not want. It reminds me of what I read a few days ago in the report of a shoe dealers' convention in which one of the speakers argued that if the customer was set on having a certain kind of boot or shoe the salesman should not insist too strongly on selling something else. It often reacts the wrong way. For if the sale were made the customer might be disappointed and not come back again."

This does not mean that the firm do not push with diligence the sale of the lines they handle. It is simply a question of reading human nature and of not failing to know when to urge the customer and when not to.

Where Customers Come From

Most customers are from among the householders in the district. These make the best customers. They may not, and usually do not, buy as freely as the

A WIDE variety of all paint and varnish products is carried in the paint department of Duquette and Lecavalier, Montreal. Having such a complete range of finishes on hand enables this store to advise customers and provide them with the best finish for the work they wish to do. This paint department has made a big hit with the householders of the district, who constitute the majority of the store customers. More paint is sold through this department now while prices are high than formerly when prices were lower. A little intelligent sales talk by the store salesman, at every opportunity, has brought about this condition.

painter, but they come oftener, and in the long run buy more than some painters. "We consider them the very best of customers," said Mr. Lecavalier, "and they are constantly buying more paint. We are selling more paint and varnish than ever before."

"Do the higher prices affect your sales?" asked Hardware and Metal.

"No, this makes no difference, in fact we sell more paint than when the prices were lower. The demand is greater all the time," replied Mr. Lecavalier.

The district in which the firm is located is a comparatively new one. That is to say, this part of the city has been extended within recent years and there is a steady growth still, with better things in prospect. During the non-building period of the war there was little doing here in this respect, but from now on it is expected that there will be development in housing operations. This will afford new business, and paints and kindred finishes will naturally sell more and more extensively. It is with this in view that the firm are maintaining a complete stock.

Mr. Lecavalier states that the better products are desired. Whether it be varnish or paint, the higher grades are popular. "People have come to realize that for painting or varnishing they require a good article, and they are also learning that it pays to preserve their property. We carry the larger packages, such as gallons, and these sell pretty well, too," he stated. "And we sell only pure turpentine and linseed oil; it pays."

Of course there is a certain amount of painters' trade, but the volume of business comes, for the most part, from the house owners and householders.

Sale and Care of Brushes

Sales of paint, varnish and kalsomine are comparatively large, and in keeping with the outturn of gallonage all through the season. To this end an excellent array of the various grades, shapes, styles and sizes of brushes are stocked, and the drawer arrangement has been adopted. While this does not permit of displaying to the best advantage, it does keep stock, Mr. Lecavalier says, in the very best of condition, and that is a big factor when one considers that the investment in a brush stock at to-day's prices means that care must be taken to preserve that stock in the best possible condition.

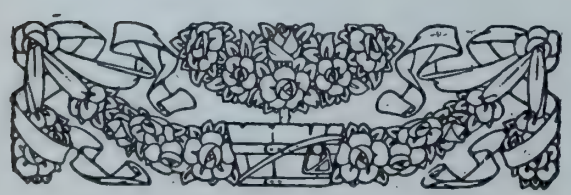
"The smaller brushes we leave in the original boxes, and the large ones we take out of the boxes and place in the drawers. It is easy to show a customer the stock and the brushes keep in good condition in these drawers. Our spring order was for about $500 worth of brushes, and as a rule we sell about $1,000 worth in the season," commented Mr. Lecavalier.

It was further pointed out that the sale of a brush depends largely upon the salesman. There is one point that this firm observes. Even though brushes are advancing in price frequently, advances are not necessarily put into effect on the stock previously bought.

"We will sell most of our stock at the profit that was added when the stock was purchased," he said.

How Hardwaremen Advertise Paints--No. 21

Taking for granted the fact that local customers have been convinced of the value of paint as a preservative as well as a beautifier, this ad. by E. T. Carter, Jarvis, Ont., suggests that therefore the best paint that can be bought is the most economical, as it will not only give a better finish, but will outlast other qualities. The illustration gives a humorous vein, followed by the statement that the painting season is at hand, and extending an invitation to have a paint talk with the store salesmen.



The Outlook for Fall Hardware Trade

Staple Lines of Hardware Will Remain Scarce and Price Declines Unlikely for the Present—Demand Will be Heavy This Fall—Paint Business Expected to Continue Active

"THE outlook for fall, 1920, appears to us to be a continuation of conditions that have existed during the early months of the year," said Col. Robert Starke, vice-president of the Canadian Wholesale Hardware Association, to Hardware and Metal. "The very staple lines of hardware, especially in the heavier class of goods such as wire nails, merchant iron, wrought pipe, Canada plate, stove pipes, etc., are very hard to obtain, and we fail to see that prices can decline from present levels with the continued high price of coal required for production, and the near approach of higher freight rates, both of which enter very largely into the cost of manufacture of this class of goods.

"With the abundant crops that are reported from nearly every section of the country it seems that the demand for all classes of hardware must be heavy for the remaining months of 1920. Stocks have been very largely drawn upon and are hard to replace promptly. Building in large centres must surely be started ere many months pass, as there exists a great lack of all classes of construction to take care of the legitimate heavy demands for hotels, warehouses, factories and dwelling houses. The immediate prospect for all lines of hardware looks encouraging, and the event of any price decline quite a few months distant.

* * *

CORDAGE OUTLOOK ENCOURAGING

W. A. C. Hamilton, Consumers' Cordage Company, Montreal, says: "Quebec crops are good, Ontario crops are good, and the Western outlook is very satisfactory. The report of a large milling company regarding the splendid prospects in the West is very encouraging. Conditions should, therefore, be very encouraging."

* * *

PAINT OUTLOOK IS GOOD

R. C. Jamieson & Co., Ltd., Montreal: "Business has been good and I think the 'Save the Surface' campaign has been a big help. If no new war breaks out in Europe the fall outlook should be a splendid one and business conditions continue active."

* * *

LEATHER BELTING

The situation in the belting trade is "normal." According to a reliable authority there is a demand in foreign markets for all the leather belting available, but the Canadian manufacturers have an eminent desire to cater to Canadian trade.

No immediate price changes are anticipated. Leather prices depend entirely on the price of hides, and should any immediate change take place in hide prices it would not be felt here for at least six or nine months.

* * *

CAR SHORTAGE IS CHIEF DIFFICULTY

Mr. Sheppard, of the Canadian Asbestos Co., states: "The worst difficulty has been that of obtaining cars for hauling our goods, but I think we have perhaps been getting our share." Mr. Sheppard indicated that conditions were reasonably satisfactory with the prospects of good business being obtained this fall.

* * *

STOVES

Speaking of local trade in iron and steel products Mr. Gurney, of Gurney Foundry Co., Ltd., thinks conditions are better and on a sounder basis in Canada than anywhere else in the world. Should the new freight rates be granted the hardware trade will be greatly affected insofar as stoves are concerned. There is decided difficulty just at present in procuring raw material but the situation is expected to clear in a week or so.

The necessity for increased housing accommodation will call for more hardware goods including heating and cooking utensils, and this will be a most valuable feature of future trade.

* * *

BRUSHES

We hear much these days of the shortage of material in practically every line of business, this is the basic reason for the unreliability of deliveries. In the manufacture of brushes over 7,000 different articles are used, covering the different shapes, sizes, etc. Considerable waiting is experienced on the producers, and naturally this affects the output and indirectly the deliveries. According to Mr. Baker, of Wm. Cane Sons & Co., Ltd., dealers are buying earlier and in larger quantities than before.

Continued prosperity depends on the ability of the manufacturer to procure material and labor at reasonable rates. Most of the articles used in the manufacture of brushes come from China, Japan and other eastern countries, and the labor conditions in those countries are as bad as here. No immediate decline in prices is expected.

* * *

CORDAGE

The wholesalers are apparently experiencing no shortage in cordage this year.

There seems to be plenty of material at hand to supply the demand.

No increase in prices is expected, and the market looks firm.

METAL ROOFING, SIDING, ETC.

There is a decided shortage of material in the metal roofing trade and there is no immediate relief in sight. Practically all the material now being used in the manufacture is premium stock. According to the latest reports, farmers and others are holding up work in hope of the situation clearing up. The possibilities for this sort of trade are limitless when raw material is procurable, but just at present the output is not up to demand. The manufacturers are importing all the material procurable from England and U. S.

* * *

ROOFING

The manufacturers of roofing cement and tar products are confident that they will be able to make deliveries until the end of the year. The opinion is expressed that apparently prices have reached the peak and market is remaining firm.

* * *

TAYLOR-FORBES CO.

C. F. Smallpiece, Taylor-Forbes Company, Ltd., Montreal:

"Business is excellent, and we have more than we can handle. The outlook is good and it looks as if price would be at least stable for some time to come. The demand is greater than the supply."

* * *

BUSY FALL EXPECTED

Edward Goodwill, Vice-President the Thos. Davidson Mfg. Co., Ltd.: "I expect the demand will be greater than the supply on many lines. Demands for all goods of our manufacture are heavy and it is a question of getting the raw material to make the goods. The outlook is satisfactory for a busy fall."

* * *

EXCELLENT TRADE IN PAINT AND VARNISH

Walter B. Ramsay, President A. Ramsay and Son Co., and Vice-President of Canadian Paint, Oil and Varnish Association:

"With the prospect of one of the best crops on record I think we ought to have an excellent fall trade. The farmers will be prosperous and will be converting their crop into cash. This, I am confident, will make a brisk demand for our products, for they will want to paint up their buildings, and there is much need for this in many places. The fact that thousands of harvesters have gone west to help take the crop off will mean that it will be promptly handled. Altogether I believe there will be a big expenditure, and, as far as prices are concerned on our products, I believe

there will be little change. High labor costs and high prices for nearly all raw materials will mean that prices, perhaps, cannot be lowered at all."

S. M. Ward, Sales Manager Canada Paint Co., Ltd.: "I think this fall will be a good one. The crop promises well all over the country and this always means a prosperous and active trade for Canadians."

* * *

CROP OUTLOOK GOOD

George Caverhill—Caverhill, Learmont and Company: "We are quite optimistic. Orders have been well booked and we are very busy. The splendid crop reports from the West helps put a little backbone into things and here in Quebec we have good prospects of a big yield. There is really only one difficulty—that of getting enough goods to fill the demand."

* * *

PAINT BUSINESS NOT AFFECTED BY CHANGES

W. S. McLennan, General Sales Manager Brandram-Henderson, Ltd.: "I have every expectation that business is going to be as good or even better than hoped for. I don't think the paint business will be affected by changes. There is no possibility of lower prices on white lead or putty, and it is problematical if there will be any changes on prepared paints. Pig lead was nearly a cent cheaper when present prices were made on lead in oil. The increased cost of labels, containers and labor are all big factors, while the only product that has been declining is linseed oil. All reports from our outside men are very optimistic."

* * *

SERIOUS SITUATION IN SHEETS

W. E. Ramsay, Vice-President The Pedlar People, Montreal: "The situation on black and galvanized sheets is serious. Manufacturers cannot get their requirements. If the cars that are being used in the United States to move the southwestern crop could be used for moving coal to the mills, and then for moving the finished product we would find things much improved. I expect, at the same time, that conditions will be much better by the middle of September."

* * *

TINPLATE IN GREAT DEMAND

Fred R. Whittall, Managing Director A. R. Whittall Can. Co.: "We expect there will be a record crop of tomatoes and corn and this will tax our capacity. While there has been a little improvement in the delivery of tinplate from the United States mills, the heavy extra demands will more than offset this. There can be no possibility of any lower prices on containers."

W. Portsmouth, formerly with the Chown Hardware Co., at London, has joined the sales staff of the Cowan Hardware Co.

Lead and Putty Basis Continued Till December

No Possibility of Declines on These Commodities—May Expect Increase with Application New Freight Rates—Containers Scarce and May Go Up

TWO important decisions were reached this week by the Canadian Paint, Oil and Varnish Association. Both white lead in oil and putty have been continued on their present basis up to and including the 15th of December next. The prices were arranged some time ago to remain effective until September 15th, and now that the date is so near it was decided to take action as to whether the basis would be continued. It therefore is obvious that there will be no change of price in either of these products for that length of time, but if a change should be necessary this arrangement would not preclude the probability of such a change being made. It is stated that no decline is likely, and some state that this would be impossible.

'There is every likelihood of the differentials as applying to various shipping points changing," said a paint manufacturer to Hardware and Metal, "if, and when the Railway Board decides on increased freight rates. This will mean that the cost of putty and lead will be higher, although the basis will, in such case, remain as it is at present."

Here Is Important Item

Continuing, this informant said, in part: "There is every prospect of higher prices becoming effective for containers, so that the differential over barrel prices for putty, for instance, would be changed, to meet this higher cost. Both paint and varnish containers and lead irons also are included, and we expect to pay more for these. All this means that adjustments may be necessary."

It is patent that there is likely to be no reduction in the price of these two commodities, in so far as it affects those which are contained in iron or tin. The great demands made upon can makers for containers for canning foodstuffs has caused a temporary, if not a prolonged, scarcity of tinplates, and it may be a good while before there is any possibility of lower prices becoming effective on containers. Every effort is being made by the manufacturers to supply his trade with containers, and on the part of manufacturers needing them to obtain ample supplies.

Big Congress Will Meet Next Month

Imperial Chambers of Commerce Will Meet in Toronto Next Month, Opening Sept. 18

Arrangements have been completed for the ninth congress of Chambers of Commerce of the British Empire, which commences in Toronto September 18 and continues during the week following. It is seventeen years since the last gathering of the kind in Canada, and eight years since the representatives of Chambers of Commerce of the Empire have assembled. Delegates from all parts of the British Empire will be present.

The King is Patron and the Duke of Devonshire, Honorary President of the Congress. Lord Desborough is President and will preside at the meetings.

Problems arising from the war will be the chief subject of discussion. Numerous resolutions on matters of particular importance, such as commercial relations between the Mother Country and the Dominions; reciprocity with all parts of the British Empire; shipping, telegraphic and cable communications and trade marks, patents, etc., have already been submitted for discussion.

GERMAN SHEETS FOR JAPAN

Japan has placed an order for several million marks' worth of sheets in Germany.

BRITISH TIN-PLATE EXPORTS

It is of interest to note that there has been considerable falling off in the imports of tin-plate and galvanized sheets from Great Britain in the six months ending June, 1920, as compared with the same period before the war.

The statistics for the above periods are as follows:

	Tons		Value	
	1913.	1920.	1913.	1920.
Tin-plate	4,320	293	£ 69,125	£ 16,557
Galvanized sheets	18,475	2,338	273,932	124,298

Hold Successful "Dollar Day" in London

By Co-operation London Merchants Get Maximum Results from Special Sale Held This Week —Make Big Drive for Women's Trade.

LONDON, Ont.—The splendid results that are to be obtained through co-operation were shown here on Thursday of this week when local merchants held their annual "Dollar Day." By a liberal use of readers in the news pages the buying public for fifty miles around London was kept on its toes for the really big advertising broadside which was fired on Wednesday. Conspicuous among the full page and half page advertisements were those of the Cowan Hardware Co. and J. G. Steele. The Cowan Co. made a direct and unusually forceful appeal to the housewives of both city and country, in advertising copy which may offer valuable suggestions to other hardware merchants for use at any time. "Cowan's Dollar Day Bargains Are Real Bargains As Every Housewife Knows. Read the Ad. Carefully and See What You Need" was printed in large display type. Below in a neat box illustrated by a cut of an electric iron was listed with prices in large type everything needed for the kitchen and washday. In another box was listed with prices also prominently displayed a number of household necessities. In a long but well balanced panel was copy telling about "Real Bargains in Silverware for Dollar Day Only" and in another panel to balance the make-up were listed such lines as brass jardinieres, hammocks, screen doors, etc. A one dollar assortment was featured in the very center of the ad. and comprised one roll of toilet paper, one can of cleaner, one paring knife, one scrub brush and a 25 cent bottle of furniture polish "All for a Dollar."

Make Drive For Women's Trade

The J. G. Steele Co. in its advertising copy also made a big "drive" for the women's trade. All prices were quoted in heavy display type much larger than the body matter and such lines were featured as enamelware for the kitchen, silverware, preserving necessities, tinware, brooms and washboards. The only exception to this list was an item for automobile owners who were offered as a big special "Auto Pliers at 39 cents each."

The W. A. O'Dell Hardware made a combined appeal to both farmers and city people by offering under the caption, "Take a Plunge Into These Dollar Day Hardware Snaps," such lines as tin pails at $1, aluminumware, washing machines, screen doors and windows, hoes, forks and cultivators, galvanized tubs and tin boilers.

It should be mentioned that all of these firms backed up their newspaper advertising by splendidly arranged window displays. Price cards were prominent throughout.

Large Turnover

One of the biggest "shopping" crowds that has ever been in the city was attracted as a result of the combined efforts of the merchants and this in spite of the fact that farmers are very, very busy harvesting. The turnover was one of the largest ever made in any one day in London.

Another feature that has a special interest to hardware merchants was the very large number of autos that brought farmers in, in some cases for fifty miles. One thing was evident and that is that the farmers are prosperous. They are buying automobiles. They are buying hardware. They are buying anything that looks to them good value for the money and they are not too particular about the price. They have lots of money and they are willing to pay a fair price.

Pays to Let People Know You Have the Goods

"We did a splendid day's business," said President Thomas Jones, of the London Hardware Dealers' Association to Hardware and Metal. "We have demonstrated before and here is the same thing again that it pays to get the goods and then let the people know that you have them. Our newspaper advertising and our window displays bring really excellent results."

The next big drive London hardware men are arranging for is in connection with the ten days Western Fair. With farmers all over the district more prosperous than they have ever been in their whole prosperous history, the merchants are looking for a big turnover. The Western Fair Board is co-operating with them and in a special effort to make everything as convenient as possible for farmers, parking accommodation is being arranged for 10,000 automobiles.

Higher Stove Prices Are Probable

Raw Materials Advanced Greatly—Increases Have Been Held Off for Many Months—If Recent Increases for Brick Linings, Pig Iron, and Coke Continue Higher Prices Certain

THAT higher prices are probable on stoves and ranges in the near future is suggested by advances just made for stove lining, coke, material, and pig iron, to say nothing of the high labor costs now in effect. In discussing this matter with Mr. Edward Goodwill, vice-president, the Thomas Davidson Manufacturing Co., Ltd.; Montreal, it was pointed out to Hardware and Metal that higher prices were likely if these advances for raw materials are continued.

"Pig iron," said Mr. Goodwill, "has advanced $4 a ton; stove linings, 33 1-3 per cent., and coke, another important item in the manufacture of stoves, has also advanced. Added to this, the high cost of labor makes production cost much higher. If these increases for raw materials continue, prices will surely have to be advanced. There has been no increase in the price of stoves of consequence since January last, and yet increased prices have had to be paid by the manufacturer for raw materials right along. High prices may have to come, and an increase is fully justified."

Demand Has Been Active

In referring to the demand for stoves, ranges and heaters, Mr. Goodwill stated that the outlook was good. Orders have been placed right along, throughout the season, and the sales of stoves and ranges have been satisfactory throughout the year. Now that the Fall season is about to open, there will be an increased purchasing of these lines, in Mr. Goodwill's opinion, and it will be just a question whether there will be ample material to make up the required stock.

The fuel situation will, of course, have a bearing on the whole matter of price in general. Increase in freight rates, if made effective, will also be an added factor in ultimate prices. Altogether it is expected by Mr. Goodwill that there will be an active fall season, with demands for all lines very satisfactory.

English Sheets Soon to Be Available

Montreal.—In discussing the galvanized sheet outlook with a large importer this week, Hardware and Metal was informed that there is now a prospect, and in a sense definite promise, of supplies from England being available within a short time. "We already have been promised a thousand tons, and these will be available early in September," said this informant. It was indicated that this might probably be the beginning of a more active movement of English galvanized sheets Canadaward, and this is welcome news to the trade in view of the continued scarcity of sheets generally. One thing that seems to favor this market is that of plenty of shipping being available for transportation providing the products are to be had.

Editorial Comment

FALL BUSINESS PROMISES WELL, BUT CAREFUL MERCHANDISING IS NECESSARY

THE 32nd Annual Fall Number of Hardware and Metal is herewith issued to the Canadian hardware trade at a time when the prospects for fall and winter trade are bright but when conditions are such that the strictest attention to efficient business methods is necessary that the merchant may successfully negotiate the period of reconstruction.

As far as can be ascertained, the outlook for supplies of various steel and iron products is not greatly improved, if at all. Leading manufacturers state that there is an accumulating list of back orders for various products such as pipe, malleables, etc. Of malleables there has been an increasing scarcity, and this is reflected in the statements of manufacturers, and, as well, of various jobbers. The demand for malleables from so many different sources has taxed the supplies beyond measure, and with the increased use of motor cars, demands consequent upon this for repair parts, and other factors, there is little hope that malleables will be obtainable in ample quantities for a long time.

In discussing with a large Canadian manufacturer the situation he stated that they had been short no less than 100 tons of malleables, and over one million pieces of cast goods. Think of that! It is but one instance, and serves to show that there is still no little difficulty confronting manufacturers and jobbers. Will prices tend downward on these lines in the face of that? One may perhaps decide such a question for himself.

There has been considerable demand for various goods used by the trade. Steel and iron products have steadily sold, and still there is shortage. One sometimes studies to learn, if possible, where supplies go, and how they are absorbed. It is safe to say that many are buying with due regard to the demands made upon them. That is to say, retail dealers are doing a sound business, buying reasonable needs and buying often. Therefore, if the products are going into consumption it is apparent that the surplus in the hands of the ultimate distributor —the retailer—is small, or in any case not excessive.

Reports indicate that there has been a fairly large amount of building in various parts of Canada. In few places has there been any boom, as Canadian building booms go. But in numerous towns and cities there has been much activity, new stores, offices and residences being erected and many places remodelled. That means that there has been call for large quantities of supplies, and even where activity was not outstandingly manifest, the monthly returns have often been surprising.

In a general way reports are encouraging. Steady, sane methods, and A PROGRAM OR PLAN are suggested by some of the leading manufacturers and jobbers of Canada. "Make a plan, then work to that plan" was the suggestion made to a representative of Hardware and Metal a few days ago by the managing director of a large company. It sounds like solid, practical advice. What is YOUR plan?

TO-DAY THE BUYER IS THE ULTIMATE PRICE FIXER

ABNORMAL merchandising conditions which have been brought about through chaotic conditions prevailing in the world's markets during the past few years have put retail business on a somewhat different basis than existed formerly. The trend of price is ever upward, there is much talk of profiteers and the laboring classes think they are being unduly exploited. The whole matter seems to be rooted in the establishment of what is a fair profit, and this point is very ably dealt with in an article appearing elsewhere in this issue. Conditions affecting supply and demand, and their relation, have changed so greatly that to-day's business is described as being on the basis of the person who sells old clothes to the rag-man—nobody knows what anything is worth though everyone hopes to get more than the value of the article. It points out that it is easy for a man to convince himself that whatever price he charges is fair for every man who sells also buys, and his sales prices are often but a reflection of the impotence

that he feels in buying. It is evident that under present conditions there is a great looseness of thought and expression. The article points out that the merchant who declares that he will "get his now while the getting is good" never does get his for his short sighted greed ends in financial wreck, because he does not see that the conditions which permitted him to make his killing have changed until all at once he is brought up with a sharp turn and everything is taken from him.

Dealing with the subject of price and profit fixing and their relation, the article states that a necessary corollary to price fixing is the fixing of demand and points out that the next step is rationing and the next communism, for when it is said that an article must be sold at a certain price and it is ordained that each individual can buy only a certain amount of that article, this is virtually communism. Fixing profits is declared to be infinitely more viciously destructive of economic life than fixing prices.

In conclusion it is pointed out that the only possible method of lowering prices is by the stimulation of production. Times have changed since the days when the producer was beseeching the consumer to buy. To-day the buyer is the ultimate price fixer.

INCREASE IN TELEPHONE RATES

ANNOUNCEMENT this week of proposed increases in tolls by the Bell Telephone Co. has not been received with anything like an unanimity of approval. In fact business men generally are emphatic in declaring the new proposals an imposition not to be tolerated. Inauguration of the "message rate service" in Toronto will greatly increase the cost of phone service to almost every business and commercial interest.

Toronto and Montreal business phones will cost, if the new tariff becomes effective, $60 a year, and be restricted to 100 outgoing calls a month. Other sections of the province show increases in rates according to the number of telephones and the demands upon them.

Representative business men in both Toronto and Montreal have left no doubts as to their wholehearted opposition to the proposed changes, and intend to fight them to the very utmost. The fixing of a limit of outgoing calls to one hundred per month is viewed as ridiculous, in the face of the statement of one Toronto wholesale grocer, that he has that number of outgoing calls in a day.

Consensus of opinion in regard to the application of the Bell Telephone Co. for an increase in its tariff of charges appears to be that before this company is granted consideration in this regard, it should make an effort to provide adequate and efficient service—a service compatible with the already high tolls that are being asked.

DECLINING MARKET REQUIRES CAREFUL HANDLING

THERE are many who hold the opinion that the peak of high prices in most commodities has been reached and that from now on prices will, if anything, decline. If this proves to be the case the situation calls for very careful handling. It is not difficult to make money on a rising market; but it is a very different proposition to carry on and meet one's liabilities on a falling market.

The good times and high prices we have enjoyed during the past few years have induced many people to go into business on their own account. A good number of these have not had the experience necessary to make a success of their venture under adverse conditions. Their stock in trade has been purchased at high prices, and owing to competition from older established merchants, whose cumulative cost has not been so high, they have been compelled to sell at a close margin of profit, and, therefore, have not been able to build up a reserve to carry them through a period of declining prices. This is the class of accounts that need careful attention.

EDITORIAL BRIEFS

THE most valuable of your intangible assets is good will. You cannot put your finger on it, but it is there and it plays a prominent part on the profit side of your ledgers. Good will can only be obtained, whether as buyer or seller, by a carefully built up reputation for fair dealing. To cancel orders arbitrarily or to return goods without cause—simply because by so doing one can escape an unforeseen loss—is to endanger one's reputation for fair dealing with the consequent loss of good will. And good will lost is difficult to regain.

* * *

DID you ever stop to think how seriously indifference and neglect of the correspondence of your creditors, relating to overdue accounts, affects your credit standing? If you cannot remit when due, don't let the creditor guess the reason. He is likely to make an unpleasant guess. Give him the reason straight, and thus encourage that frank relationship between business men that is worth dollars to each. Promptness in correspondence is one of the best of credit and business builders.

The Clerks' Department

The Measure of Ability

Observation and Concentration Are Essentials to Successful Retail Hardware Salesmanship

By Rivers A. Peterson in the National Hardware Bulletin.

ANY man who makes an effort to improve his salesmanship is reasonably certain to do so. Possibly the reason that more do not try is due to the feeling that the employer is the one who reaps the benefit of the improvement.

This conclusion is erroneous, as will be seen by anyone who thinks over the proposition. The first lesson every man should learn is that, regardless of who pays the salaries, he is in business for himself.

Observation

Do you see, or just look? There is a vast difference, and it plays an important part in salesmanship. You may look at a customer and know he wishes to make a purchase. If you practise close observation you will see in the manner, dress, and appearance of the prospect how he should be handled to close your sale.

Observation frequently enables the salesman to establish an immediate point of contact with his customer that is invaluable.

A customer walked into a shoe store. The only employee in sight was a saleslady who was busy. After a few moments, she approached the newcomer to serve him. As she glanced at his shoes, following his statement that he wished to buy a pair, she remarked:

"The shoes you have on are too short for you. I could tell that from your walk when you came in."

To the customer, painfully aware of the truth of her statement, this evidence of observance gave confidence in the ability of the saleslady and made it much easier for her to sell to him.

Watch the Customer

As a customer enters, you may see her pause a moment to look at a washing machine. The fact that her attention is attracted shows she is giving the subject some thought, although the immediate object of her visit may be something entirely foreign.

The observant salesman will bring up the subject of washing machines after the original transaction has been completed. Many so-called "suggestive sales" are really due to incidents of this kind.

MARSHALL FIELD'S CREED

"To do the right thing, at the right time, in the right way; to do some things better than they were ever done before; to eliminate errors; to know both sides of the question; to be courteous; to be an example; to love work; to anticipate requirements; to develop resources; to recognize no impediments; to master circumstances; to act from reason rather than from rule; to be satisfied with nothing short of perfection."

What Happened to an Observant Office Boy

Does it pay to be observant in all things?

It was the custom of a former president of the Michigan Stove Company to go to his office each morning by way of the factory yards in order that he might count the numbers of cars of iron, coke, etc., delivered the day previous by the railroad company.

One morning something interfered with this routine, and later in the day he asked the plant superintendent for the information, but he could not give it offhand.

One of the office boys heard the question and said he knew. The surprised executive asked him how he happened to know, and the boy said he always counted the cars when he came through the yards in the morning, and gave the exact data.

This faculty of really seeing things marked the young fellow for promotion. The office boy is to-day the general manager of that business.

Learning From the Other Fellow

The characteristic of watching what is going on, and how the other fellow does and says things, is invaluable to the young man just starting in the hardware line.

Without being obtrusive, he may listen at times to the sales talks of more experienced men. He can watch the methods they use and oftentimes improve on them. He may learn in this way how to make convincing demonstrations and get the important selling points of the articles his store carries.

This plan enables the student to know the various objections offered by customers and plan to overcome them.

Many beginners have attracted the attention of their employers by making sales demonstrations, of which their employer has not thought them capable. They have learned to do this mainly by watching the other fellow and applying his methods.

Learning the Goods

The close observer finds many things about his goods which arouse his curiosity and cause him to ask questions which give important information. In many cases, the facts would not be obtained otherwise. There is no one in the average store who makes it a business to see that every man knows all the selling points on various goods. The student must dig the information up for himself.

He soon becomes a regular human question mark, storing away a fund of information that will, with the proper application of other fundamentals of salesmanship, make him the best business producer in the business.

Sales frequently hinge on an apparently foolish question. I can remember distinctly the loss of the sale of a range due to the fact that I could not tell the prospect why certain unused bolt holes were in the top.

Subsequently I learned these were prepared to take care of attachments, and was able to use the information to sell these attachments. In the case cited, the prospect's loss of interest and confidence in my ability was noticeable from the moment I could not give a ready answer to her question about the bolt holes.

What Other Stores Teach

The salesman must learn to be a close observer outside his own store, as well as in it.

As he has occasion to visit other stores, he can see the methods they use, and apply them if good.

He may also improve his time by observing their principal lines and learning the marked differences between them and the ones his store carries.

In the larger goods, such as ranges, heaters, vacuum sweepers and washing machines, he should observe closely enough to be able to visualize the article whenever he wishes.

This enables him to talk intelligently about these lines, when the subject is brought up by the prospect, and to point

out the features of his own line which are advantages over the other.

Many times these comparisons are made without mention of any competing line. The better salesman will not refer to a competitor's line, yet often, by contrast, he will tear the other man's argument to pieces.

A salesman selling a line of cast heaters used to spend much time on the advantages of cast iron over sheet metal. He never mentioned a competitor, but he had observed that all the other hardware stores in the town carried heaters with sheet metal bodies.

Concentration

One of the secrets in selling is to be able to keep the prospect's attention concentrated upon the article under advisement. No man is behind the counter long before he learns the danger of allowing any interruption to distract the attention of the customer.

Sometimes the distraction is due to a friend of the prospect stopping for a chat, at others the salesman is called away momentarily. In other cases, the prospect's mind wanders from the subject. This is the fault of the salesman. He is not making his demonstration in a way that holds the interest of his customer.

Losing Control of the Customer

Frequently, if the salesman will analyze these instances, he will find that his own mind began to wander before he lost control of the customer. It is hard for many men to concentrate. Subconsciously they are thinking of other things which are liable to usurp the place of the subject under discussion.

Ability to concentrate is valuable and should be cultivated. The man who finds it difficult to hold his thoughts on a given subject for any length of time he wishes should begin to remedy the defect at once.

Test yourself on reading matter. Are you able to read a page and know after you have finished what it contained? If not, it is due to the fact that you have not really had your mind on what you were reading.

Practise concentrating constantly. Select any subject you wish and force yourself to think constructively, or analytically, on it. The more this is done the easier the task becomes.

Many men have failed who would have been successes had they been able to concentrate. It is the mental stick-to-it-iveness that wins. The student of salesmanship should not neglect it.

Successful Convention of Boston Varnish Company

What will go down in Kyanize history as the most enthusiastic, most instructive and best attended sales convention ever held by the Boston Varnish Company took place at the plant on August 2, 3, 4, 5, 1920.

The arrangement of the program was of such a nature that interest never for a moment lagged. The new advertising plans which call for a more aggressive and far reaching series of magazine and trade-paper announcements than ever before in the history of this enterprising firm, backed by a much more formidable array of dealer-helps in the form of window displays, cut-outs, signs and mail campaigns—all brought forth applause from the men. New lines of merchandise were announced, together with the plans for launching them on the market, and these also inspired the hearty approval of every man present.

Further Enlightenment on Application of New Taxes

FURTHER enlightenment on the application of the taxes to certain articles sold through the hardware trade is given through a letter to Hardware and Metal from the Ass't. Deputy Minister of Inland Revenue as reproduced herewith. In regard to the question of refund taxes on returned goods, proof needed to establish whether canoes are used for trading purposes and thus exempt, as to canoe paddles and the possible exemption of toboggans and other means of conveyance used for commercial purposes, there has been some misunderstanding among the trade. Rulings have been outlined in another part of this issue, but the ruling given herewith is official and explains the matter more clearly than heretofore. The letter is as follows:—

Hardware and Metal,
Toronto.

Gentlemen:—In reply I may state that if adjustment is necessary in respect of luxury tax paid by a customer who purchases an article in a retail store, plus the tax, and then returns the goods later for a total refund, such adjustment will be made by application to the Department through the Collector of Inland Revenue for the division in which the tax was paid. Retailers are not authorized to take it out of their next tax remittance except in a case where goods are returned and articles of greater value are substituted therefor, in which case the retailer is required to collect from the customer the luxury tax upon the difference in value only.

As regards canoes used for trading or commercial purposes, I may state that if the purchaser will furnish the manufacturer, at the time of ordering, with an affidavit setting forth that the canoes being purchased are to be used for trading or commercial purposes only and specifying such purposes, the manufacturer will not be required to charge the manufacturer's tax at the time of sale of such canoe. If the tax has been paid to the Canadian manufacturer and the canoe is sold by the dealer to a person for trading or commercial purposes only, application for refund of the tax paid may be made to the Department. Such application must be supported by (1) Proof of payment of the tax, and (2) an affidavit setting forth that the canoe is being used for trading or commercial purposes and specifying such use.

Canoe paddles are subject to the payment of the 10 per cent. luxury tax when sold for consumption or use and no provision is made for exemption therefrom when sold for trading or any such purpose. No provision is made in the amendment to the Special War Revenue Act for exemption from payment of the luxury tax on toboggans used for toting purposes and such toboggans are subject to a tax of 10 per cent. on the total purchase price when sold at a price in excess of $3.

Arrangements for the use of stamps are not yet complete, but will be completed at an early date.

I am, gentlemen,

Yours very truly,
GEO. H. TAYLOR,
Asst. Deputy Minister, Inland Revenue.

Discovers Paint Pigment in Ontario

Oshawa, Ont.—A valuable paint pigment has been discovered in a mine north of Peterboro by Mr. Roy Marks, son of Mr. and Mrs. William Marks, Centre Street, Oshawa. The ore contains about 40 per cent. lead and it is said will have a great demand in the painting industry, where it will take the place of white lead. It can be ground fine and used in the manufacture of putty and cleansers. Mr. Marks has experimented extensively with the ore and also has had consultations with experts.

Events in the Trade

Business Changes

Clinton, Ont.—W. H. Davison has disposed of his hardware business to Messrs. Carless & Venner. Mr. Davison is retiring, due to ill health.

U.S. Rubber Co. Starts Plant in Welland

Welland.—The Joseph Stokes Rubber Co., of Trentor, N. J., manufacturers of hard rubber goods, have purchased a site of three acres adjoining the Grand Trunk Railway at Welland and will commence the erection of a Canadian works at once. The first unit for this new plant will be 65 feet by 160 feet, with separate power house and office. It is expected that manufacturing operations will be commenced by December 1, with a payroll of 100.

Steel Company of Canada Build Wire Fence Plant

Hamilton, Ont. — Erection of a wire fence plant is planned by the Steel Company of Canada at Hamilton. It is understood that approximately $250,000 will be involved in connection with this project.

Scrap Metals Tax Has Little Effect on Trade

American buyers of scrap metals who do considerable business with Canada think that the imposition of a new tax of 1 per cent. on all sales of scrap metal to manufacturers which was recently announced in the Dominion, will have little effect on this class of trade. The fact that most Canadian sellers insist upon being paid in American funds appears to be of far more consideration.

New Housing Concern Has Been Formed in Oshawa

Oshawa, Ont.—The Oshawa Improvements Company, Limited—a new incorporation under the Ontario Companies Act—with an authorized capital of $500,000 has just been organized by prominent local men for the purpose of carrying out an extensive home building program to meet the present and constantly growing needs of the factory help. The company has taken over four large sub-divisions within the town limits and one immediately adjoining, so that it is starting with an established business and to carry out its house-building plan is offering part of its 4½ per cent. cumulative preferred stock for public subscription with a bonus of 25 per cent. of common stock.

Western Ontario Notes

London. — Thomas H. Purdm, Jr., of the Purdm Hardware Co., London, returned Monday after spending three weeks in New York, Rochester and other Eastern points.

* * * *

The business block at Waterloo, Ont., occupied by Moore and Sons hardware has been purchased by William Moore, of Blyth, Ont.

* * * *

Harry Abel, of the John A. Brownlee hardware store at London, Ont., has left to spend two weeks' vacation on a motoring trip through Western Ontario.

* * * *

Tom Sills, the little son of Frank Sills, of Seaforth, Ont., had his leg fractured when he was knocked down and run over by a boy riding on a bicycle.

* * * *

George Steer, of the Purdom Hardware Co., London, Ont., is spending his vacation with friends at Sarnia.

* * * *

A. Rice & Sons, of Wyoming, Ont have just finished redecorating the front of their hardware store and made a most striking and attractive effect in white, with black trimmings.

* * * *

Walter Stokes is visiting at his home in Corunna, Ont., after having spent the past six years in Persia, directing important development work for the Anglo-Persian Oil Co., of London, Eng.

* * * *

Albert Brownlee leaves this week end to motor from London, Ont., to Atlantic City, where he will spend his vacation. As a result of the premises occupied by his hardware store having been put up for sale in order to wind up an estate, he is going into business with his father, J. A. Brownlee, on the Market Square, at London, Ont.

* * * *

James Cowan, president of the Cowan Hardware Co., London, returned Monday after having spent a most enjoyable vacation at Kincardine.

* * * *

Blake Jones, of the Cowan Hardware Co., London, has left for the north to spend two weeks fishing in the French River district.

* * * *

Charles McKerlie of the sales staff of the Cowan Hardware, London, has returned after spending two weeks with relatives at Guelph.

Pioneer Hardware Dealer of Brechin is Dead

Brechin.—A pioneer merchant of Brechin passed away in the person of Gilbert Gillespie, who died at Brechin August 9, in his seventy-second year. Mr. Gillespie was one of Brechin's oldest and most respected residents, carrying on a harness-hardware business for thirty-seven years. He interested himself in public and educational affairs, serving as a member of the School Board for over thirty years, and being one of the village trustees for a number of years.

About two months ago Mr. Gillespie had a severe attack of pneumonia, and about two weeks ago a second attack came on, which proved too much for his strength.

Company Changes Hands

Toronto, Ont.—A general meeting of the shareholders of the Oak Tire and Rubber Company, Limited, was held last week. By a two-thirds vote of the total stock issue the shareholders decided to pass a by-law that provided for the sale of the assets of the existing company to a recently incorporated company with the same name and object. There was no dissenting vote registered.

Obituary

Toronto. — Hadley Albert, hardware merchant, of Toronto, died on Wednesday, Aug. 18.

London, Ont.—The death occurred at London, Ont., on Sunday last of John McKenzie, father of Alex. McKenzie, hardware merchant at Moose Jaw, Sask. Mr. McKenzie was 77 years old and a veteran of the Civil War. He was one of the most prominent Orangemen in the district.

New Appointment for R.M.A. Secretary

W. C. Miller, secretary of the Retail Merchants' Association for the Province of Ontario, has been appointed Vice-Consul of Canada by the Minister of Foreign Affairs of Greece, with jurisdiction in the Province of Ontario. This is the first appointment of the kind. Mr. Miller has been advised that the British and Canadian Governments have been requested to recognize his appointment, and that he assumes office forthwith. All passports and other documents requiring consular attention in Ontario will now be looked after from Toronto.

Suspend Freight Pre-Payment Order

Pending Further Investigation Canadian Business Men Will Not Be Compelled to Carry Out Railways' Demand

Washington. — Regulations proposed by railroads requiring prepayment of freight charges on traffic to points in Canada were ordered suspended from August 18 to December 16, by the Interstate Commerce Commission, pending investigation.

Ottawa.—News of the suspension of the order of United States railways requiring the prepayment of freight on commodities consigned to Canadian points will have a welcome sound to Canadian business men and others who had complained to the Government here and also the Board of Railway Commissioners. The latter body took up the matter, and it is understood the situation was thoroughly gone into during the recent visit of the chairman to Washington.

Canadian business men protested that if they were required to prepay in the United States currency the freight rates on goods not only to the border, but also over Canadian lines to their destination, this meant a hardship to them in the present exchange conditions. The prepayment in American funds practically added from 14 per cent. to 15 per cent. to the cost of freight, and consequently to the cost of goods which had to be retailed in Canada.

In dollars and cents, the saving to Canadian buyers of goods from the United States will, it is stated, reach huge proportions, even during the period of suspension from Aug. 18 to Dec. 16.

Dominion Glass to Re-Open Plant

Montreal.—The Dominion Glass Co., Ltd., Montreal, will re-open its Delorimier Avenue plant early in September, according to an announcement made Hardware and Metal by M. M. Yuile, sales manager of the company. "This plant has been closed for about five years," said Mr. Yuile, "and we expect to start operations there again in September.

"We have also greatly increased our capacity at Redcliffe, Alberta, doubling our output there, and the capacity of our Toronto plant has been increased."

Asked as to the outlook for the fall trade in these lines, Mr. Yuile stated that he believed there would be a good trade in general lines. "We have been overtaking orders lately and look for greater improvement," he commented.

Montreal Steel Workers May Return

Mill hands and steel employees, who have been out on strike for some time in Montreal, are contemplating a return to their work. It is expected that all differences will be settled and the men will return to work.

Practically every steel company in this district has been forced through the action of the men to shut down some part of its plant, but it is now thought that the trouble is at an end and that conditions in the steel industry will return to normal by next week.

Picnic of 1,000 Steel Workers

Montreal.—Employees of the Canadian Steel Foundries, Limited, to the number of nearly one thousand, held their annual picnic on Saturday last. A special Grand Trunk train took them, with their families and friends, to Otterburn Park, on the Richelieu River, and this journey to and from the Longue Pointe plant vicinity proved very enjoyable. Sports and races of various kinds served to mark a pleasant day. This was the fifth annual picnic and was held under the auspices of the Canadian Steel and Foundries Social and Athletic Club.

Business Men and Telephone Rate Increase

Montreal.—As far as Montreal business interests are concerned the application of the Bell Telephone Company for increased rates will doubtless be met reasonably. What the applicant company will have to show is that they must have an increase, justified by increased costs to operate. If this can be shown the average business man, Hardware and Metal understands, will accept the burden of higher costs for both regular and long distance service.

Doubtless the frequent user of the service will have to face the music to the tune of greatly increased outlay. Logically, it would seem that there can be little real fault with such a plan, for it is a natural deduction that to that extent to which a service is employed in this relation must it be paid for.

Roll Tin Plate in Toronto

Toronto, Ont.—While being shown over the Baldwin plant at Ashbridge's Bay, Imperial Press delegates learned that tin plate will be rolled in Toronto in three weeks' time, with 100 mechanics trained in the industry, most of whom come from Wales. It is stated that as soon as the staff is organized 800 or 900 workmen will be employed. A considerable proportion of this number will come from Wales, because of the skilled nature of the work. When things are in full swing in a year or two it is estimated about 6,000 men will be employed.

Lucan Hardware Merchant is Preacher as Well

London, Ont.—George H. Stanley, hardware merchant at Lucan, Ont., has been assigned to preach for a month at Dundas Centre Methodist church. This congregation is one of the largest and wealthiest in the city and Mr. Stanley was honored by being asked to take the services not only in recognition of the splendid work he has done as a layman, but because of his ability as a speaker. The services on Sunday were very largely attended. Mr. Stanley chose as his subject, "The King's Sin and His Sorrow," based on the story of David and his son Absalom. He emphasized the point that health, wealth and strength will come if one does not fall in one's aims, always provided that the aims are in accord with God and one has faith in Him. He urged the importance of getting a good start, especially for young people, pointing out that in nine cases out of ten the person who does not start well does not end well.

Quebec Manufacturers Invite Ontario Visitors

Montreal. — At the meeting of the Quebec Canadian Manufacturers' Association here, it was decided to extend an invitation to the Ontario branch of the Canadian Manufacturers' Association to visit the Province of Quebec during next month in order to extend the Entente Cordiale between the two Provinces.

The party will be entertained at Sherbrooke, Three Rivers, Quebec and Montreal, and plans are under way for a tour covering many of the leading centres of the Province.

Retail Merchants Oppose Telephone Increases

Ottawa.—Affirming that the proposed increase in business rates which the Bell Telephone Company is applying for before the Railway Commission is unreasonable and excessive, and that the increase, if granted, would hit the retail trade harder than any other line of business, the retail merchants of Ottawa, at a special meeting of the local branch of the Retail Merchants' Association of Canada, under the chairmanship of Mr. A. J. Freiman, president of the Ottawa branch, voiced their opposition to the increase in unmistakable terms.

As a result of the meeting, the decision was reached to ask the Dominion Board of the Retail Merchants' Association of Canada to engage counsel and experts to look after the interests of the retail merchants from coast to coast when the Bell Telephone Company's application comes up before the Railway Commission. It was also decided to appoint a committee of the Ottawa branch to co-operate with Dominion Board of the Retail Merchants' Association in securing information bearing on the merits of the application and its effect on trade generally.

News of Western Canada

Tells How To Sell More Sporting Goods

R. Peden, Victoria, Says Salesman Should Have Experience in Handling Goods He Sells—Public Not Interested in Substitutes—Change Advertising Copy Regularly—Treat All Customers as Guests

THE hardware trade will be interterested in some views concerning the sale of sporting goods, as expressed to Hardware and Metal by R. Peden, Victoria, B. C. Discussing the merchandising of sporting goods, Mr. Peden said:

"For a man to sell any line of merchandise, he should be thoroughly familiar with it. I am very fond of fishing. It is necessary to know at least something about all kinds of conditions and all kinds of tackle, to make a real success of the tackle business. If a man asks for a certain kind of fly, there is nothing else he is interested in as a substitute. In most cases, in any sporting goods line, the buyer who knows what he wants could not be switched to another brand, if you cut the price in half. I have learned that it is poor business to attempt to substitute."

The Selling of Goods

This slogan has been responsible for Mr. Peden gathering around him a staff of salesmen who are very valuable to the customers, and, therefore, valuable to the business.

"I have one clerk, a new one," stated Mr. Peden, 'who does no fishing, because he doesn't like it. I'm sorry, but I have advised that clerk to get busy and learn something about fishing, or we will have to separate."

Until quite recently, Mr. Peden was the President of the Victoria Gun Club.

"Not because of the business one can get by joining organizations of this kind," said this dealer, "but for the first-hand information of what is needed."

"I would advise a man to go in for trap-shooting, if he proposes to sell trap-shooting supplies," he added.

Then there is tennis that can be encouraged—and the trade earned. Roller skates are advertised for the kiddies, and a little stock of repair parts carried, also football supplies and baseball and hockey supplies. Speaking of baseball bats, this merchant said: "In selling baseball bats, fishing rods and golf clubs, one can only sell from stock. These are three articles that the purchaser will not buy on description. He wants to get the 'feel' of the thing in his hand. He wants to test the weight, balance and flexibility, as the case may be, and a cut and description in a catalogue or folder will not suffice."

Newspaper Advertising

"I am the firmest believer in newspaper advertising," went on Mr. Peden, adding, "it sells goods for me; but here is a thing that cannot be stressed too much; change your copy every insertion. Make the reader look for your advertisement, knowing that he will see something different. Any time your customers say 'I know what his ad. will be,' your advertising is bound to fail.

"Whether I use a daily or a weekly, I would change the advertisement each issue. The man who is too busy to change his 'ad.' is working so hard with his hands that his brain doesn't earn anything; and if it's too much trouble, then he'd best stop serving customers at the counter, and give himself a lot more leisure."

On being asked by Hardware and Metal to outline a few policies that have contributed to the growth of this business, Mr. Peden said:

"One of the cardinal points for a merchant to remember is that the five-cent purchaser today may be the hundred-dollar customer tomorrow. Always take a youngster in his turn; it makes a great impression with him. His money talks just as loudly as a man's, and in a very few years the kid who buys ten cents' worth of fish-hooks to-day will soon be in the market for a thirty-five dollar rod, rubber boots and a rifle, tube skates and a safety razor, and numerous other things.

Last-Minute "Rusher"

"Another thing that a customer is keen to notice is this—if your door is open at two minutes to six, he's quite

(Continued on next page.)

How the upper section of the disp lay windows of the store front may be used to show bicycles is demonstrated in this picture of the store of R. Peden, Victoria, B. C. Mr. Peden believes in making the best possible use of all display space and linking up the windows with the daily advertisement to boost sales of sporting goods.

Encourage Iron Production in Canada

British Columbia Offering Encouragement for Establishment of Large Iron and Steel Industry on Pacific Coast in Way of Bounty. In case of 300 Ton Plant Would Mean About $1,000,000

BRITISH Columbia is offering encouragement for the establishing of an iron and steel industry on the Pacific coast and is offering a bounty for large interests to start operations there. The bounty now being offered by the Provincial Government for pig iron produced in British Columbia from local ores would mean, in the case of a 300-ton plant, about $1,000,000.

S. Fleming, of New York, president of the board of directors of the Canadian Collieries, Ltd., is still in the neighborhood of Vancouver investigating possibilities of manufacturing in and marketing iron and steel from that district. Mr. Fleming, together with a group of engineers and financial experts, has been in continual conference with Canadian officials on the merits of such an enterprise.

William Sloan, Canadian Minister of Mines, stated in a report:

"It is said that only the market question stands in the way of the establishment in British Columbia of an iron and steel industry. To my mind this should not be a stumbling block. If it is admitted, as it must be, that we have the magnetite ore and the necessary fluxes for the smelting of the same and the production of a high-grade of pig iron there is no further important problem facing those who would invest the capital needed for the launching of a moderately sized plant.

"The Canadian Collieries are better situated than any other corporation to undertake the enterprise. It is possessed of extensive coal fields on Vancouver Island, it has the coke ovens and also controls considerable iron ore-bearing areas."

Western Notes

Winnipeg, Man.—Richard Bros., sheet metal workers, have been succeeded by G. Grazden.

Winnipeg. — R. R. Kinread, 72-74 Princess Street, Winnipeg, has issued an attractive circular displaying his full line of halters and harness supplies.

Kelowna, B.C.—D. Leckie, hardware merchant, has just finished redecorating his store after a fire which occurred on May 28.

Hardware Store Burned in Morinville Fire

Morinville, Alta.—Morinville suffered severe losses when a recent fire completely wiped out one of the major business portions, destroying a hardware store, several offices, an auto supply warehouse, and the premises of the Royal Bank. The damage is estimated at $100,000 and is understood to be fairly well covered by insurance.

Britisher Joins Laboratory Force of Paint Company

Vancouver, B. C.—J. Carl Pendray, of Victoria, chairman of directors of the British-American Paint Co., was recently in this city interviewing Jordayne Cave-Brown-Cave, a well-known member of the Society of Chemical Industry, and for the past few years manager of one of the largest tar distilleries in England. Mr. Pendray has succeeded in securing the services of this gentleman for his firm, for the manufacture of additional lines.

Must Not Sell After Six O'clock

Winnipeg Merchants Are Not Permitted to Sell Hardware After Six o'Clock—Must Abide by Regulation

Merchants in Winnipeg will have to close their stores at six o'clock in the evening, and any effort to sell hardware after that hour will be contrary to the by-law.

Action by the city, is authorized by the Shops Regulation Act, passed by the Legislature in 1918. It prevents the sale of hardware after regular closing hours. The city delayed enforcement of the by-law to ascertain if some modification could be made whereby small stores would not be tied up completely.

J. H. Curle, secretary of the Retail Merchants' Association, headed a deputation that urged that protection be given the retail trades and that the city decline to permit stores to exploit the retail business.

According to the decision of the committee, stores must discontinue selling hardware if they wish to do business after six o'clock in the evening.

Appointment of Canadian Tariff Commission

The promised commission to revise the Canadian tariff has been appointed, and will begin sittings in Winnipeg on September 15. The commission will consist of Sir Henry Drayton, Minister of Finance (chairman); Hon. J. A. Calder, president of the Privy Council, and Senator Robertson, Minister of Labor. Following the initial meeting in Winnipeg the commission will proceed to British Columbia and take evidence on the Pacific coast. Evidence will subsequently be heard in all Provinces.

TELLS HOW TO SELL MORE SPORTING GOODS

(Continued from page 252.)

right in walking in and expecting service. How often does he get rushed into accepting something not quite satisfactory to him, and ushered to the door by a clerk who plainly shows that he would throw him out by the back of the neck if he could get away with it? I say that a customer in your store is a guest. Either your advertising, your window dressing, a friend's recommendation, or your past service has been responsible for him coming into your store and giving you an opportunity to submit your merchandise. Don't ever run away with the idea that you are doing him a favor to sell him. If he apologizes for coming in late, say that you have ample time to give him. If he doesn't, don't look as if he should; he doesn't need to. Your open door was an invitation which he accepted.

"I have decided, too, that the customer should be satisfied always. If he suggests a brand, he will most likely be best satisfied with what he asked for. If he asks your advice, give him what is the best—it will be the most satisfactory—and if two articles selling for the same price have different merit with different profit—give him the best. This scheme cannot fail in the long run—and that's what a merchant should figure on."

Folly of Under-Selling

To the customer who tries to get the five-dollar article for $4.75, and the standard-priced article at a reduction, the invariable answer of Mr. Peden, and all his staff, is: "If sound merchandising practice would let us sell that article for your price, we'd have marked it at that."

He believes, too, that it is folly for the boss to undersell his clerks. It humiliates them, and also leaves the customer with the feeling that there are several prices ruling on all things—the price depending on the man making the sale.

A razor sale at $4.75 is, perhaps, not as satisfactory as one at $5, and even the customer has a sneaking idea that if he had seemed more reluctant to buy he might have got what he wanted for $4.50.

Victoria, B.C.—It is reported that investigations with a view to the establishment of a big steel plant on the Pacific coast of Canada have been commenced by Mr. Henry S. Fleming, of New York, chairman of the board of directors of the Canadian Collieries, who has recently been visiting London, Paris and Brazil on business and is now at Victoria, B.C.

Newsy Notes From Here and There

Toronto.—D. A. Thomson, hardware merchant of Coronation, Alberta, was a visitor in Toronto last week.

* * *

Toronto.—Robbers broke into Moles' hardware store, 534 Queen Street West, and stole $60 in cash and some cutlery.

* * *

Perth, Ont.—Some days ago a cow visited town accompanied by Chas. Dodds and Alderman R. O. Brown. When passing the hardware store of James and Reid it quietly stepped in, took a tour around the show counters, and up and down the aisle a few times. The office staff looped the loop and Mrs. Cow departed apparently satisfied with her inspection.

* * *

Montreal. — Mr. Cabana of the Buffalo Specialty Company called on the Montreal trade last week; The Consolidated Tool Works, Inc., 261 Broadway, N.Y., were represented this week in Montreal by F. V. Teller; Mr. Avery, of Henry Milward and Sons, Redditch, England, was in Montreal calling on the jobbing trade; John Richardson, Richardson and Bureau, Montreal, spent some days this week in calling on the Toronto jobbing trade; J. G. Lewis, Vice-President Lewis Bros., Limited, returned to Montreal after a brief vacation to outside points; W. Beverley Robinson, President B. & S. H. Thompson and Co., Ltd., Montreal, returned from an extended trip to the Old country; many travellers are off the road for a few weeks, as is usual at this season of the year, and a number have gone to out-of-town resorts for their vacation; W. S. Leslie, President A. C. Leslie and Co., Ltd., Montreal, returned on Tuesday from a trip of several weeks, spent in England and on the Continent; Roy C. Lewis, Sales Manager T. S. Simms and Company, Ltd., St. John, N. B., was in Montreal this week for a few days; Sidney M. Ward, Trade Sales Manager Canada Paint Company, is taking his vacation, and is enjoying a sail down the St. Lawrence via the Gaspe Coast; Archie T. Black, Manager of the Martin-Senour Company, returned to Montreal after spending several weeks at out-of-town points; J. W. Robertson, of the Dominion Glass Co., Ltd., Montreal, is at present on his vacation. W. S. McLennan, Sales Manager Brandram-Henderson, Ltd., is spending his vacation at Algonquin Park.

Hardware Letter Box

ACETYLENE MINERS' LAMPS

James S. Neill & Sons, Ltd., Fredericton, N.B.—We wish to get in touch with manufacturers of acetylene miners' lamps in Canada.

Answer.—The Hiram L. Piper Co., Ltd., Montreal, Que.; The Sudbury Construction and Machinery Co., Ltd., Sudbury, Ont., make acetylene lamps in Canada, and the following firms in the United States manufacture miners' acetylene lamps:

Justrite Manufacturing Co., Chicago, U.S.A.; Davis and Hemphill, Elkridge, Md., U.S.A.; John Simons Co., 110 Centre Street, New York, U.S.A.

CIDER PRESSES (HAND AND POWER)

The Rosebrugh Hardware, Tilbury, Ont.—Can you advise us where we can procure hand and power cider presses?

Answer.—The following firms make these: Hergott Bros., Mildmay, Ont.; W. R. Perrin, Ltd., Toronto, Ont.; The Boomer & Boschert Press Co., Ltd., Syracuse, N.Y., U.S.A.; P. P. Mast & Co., Springfield, O., U.S.A.; A. B. Farquhar Co., Ltd., York, Pa., U.S.A.

Trade Enquiries

The names of the firms making the inquiries given below, with their addresses, can be obtained only by those interested in the respective commodities upon application to HARDWARE AND METAL.

Please Quote the Reference Number When Requiring Addresses

1623. **Pumps, sanitary ware, agricultural machinery.**—A very old established firm in Genoa wishes to do business with Canada in the foregoing.

1584. **Electrical apparatus.** — A firm in Roumania desire to receive price lists and quotations as well as other particulars from Canadian firms in a position to export electrical apparatus.

1587. **Cranes, machinery, hardware, etc.**—A house in Turin, Italy, is willing to purchase the above in Canada.

1615. **Hardware, novelties, metals.** — A house in Naples wishes to hear from Canadian houses dealing in the foregoing articles.

1616. **Iron and steel goods, hardware, tools, etc.**—A Cape Town commission agent is seeking agencies for all of the lines mentioned above.

1608. **Hardware.** — A firm in Turin inquires for Canadian supplies of hardware.

1609. **Hardware.**—A firm in Rome wishes to buy hardware in Canada.

1610. **Hardware.** — A commission agency firm ask for correspondence from Canadian manufacturers who may want representation in South Africa on all lines of hardware and iron and steel goods for the ironmongery trade.

1611. **Hardware.**—A company at Arona, Italy, with branch offices at Milan, Genoa, Bologna and Turin, carrying on business in hardware, would be glad to do business with Canada.

1612. **Hardware.**—A Johannesburg manufacturers' agent is prepared to take up Canadian agencies in hardware lines.

1613. **Hardware.**—A very important Milanese firm state their desire to buy hardware in Canada.

1614. **Metals, hardware, etc.**—A firm in Cairo, Egypt, prepared to purchase some lines and handle others on commission, is desirous of getting into touch with Canadian manufacturers able to ship the following: wire nails, screws, bolts, locks, hinges, enamelware, copper and brass sheets, and hardware generally. Terms cash against documents.

1607. **Machinery, hardware, pumps, etc.**—A most important firm in Genoa is willing to consider offers from Canadian firms dealing in machinery, hardware, pumps, etc.

Catalogs and Booklets

FINDLAY BROS. CO.

Findlay Bros. Co., Ltd., Carleton Place, Ont., have sent out a copy of their new stove catalog just issued. The catalog is well got up in an attractive style and fully covers the well-known Favorite line of stoves, ranges and heaters manufactured by this firm. A good feature is the repair list with weights, by which the storekeeper is enabled to give his customer an idea of the cost of any repairs that may be needed.

The number of the catalog is 60 and readers of Hardware and Metal wishing a copy should write to above address.

TROPIC RANGES, CAMP RANGES AND HEATERS

An attractive 24-page catalogue has been issued by Adam Hall, Ltd., Peterborough, Ont., featuring various sizes of tropic ranges, lumberman ranges, camp heaters, hotel ranges. The catalogue is attractively illustrated, and copies will be sent to readers of Hardware and Metal upon request.

S. SMITH & SON

S. Smith & Son (M.A.), Limited, 179-185 Great Portland Street, London, W.1., has just issued a catalogue of motor accessories. This comprises speedometers, motor clocks, tank gauges, motor cycle watches, chronographs, carbureters, storage batteries, magnetos, switchboards, ampere meters, electric cables, electric horns, limousine lamps, motor lamps, and many other accessories and motor tools, including jacks, pliers, tool bags, etc.

The catalogue is illustrated with fine half-tones and is printed on heavy calendered stock. As an introduction to this catalogue cuts of the speedometer house, show rooms, and also of the works of this firm at Edgware Road, Cricklewood, are shown. Following this is a description of the plant in picture and in story. The company is now entering Canadian markets.

NEW LIST ON FIREARMS

Starke-Seybold, Ltd., Montreal, have issued a neat illustrated list on guns, rifles and pistols. This carries list prices, and any hardware merchant interested may procure copy by addressing the firm at 14 St. Peter street, Montreal.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

THERE is still a considerable list of advances to record in the prices of many hardware lines this week, and though "Bradstreet's" says, "the trend of commodity prices is still downward," this can hardly be said of hardware goods, especially those of iron and steel. Among the lines advanced this week are well and cistern pumps, bale ties, knife handle wrenches, lawn mowers, grub hoes and pick mattocks.

Higher prices are also quoted on certain kinds of roofings, tarred felts and sheathings, upon cotton clothes lines, washboards and sandpaper.

Wire fence stretchers, horse muzzles, whiffletrees, electric toasters, grills and sad irons are also marked up. Brass and copper tubing and copper sheets have higher quotations.

Among the lines which have been revised downwards are leather boot soles and heels, and linseed oil and turpentine also have declined in price this week.

Business, in spite of this being the holiday season and usually dull, is reported very good.

The harvest is in full swing and even this does not affect trading in rural communities as it did, as with telephone and automobile the farmer is in close touch with nearby towns.

Manufacturers and dealers are optimistic regarding prospects for fall trade, and with a noted improvement during the past few days in railroad conditions in the U.S. better supplies of iron and steel and their products should be forthcoming. It is on these goods that the biggest shortage is felt and supplies of sheets, Canada plate, wrought pipe, iron and steel bars and wire and wire products, nails, etc., are badly needed as stocks are almost depleted.

Collections are said to be coming forward freely.

MONTREAL MARKETS

MONTREAL, August 19.—The third week of August finds the hardware jobbing trade busy and expectant. There is a decidedly optimistic note here regarding the outlook for fall trading, and if goods can be secured there will be a busy fall. Prices have been quite firmly maintained on most lines, and a number of important items show an advance, while there is but one single commodity showing an actual decline, that of tap soles and heels, these declining about 20 per cent. Advances have been made on various rivets. Eavetrough, conductor pipe and corrugated sheets are higher, while black sheets have advanced about one dollar per cwt. Pyrex glassware has advanced in price. Spring hinges are higher, wrapping paper, roofings of the prepared variety, building papers and sheathings are all higher. Wire products are scarce, and higher prices prevail on smooth galvanized wire. Cut and wire nails are very scarce and there is no likelihood of a decline on either. Genuine wrought iron pipe is slightly revised upward. Bright and brass jack chain have been marked up somewhat. Slates, cistern pumps, wash boards and brass and copper tubing and copper sheets have been marked higher. Stoves and ranges are very likely to be advanced, due to increased costs to the makers for coke and pig iron, and also for firebrick for linings. Firearms are selling well, and there has been an excellent demand for amumunition, manufacturers being besieged with orders from the trade. An excellent fall is expected, so encouraging are crop reports from all sections of the country. It would be more reassuring if goods were available more readily and in larger quantities.

Will be Difficult to Fill Pipe Orders

Montreal.

STOVE PIPES.—Manufacturers state that it will be very difficult to take care of the demands of the present season for stove pipes. The call from all parts of the country has been excessive, and manufacturers are bending every energy toward filling their customers' orders. There is a limitation on the amount of Canada plates that can be secured, and already some manufacturers are cutting up large sheets to make into stock, even at a loss. The outlook suggests that it will be well to conserve stocks in hand and not sacrifice them. Prices are bound to hold firm and may probably advance.

Eavestrough and Conductor Higher

Montreal.

EAVESTROUGH, CONDUCTOR PIPE.—Much higher prices are effective for eavestrough and conductor pipe. This is due to the dearth of raw material, and the present net prices at Montreal on eavestrough are as follows: Eight inch girth, per 100 feet, $8.65; 10 inch., $9.65; 12 inch, $11.45; 15 inch, $15.65.

CONDUCTOR PIPE is also higher in price: Two inch, selling at $10 per 100 feet; 3 inch, $12.15; 4 inch, $16, and 5 inch, $21.90. It is increasingly difficult to obtain the necessary sheets to make these products, but some encouragement may be given for those who want to buy after mid-September, manufacturers state.

New Net Prices Out on Corrugated Sheets

Montreal.

CORRUGATED SHEETS. — Higher prices have been made effective this week for corrugated sheets. These are selling at the following net prices: 28

gauge per square, $12; 28 guage, $12.75; 24 guage, $18.75; 22 guage, $22.25; 20 gauge, $26.50, and 18 gauge, $32.75. It will be noted that there is a great disparity in the price range, and this is doubtless due to the difficulty of obtaining certain gauges. The materials are very scarce.

Foreign Demand May Help Old Material

Montreal.

OLD MATERIAL.—Removement of old material has not taken on its usual Fall swing yet, but there is a fair movement. The outlook is better than it was and as soon as the Fall buying season opens dealers expect that prices paid by the mills will be satisfactory to them. There has been considerable inquiry from overseas of late, particularly for heavy machinery casts. If this continues it is likely to firm the market on this commodity.

Lead Products Firm, With Steady Movement

Montreal.

LEAD PRODUCTS.—The movement of manufactured lead products to the trade has been satisfactory to manufacturers and jobbers, and this indicates that a considerable amount of building is in progress. In view of the fact that pig lead is holding on a high basis, prices are rather firm, and this fact, coupled with continued high wages, precludes the probability of prices becoming lower in the immediate future.

Jobbers Cannot Get Nail Requirements

Montreal.

NAILS.—Jobbers state that they can only procure very small quantities of wire nails from the mills, and it is necessary to take frequent delivery. A continued shortage is manifest on all sides, and prices are very firm in view of the fact that production is so small at the present time. There has been no change during the week on either wire or cut nails, standard wire selling at $6.40 per keg and cut nails at $6.90, the latter price being fixed a week ago.

Fair But Seasonable Demand For Cordage

Montreal.

ROPE AND CORDAGE.—The movement of rope to trade channels is rather limited, but business is satisfactory for this season of the year. The price basis on various grades is unchanged, pure Manilla selling at 35½ cents per lb., New Zealand and British Manilla at 28 cents and sisal at 22½ cents.

Gasoline and Oil Firm at Advances

Montreal.

GASOLINE, COAL OIL.—The prices announced two weeks ago still obtain for coal oil, namely 31 to 33 cents per gallon according to grade. Motor grade gasoline is selling at 41 cents per gal., and prices range from this to 26½ cents for the better grades used for illuminating purposes. Regardless of the higher prices, the demands are very heavy.

High Prices to Rule Still on Fuel Oil

Montreal.

FUEL OIL.—The demand for fuel oil for manufacturers has continued active, although there has perhaps been a slight falling off within the last few weeks. Prices are firmly held at 21½ cents per gal., and it is difficult for the refiners to succeed in laying aside any surplus quantity.

Ware Lists Firm; Low Prices Improbable

Montreal.

VARIOUS WARES.—The movement in various wares to the trade continues satisfactory, and the outlook for a big business this fall is reported to be excellent. There is still some uncertainty as to whether manufacturers will be able to get ample supplies of steel sheets for manufacturing these goods. It would seem that there will be a shortage of raw material, and in view of this the trade would seem to be well advised to anticipate their requirements as early as possible.

Higher Prices Likely For Ranges and Heaters

Montreal.

STOVES, RANGES.—The movement of stoves and ranges and also of heaters to the trade will be active in a few weeks' time, and orders already in the hands of manufacturers will largely tax their capacity this fall. The difficulty of getting supplies is no small one and manufacturers have been faced this week with advances for brick linings for stoves, coke, and pig iron, the latter commodity advancing $4.00 per ton. It begins to look as though higher prices would be inevitable on stoves and ranges.

Glassware Moving; Outlook is Better

Montreal.

GLASSWARE.—Various glassware, including lantern globes, fruit jars, etc., seem to be available in average quantities and the outlook is a little better than it was a few weks ago. One manufacturer states that he will be turning out in larger quantities than usual in a few weeks, and the outlook for raw material is better than it was. Prices are holding quite firm on these lines, while certain advances have been made here and there.

Cooking Glassware Will Cost More Money

Montreal.

COOKING UTENSILS.—An advance of price has been made in "Pyrex" ware. This product is subject to a new resale list, now being issued to the trade but the discount is made still at 30 per cent.

Increased Prices For 1922 Lawn Mowers

Montreal.

LAWN MOWERS.—An advance has been made in the lawn mower list on supplies wanted for next season. Daisy Brand are now selling at 16 per cent. off the list, and Empress at the same discount. Star and Woodyatt are on the discount basis of 10 per cent. This is an approximate advance of from 10 to 15 per cent.

Range Boilers Steady With Undertone Firm

Montreal.

RANGE BOILERS.—There is a continued demand for range boilers of standard size and manufacturers have fortunately been able to take care of the demand quite well. Prices are holding steadily firm on all grades, and standard is selling still at $15.00 each, 30 gal. size and the extra heavy at $18 each.

Active Market Now For Various Firearms

Montreal.

FIREARMS.—Jobbing circles state that there is, and has for some time been, a decided activity in the sale of guns, rifles and pistols. Regardless of the high prices, plus the heavy tax imposed by the Budget, there seems to be a healthy request for these goods. Prices are holding very firm and no reductions have been made on any of the standard or special lines.

Big Movement Shells Reduces Stock Greatly

Montreal.

AMMUNITION.—While there has been a decided increase in the active

movement of various ammunition this season, the sale of loaded shells appears to have been greater than was looked for. Manufacturers state they are really much oversold and that this is a fact is borne out by the jobbers. First and early shipments appear to have been satisfactoriy made to the jobber, who, in turn, is now filling orders. If there is a continued movement this fall, repeat orders ought to be in early to avoid disappointment.

Fifteen-cent Basis For Wrapping Paper

Montreal.

WRAPPING PAPER.—The basis on kraft wrapping paper is now given as 15 cents a pound. This is an increase over previous prices ruling locally, although some have been quoting, Hardware and Metal understands, more favorably. The market is quite firm.

Increases Again Made on Papers and Roofing

Montreal.

BUILDING PAPERS, ROOFINGS.—Prices are higher on various building papers. Cyclone dry sheathing is quoted at $1.85 per roll and tarred at $1.95. Dry sheathing, ordinary grade, is priced at $1.50 and tarred at $1.70; Surprise sheathing, $1.55; heavy dry, per 100 lbs., $8.05, and tarred, $8.05; carpet felt, $9 per 100 lbs., and tarred felt, $6.05. Ready roofing, 2-ply, is $2.33 per roll, and 3-ply, $2.75. Common pitch is quoted at $1.30 per 100 lbs., coal tar $9 per bbl., refined coal tar, $10.25. Shingle varnish, $10.75, and roofing cement as follows: Barrels, per gallon, 60 cents; 4 and 5 gallon cans, per gall., 70 cents, and 1, 2 and 3 gall. cans, per gallon, 90 cents. Other changes are pending on both roofing and building papers of various grades.

Scarcity Iron Pipe; Slight Price Changes

Montreal.

IRON PIPE.—Slight advances have been made in the price of genuine wrought-iron pipe and there is a strong undertone to the market. This comes from a dearth of supplies aggravated through the scarcity of skelp. The regular selling sizes are naturally the most difficult to obtain, and the scarcity prevails in both black and galvanized grades. A slight revision was made in the prices applying on genuine wrought iron pipe, the demand being thrown upon this owing to the scarcity of the ordinary grade. The following quotations apply.

Standard Buttweld Pipe
Per 100 Ft.

	Steel Blk.	Steel Galv.	Gen. Wrought Iron Blk.	Gen. Wrought Iron Galv.
1/8	$ 6.50	$ 8.50	$.....	$.....

Some New Supplies Sheet Will Arrive

Montreal.

SHEETS AND PLATES.—It is expected that the sheet market will be somewhat improved through the arrival of English sheets which now promise to come to this market early in September. This will be encouraging to the trade, and while the receipt of tonnage will only increase gradually, the sign is encouraging. Prices still are firm and high and there is nothing to indicate that there will be any easing of the undertone for some time.

BLACK SHEETS—

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

May be Some Time For Easier Bar Iron

Montreal.

IRON AND STEEL.—Mills are not delivering much bar iron or steel, and as a matter of fact the situation is getting worse rather than improving. Jobbers state that they cannot obtain necessary stocks of staple sizes of iron and steel and the demands this fall, from all accounts, will be active. Prices are firm, though unchanged.

IRON AND STEEL

Iron finish machinery steel		$5 05
Norway iron	13 50	15 00
Single reeled machinery steel		6 50
Spring steel		5 50
Sleigh shoe steel		5 50

Common bar iron, per 100 lbs.		4 65
Refined iron, per 100 lbs.		5 65
Mild steel		5 00

3-16 and thinner flats in iron or steel take extra 50c per 100 lbs. over base and regular extra.

Not Easy to Get Scoops For Fall

Montreal.

SCOOPS, ETC.—Owing to the scarcity of those gauges of sheets of which scoops are made, there is naturally a shortage of scoops for fall, and the jobbing trade reports that these lines may be somewhat scarcer when the active demand manifests itself. With a heavy grain crop in prospect it will be well to obtain one's needs for the fall trade according to advices just received. Prices are firm but unchanged.

Wire Products Scarce; Higher Bases Ruling

Montreal.

WIRE PRODUCTS.—In addition to the changes outlined in Hardware and Metal last week on hay wire there have been revisions as well on plain galvanized wire. This is based here as follows: No. 9, $6.40 per 100 lbs.; No. 12, $6.65. It is most difficult to obtain wire from the mills, and some look for still greater stringency this fall.

Jack Chain Higher Owing Change Discount

Montreal.

CHAIN.—An advance of price is registered on jack chain. This comes as a result of a change in the discount. Steel jack chain now carries list price, plus 45 per cent., and brass jack list, plus 35 per cent.

Prices Reduced on Leather Soles

Montreal.

LEATHER SOLES.—Prices are marked lower on various leather soles and on heels. The decrease is approximately 20 per cent. Soles are selling at these prices: No. 36, $4.45 per doz.; No. 37, $4.15; No. 37½, $2.55; No. 10, $7.35; No. 11, $6.10; No. 14, $3.35; No. 15, $2.80; No. 121, $4.55; No. 123, $4.20, and heels: No. 50, $1.80; No. 141, $1.15;, and No. 81, $1.20. This is due, of course, to recent softening of the leather market and perhaps the easing off of orders has had some effect.

School Slates Are on Higher Basis

Montreal.

SLATES.—Prices are revised upward on school slates. These quotations are made by the jobbing trade: 5 x 7, per doz., $1.15; 6 x 9, $1.60; 6½ x 10, $1.70; 7 x 11, $1.90; 8 x 12, $2.25, and 9 x 13, $2.75.

Cistern Pumps Are Costing More Money

Montreal.

CISTERN PUMPS.—Prices are marked up on some lines of cistern pumps. Pitcher spout pattern are quoted at 20 per cent. off list and closed spout at 10 per cent. off. Cottage force are selling, No. 6, at $7.75 each.

Rivet Lists Higher; Discounts Unchanged

Montreal.

RIVETS.—A new list of prices on standard rivets, copper belt rivets and burrs, tinners' and copper rivets, iron belt rivets and burrs, and also extras,

has been issued by the manufacturers. This list is effective as from August 9. The discount of 32½ per cent. is still effective, the list only being changed. List will be found in another column.

Screen Hinges Are Now Priced Higher

Montreal.

SCREEN DOOR HINGES.—Prices are higher on No. 20 screen door hinges. These are now quoted at $2.50 per dozen. The increase amounts approximately to 50 cents per dozen.

Another Advance Made for Some Washboards

Montreal.

WASHBOARDS. — Advances have again been made for washboards. This is definitely in accord with the tendencies forecast in Hardware and Metal for some time back. The scarcity of glass, the increasing basis for woodenware and continued high wages are contributory causes. "Supreme" zinc are quoted at $6.50 per dozen; "Competitor Globe," $5.90; heavy zinc, $7.25; "Surprise Toy," (zinc), $3; "Canuck" glass, $8.75, and "Enamel Queen," $9.50.

Big Brush Orders Absorb Much Stock

Montreal.

BRUSHES.—Manufacturers have been very busy this summer in executing orders placed with them. "We have more than we can handle, and orders are accumulating," said a Montreal manufacturer to Hardware and Metal. "There is not likely to be much relief this year in getting raw materials." Prices are very firm under these conditions, and there will probably be no relief in the way of price or of supply. China, according to latest advices, is supplying most of the bristle stock, Russia being counted out for the present. The season has been an active one, and doubtless the fall activity will be satisfactory.

Sheet Copper and Tubing Marked Up

Montreal.

COPPER SHEETS.—Tinned copper is holding on a stronger basis. For ordinary copper sheets tinned on one side the basis here is advanced to 48 cents a pound, and for polished and tinned 52 cents is the base price. Copper tubing is quoted at 50 cents a pound.

Canada Plates Will be Scarce This Fall

Montreal.

CANADA PLATES. — As already pointed out in previous issues, the scarcity of Canada plates has been very marked for some time. Some hoped that the dearth of supplies would be greatly relieved but there seems to be little promise now of relief coming this fall. Those who have secured their requirements may, according to importers of these products, consider themselves fortunate, and it would seem to be good advice to conserve supplies and to make no sacrifice of them. Prices are rather nominal, but range around $13.25 per box for 60 sheets, ordinary grade.

Little Feature Shown Throughout Ingot List

Montreal.

INGOT METALS.—Little change has manifested itself in the list during the past week, sales being limited and prices, with the exception of that on antimony, remaining unchanged. Some are disappointed that the yield of Canadian lead and copper is so limited this year. At the same time there is plenty available for present needs from outside sources.

LEAD.—English lead is procurable on a fair price basis, in fact it is stated that supplies from there can be secured for less money than from the States. Local basis holds at 10¼ cents.

TIN.—Very little fluctuation has been apparent in the London market, and with the feverish spread of price range removed there is a better tone. Sales are transacted at 56 to 57 cents per pound.

ANTIMONY.—This is the one ingot that shows change this week, the undertone being softer, with price reduced to 10 cents a pound.

COPPER.—Local business is not heavy. Quantities are available to meet present needs and prices are quite steady. For electrolytic 24½ cents per pound is quoted, and for casting 24 cents.

ALUMINUM.—Little interest centres around this. The movement is seasonable with quotations ranging from 37 to 39 cents according to quantity.

SPELTER.—A price of 10¾ cents still applies on this, and there is a steady though limited volume of business.

TORONTO MARKETS

TORONTO, August 19.—Business this week is said to be very good in nearly every line of hardware and despite the holiday season manufacturers and jobbers are well satisfied with amount of business done. Higher prices are noted, as usual, in quite a few lines with very few indications of any downward revisions.

Among the commodities on which higher quotations are given are pumps, excluding the semi-rotary type, iron rivets, cut nails, bale ties, mop wringers, pyrex ware, thumb latches, knife handled wrenches, crescent wrenches, cotton clothes lines, and some makes of washboards. Lawn mowers of Taylor Forbes make are also marked higher for next season while increased prices go into effect on some lines of sheathings, tarred felts and roofing. A great scarcity continues on sheets both black and galvanized and on Canada plates, iron pipe and pipe fittings and also wire goods and wire nails.

Leather soles and heels have been reduced in price about 15 per cent.

The ingot metal market is reported a little brisker and prices generally are sustained. Lower prices were in evidence on the English metal markets but have not reacted on the U.S. markets and it is said that steel men look for a long period of active demand and brisk industrial operations, with the railroads gradually absorbing a larger and larger share of the iron and steel output which will more than offset any decline in consumption of iron and steel products by the automotive industry or any other section of industry which may have been affected by the movement away from inflation and extravagance. If such is the case it does not look as if iron and steel products are likely to decline for some time.

Prices on Pumps Advance 15%

Toronto.

PUMPS.—All pumps of the Smart make with the exception of the Red Wing semi-rotary pump have been increased in price approximately 15 per cent. The higher cost of raw material and increased cost of production are the reasons for this. The rotary pumps remain at the same discount as formerly.

Stoves and Furnaces on Short List

Toronto.

STOVES AND FURNACES. — Manufacturers report a satisfactory amount of business in stoves and ranges, and notwithstanding the higher prices demanded now compared to a year ago, the stove manufacturers seem to be well pleased with the volume of sales, and the only thing they are worried over is how to fill all the orders. It seems as if it will be a case of "first come first served" again, and those who got their orders in early will have the best chance of getting the goods. The factories are beginning to ship the booked orders for heaters and ranges. The range that can be used for coal and wood and also gas is having a ready sale in towns and cities where gas is available. Furnaces look like being short, too, the production having been held up for want of material and the

foundries are away behind with their orders.

Compression Bibbs and Valves Prices Unchanged

Toronto.

VALVES AND BIBBS.—The demand for compression goods and valves continues good although it has dropped off this past week or two. No price change is reported or expected and stocks are fairly plentiful in comparison to some lines. The discount of the better known lines is given as follows:

Compression work, standard	25%
Fuller work, standard	30%
Bath cocks, compression	25%
Bath cocks, Fuller	28-30%
Flatway stop and waste cocks, standard	25%
Roundaway stop and waste cocks, standard	25%
Brass steam cocks, standard	add 10%
Globe, angle and check valves, standard	add 5%
J.M.T.	plus 10%
J.M.T. C	Net
Gate or straightway	Net
Jenkins gate valve	10%
Standard gate	list plus 5%
Jenkins Globe	list plus 20%

F.o.b. Toronto.

Stocks Light of Black and Galvanized Sheets

Toronto.

BLACK AND GALVANIZED SHEETS.—The situation in these has not improved any and both black and galvanized are reported very scarce. While the demand is not so heavy as it was, jobbers cannot fill the orders they receive and any supplies they may get from the mills do not remain very long on their hands. No change is recorded in prices, but it is recognized that quotations are largely nominal, and as an example a jobber instanced a case where a shipment of black sheets his firm sent out cost more than prevailing prices of the same gauge in galvanized.

The following are latest quotations:

BLACK SHEETS

14 gauge	$8 95
16 gauge	9 00
18-20 gauge	9 45
22-24 gauge	9 50
26 gauge	9 55
28 gauge	9 65
3-16 inch plate	9 75
¼-inch boiler plate	....

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS

	Premier		Apollo	
10¾ oz.	$12 00	$12 50	$12 00	$13 25
U.S. 28	11 45	12 70	11 45	12 85
U.S. 26	11 15	12 40	11 15	12 55
22 and 24	11 00	12 25	11 00	12 40
18 and 20	10 70	11 95	10 70	12 10
16	10 70	11 95	10 70	12 10
12 and 14	10 55	11 20	10 55	11 95

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Bar Iron and Steel Firm; Supplies Short

Toronto.

BAR IRON AND STEEL.—There is a continued report of short stocks of bar iron and steel, and men in the trade profess to be unable to foresee any improvement in sight according to reports; raw, semi-finished and finished materials are piling at the mills, but the greatest difficulty is getting cars to ship products. The fuel situation is still acute and a large number of mines are still idle. Prices of pig iron in the States have already begun to advance to take care of increased freight rates, and it is expected that local markets in iron and steel will shortly feel the effect.

Current quotations are unchanged, but higher prices may have to be paid in some cases.

IRON AND STEEL

Common bar steel, 3-16 in. and lighter	$ 6 00
Common bar steel, ¼ in. and heavier	5 50
Common bar iron, 3-16 in. and lighter	6 00
Common bar iron, ¼ in. and heavier	5 50

Sleigh shoe steel	5 75
Hoop steel	6 75

New List on Black Iron Rivets

Toronto.

BLACK IRON RIVETS.—A new list is issued on iron rivets and becomes effective August 9th. The prices given are list price per pound in 200 lb. kegs. The discount remains unchanged. Copper belt rivets and burrs and iron belt rivets and burrs, tinned or copperplated, remain unaffected.

Revision on Bale Ties Approximately 5%

Toronto.

BALE TIES.—A new price is in effect on single bale ties, being an approximate advance of 5 per cent. The following are the new prices:

No. 12, $7.30; No. 13, $7.40; No. 13 1-2, $7.45; No. 14, $7.60; No. 15, $7.75; No. 16, $7.90.

Rope Sales Good; Prices Firm and Unchanged

Toronto.

ROPE AND SASH CORD.—The demand for rope and cordage continues very good without change in prices. The demand for binder twine has slackened off as the season is well advanced. Sash cord continues to move well and the demand for cotton rope has been remarkably good. Prices remain unchanged and will be found on current market quotation pages.

Famine in Canada Plates; Market Cleaned Up

Toronto.

CANADA PLATE—Jobbers and dealers report an unprecedented shortage in these and scarcely any signs of improvement. Orders are away behind and it may be weeks yet before deliveries are made. In the meantime though no price change is announced, dealers have to offer increased premiums to obtain what little is available.

50 Pound Boxes	add 3c. to List
25 Pound Boxes	add 4c. to List
5 or 10 Pound Packages	add 5c. to List
1 Pound Packages	add 8c. to List

The general list of Rivets as shown in the above List in regular Round, Flat, Wagon-box, Truss, Hame, Wheel, Cone Head or Countersunk, shall be considered as Standard.

Lengths other than Standard and Special Heads in quantities less than 100 lbs., prices on application, the following net extras apply:—75 to 100 lbs., 3c. per lb. 50 to 75 lbs., 4c. per lb. 25 to 50 lbs., 5c. per lb. 10 to 25 lbs., 10c. per lb. Less than 10 lbs., 25c. per lb.

Extra for Metallic or Wash Tinning, Copper or Brass Plating and Galvanizing. Prices on application.

Cut Nails Ruling Firm and Scarce

Toronto.

CUT NAILS.—There is a fair demand for cut nails and prices stay firm with no sign of any decline. The present quotation is $6.90 per keg of 100 lbs., f.o.b. Montreal. The extras for galvanizing nails are as follows: for 1 inch and over $4.00 per 100 lbs.; under 1 inch, $4.50 per 100 lbs.

Mobiloil Is Revised Upwards 10 Per Cent.

Toronto.

GARGOYLE MOBILOIL.—This grade of gas engine cylinder oil has been re-

vised and the following are latest prices:

Gargoyle Mobiloil, E and Arctic, $1.60; Gargoyle Mobiloil, B and Arctic, $1.95; Gargoyle Mobiloil, BB and Arctic, $1.90; Gargoyle Mobiloil, A and Arctic, $1.80. List less 15 per cent. on above.

Aluminum Coffee Percolators in Demand

Toronto.

ALUMINUM COFFEE PERCOLATORS, which have been very scarce for some time and hard to get, are again on the market and having a ready sale.

Prices quoted are $3.05 and $3.25.

Side Cutting Pliers Revised in Price

Toronto.

SIDE CUTTING PLIERS.—The new price on 8-inch side cutting slip joint pliers is now $7.00 dozen.

Higher Prices on Reliance Mop Wringers

Toronto.

MOP WRINGERS.—There has been an advance in the price of the Reliance All Steel Mop Wringers and they are now quoted at $5.00 in the small size and $5.70 in the large size.

Steel Thumb Latches Have Advanced in Price

Toronto.

STEEL THUMB LATCHES. — The new price on the No. 1 steel thumb latch is now $2.40 per dozen.

Knife Handle Wrenches Again Advanced

Toronto.

KNIFE HANDLED WRENCHES.—New prices on Whitman and Barnes make of knife handled agricultural wrenches are in effect.

The new net quotations are as follows: 8 inch, $18.00 per dozen; 10 in., $22.00 doz.; 12 in., $28.00 doz.; 15 in., $38.00 doz.; 18 in., $48.00 doz.; 21 in., $58.00 doz.

Revised Prices on Crescent Wrenches

Toronto.

CRESCENT WRENCHES.—This well known make of wrench has been revised in price upwards and the new quotations are for 6 in. $9.00 doz.; 8 inch, $11.00 and 10 in., $13.80 per doz.

Prices Unchanged on Lead and Zinc Products

Toronto.

LEAD AND ZINC PRODUCTS.—There has been little change to report on these lines this week and business is a little quiet. Prices are ruling firm, with the exception of solder, which shows signs of easiness.

Quotations on principal lines follow:

Lead pipe, list, per lb.	0 17
Lead waste pipe, list, per lb.	0 18
Do., over 8 in., list, per lb.	0 19
Lead traps and bends	add 30%
Lead sheets, 4 to 6 lbs. sq. ft., in rolls, lb.	0 18
Cut sheets ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 43
Solder, strictly, lb.	0 35
Solder, commercial, lb.	0 33
Solder, guaranteed, lb.	0 39
Solder, wiping, lb.	0 33
Zinc sheets, per lb.	0 19

Trading in Waste Materials Dull

Toronto.

WASTE MATERIALS. — Business has been on the quiet side in waste materials though a slight improvement is noted. Prices rule unchanged from last week's quotations and are as follows:

WASTE MATERIAL

No. 2 busheling	$13 00
Stove plate, per ton	32 00
Yellow brass	0 10
Red brass	0 15¾
No. 1 machinery cast	33 00
Heavy melting steel	15 00
Heavy copper	0 17
Scrap zinc	0 06
Light brass	0 08
Wrought iron, No. 1, per gr. ton	15 00
Heavy lead pipe	0 06
Old rubbers, boots and shoes	0 06
Overseas lumbermen's rubber boots	0 04
Bicycle tires	0 01½
Automobile tires	0 02½
Heavy lead pipe	0 05¾
Tea lead	0 03

Cotton Clothes Lines Advanced About 10%

Toronto.

COTTON CLOTHES LINES. — There has been an advance on cotton clothes lines and the new prices given below are approximately 10 per cent. higher.

New prices: 40 ft. lengths, $4.20 per doz.; 48 ft. lengths, $5.10 per doz.; 60 ft. lengths, $6.35 per doz.

Pyrex Ware Advanced in Price 20%

Toronto.

PYREX WARE.—New lists have been issued covering the whole line of Pyrex goods, which show an advance of approximately 20 per cent. The discount still remains as before, namely 30 per cent. off list.

Reduced Prices on Leather Soles and Heels

Toronto.

LEATHER SOLES AND HEELS. — Slight decreases have been made in leather tap soles and heels. New prices are about 10 per cent. less, and are as follows:

Soles: No. 121, $4.65 per doz. prs.; No. 122, $4.45 per doz.; No. 123, $4.30 per doz.; No. 37½, $2.60 per doz.; No. 31½, $3.40 per doz. Men's heels, 70 cents; Women's heels, 60 cents; Boys' heels, 65 cents.

10% Advance on Glass Washboards

Toronto.

WASHBOARDS. — Glass washboards have been advanced about 10 per cent. and are now selling at $8.75 per doz. Some other lines of washboards have also come in for revision, and new prices are: Baby Globe, $3.00 doz.; Enamel Queen, $9.50 doz.; Solid Rack Globe, $7.25 doz.; Supreme Zinc, $6.50 doz.

Wire Nails Unchanged, But Not Plentiful

Toronto.

WIRE NAILS. — There has been no change in the price of wire nails, but they continue to be scarce, and deliveries from the mills show no signs of improvement.

The price is quoted round $6.40 base for wire, and $7.35 for cut, F.O.B. Toronto.

New Prices on Lawn Mowers

Toronto.

LAWN MOWERS. — New prices which are considerably higher—as announced in these columns last week—are out for lawn mowers for next season, and the following are new quotations for the Brockville make:

Whippet, 3 blades—12 in., $7.65; 14 in., $8.35; 16 in., $8.95.

Model C, 4 blades—12 in., $10.50; 14 in., $11.05; 16 in., $11.60; 18 in., $12.05; 20 in., $13.10.

Model C, 5 blades—12 in., $10.90; 14 in., $11.40; 16 in., $11.95; 18 in., $12.40; 20 in., $13.45.

Bluebird, 4 blades—12 in., $12.25; 14 in., $12.85; 16 in., $13.45; 18 in., $14.10; 20 in., $14.45.

Bluebird, 5 blades—12 in., $12.90; 14 in., $13.50; 16 in., $14.10; 18 in., $14.70n 20 in., $15.25.

Model K, 3 blades—8 in., $8.90; 10 in., $9.30; 12 in., $9.50; 14 in., $10.10; 16 in., $10.50.

Model K 4 blades—8 in., $9.30; 10 in., $9.70; 12 in., $10.10; 14 in., $10.50; 16 in., $10.90; 18 in., $11.65.

Model K, 5 blades—8 in., $9.70; 10 in., $10.10; 12 in., $10.50; 14 in., $10.90; 16 in., $11.65; 18 in., $12.

Less 20%.

Genuine Stillson Wrenches Now Higher

Toronto.

STILLSON WRENCHES. — The genuine Stillson wrench now carries a discount of 20 per cent., and the Canadian pattern 25 per cent.

Wares in Demand; Prices Unchanged

Toronto.

WARES. — There is a good steady demand these days for all wares including enamelled, tin, aluminum and galvanized kitchen ware. Stocks are fairly low in manufacturers' hands and difficulty in getting supplies of raw material is hampering production. Prices continue unchanged and discounts are as in current quotation market pages.

Iron Pipe Scarce and Firm

Toronto.

WROUGHT IRON PIPE. — Both black and galvanized iron pipe are still scarce, especially the galvanized, and jobbers find it extremely difficult to cope with the business they are getting, although it is less now. Conditions at the mills do not seem to have improved any.

Prices are unchanged and are quoted from list No. 46, and will be found on current market pages.

Pipe Fittings Unchanged; Stocks Are Low

Toronto.

PIPE FITTINGS. — The demand is good for various kinds of pipe fittings, and jobbers find it hard to fill orders.

Many sizes are out of stock, and supplies are only coming round again slowly. Prices are as follows:

PIPE FITTINGS

Cast iron fittings	Plus 10%
Plugs	7½%
Bushings	10%
Unions, ¼-in. to 2½-in.	30%
Do., ⅜-in. to 3-in. and larger	25%
Dart unions, ¼-in. to 2-in.	Plus 50%
Do., 2½-in. and larger	8%
Nipples, up to 4-in.	60%
Do., 4½-in. and larger	50%
Do., running thread, 4-in. and under	30%
Couplings, 4-in. and under	30%

MALLEABLE FITTINGS

Class A	0 70	0 85
Class B	0 30	0 40
Class C	0 20	0 30

Cotton Waste Unchanged and Firm

Toronto.

COTTON WASTE.—The demand for cotton waste continues to be good and stocks are fairly plentiful. Prices are unchanged, with little expectations of any variation. Current quotations as below.

Above lines subject to trade discount for quantity.

Papers and Tarred Felts Will Have Higher Price

Toronto.

SHEATHINGS AND TARRED FELTS.—An advance has been made in these products though the lists with new prices have not been issued at time of going to press. Increased cost of production and higher prices ruling on raw materials are said to be the cause of advance in prices.

More Demand for Ingot Metals; Prices Firm

Toronto.

INGOT METALS. — There has been a little brisker tone to the metal market this week and the general slowing up in these lines of the past few weeks seems to have been arrested.

TIN. — There appears to be considerable quantities of tin available and prices are firm around 56 cents per pound.

LEAD.—Slight advances appear to be the feature of the market in lead. Local quotations are at 10 cents.

SPELTER. — Continues unchanged at 10¾ cents, but is said to be somewhat easier.

ANTIMONY.—This continues featureless, with some declines, and is quoted at 10 cents.

COPPER. — An improvement is reported in some markets, while others are noted for dullness. The price quoted for casting copper is 24 cents per pound.

ALUMINUM. — This continues unchanged at 37 cents, and market is said to be rather featureless.

LONDON MARKETS

LONDON, August 19.—With the approach of fall hardware business is speeding up again and a good trade is reported by jobbers and merchants alike, during the past week.

The harvest is in full swing and a heavy demand for seasonable lines has been experienced. Many lines this week are advanced.

Higher prices are quoted on screen door hinges and sets. Sandpaper, apple parers, electric goods of the Canadian Beauty make, stove-pipe dampers, jack chain and motor stains. Lawn mowers and sap spiles for spring booking show an advance. A seasonable demand is reported on linseed oil and white lead. Collections are said to be excellent.

Nails Sales Large; Supplies Limited

London, Ont.

WIRE NAILS.—There is said to be a big demand for wire nails, but the supply is very limited and does not keep pace with the demand. No improvement in deliveries is noted or expected for a considerable period. Present quotations are for wire, $6.25 per keg base and $7.50 per cwt.

Linseed Oil Sale Seasonable; Unchanged

London, Ont.

LINSEED OIL.—The sale for linseed oil is reported to be good for the season of the year and prices are unchanged as follows:

Raw—1 to 2 bbls., $2.12 per gal.; 3 to 5 bbls., $2.11 per gal.; 6 to 9 bbls., $2.09 per gal.

Boiled—1 to 2 bbls., $2.15 gal.; 3 to 5 bbls., $2.14 gal.; 6 to 9 bbls., $2.12 per gal.

Less bbls., add 15 cents per gal.

No Change in Price of Turpentine

London, Ont.

TURPENTINE.—No change is recorded in the price of spirits of turpentine. Sales continue to be fair and quotations are: 1 bbl. lots, $2.65 gal.; 2 to 4 bbl. lots, $2.64 per gal.; 5 gallon lots, $2.80 per gal.

Harvest Goods Find Ready Sale

London, Ont.

HARVEST GOODS.—The demand for all lines of harvest goods has been brisk though naturally with the season so far advanced a slackening is noticed. Considerable quantities of repeat orders are being placed with jobbers. Prices are unchanged at 50 and 10 per cent. off list.

List Higher on Canadian Beauty Irons

London, Ont.

CANADIAN BEAUTY IRONS.—This make of electric iron has been advanced in price. The new list price is $8.00 and the discount being 27 per cent., the net price is now $5.84.

New Prices on Apple Parers

London, Ont.

APPLE PARERS.—A new advanced price is out on Little Star and Hudson apple parers and following are present quotations: Little Star, $15.00 doz.; Hudson, $20.00 per dozen.

15% Advance on Sand Paper

London, Ont.

SANDPAPER. — Higher quotations have been made on sandpaper, with approximate advance of 15 per cent. and the Baeder, Adamson and Star brands are now selling at net list.

Good Demand For Steel Wool

London, Ont.

STEEL WOOL.—The sale for steel wool is said to have been particularly good. Present quotations are as follows: Family size, $1.25 per dozen packets; 1 lb. packages, No. 0, 92c per lb.; 1 lb. packages, No. 1, 80c. per lb.; 1 lb. packages, No. 2, 65c per lb.

Electric Toasters Costing More

London, Ont.

ELECTRIC TOASTERS.—The Canadian Beauty make of electric toaster is now costing $5.84 net. The new list price is advanced from $7.50 to $8.00 with a discount of 27 per cent.

Canadian Beauty Electric Grills Advanced

London, Ont.

ELECTRIC GRILLS.—The electric grill of the Canadian Beauty make has been advanced $1.50. The new price list is $14.00 less 27 per cent. and net price is $10.22.

Advance in Steel Stove Pipe Dampers

London, Ont.

STOVE PIPE AND DAMPERS.—An

advance has been made in steel stove pipe dampers and new prices are: 6 in., $1.25 per doz.; 7 inch, $1.50 per doz.

Mortar Stain New Higher Price

London, Ont.

MORTAR STAINS.—New prices are effective on these as follows: Red, $2.00 per 100 lbs.; black, $3.80 per 100 lbs.

Steel and Brass Jack Chain Higher

London, Ont.

JACK CHAIN.—A new discount is out on steel and brass jack chain, which is approximately 10 per cent. higher. The discount on steel is list plus 45 per cent. and on brass list, plus 35 per cent.

New Higher Prices For Screen Door Hinges

London, Ont.

SCREEN DOOR HINGES.—New and higher prices are out for present and spring booking on screen door hinges and the new quotations are as follows: No. 20, $2.50 per doz. prs.; No. 50, double acting, $7.00 per doz. prs.; No. 2255, $3.85 per doz. sets.

Sap Spouts Higher For Spring Booking

London, Ont.

SAP SPOUTS.—Higher prices on sap spouts for next spring's booking are announced and are as follows: Eureka, $16.85 per 1,000 in case lots; smaller quantities, $1.75 per 100.

Big Advance in Lawn Mowers

London, Ont.

LAWN MOWERS.—A considerable advance in prices of from 15 to 25 per cent. is noted in new lists for the Taylor Forbes make of lawn mowers. This increase takes effect immediately, so that any orders for present delivery would be affected as well as those for next spring's booking.

Lists have not been changed, but new discounts are quoted.

New prices are as follows:

Daisy, 12 in., $8.25; 14 in., $9; 16 in., $9.70. Less 15%.

Empress, 14 in., $15.25; 16 in., $16; 18 in., $16.65; 20 in., $17.35. Less 15%.

Star, 14 in., $10.70; 16 in., $11.40. Less 10%.

Woodyatt, 14 in., $11.80; 16 in., $12.50; 18 in., $13.20; 20 in., $13.90. Less 10%.

Lower Prices on Leather Soles and Heels

London, Ont.

HALF SOLES AND HEELS.—Lower quotations are recorded for leather half soles and leather heels. The reduction is approximately 10 per cent. and the prices on some of the best sellers are given below:

Soles—No. 30½, Boys, $3.55 per dozen pieces; No. 31½, Boy's, $3.30; No. 37½, Ladies, $2.55; No. 43½, Misses, $2.05; No. 123 Men's, $4.20; No. 122, Men's, $4.35; No. 121, Men's, $4.55.

Heels—No. 80, Ladies, $1.20 per dozen pieces; No. 81, Ladies, $1.20; No. 52, Men's, $1.45; No. 51, Men's, $1.60.

New List on Iron Rivets; Price Higher

London, Ont.

IRON RIVETS.—A new list is in effect on iron rivets with price based on 200 lb. kegs. For 5 lb. kegs add 5 cents per pound to list and for 1 lb. pkgs. add 8 cents.

The new list will be found printed in another column.

Selling Price of Rope Unchanged

London, Ont.

ROPE.—There has been no change in the price of rope and the demand has been very good. The principal base prices are given herewith: Pure Manila, 35 1-2c.; Beaver Manila, 28c.; New Zealand hemp, 28c.; Sisal, 22 1-2c.

Window Glass Selling Firm and Unchanged

London, Ont.

WINDOW GLASS.—No price change is quoted on window glass and a fair demand for this product is being experienced. Stocks are only medium and discounts are as follows: single diamond, 15 per cent. off list; double diamond, 15 per cent. off list; cut lights, 40 per cent. off list.

Putty Moves Well, With Price Firm

London, Ont.

PUTTY.—The sale for putty continues to be good and no change in price is noted or seems likely at present. The scarcity of whiting has offset any reduction in the oil. Present quotations: Standard 100 lb. drums, $8.30 per 100 lbs.; standard 25 lb. irons, $8.55 per 100 lbs.; pure 100 lb. drums, $10.80 per 100 lbs.; pure 25 lb. irons, $11.05 per 100 lbs.

White Lead in Oil Good Seasonable Sale

London, Ont.

WHITE LEAD.—The demand for white lead in oil has been good, considering that at this season of the year the majority of the travellers are taking their holidays.

The product is holding firm with no change in prices looked for.

Quotations are as follows:

Pure—tons, $20.45; less tons, $20.80 per 100 lbs.; Elephant Brand, $20.95 in tons, less tons, $21.30 per 100 lbs.

WINNIPEG MARKETS

THE hardware trade for the past week throughout the Western Provinces has been very good. Past experience has evidently had some effect in regard to the dealers taking early delivery of their fall requirements as many booked orders for fall are being shipped out at this time. The fact that the harvest is now in full swing is reflected in the many orders being received for threshers' supplies and lines of hardware generally used at this season of the year. There is quite a noticeable movement in automobile tires and accessories. Builders' hardware and paints and varnishes are moving fairly well and there is also considerable demand for such lines as stove pipe, elbows, lanterns, etc.; as well as pipe and fittings of all kinds. As the fall season approaches it becomes more apparent that there is going to be an acute shortage of Canada plate and it is next to impossible to procure any of this material at all. The shortage of various materials is becoming quite marked in some quarters. Barbed wire manufacturers have advised that they will soon be unable to procure wood from which to make wooden spools for barb wire and before long wire will appear on the market reeled on steel spools.

A good many changes have been made this week in the prices of hardware commodities. In the majority of cases the price is marked higher. A slight reduction has been made in the price of solder. Grub hoes and grub mattocks have a higher price. Railroad and rock picks have also advanced quotations. Many lines of tools and builders' hardware have been marked up this week. Other lines such as Holstein cow bells, turn buckles, iron and steel horse shoes, wire stretchers, carriage whiffletrees, horse muzzles, horse blankets, ice tools, brooms, Pyrex ware, Canada plate, Heinisch shears, Belgian guns, McCullough tube skates, McGregor footballs, whiting, roofing pitch and some lines of brushes have all been revised upwards in price.

Crow-bars Advance in Price 15%

Winnipeg.

CROW-BARS. — The price on crow-bars has been advanced this week approximately 15 per cent. and they are now quoted at 12 1-2 cents per pound.

CLAW-BARS. — The price has also been advanced on claw-bars and this week's price is 16 cents per pound.

Grub Hoes and Mattocks Advance $1.00 Per Doz.

Winnipeg.

GRUB HOES.—The priec has been advanced on grub hoes, which are quoted now at $12.50 per dozen.

GRUB MATTOCKS.—The price on grub mattocks has also been advanced and today's price is $15.50 per dozen.

Pick Mattocks Revised Upwards in Price

Winnipeg.

PICK MATTOCKS.—All new shipments of mattocks are higher in price. This is on account of scarcity of raw material and also manufacturers have to pay more for same.

The price quoted this week for pick mattocks is $15.25 per dozen.

Turnbuckles Show Increase in Price

Winnipeg.

TURNBUCKLES. — The supply of this commodity is not any bigger than the demand and every shipment from the factory is a trifle higher in price than the one previous.

The following quotations are made this week: 1-2 inch, 66c.; 5-8 inch, 76c.; 3-4 inch, 96c.; 7-8 inch, $1.13; 1 inch, $1.33; 1 1-8 inch, $2.70; 1 1-4 inch, $3.00; 1 1-2 inch, $3.50.

New Higher Quotations on Wilcox Wire Stretchers

Winnipeg.

WIRE STRETCHERS.—A new quotation has been made on the price of Wilcox wire stretchers. No. 1 is now quoted at $22.00 per doz. and No. 2 at $37.50 per dozen.

Horse Muzzles Higher; Booked Orders Plentiful

Winnipeg.

HORSE MUZZLES.—Many orders are being received every day by the jobber for fall shipments of horse muzzles. Stocks are in fair shape at the present time, but will not last long if the demand of this week is kept up. The following prices are quoted: No. 4, $4.70 per dozen; No. 3, $3.30 per dozen; No. 11, $4.20 per dozen.

50% Advance in Butter Bowl Prices

Winnipeg.

BUTTER BOWLS.—The big advance in the price of butter bowls is due of course to the scarcity of all kinds of wood and the future looks none too good for further supplies of commodities that require special wood in their manufacturing.

The following prices are quoted on butter bowls this week: 13 inch, per doz., $9.60; 15 inch, per doz., $14.00; 17 inch, per doz., $24.00; 19 inch, per doz., $30.00; 21 inch, per doz., $36.00.

Big Demand For Wire Nails; Supplies Short

Winnipeg.

WIRE NAILS.—The demand is still very active with but little relief in view. It looks very much as if the market will be bare for the present season unless supplies become more plentiful.

The price is firm and the basis holds steady at $7.00 per keg.

Good Demand For Building Papers

Winnipeg.

BUILDING PAPERS.—Prices are firm on all lines of building, paper and roofing, and there is little hope for lower prices. The present demand is caused by the filling of back orders, and the manufacturers are still finding it difficult to procure raw material.

Stillson Wrenches Again Advance

Winnipeg.

STILLSON WRENCHES. — Higher prices have again been made on Stillson wrenches. The new quotations are approximately 7 1-2 per cent. higher than the old price. The discount for the Stillson pattern is 25 per cent. and the discount for the genuine Stillson is 20 per cent. off the list.

Stillson wrenches. List.—6 inch, each $2.00; 8 inch, each $2.25; 10 inch, each $2.50; 14 inch, each $3.50; 18 inch, each $5.00; 24 inch, each $7.25; 36 inch, each $13.50.

Higher Prices on Horse Shoes; Stocks Lower

Winnipeg.

HORSE SHOES.—Higher prices are quoted this week on iron horse shoes and not unlike other lines manufactured from iron the tendency is for higher prices and limited shipments from the factory.

The following prices are quoted today on iron horse shoes: Light and medium, Nos. 0 and 1, $9.60; No. 2 and larger, $9.35; snowshoes, Nos. 0 and 1, $9.85; No. 2 and larger, $9.70.

Canada Plate Costs More and Is Very Scarce

Winnipeg.

CANADA PLATE.—The future for Canada plate is serious. There is little or no stock and the price quoted today is not reliable as many say prices are paid in order to get any quantity to partly fill orders.

The following prices are quoted this week: Ordinary size, 18x21, per box, $13.25; 18x24, per box, $13.25; 20x28, per box, $13.50. Special Blued, size 18x21, per box, $14.00; 18x24, per box, $14.00; 20x28, per box, $14.25;

Solder Down 5 Cents Per Pound

Winnipeg.

SOLDER.—A revision has been made in the prices of metals and with the exception of solder, the prices have remained firm and the tendency is for higher quotations. Stocks of solder are good which is probably the reason for a lower price, and the demand is only fair.

Solder, strictly half and half, is quoted today at 43 cents per pound in case lots; in less than case lots, 44 cents per lb.; wiping solder in case lots, 35 cents per lb.; in less than case lots, 36 cents per pound.

PITTSBURGH MARKETS

PITTSBURGH, August 19.—In the general iron and steel market situation pig iron and coke occupy the centre of the stage. Steel products are quiet and merely show, on the whole, a slight declining tendency. Pig iron on the other hand has lately assumed a very aggressive attitude, with some furnacemen predicting much higher prices, and some sales being made at actual advances. It is true that other furnaces deprecate advances and state they will be the last to quote higher prices. The advances in pig iron, when made, have been based upon scarcity rather than upon volume of demand, while the common excuse of furnacemen has been the high price of Connellsville coke. For some time this excuse held good, or at any rate coke stayed at an altogether fancy price. Now, however, coke seems to be lined up for a decline. At the moment of this writing no actual decline is found in the market but in some quarters it is held that everything is set for a decline within a couple of days or so.

A tense situation is accordingly produced, with pig iron having assumed an advancing attitude, partly on account of coke, and coke now threatening to decline and remove this supporting factor.

In some quarters it is thought that the furnacemen who of late have been actively engaged in endeavoring to push the market upwards were doing so because they felt that while the pig iron market could not stay up for any length of time there was a combination of circumstances in which they could push the market up temporarily and make something out of the movement. If the market was about to decline some day it might as well decline from a higher as from a lower level. Some furnacemen do not agree with this reasoning and hold instead that if the market were held steady it would last longer than if it rode for a fall.

For some time past foundry iron has been quotable at $46, valley. For a fortnight or more predictions have been common that $50 iron was going to be seen shortly, and two merchant interests at least announced that their price was $50 and they would not sell until they got that price. One of the two has now succeeded, making a sale at $51, furnace, equivalent, considering the point of delivery, to about $50.50, valley. The quantity was 500 tons, for delivery

(Continued on page 265.)

Weekly Paint Markets

MONTREAL

MONTREAL, August 19.—Paint manufacturers generally are well pleased with the outlook for fall. Naturally there has not been a great deal of activity during the present month and travellers have been off the road for a few weeks. It is expected that by the first of September fall business will be looking up, when it will not take long in all probability for business to take on a good stride. Price tendencies are quite firm in all lines with the one exception of linseed oil, which is ruling easier although holding on the same price basis as last week. There is increased cost for most basic commodities, the general opinion being that lower prices will not become effective.

Lower Linseed Oil Possible in Few Weeks

Montreal.

LINSEED OIL.—With the arrival of regular supply of seed from the Argentine and elsewhere linseed oil has been plentiful of late and the price tendency has been downward. No definite change in the basis has been made since last week, raw selling at $1.85 per gallon on single barrel basis. Just whether this price will be superseded by a lower one is not clear at the moment, but some expect that lower prices will prevail within the next few weeks. The market quotations at this writing for flax is $5.10 per bushel and this price has been holding for the last week or ten days with a limited fluctuation.

	Imp. Gal.
Raw—	
1 to 4 barrels	1 85
3 to 4 barrels	....
Boiled—	
1 to 4 barrels	1 87½
3 to 4 barrels	....

NOTE—Owing to fluctuations seed markets jobbers, generally, are not quoting.

Lower Turpentine Prices in September

Montreal.

TURPENTINE. — Lower prices are likely to obtain on turpentine in the near future. Whether reductions will come within the next couple of weeks is not clear, but for September delivery the trade is expecting that from 25 to 30 cents per gallon will be lopped off the present price. This week's quotation remains at $2.60 per gallon. Active demand for the product has not been manifest for a long time and until the price reduces considerably it is doubtful whether there will be an active sale for turpentine.

	Imp. Gal.
Turpentine—	
Single barrels	2 60
Small lots	2 70

(Packages extra.)

Extension of Date on White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—The feature of the week has been that of a continuation of the present price basis on white lead in oil until December 15. It will be recalled that when last prices were made the date limit was September 15. The paint manufacturers find that paint lead is continuing to hold firmly, and, as a matter of fact to be higher in price in some respects than it has been for a long time. In view of this they do not see the possibility of prices being lowered and the date to which these prices will apply has just been extended for three months. Some expect that the market will hold firm and there is just a slight possibility that prices might be higher. Five-ton lots are based at $19.50 per 100 pounds, ton lots at $20, and smaller lots than tons at $20.35.

December Fifteenth Date For Putty Prices

Montreal.

PUTTY.—The present demand for putty is seasonable but there is not a heavy movement. The feature of the week is that of the extension of the price basis from September 15 to December 15, and this was ararnged during the past few days by jobbers. This means that unless something untoward or unexpected happens that present prices will prevail until December 15, but should occasion arise prices would be advanced. There is still a considerable scarcity of English whiting used in the manufacture of this product.

PUTTY—	5 ton	1 ton	ton
Bulk, in barrels	6 50	6 75	7 10
Do., ½ barrels	6 65	6 90	7 80
Do., 100 lbs.	7 35	7 60	7 95
Do., 25 lbs.	7 60	7 85	8 20
Do., 12½ lbs.	7 85	8 10	8 45
3 and 5 lb. tins	9 60	9 85	10 30
1 and 3 lb. tins	11 10	11 35	11 70
Do., in 100 lbs. cases	8 35	8 60	8 95

Expect Maintenance Prepared Paint Basis

Montreal.

PREPARED PAINT.—The consensus of opinion seems to be that there will be no change in the basis for prepared paints this fall. The matter will doubtless be considered within a few weeks by the paint manufacturers, but in the meantime costs are soaring for various important raw materials such as white lead, and there has been a suggestion of a good increase in the prices to be paid for containers. In the meanwhile there has been no change notably and business is seasonably good.

Glass Available But May be Scarcer

Montreal.

GLASS.—While there is ample stock of glass at this writing, jobbers and importers feel that there will be no surplus this fall; there may be shortage. The discount on ordinary glass remains at 15 per cent., and the market is quite firm. With regard to delivery from Belgium, Hardware and Metal is informed by a large importer that it is altogether problematical whether supplies will come from there, and if they do come, to what extent they will be available. It is also uncertain as to what supplies will come from the United States. Lately, it is understood, certain tonnages of glass have been shipped into the United States from Canada.

Container Scarcity May Affect Varnishes

Montreal.

VARNISHES.—Prices on varnishes of many grades are high and tendencies are upward. The procuring of gums has been a rather difficult matter, and while linseed oil has been easing of late it is about the only product entering into varnishes that has eased away. Now that the can shortage is becoming more acute with a promise of higher prices, it may be that this will again reflect in higher prices being quoted on the varnish. The market undertone is firm.

Dry Colors and Colors in Oil Are Marked Up

Montreal.

COLORS.—Basic colors such as greens, yellows and reds are firmer and some have revised prices upward on dry colors and colors in oil. The undertone on most of these lines is firm and prices will likely be firm this fall on a number of the important colors which have been so much in demand that there is unlikely to be much surplus.

Whiting Very Scarce; More Could be Sold

Montreal.

WHITING.—Importers indicate that there is still a great shortage of English whiting. "We could dispose of much more were we able to obtain it," was the remark of a heavy importer to Hardware

and Metal this week. The difficulties in the way of securing the necessary quantities appear to be those of labor shortage more than any other single factor.

Bluestone Sales Big; Prices Show No Change

Montreal.

BLUESTONE.—While the retail trade is making few, if any, purchases of bluestone at this time, the manufacturers are now placing orders, and there is quite a heavy booking of the product. Prices are ruling steady, and about the same as they were a year ago. There appears to be plenty of the product available for manufacturing factors.

TORONTO

TORONTO, August 19.—Paints and varnishes and paint products have been moving out very well indeed, considering that this is the dullest month of the year from the manufacturer and jobber's point of view, being the month when the majority of the travellers are off the road taking their annual vacation. Very few changes are reported this week in paint markets. Most lines are holding firm with no indication of any radical change. White lead quotations for Ottawa are now the same as for Montreal instead of 25 cents per 100 lbs. higher as formerly. Lower quotations are out on linseed oil, which is selling at 17 cents per gallon less than last week. Turpentine is slightly easier and is quoted at a reduction of 5 cents below last week's prices. Larger supplies are on hand and that still lower prices may be expected is the opinion of many. Putty is holding firm and the base price for it and white lead is likely to hold for the fall. The prospect for fall business seems very good and the majority of the manufacturers seem to think that prices will remain firm. There is a pronounced shortage of cans and containers in the trade and conditions in that respect are no easier. Collections are good.

Putty Holding Firm; Sales Steady

Toronto.

PUTTY.—There is a fair demand for putty still, though naturally it is not large at this season of the year.

There is no change in price and with the cost of the ingredients holding firm it does not look as if there will be any alteration of any amount for the present.

Prices.—Bulk in bbls., $6.75 per 100 lbs. in ton lots; 100 lb. irons, $7.60; 25 lb. irons, $7.85; 1 and 3 lb. tins, $11.35.

White Lead in Oil Unchanged and Quieter

Toronto.

WHITE LEAD IN OIL.—A little less demand is shown for white lead in oil this week, but this is only to be expected with so many travellers away on their holidays. No change in prices is reported and last week's quotations hold good. A little change affecting Ottawa and district is noted. The price there was 25 cents per 100 lbs. advance on Montreal prices, but is now quoted the same as Montreal.

Local quotations are $20.35 per 100 lbs. in ton lots, for Government standard pure, with higher prices for smaller quantities, and $23.40 for B. B. genuine.

Prepared Paints; Output Steady

Toronto.

PAINTS AND VARNISHES.—Prepared paints and varnishes are moving out even better than is usual during what is regarded by paint manufacturers and jobbers as the slackest season of the year and they profess to be well satisfied with the amount of business done. No change in prices is recorded and the price of all raw materials is firm.

Cans and containers are said in some quarters to be scarce and supplies are not coming to hand as quickly as is necessary.

Some Dry Colors Have Upward Tendency

Toronto.

DRY COLORS.—A decided shortage in some grades of dry colors is reported with a tendency in certain colors towards higher prices. Advanced quotations are noted on pure chrome greens, which now sell from 50 to 56 cents per lb. and chrome yellow from 30 to 45c., while Brunswick greens are from two to three cents a lb. higher.

Steady Demand for Window Glass

Toronto.

WINDOW GLASS.—While the demand is not so very large for glass at the present time, it is said to be well over the average. Stocks are not heavy and no change is reported in the outlook for the fall season. The raw material question shows no signs of improvement at the time of writing.

Prices are unchanged with a discount of 15 per cent.

Shellacs Have a Weaker Tendency

Toronto.

SHELLAC.—There has been a continuation of a weaker tendency with regard to shellac. The demand has not been great, but prices are inclined to fluctuate somewhat.

Whiting Supplies Not Too Abundant

Toronto.

WHITING.—The demand for whiting continues to be fairly good and in view of the comparatively small arrivals producers are hard put to supply their customers to say nothing of accumulating any stocks. Prices are firm.

Linseed Oil Shows Further Decline

Toronto.

LINSEED OIL.—A further reduction in the price of linseed oil is noted this week, being a reduction of 17 cents on last week's prices. An easier tone is noted and larger supplies seem available. There appears to be an uncertainty of opinion as to whether this decline is likely to be maintained or not and present quotations are as follows:

Linseed Oil—	
1 to 2 barrels, gal.	2 00
3 to 5 barrels, gal.	1 99
10 barrels and over, gal.	1 97
Boiled.	
1 to 2 barrels, gal.	2 03
3 to 5 barrels, gal.	2 02
10 barrels and over, gal.	2 00

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market; less than barrel lots are 15c per gal. higher than single barrel price.

Turpentine Shows a Slight Reduction

Toronto.

TURPENTINE. — While turpentine does not show so much change this week the tone of the market is slightly easier and a reduction of 5 cents per gallon over last week's prices is noted. Stocks are said to be slightly improved from the previous week. Quotations ruling are as follows: 1 bbl. lots, $2.60 per gal.; 2 to 4 bbl. lots, $2.59 per gal; less quantities, 5 gallon lots, $2.75.

PITTSBURGH MARKETS

(Continued from page 263.)

over the remainder of the year, and the buyer a New England foundry interest. It chances that the brand sold is a very well established one and the buyer might have paid the price asked on account of desiring that particular brand for the mix, so that the one transaction while interesting does not mark up the market as a whole.

In basic pig iron the curious situation is presented that over a week ago a sale of a good sized tonnage was reported at $48.50, valley, when the recognized market had been $46.50. It is alleged that the reputed buyer denied having made any purchase at any price. The market could hardly advance $2 without being active at the same time, yet since that report no sales at any price have been reported. In a normal market, if the sale reported made the market, other transactions should have followed by this time, and thus a very curious situation is presented. In some quarters "the market" on basic iron is regarded as $48.50, while in other quarters the market is still called $46.50.

In the case of Bessemer iron, which had been $47, valley, there have been some odd lots sold at this price in the past few days, while on the other hand one sale is reported at $50. The trade is decidedly puzzled as to where prices really do stand.

CURRENT MARKET QUOTATIONS

These prices are for such quantities as are usually ordered by retail dealers. Large buyers can frequently make purchases at better prices.

The Power of the Paint Brush

The Dealer who carries B-H Products has a tried and trusted weapon of defence against every form of natural deterioration and decay.

Every structure, whether of wood or metal, will show, in time, the inevitable effect of wear and tear, and to counteract these elements there is a recognized and reliable surface-saver.

The general public is being educated on all sides that to paint is to preserve as well as to beautify and a larger demand is the natural outcome.

Livingston Brand

"THE KIND YOUR GRANDFATHER USED"

Linseed Oil

It's history in brief

IT was in the Autumn of 1864 when the late founder of this Company crushed the first flax seed and began the manufacture of what was then known as Baden Oil and, what was almost as important, J. & J. Livingston's Oil Cake Meal.

For several years the Livingston farm produced all the seed that was used, for the main industry then was linen making, but as the country developed and the demand for oil became greater the tables turned until today the manufacture of the oil is paramount and vast quantities of seed are brought in from different parts of Canada and, in fact, other parts of the globe.

In the interests of the Eastern trade, plants were erected in 1899 in Montreal and have since become an important factor in the supplying of oil to Quebec and the Maritime Provinces.

In 1918 our Winnipeg plant was opened and is now in full operation serving the Western portion of Canada.

The same high standard is maintained in all our plants, the name Livingston means the same to the Westerner as to the Easterner. **It represents the best in Linseed Oil.**

Livingston Brand

"THE KIND YOUR GRANDFATHER USED"

Linseed Oil

The why of its quality

DATING back to the early sixties the one prevailing idea of the originator of Livingston Brand Linseed Products was to produce the best.

With the passing of the years this idea has been kept in the foreground until today Livingston Products stand in a class by themselves—the standard by which all others are judged.

There are two products—Linseed Oil and its by-product, Oil Cake Meal. Both are recognized by the trade as the finest produced. The reason is this:

In crushing, only the finest seed is used and both products are given consideration during the process. The more oil that is taken from the seed naturally the less will be left in the Oil Cake Meal.

There's a point in crushing when the substance extracted shows a very high percentage of mucilaginous matter which when left in the by-product adds immensely to its value as a fattener, but, when allowed into the oil, lowers its quality to the same degree. This is the point where Livingston Brand Products are different from others.

We take the lowest percentage of mucilaginous matter from the seed. This is why both Livingston products are recognized by the trade as the standard of quality. This is why painters insist on Livingston, known to them as Baden Oil, when they have a particular job to do. This is why manufacturers use Livingston Brand oil in their high grade paints and varnishes.

The Blue Barrel is the Outward Mark of Inward Quality

Insist on Livingston Brand oil and retain the good will of your customers.

Order from your Jobber.

of Surface

can be covered by 1 gallon of Sani-Flat, the ideal paint for all interior painting.

Sani-flat is absolutely non-poisonous, as it contains no lead and is especially adapted for walls where a soft velvet finish is desired. It works easily and sets slowly, showing no laps or brush marks and is of great body and covering qualities, two coats covering perfectly. Non-changeable, the White positively will not turn yellow with age. Washable and can be cleaned with water without injury, and presents a perfect undercoat for enamel.

Only properly prepared and treated oil is used as a binder.

The dealer will find Sani-Flat a profitable line to sell. It assures new business and repeat sales. Write for more details.

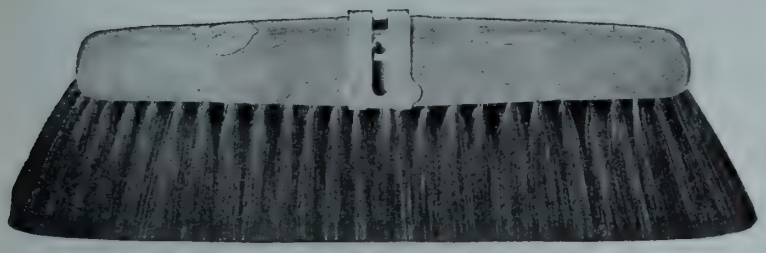
MONTREAL



BOECKH'S

Adjustable Screw Lock Handle for Carpet or Floor Brooms

A labor-saving handle that you'll be proud to sell. It exactly fills the need that housewives have for an adjustable handle. Consequently, it makes good sales for merchants. It is readily adjustable for the tall or short person or for sweeping under furniture, in odd corners, etc. The position of the handle is altered simply by loosening and tightening the "screw lock." The handle should always be screwed tight.

By changing the handle from one side to the other every week, the life of the broom is materially lengthened, and the sweeping surface is kept even. The broom should not rest on end when not in use nor be used in water.

Boeckh's brushes are well established. People have liked them since 1856. These friends of Boeckh's brushes are looking for your store when they go out to buy Boeckh's brushes. Don't let them pass your store in search of a Boeckh dealer—display Boeckh's brushes well.

Every Brush Guaranteed

Brushes

Time Tested Brushes for Sales and Profits

SINCE 1852 the firm of Meakins & Sons has given the trade the last word in brush quality and service. As the business developed, expert brush makers devoted their talent to a search for new ways to improve the Meakins brush. New ideas were formed, explained and tried out, neither expense nor time was spared, and now after 68 years of careful thought and study, we have the greatest brush on the market, an absolutely guaranteed Rubber Set Brush. The productive life of any brush depends on the quality of material and methods of manufacture. We use nothing but high-grade materials, together with extraordinary care and attention, which has put us in the front rank of the brush business.

The bristles cannot loosen, a very convincing selling point to a prospect. The dealer finds the Meakins line a profit-maker. Write to-day for complete catalogue.

Service Is the Only Real Measure of Value

In Crown Diamond Paint you get not only service but enduring qualities far beyond that given by ordinary paint.

The many elaborate tests conducted by large users of paint, as well as analysis of the Crown Diamond Paint formula by expert chemists, have all verified the fact that the Crown Diamond Paint formula contains the correct admixture of pigments to give the utmost in wear and service.

In addition to this is the firmly established reputation

gained by over 78 years of constant use under all extremes of climate. You will find a certain satisfaction in selling this old reliable line of practical and thoroughly tested Paint products.

Build up a reputation for supplying only the best—do not deal in mere paint when "Better Paint" costs no more and you are assured of real service.

Your name on a post card to-day will bring you full information about this "Better Paint."

Do You Know the Agate Family?

If interested, tear out this page and keep with letters to be answered.

Display Ramsay's and It's Half Sold!

The sale of one Ramsay product sells others. The line is well balanced and offers the right paint, enamel or varnish to close any sale. It is a practical, well chosen line of colors—the ones that sell. It is for this reason that Ramsay's displayed, is Ramsay's half sold—some one of the line always fills the requirements.

Do you know the Agate Family? A useful, industrious family that is delighting consumers with the way it beautifies homes, and gratifying dealers with its splendid sales.

Agate Varnish Stain, made from our well-known Agate Floor Varnish, is a leading member of this popular, well liked family. There are eight beautiful shades and natural. It's a worthy addition to the Ramsay line.

Hillcrest Paints
and Varnishes

Pearcy's Prepared Paints have given the fullest measure of satisfaction to dealers and consumers for more than 40 years.

Time is probably the most convincing test of paint; because the purpose of paint is to cover and protect a surface against the attacks of all kinds of weather for a reasonable period of time, consequently the actual test of service under all conditions is the only convincing test. Pearcy's Prepared Paints have been tested for more than 40 years in service to consumers and in sales value to the merchant. From every test of time or science this reliable paint has emerged with increased honor and prestige.

It pays the dealer to handle Pearcy's Prepared Paints.

LIGHT—YET STRONG

The "Keystone" Perfect Curling Broom

In the selection of Curling Brooms, careful attention should be given to two essential points. A perfect Curling Broom must combine great strength with light weight.

That is why "Keystone" Curling Brooms are such favorites. They are light and unbelievably strong.

Note the stapled metal band—This band is firmly secured to the handle, adding greatly to the strength of the shoulder of the broom.

Examine Keystone Curling Brooms in detail. See how every feature is designed to attain perfection.

The Handle—The Broom is built on a light, thick, white, Basswood handle.

The Stock—Tough corn, absolutely free from stems and seeds is employed in every Keystone Curling Broom.

The Stitching—Each Broom is closely stitched with the highest grade of strong twine.

"Keystone" Curling Brooms are made in two styles—one for the Eastern and one for the Western trade.

Place your order with us at once—or write for descriptive circular.

How to Make a Larger Profit With a Smaller Stock

If someone showed you how you could cut down your stock and make more money by doing it—*what would you do?*

You'd reduce the stock, of course!

That's the SE-MENT-OL argument exactly.

Because one 75c can of SE-MENT-OL will repair even the largest cooling system, it is not necessary to stock several different sized cans.

This explains why thousands of successful dealers who used to stock *several* brands of radiator repairers, now carry only

SE-MENT-OL

(LIQUID or POWDER)

By concentrating on SE-MENT-OL, the *original*, self-acting radiator repairer, they find they can make a bigger profit with a smaller investment—get a quicker turnover—and keep the good will of their trade by giving them the most value for their money.

You take no chance in stocking SE-MENT-OL—it is *guaranteed* to repair quickly and *permanently* cooling system leaks. SE-MENT-OL Liquid, kept in the radiator, will keep the cooling system leak-proof for the life of the car.

If you are not already selling SE-MENT-OL and other Norwesco products, better get acquainted right away—it will pay you well.

Write to-day for dealer's proposition and discounts

Dunlop Garden Hose

Affords You a Splendid Opportunity to Greatly Increase Your Profits

"HERCULES CORD" —A high-grade, two-ply, seamless, braided fabric hose with a sturdy, tough, corrugated rubber cover. Is particularly suitable for garden and florists' work, or in any capacity where the demands are exceedingly exacting. A special feature of this hose is that it is manufactured in 500-foot lengths, which allows the cutting of any length required without waste. Will not kink.

"DUNLOP"—As its name would indicate, this hose is an Extra Special high-grade one—a super hose, in fact, designed to withstand most severe usage. Is of different construction to "Hercules," but equally as efficient.

"PEERLESS" and "PEERLESS FLORIST" — So good that it is regularly considered as first-grade in garden hose. Is a thoroughly substantial hose and widely popular, especially for florists' and greenhouse work. Has an extra heavy, durable cover and will render highly satisfactory service at all times.

"RELIANCE"—Is a general favorite and well suited to ordinary garden and lawn duty. This grade is practically in the same class as "Peerless" excepting that it is slightly lighter in weight and costs less to buy. Is representative of the same careful workmanship as the other lines above-mentioned.

"BANNER"—Represents what is commonly known as sheeting construction. Will give a splendid account of itself in light work, and is good value at the price. Reliable for lawn and garden use.

"KANT KINK"—A splendid and special type of hose with a very effective protective covering. Shows its class in any capacity where there is necessarily considerable banging round, and the possibility of the hose being trampled on.

Our representative will call on you in ample time to take care of your fall booking requirements. It will pay you to reserve the placing of your orders until you have considered carefully the samples he will show you and the very attractive prices he will submit to you.

ADAMS & ELTING CO.

KEEPS CARS IN SERVICE
KEEPS CASH DRAWERS FILLED

With the present high prices and poor quality of gasoline, a carbon-free motor becomes a necessity in automobile economy and efficiency, as carbon causes knocking, back-firing, loss of power, and the consequent low gas mileage.

AD-EL-ITE Motor Carbon Remover quickly and harmlessly eliminates all these troubles, and does in a few minutes, and for a few cents, what the old grinding process takes days and dollars to do.

AD-EL-ITE Auto Specialties are well advertised and in ever increasing demand by motorists throughout the Dominion.

We supply store and consumer advertising that effects a quick turnover.

Send for elaborate catalog, "New Cars For Old." It will show you how to steadily increase your business at a profit.

The Standard Spark Plug of the World

It is very easy to claim certain specific superiorities for spark plugs. But it is not easy to meet the requirements of America's leading automotive engineers, as AC Spark Plugs have done, or to withstand the punishing tests of the record-shattering race car and airplane, as AC Spark Plugs are continually doing. Thousands of dealers have found that they profit most from the sale of spark plugs which prove best in actual service. They stock the complete AC line. Do you? If not, write today for complete dealer information.

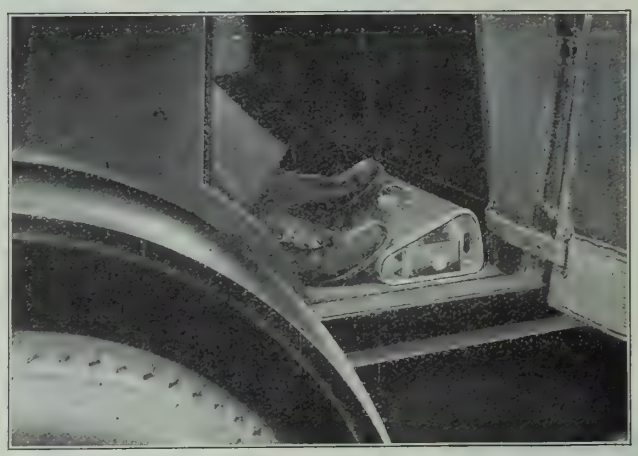
Clark Double Purpose Heaters



In the Car While Driving Keeps Passengers Warm

In open as well as closed cars Clark Heaters guarantee comfort, are easy and quick to operate and are unfailing in efficiency. Each brick of Clark Carbon Fuel lasts from 12 to 14 hours, and heater can be made ready for use in five minutes. Positively safe in every way—no flame, smoke or odor. Use the same heater under the hood to keep engine warm when car is standing.

Under the Hood While Standing Keeps Engine Warm

A Clark Heater placed under the hood keeps the engine warm and does away with all starting troubles common in cold weather. Do this when car is standing in the garage or in the street. A robe thrown over the hood increases the efficiency of the heater.

Use the same heater in the car to keep passengers warm while driving.

The Duchess -- No. 8 XX

The Handsomest Heater ever built.
Covered with rich velvet plush in blue, green or maroon shades.
Extra wide, highly finished, nickel-plated, flange at ends.
Extra heavy body construction and insulation.
All outside metal parts quadruple nickel-plated —de luxe finish.
Side and end heat controls to give perfect heat regulation.
Two Fuel Drawers—one in each end to use double charge of fuel, if wanted, in extreme weather.
24 inches long. Weighs 12 lbs.

Every Car at Your Door a Prospect

CLARK HEATERS make winter driving a pleasure. Every doctor, every rural mail carrier, every bread or milk route driver is a prospect for Clark Heaters. There are thousands of others—everyone who drives in winter needs one, including the multitude of people who use them to supplement the luxurious appointments of handsome closed cars.

Soon the cold days will be here. Have a Clark Heater displayed in action. When half-frozen drivers stamp into the store explain Clark Heater advantages while they are influenced by its genial warmth. It's an opportune moment for sales. Every car at your door is a prospect.

Get Your Order to Your Jobber Now While He Can Supply You.

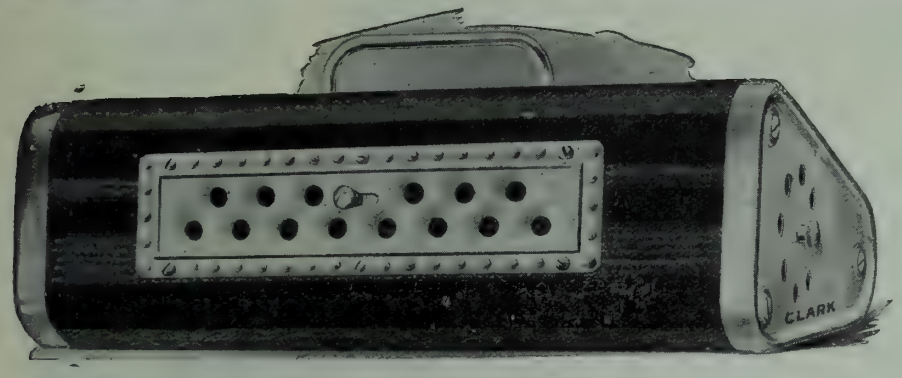
Chicago Flexible

5608 Roosevelt Road

If interested tear out this page and place with letters to be answered.

Clark Double Purpose Heaters

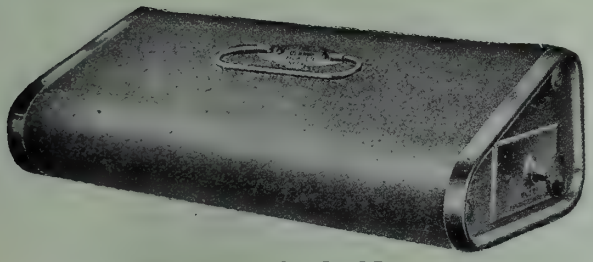
Indestructible Steel Construction



No. 7-D Clark Heater

Indestructible steel body, slanting top, 14 inches long, asbestos insulation, covered with dark green Brussels carpet. All outside metal parts nickel-plated and polished. Side and end controls for regulating heat. An excellent heat-giver of attractive appearance. Weighs 6 lbs.

The Swift Selling No. 7D



No. 7X Clark Heater

Very Popular for Electric Cars and Fine Coupes.

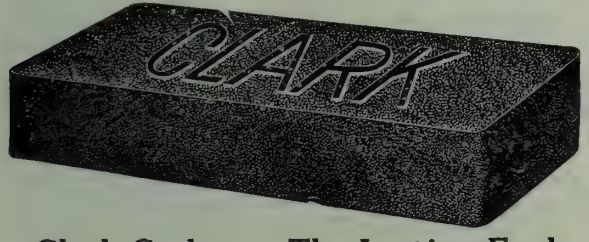
Covered with mohair plush in a selection of colors—blue, green or maroon. The outside metal parts are extra heavily nickel-plated and highly polished. Side and end heat controls permit of perfect regulation of heat. The handsomest slanting top heater made. Weighs 6 lbs.

No. 7C Clark Heater

An Excellent Slating Top Heater at an Attractive Price.

Widely used in all kinds of vehicles—a big value.

Clark indestructible steel body, 14 inches long, insulated with asbestos felt and covered with a good quality of Brussels carpet in a dark green shade. End heat controls. Weighs 6 lbs.



Clark Carbon -- The Lasting Fuel

Densely compressed into brick form to concentrate the maximum heat-giving properties in the smallest volume and to produce a fuel so compact as to last all day, giving off a continuous and satisfying amount of heat.

A brick of Clark Carbon is placed in any fire or flame for two or three minutes until red, then placed in heater drawer and immediately gives its maximum heat, so the drive can be started immediately and with the assurance that should you be gone all day you will have a satisfying volume of heat without recharging.

Clark Carbon operates at a cost of about one cent per hour.

BEATS-ALL FOR ALL YEAR PROFITS

Beats-All Products are in demand from January to December inclusive. The careful motorist will protect his car from the attacks of Fall and Winter weather just as much as he would protect his car from Summer's scorching sun.

Beats-All Products will fill every requirement at every season.

500,000 Autos

are prophesied for Canada by the end of the season of 1920. Every motorist is a prospect.

It is easy to sell Beats-All Products when you explain to your trade that the original storm-proof qualities and Factory Durability can be restored by using any of these "upkeep economizers."

Beats-All Top Dressings for Mohair, Pantasote and Imitation of Leather are the only Top Dressings which incorporate Liquid Rubber into the base. That is why they are sold on a guarantee to Weatherproof and Re-rubberize the fabric.

All hardwaremen should be "in on this." It means money and additional customers.

Mohair Top Dressing

Will give the shabby, leaky, weather-beaten top that new appearance and factory durability. It re-dyes and re-rubberizes, making the fabric stormproof and leaves the top soft and pliable.

Pints, 85c; quarts, $1.50

Drab Lining Dye

It re-dyes and re-finishes the inside lining a fast, light color, giving it that fresh and new appearance. Covers all stains and discolorations.

Pints, $1.35; quarts, $2.50

Ask Your Jobber

Knu-lac Top Dressing

A coat of Knu-Lac applied to any Ford Top of Rubber or Imitation Leather will positively waterproof and re-rubberize it. Gives it original pliability and wearing quality, producing a rich, gloss black, durable finish.

Pints, 75c; quarts, $1.35

Dull-lac Non-Gloss Dressing

For all Leather and Pantasote tops—weatherproofs and re-rubberizes—softens and preserves the material, giving it a rich, egg-shell, non-gloss finish.

Pints, 85c; quarts, $1.50

"RELIABLE" JACKS

THESE famous Jacks are all that their name implies. They are supplied as standard equipment by the great majority of Automobile and Truck Manufacturers. There are more than eight million "Reliable" Jacks in active service.

Made throughout of the choicest grades of Cold Rolled Steel and Malleable Iron. It costs more to make "Reliable" Jacks, but they stay sold when once you sell them. There is a "Reliable" Jack suitable for every type of car made.

As with all C. G. E. Automobile Accessories, "Reliable" Jacks are a quality proposition. They are the best that can be procured. We unhesitatingly commend them to our customers.

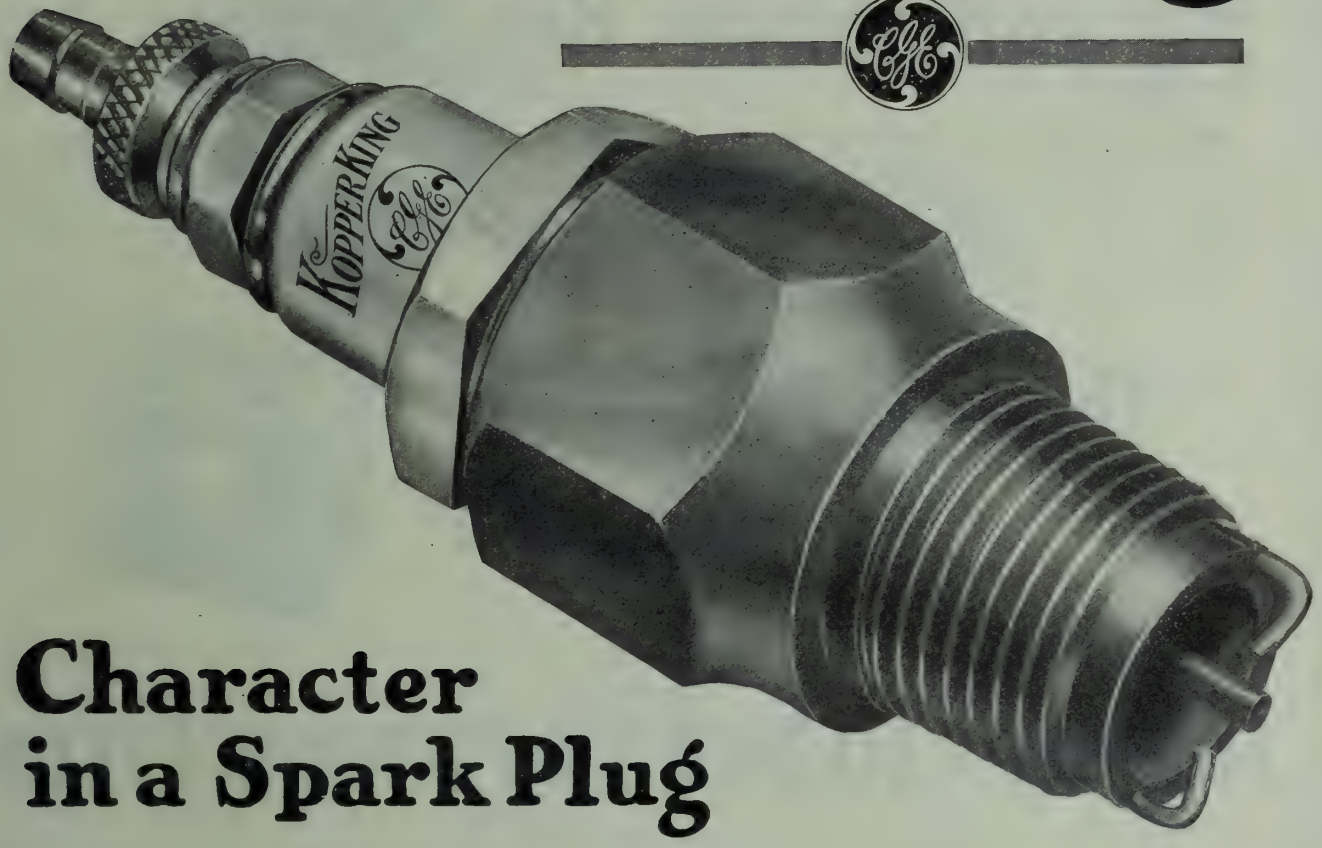
Kopper King



Character in a Spark Plug

FIRING the gas vapor, driving down the piston-head hour after hour with an exploding sheet of flame, demands character—not mere metal and insulation—but character expressed in design, in construction methods and workmanship.

The Kopper King is a prestige builder. Incidentally, it shows the Dealer a greater margin of profit than any competing plug. The Rust-proof Copper Surface prevents Carbon deposits; carbon will not adhere to copper under Electrical Heat. The Kopper King is without a peer among Spark Plugs. It is a quality plug from first to last.

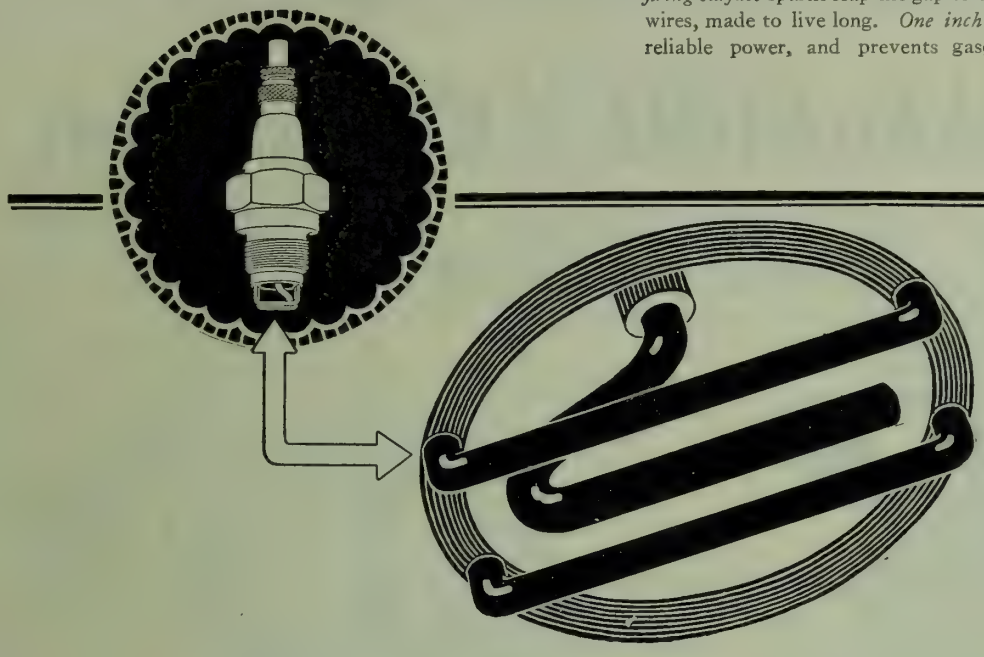
ONE INCH FIRING SURFACE

This shows the central electrode, from whose *one inch firing surface* sparks leap the gap to the stout right and left wires, made to live long. *One inch firing surface* insures reliable power, and prevents gasoline-formed carbon.



Canadian Money at Par

Leaping the gap to right and left, sparks hiss from the *one inch firing surface* in Fyrac, and fall not upon a single-point, but upon an inch of surpassingly durable wire, every point of which need withstand only a small fraction of the shock that shrivels the solitary point in the ordinary plug.

One glance at a Fyrac tells this whole story to the motorist.

It means continuously smooth operation—and he buys.

Unprecedented Demand
for
Automotive Equipment

THE Automobile Industry is now regarded as the second largest on the continent. Therefore, dealers are optimistic regarding the future sales of Automotive Equipment. They report an unprecedented demand for Equipment and Supplies, especially of articles that cater to the welfare of car owners, by adding to the beauty of their cars, or to the comfort and convenience of automobiling.

RIE NIE Rubber-Fabric Fan Belts

RIE NIE Fabric Fan Belts have enough give to be self-adjustable, all permanent stretch having been removed. They are built to hug the pulley and will not ride up over the edge or slip.

Special treatment of the fabric in these belts makes them oil, heat, and waterproof, also non-slipping.

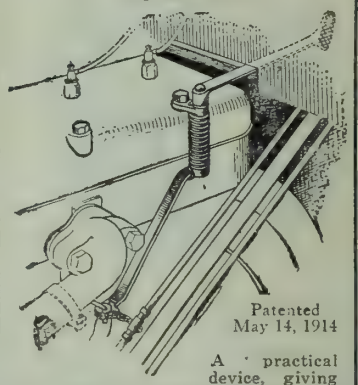
No. 6477—Price, 1911-16 Fords $0.50

No. 6478—Price, 1917-20 Fords 55

THE HYSLOP LINE

ensures the dealer unlimited business possibilities. This line has won the approval of the great bulk of Canadian car owners, because every item placed on the market represents quality and utmost value in service. Any dealer who keeps a well-balanced Hyslop line is sure to capture the business in his territory, besides receiving handsome profits and making permanent customers. Sell the Hyslop line exclusively.

Adamson Foot Accelerator For Fords

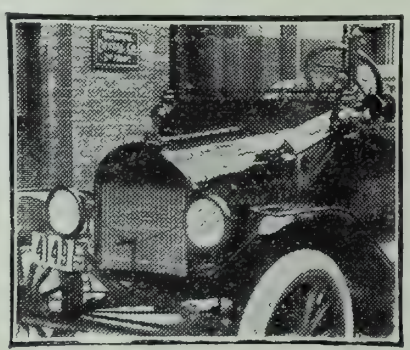


Patented May 14, 1914

A practical device, giving the operator complete control of the throttle with the foot. It operates entirely independent of the hand throttle. Same as that regularly used on all other cars and is of equal convenience to the Ford driver.

No fitting or altering whatever is necessary, so simple anyone can install it.

No. 6447—Price $2.00



A De Luxe Combination Streamline Hood and Radiator Mask

Adds wonderfully to the appearance, value and efficiency of any 1912 to 1916 Ford, showing outfit mounted on a 1915 Ford Car. Note the transformation.

The patented De Luxe Streamline Hood and Radiator Mask is the most distinctive and exclusive outfit for Ford Cars on the market. The front of radiator section is nicely pressed or rounded out, both top sides and bottom.

The hood is perfectly plain on top, the sides being rather low, leaving the perfect streamline from dash to front of radiator. Sufficient louvers are made for ventilation.

Made of heavy steel, and finished in a double coat of glossy enamel. Will outlast the life of the car.

No. 6422—Price, for 1911-1914 Fords with flat dash..... $17.00
No. 6423—Price, for 1915-1916 Fords with Cowl dash..... 17.00

Exhibition Message to Dealers

We have Created the Demand You Only Need to Supply It

For years we have been building a reputation for the dependability of Champion Spark Plugs. To-day "Champion" on the insulator of a spark plug is the world's synonym for dependability.

Spark plug users have come to realize that "Champion" means satisfactory, efficient spark plug service.

Champion "Heavy Stone"

B-13, ½-inch B-53, ⅞-18 long
B-43, ⅞-inch, 18 B-73, ¾-inch
B-83,¾-in. long

Price $1.25

Specially adapted for heavy service cars, tractors, trucks, farm and stationary engines.

Champion

Dependable Spark Plugs

have been selected as regular factory equipment by over 300 manufacturers of automobiles, trucks, tractors, farm and stationary engines, motor boats, and motor cycles in Canada and the United States.

The demand for "Champions" is already established. All you have to do is to supply that demand, and take your share of the business our advertising has created for you.

Keep your stock of Champions complete that you may be able to, at all times, supply the demand.

Champion Spark Plug Co. of Canada, Limited

Windsor, Ontario

LION Brake-Linings for FORD CARS

If you handle brake-linings you should stock a line that moves quickly.

LION BRAKE-LININGS for Ford cars give satisfaction to everyone, from the jobber to the consumer.

They are specially treated to prolong wear, to avoid "running smooth," to prevent chattering, giving wonderful resistance and a SURE, SMOOTH, SILENT grip.

Individual sets, complete with copper rivets put up in attractive cartons. Also put up in 100-foot rolls for garage trade.

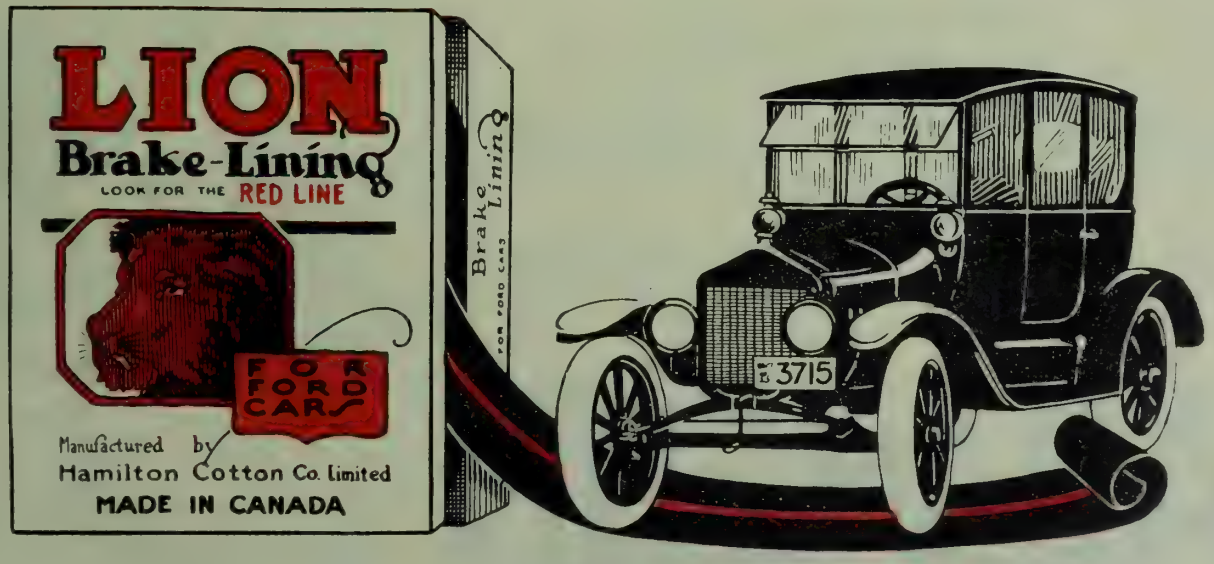
For sale by the leading accessory jobbers.

MADE IN CANADA BY

THE HAMILTON COTTON COMPANY, LIMITED

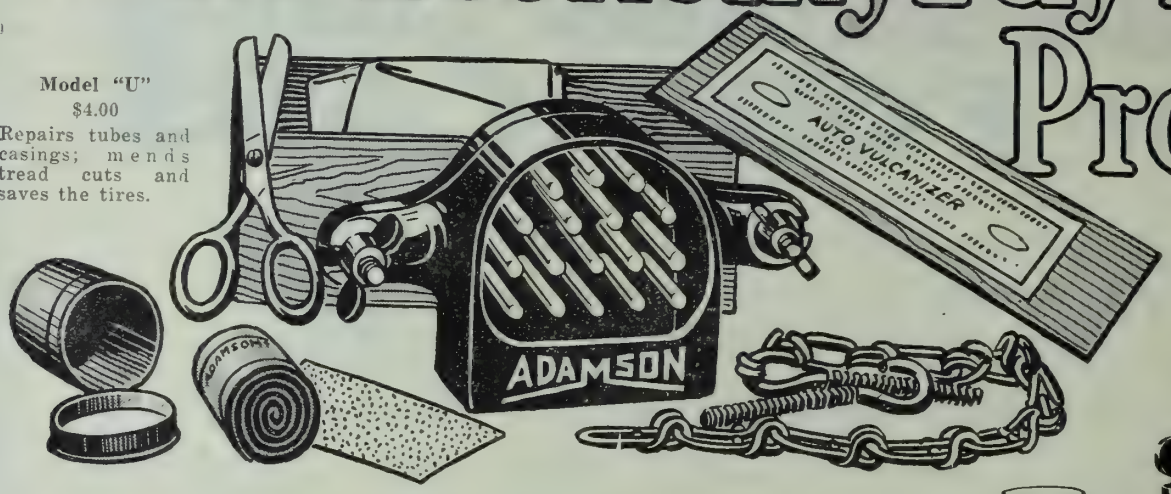
Hamilton, Ontario

Look for the RED LINE



If interested tear out this page and place with letters to be answered.

Make Economy Pay YOU Profit!



Model "U"
$4.00
Repairs tubes and casings; mends tread cuts and saves the tires.

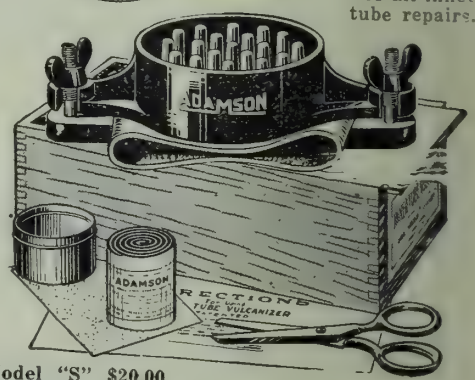
Model "E" $1.75
Repairs tube punctures in five minutes. Uses Adamson Dry Fuel or gasoline.

Model "T"
$3.00
For all inner tube repairs.

Every motorist is seeking a way to make his casings and tubes last longer, and protect himself against the rising costs and threatened shortage of new tires.

Adamsons best meet this increasing demand because they not only mend *tubes,* but vulcanize cuts and abrasions in the *casings,* and keep moisture and dirt from getting into the fabric and destroying the tire. That means thousands of miles more tire service at the cost of a few cents.

Profit by this opportunity. Display and sell the Adamson line—a vulcanizer for every repair a motorist can make; surest in results and cheapest to buy and use; all models burn common gasoline, the fuel that is always dependable and easy to get.



Model "S" $20.00
For private garages and repair shops. Makes tube repairs up to 12 in. in length.

Write for Store Displays and Dealer Helps.

ADAMSON MFG. COMPANY
Hamilton, Canada

We also make Brake Shoes, Lined and Unlined, and Cut Outs and Accelerators for Ford Cars.

OAKLAND	*DORT*
PAIGE	*SCRIPPS-BOOTH*

TRUCKS: NASH and REPUBLIC

22 of the leading car and truck manufac- turers of the United States and Canada have proven Locktite Tire Patching Material the best by every conceivable test of actual road performance and factory laboratory analyzation.

The unmatched merit of Locktite Tire Patching Material is an established fact. You can conscientiously sell and recommend Locktite. It's guaranteed.

2,000,000 new cars and trucks will this year leave their factories with Locktite Tire Patching Material in their tool kits. That means many times more than two millions "over the counter sales" within the same period of time.

Are you supplied with Locktite? Can you meet this repeat order demand? Will you get your share of Locktite profits?

Write us for literature explaining the "Locktite Kit." It's the handiest, easiest selling, cold patch tire outfit on the market.

Send Us the Name of Your Jobber.

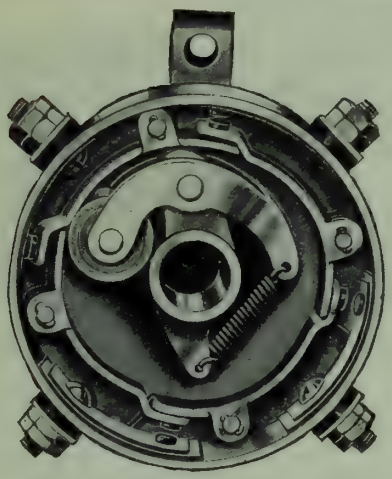
Tremendous Sales Record

Duplex Timer for Double Duty — a Masterpiece Timer — Fords

The Timer That Times All The Time It Never Misses



PATENT APPL'D. FOR.

The Duplex Timer Ends All Timer Troubles Forever

Efficiency and Sales

The tremendous sales record the Duplex Magneto Break Timer has made is proof of the wonderful efficiency and economy of this popular accessory.

The Duplex has many reasons for being popular, both as a sales-maker for the dealer and a money-saver for the motorist.

Magneto Contact

The **magneto contact** of the DUPLEX **Timer** gives to each cylinder a **direct contact** between two genuine Tungsten points, timed by the accuracy of the single roller. In the DUPLEX we have combined the accurate firing of the roller type, and the superior contact of the magneto, and give you the Double Duty Timer.

The Duplex gives a big, healthy spark, perfectly and regularly timed on all four cylinders.

The Duplex Timer never misses fire. It maintains itself at all speeds. This makes high acceleration possible, while at the same time the motor pulls its full load at extremely low speed and may be throttled to a point where it barely turns over when running idle.

Contains no sliding contacts to become insulated with oil. No oiling is required.

Overcomes all starting troubles—makes starting in any weather quick and easy.

Ten Reasons why

IVER JOHNSON SAFETY—AUTOMATIC REVOLVERS

are easy to Sell:

1. The Safety Device—You can "Hammer the Hammer" or throw the revolver on the floor—it can be discharged only by pulling the trigger all the way back.
2. The Safety Action demands no thought from the user—there is nothing for him to remember to do to make it safe—the safety is automatic.
3. All springs are made of drawn-tempered piano wire—practically non-breakable.
4. Perfect rifling of the barrel—the accuracy and penetration depend on this rifling.
5. True alignment of barrel and cylinder make for greater penetration and accuracy.
6. Smoothness and speed of action—the result of simplicity of parts and absence of friction.
7. Quality of materials used—the finest.
8. No delicate, complicated parts to break or get out of order.
9. Complete range of models and sizes.
10. Moderately priced.

Stock the entire line—22, 32, 32 special, and 38 calibers, Hammer and Hammerless Models with Regular, Perfect Rubber, and Western Walnut grips.

Why not stock Iver Johnson shotguns, too? Then you can capitalize on the entire Iver Johnson line of firearms.

Send for free catalogs which show the entire line of Iver Johnson firearms. Complete dealer information will be sent you. Write for information on bicycles and motorcycles, too

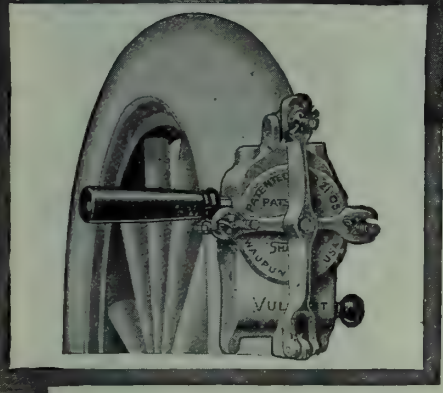
"The Safe Revolver to Sell"

If interested tear out this page and place with letters to be answered.



"—saves two-thirds of my Tire Expense"

"Once a week I go over my tires—and seal the little holes and cuts that ruin tires by permitting dirt, oil and water to reach and rot fabric. With the SHALER Vul-Kit I 'vulcanize' these holes with tough, new rubber that makes a lasting job of it. It takes only a few minutes—but keeps my tires good as new—prevents tire trouble—*doubles* my mileage—and actually saves ⅔ of my tire expense."

Sell the SHALER VUL-KIT

It's easy to sell. Motorists are looking for a tire-saver like this. Their word-of-mouth endorsement of the SHALER to their friends gives you a chain of sales. The repair material they buy of you to use with this vulcanizer gives you "repeat" profits that come to you regularly—without effort. You make a good profit selling the Vul-Kit itself and big, steady "repeat sale" profits.

SHALER Vulcanizers are advertised regularly throughout the year. Motorists are now reading the large, dominant advertisements in the leading national and motorist publications. Every car-owner needs a SHALER Vul-Kit—sell it to him and make these big steady profits for your self.

Order From Your Jobber Now—Write Us for Catalog

of the complete line of SHALER Vulcanizers for garages, tire repair shops and motorists' use.

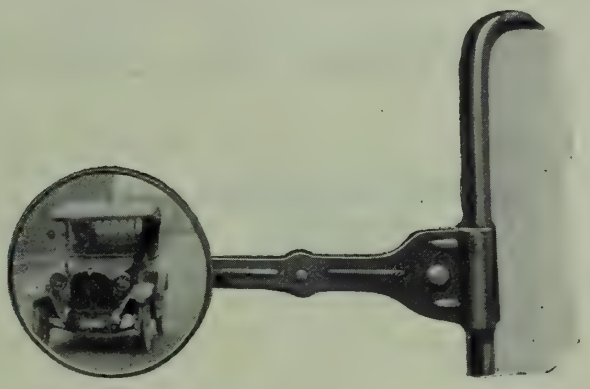
THE CANADIAN WINKLEY CO., LTD.
WINDSOR, ONTARIO



Take a "Hindview" of Your Business

Big demands for certain accessories have developed almost over night. Many which you were reluctant to add to your line turned out to be money makers. Some, which you did not put on at all, earned profits for your competitors.

"Hindview" dealers are making their biggest profits right now. Traffic everywhere is congested—not only in the cities, but on the country roads. Two years ago the Auto Mirror was considered a fad; to-day motorists everywhere realize that it is not only a convenience, but a big factor of safety. In addition, Province of Ontario has passed a law requiring Auto-Mirrors. Perhaps your province will be the next.

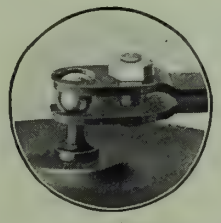
Count the number of automobiles equipped with Auto Mirrors. Remember that these mirrors have been sold by dealers—for rarely is an Auto Mirror included in the standard equipment of a motor car to-day. Then figure the profit you can make supplying this enormous and ever-increasing demand!

KALES

Hindview

AUTO MIRRORS

are substantially made—guaranteed to be free from defects, and absolutely waterproof. There is a type for every purpose, on every passenger car or truck.



The Ball Joint—an exclusive "Hindview" feature—allows the driver to tilt his mirror instantly to any angle desired. The ball is made of brass, gripped firmly by the jaws of the arm. Vibration cannot disturb the position of the mirror.

The Ball Joint, plate glass mirror, heavy clamp, waterproof back—all are "common sense" features of the "Hindview" mirror which recommend it instantly to customers. The Auto Mirror will undoubtedly be one of the biggest selling accessories this fall. Don't wait—ask your jobber, or write.

Kales Stamping Co., Limited

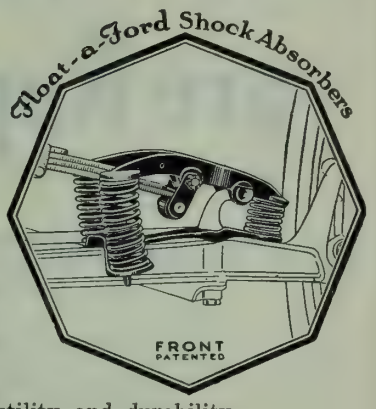
SHOCK FLOAT A FORD ABSORBER

PATENTED

MAKES A FORD EVEN BETTER

Is easiest to sell because it's the best to buy.



A Perfect Rebound Absorber

EVERY motorist knows that the rebound is more to be feared than the main shock. Every Ford owner should know that the rebound is to blame for most spring breakage and vibration damage to the car. Float a Ford not only absorb the main shock, but they check the rebound and insulate the car against side-thrusts.

Float a Ford literally make a Ford float.

If you have not already examined this shock absorber, study the illustrations.

The Float a Ford principle is as easy to understand as it is scientifically correct. When a car strikes a bump the first shock is downward. This is absorbed not only by the Ford spring itself, but by the large twin springs of the shock absorber. Immediately there comes the rebound, but the famous Float a Ford "third spring" is on guard to absorb that shock by resisting compression.

Now note the suspension of the Ford spring itself. You will see at a glance how Float a Ford not only permit free expansion and contraction of the Ford spring, but also insulate the car against annoying side-thrusts.

Do Not Weaken Car

The Ford owner knows that the Ford car is one of the best examples of automobile engineering. It stands for economy, utility and durability.

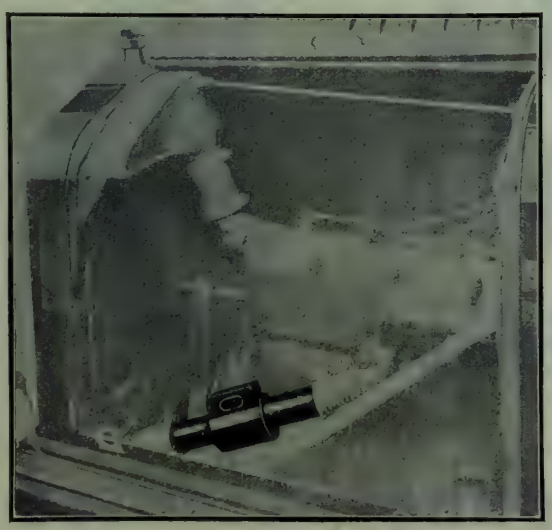
The Burpee-Johnson Co. of Indianapolis, manufacturers of the Float a Ford Shock Absorbers, have been careful not to interfere in any way with Ford engineering principles or in any way to weaken the car itself.

Float a Ford do not bind or interfere in any way with the Ford springs. They do not bump the lamp posts or body. Easily and quickly installed.

Float a Ford springs in three weights—touring and coupe; sedan and commercial, and roadster.

Float a Ford fully guaranteed. If your customers are not satisfied after using them fifteen days you may return their money and obtain a refund. All parts guaranteed against defective material or workmanship for one year. They will actually last as long as the car.

Two Motor Accessories that will boost your Winter Sales



MAYALL MOTOR HEATER

is fast supplanting the unsatisfactory, expensively heated garage. It is quickly set in the water system and is always ready the same as an electric toaster or iron to have the plug inserted and the electricity turned on. Keeps the motor and radiator warm in coldest weather. Made for all popular cars. Costs little to operate. Sells readily over the counter. Order from your jobber. Window displays supplied free of charge.

"Steer Warms"

Unusual Selling Points

Carbalox is a product of the electric furnace so fast and cool cutting as to be particularly adapted to the rapid cutting and polishing of metals.

Being available in handy rolls, it reduces cost of production because the workman, keeping a roll at hand, uses as desired without waste or loss of time in cutting.

Peerless

A Made-in-Canada Poultry Fencing. The kind needed now in rebuilding the great poultry business of a great nation. Our fighting men will need and demand Canada's best production in everything manufactured. We have a real pride in offering to the buying public this splendid fencing. The kind that stands the acid test—and the test of time as well.

In all that represents strength, character, real worth, permanency and the elements which builder and buyer recognize as the stamp of honest accomplishment,

The Peerless Perfection Fencing

stands every test. Made by the open hearth process, all the impurities are burned out of the metal, thus removing one of the greatest causes of rust. The wire is also galvanized so thoroughly that it will not flake, chip or peel off. Every intersection of the wires in our farm and poultry fence is locked together with our Peerless lock. While these locks hold the wires securely together, yet this fence can be readily adjusted and perfectly stretched over uneven ground. It's easily erected and on account of heavy, stiff stays used, few posts are required. That means real economy in construction.

Peerless Perfection Poultry Fence

is true to its name, a perfect fence strong enough to keep strong animals out and close enough to keep even small poultry in. Every Peerless fence is guaranteed against sag, rust or break and we stand back of your dealer unconditionally. A guarantee to us means something—it does to you, too.

Peerless Ornamental Fencing

for lawns, parks, cemeteries, etc., are handsome. Also lawn borders, flower bed guards, trellises, etc. They are all of our quality brand.

Send for Catalog and get familiar with the best, cheap ornamental and serviceable fencing to be had in the Dominion. Throughout Canada, Peerless Perfection stands as the symbol of quality.

HULL IN 1851

Story for Week Dated August 21, 1920 — Being No. 19 in the Series

Where The Lumber First Enters The Eddy Plant

The logs you see in the picture above are at the last stage of their journey to the Eddy Plant on the way to become pulp and paper. Lumber for match-wood enters the plant by another gateway, though in much the same manner. The logs which are afloat in the basin in the foreground are poled along till they come transversely towards the steadily moving claws of the slanting conveyor-lift which you can just make out under the big chimney to the left. Once in the grasp of those relentless claws the logs are rushed resistlessly to the big buzz-saws which, revolving furiously in a battery of eight, cut each log into short lengths. On they hurry, tossed from saws to conveyor belts, and in marvellously brief time the wood is becoming pure, perfectly sterilized pulp by processes which will be described in forthcoming articles in this series.

Why Not Allow Your Staff the Privilege of Increasing Your Sales?

Making change takes time that might be used to better advantage in the selling of more goods. And, too, it diverts the salesman's mind from his real business.

We have a Cash Carrier to assist you, and there is no better investment than the purchase of a carrier system. It affords more time for salesmen to remain with customers, and in this way increases the efficiency and selling capacity of an entire staff. And the saving of steps—they should not be forgotten.

Write for our four-page leaflet. It tells how to obtain a double check on sales, and allow your salesmen, in a greater degree, to display their selling ability.

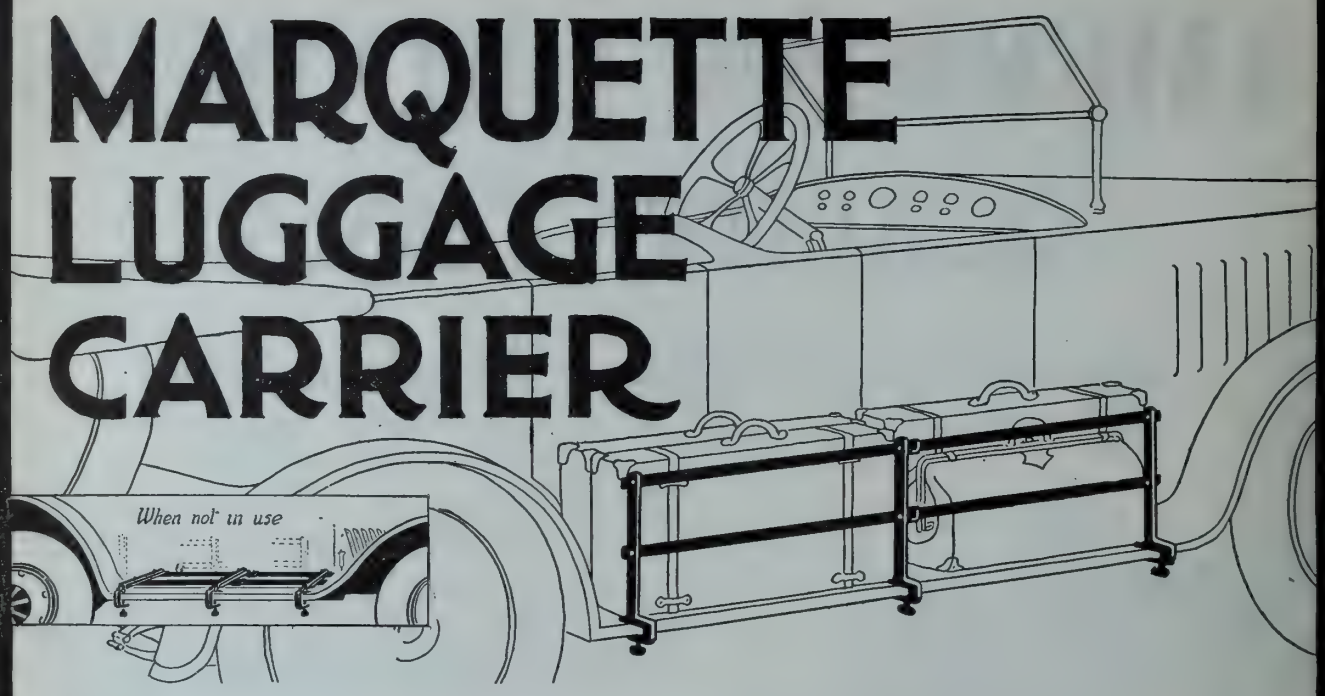
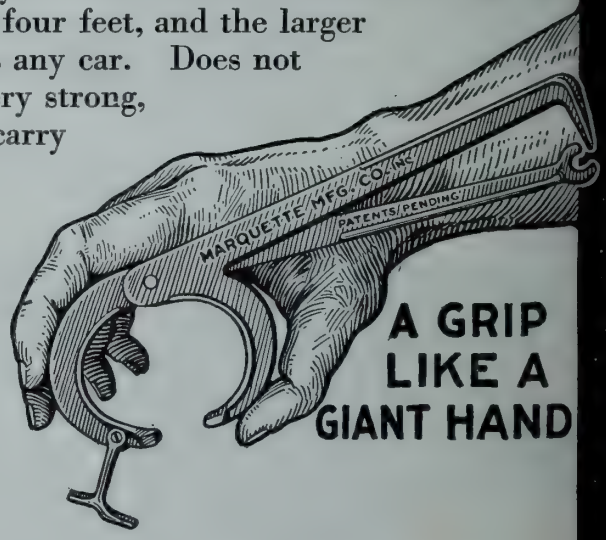
MARQUETTE LUGGAGE CARRIER



This all-steel folding Luggage Carrier is built for both service and convenience. It attaches to the running board without the use of tools, and when not in use folds down out of the way. It is made in two sizes---the smaller size is adjustable from 27 inches to four feet, and the larger adjustable from 37 inches to five feet. Fits any car. Does not detract from the appearance of the car. Very strong, durable and neat looking. Enables one to carry baggage, etc., outside the car without injury to either baggage or car.

MARQUETTE TIRE TOOL



A GRIP LIKE A GIANT HAND

Takes all the hard, dirty, useless work out of changing clincher tires. Grips the tire as you would with your hand---no danger of injury to tire or tube. It is the "off again, on again" tire tool with the reputation for satisfaction. Makes tire changing so simple and easy a child can use it successfully.

More than a hundred Jobbers supply the trade with all Marquette Specialties. If YOUR jobber does not carry them, write us direct. . . . . .

Stephens'

REGISTERED TRADE MARK

Silkstone Flat Wall Colours

An ever-growing source of good business for the merchant. Silkstone Flat Wall Colours have made good with professional decorators and their handiness and economy have made them a fast favorite with the housewife. She uses them all through the year to beautify walls and "fix up." Cheaper than wall paper, and far more sanitary, Silkstone can be washed often without rubbing off. Dries with a beautiful, silky finish.

Wa-ko-ver Stain

A handy, labor and time-saving finish that stains and varnishes in one operation. It is a great beautifier much appreciated by home-loving housewives as well as professional painters. Its use brightens up and renews old, scarred woodwork and greatly enhances the natural beauty of the grain in wood.

Let the Royal Prove its Merit in *Your* Store

THE real test of an electric cleaner is how well and easily it will do the work in the home. Will it get all the deeply imbedded dirt in the rug as well as lint, hair, threads, and litter on the surface? Will it clean under the beds, close to the base-boards and in the out-of-the-way places?

Will it remove germ-laden dust and dirt lodged in draperies, upholstery, mattresses, walls, ceilings, closets, stairways and other un-get-at-able places?

Is it light in weight, easy to operate, economical and thorough?

To thousands of women the Royal has proven a household blessing because it satisfactorily answers all of these questions.

Just a touch of the handy switch on the handle, and the powerful, cleansing air stream is ready to save hours of heart-breaking, back-straining household drudgery.

Let us send a Royal to your store and let you try it yourself. A few minutes trial will convince you that it is the one vacuum cleaner for you to sell. There's a good profit too.

SWAN
Weatherstrip

Positively Prevents Drafts

This popular, quick-selling weatherstrip has been ingeniously designed and constructed with remarkable technical skill and foresight, especially for doors. It absolutely eliminates drafts and assures a tight, satisfactory closure of the door.

Made in Convenient Lengths

Two pieces 7 feet long for the two sides; one piece 3 feet long for the bottom; a piece 3 feet long for the top. A packet of nails is included. Holes for nails are drilled to prevent splitting.

Conveniently Packed

It is put up in handy, convenient bundles of ten sets. Each bundle weighs 18 pounds.

It is made of wood and felt, with absolutely no rubber to dry out and crack, nor metal to buckle and cause annoyance.

Swan is beautiful in appearance as well as useful and durable, being made from handsome, selected oak or beautiful fir nicely finished. The felt is specially manufactured; very durable and lasting—Green in color.

Pays to Order Early

Don't overlook the attention value of appearance, supported by strong, practical, selling points that close the sales quickly and without time-consuming argument.

Sold by

J. H. Ashdown & Co., Marshall Wells Co., Walter Woods Co., Winnipeg Paint & Glass Co., Merrick, Anderson Co., Wood, Vallance Co., Miller, Morse Hdwe. Co., Mackenzie Brothers, Winnipeg.

Also through other leading jobbers throughout Canada.

Establishing the Reputation of a New Firm or Extending the Reputation of an Old One

When the shrewd, modern advertiser has successfully harnessed the great power of publicity to his business, his next operation is the selection of a definite objective. Perhaps one of the most familiar objectives that makes his continuous advertising productive and profitable is the establishing or extending of the firm's reputation by a regular weekly message to the whole hardware trade of Canada setting forth the claims and policies of the house. The trade invariably prefers to purchase from a concern that has become familiar in the pages of their favorite trade newspaper—HARDWARE AND METAL.

If interested, tear out this page and keep with letters to be answered.

Personal Service

Service has been the keystone of our success. Our constant aim is improvement. With this end in view we have created a "Personal Service Department," under the direction of Mr. Dave Burnet, an experienced hardware man and former member of our travelling sales force. We believe we are the only hardware house in Canada conducting a department of this nature.

The object of the "Personal Service Department" is to give our friends direct personal attention either when they visit Winnipeg, and honor us with a call, or when they have occasion to write, phone or telegraph concerning any special or personal matter.

We want our friends to feel free to avail themselves of the service this department can render, and we will appreciate their co-operation to make it a conspicuous success.

Burgess Batteries

The "Burgess" Name stands for Profit Insurance on your Battery Business.

Patented Packing, uniformly high quality, attractively labeled package, long shelf life and superior service make Burgess the "repeater" for the merchants.

Here's how the Burgess policy protects you:

Every Burgess product is fully guaranteed and you are protected by an unqualified agreement to replace any article which does not give satisfactory service.

Flashlight Cases and Batteries

Burgess manufacture a complete line of flashlight cases and flashlight batteries in all styles and sizes, carrying the unqualified agreement.

Uniplex Batteries

Burgess Uniplex batteries are actually waterproof. This is the most serviceable of all types of dry batteries—easy to connect, handy to carry and take up little space.

Burgess Products are not sold by Mail Order Houses.

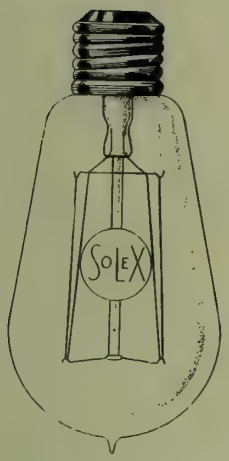
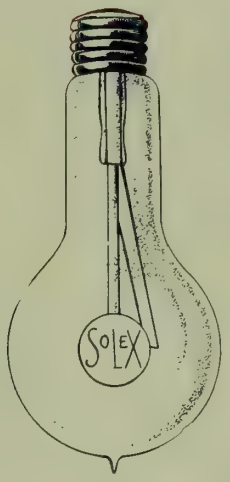
Solex
Electric Lamps



Tungsten Lamp

Round Tungsten



Nitrogen Lamp

Lamps That Save Money

Solex Lamps combine quality materials, and superior workmanship. They are brilliant—yet economical, giving a white, intense light closely resembling natural light. Solex Lamps give more light for the same cost of current, to which is added an average life guarantee of 1,500 hours. These efficient lamps save money. There are Solex Lamps to meet all requirements of the home, factory, office, or farm.

The Blue Lunar Lamp when illuminated gives a soft and diffused light. A most suitable lamp for window illumination.

All Solex Tungsten Lamps are pure, continuous filament drawn through diamond eyes into a fine, strong wire. Breakage is minimized through springy metal supports.

The Round Bulb Tungsten Lamp will be found in some cases more suitable than the pear-shape. Can be used to fit in smaller electric light fixtures, etc.

The Solex Low Voltage Nitrogen Lamps are specially designed for use on farms. Conserve electricity, yet give a steady, bright light.

Write to-day for full particulars of this money-making plan.

QUICKEST TURNOVERS?

Why Eveready—Of Course

Ten to twelve times a year is the dealer's average turnover on Eveready "flashlight" cases and Tungsten Batteries.

A whale of an argument to keep this all-seasons line complete and display it prominently in your window and show case, for no other line has the all-year-'round appeal of "flashlights."

The big Renewal Feature gives Eveready a lead on other merchandise, for to-day's purchaser of Eveready Daylo is a future purchaser of Eveready Tungsten Batteries—renewals which pile up profits. Eveready distribution assures a supply to meet the demand.

SELL MORE EVEREADY FLASHLIGHT BATTERIES. THEY FIT ALL FLASHLIGHTS

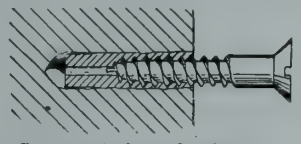
(Patent No. 150,527/13)

for fixing screws in Plaster, Brick, Marble, Slate, Stone, Cement, Concrete, Metal. Appeals to HARDWARE STORES. Invaluable to Builders, Electricians, Plumbers, Engineers, for fixing gas or sanitary fittings, wires, wainscotting, doors, shelves, cupboards, mirrors, coat hooks, overmantels, pictures, cinema seats, advertisements, signs, etc.

Points

1. No skilled handling.
2. One man can do work of six.
3. No damage to decorations.
4. The only plug for Marble, Tiles, and Sanitary Fittings.
5. Invisibility—the screw-head covers the plugged hole.
6. The only efficient plug for Plaster or Metal.
7. Ten times cheaper than Metal expansion plugs.



Screw entering, showing expansion of Rawlplugs against side of hole.

WILL HOLD HALF A TON IN BRICK

MILLIONS of Rawlplugs have been used by the Admiralty, War Office, Post Office, and principal Municipal Authorities, Railways, Building and Electrical Firms and Telephone Companies.

Outfits

Household Outfit
50 Rawlplugs, 50 Screws, Rawlplug Tool, $1.00

Complete Outfit
All Sizes of Rawlplugs and Tools, $10.00

Mechanic's Outfit
100 Rawlplugs and Supply of Screws, Special Tools, 2 Bits, $1.50

Rawlplugs are made in all sizes and lengths.

ARE YOU OPEN-MINDED?

Remember that your ability to be an effective business man is dependent upon your open-mindedness. You may not have tried

BABBITT METAL SOLDER
LEAD PIPE, LEAD TRAPS, LEAD BENDS

Sheet Lead

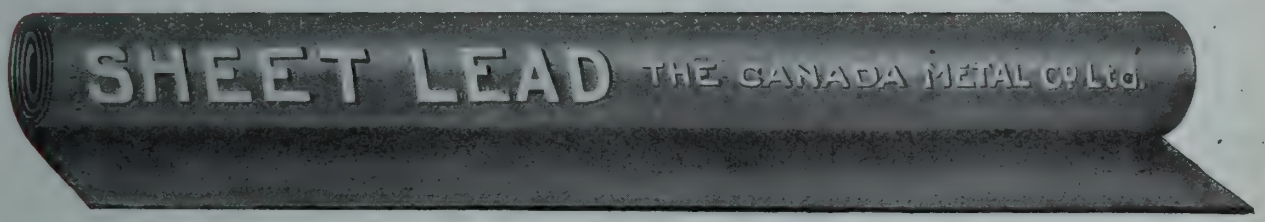
made by The Canada Metal Co., Limited, but that is no reason why you should not!

We make SHEET LEAD up to EIGHT FEET WIDE, ANY LENGTH, ANY WEIGHT.

The lead undergoes a new process of super-refinement which gives to it just

"THE LITTLE MORE"

in acid-resisting properties which is so important to the life of a Chemical Plant.



Remember too we are specialists in the manufacture of

High Pressure Antimonial Lead Pipe

Very great care is taken in the manufacture and the pipe produced combines great rigidity and strength with high acid-resisting properties.

We make any size up to

Twelve Inches in Diameter

Ask us for prices on

Babbitt—Solder—Lead Pipe—Sheet Lead

WE ARE THE LARGEST MANUFACTURERS OF WHITE METAL ALLOYS IN THE DOMINION

Barrett Roofings, Cements Industrial Paints etc.

THESE Barrett Products are widely advertised in farm and technical publications throughout every province. The demand created by this advertising, *plus* the requirements of thousands of users who have already proved the superiority of these products, means easy sales for dealers who are alive to the opportunity.

We can fill your orders promptly, if you send them *now*.

Everlastic "Rubber" Roofing

THIS is the biggest selling roll roofing on the Canadian market.

It is popular with users, because moderate price and long service mean sound economy.

It is popular with dealers, because quick sales and satisfied customers mean larger profits and more business.

Long years of manufacturing experience and the use of carefully selected materials insure the uniform high quality of Everlastic "Rubber" Roofing. It is *always* good.

Everlastic "Rubber" Roofing is made in three weights; light (1-ply), medium (2-ply) and heavy (3-ply), and put up in rolls containing 108 square feet. Nails and cement are packed with each roll.

Everlastic Liquid Roofing Cement

FOR renewing the life of old and worn-out felt and "rubber" roofing, Everlastic Liquid Roofing Cement is positively without an equal. It is easy to apply and forms a new wearing surface that is smooth, tough, waterproof and so durable that it makes the old roof good for several years of extra service.

Although Everlastic Liquid Roofing Cement is a comparatively new product, roof owners have been quick to recognize its value and it is a big seller everywhere.

If you want to save money for your customers you should sell them this remarkable Barrett Product.

Everlastic Liquid Roofing Cement comes ready for use in packages of various sizes, ranging from 1-pint cans to 40-gallon barrels.

The Barrett Trade-Mark stands for high quality products, moderate prices and fair dealing.

It pays to handle goods bearing the Barrett label.

Other Barrett Products are Creonoid (Fly Oil) Lice Destroyer and Cow Spray, Elastigum Plastic Patching Cement, Everjet Elastic Carbon Paint.

"VIKO"

Aluminum Products

Ninety-Nine Per Cent.

Pure Aluminum

Here are some of the reasons why Viko Aluminum Ware sells:—Stamped from pure aluminum; tough and durable; light in weight; attractively and perfectly designed; does not tarnish; clean and sanitary; rust-proof, and free from poisonous compounds. Corners rounded for easy cleaning; economical, because they are fuel saving and last a lifetime. No enamel or plating to chip, crack or wear off. Heat readily, and distribute heat evenly, retaining it longer. Will not burn or scorch foods or leave a metallic taste. No joints or seams to give trouble; jointed with flat-headed rivets. Rolled rims, no grease can accumulate; handles, tinned steel; hinges, nickelled steel; non-porous, non-leaking and unbreakable, aluminum welded parts, double-lipped, parts easily replaced. Raised bottom prevents food burning. Write for catalogue.

CANE'S Clothes Pins

NOT
"Just Clothes Pins"

Cane's Star Brand Clothes Pins are better—they cost no more than "just clothes pins"—but there's a difference.

Star Brand are always right in shape, right in length and correct in count. They will not injure the clothes.

Your Jobber will be pleased to supply Star Brand Superior Clothes Pins at no extra cost.

BILLMONT

Quick turnovers, healthy profits and customer-satisfaction are items dealers and jobbers now view with greater interest than ever before. To carry in stock "just socket wrenches" and wait for the call is not the business builder nor profit reaper that comes from carrying a line such as Billmont with the universal nose-piece among its dozen or more other "headline" features.

Billmont Master, Junior, Long T, Short T, Rim Brace, Speeder, Offset and Rachet are all self-salesmen and dividend payers. The jobbers listed can supply you and if your jobber is not among "those present" ask him why.

B·S·A

SPORTING RIFLES

LEE-ENFIELD ACTION

The B. S. A. Sporting Rifle illustrated has the same action as the famous Lee-Enfield model which proved superior in the firing lines of France. In extremely cold climates the Bolt always functions perfectly—a feature thoroughly appreciated by many veteran hunters where the mercury is below zero.

Since the war there has been a world-wide demand for B. S. A. Sporting Rifles. Dealers can therefore be sure of ready sales. There is satisfaction also in knowing that you are selling a good article that will help maintain the prestige of your business. The B. S. A. Trade Mark stands for rifles and shot-guns of unerring accuracy, perfect balance and excellent workmanship. It is a pleasure to place one of these firearms in the hands of a customer—to see him test its balance, open and close the breech, bring the butt to his shoulder and decide it will be *his* rifle!

Dealers are invited to write concerning the stocking and selling of B. S. A. Rifles and Shot-Guns.

Available from Montreal Stock

Are You Selling Brunswick Phonographs?

If not, you are neglecting a line which is earning big profits for many other live hardware dealers.

Brunswicks are not only big earners on their own account, but will attract more business to the other departments of your store.

It pays you best to sell

The Brunswick
ALL PHONOGRAPHS IN ONE

This instrument has many features not found on any other phonograph—features that give it an outstanding versatility and tone quality, and which make it the quickest selling phonograph.

Three of these features are:

1. **The All-Wood Oval Horn**—that delivers tone free from all metallic harshness, because it is made according to scientific laws.
2. **The All-Record, All-Needle Ultona**—that plays every make of record. A mere twist of the wrist instantly provides the exact weight, diaphragm and needle for every make of record.
3. **The 4-spring Silent Motor**—an exclusive phonograph motor built on a new principle that means absolute silence of the mechanism of reproduction and which continues to play even if any one of the springs happens to break.

Service from Three Warehouses

Several Months of Brisk Selling Ahead

THERE are many bicycle sales yet to be made this year by the aggressive bicycle dealer.

It is comparatively easy for a good salesman to make a sale if it is pointed out to a prospect that there are still several months of fine weather ahead with the roads in the best of condition. And by buying now, the rider will be sure of having his bicycle ready for use with the first good roads next spring. Then, to clinch the sale, give him a strong talk on the many uses of

JACOBS CHUCKS

--- As Advertised

Jacobs Chucks have always fulfilled what has been claimed for them.

Their tested and proven performance has made them the choice of the driller and the preference of the purchaser. Hence their selection as standard equipment by foremost drill makers.

A standard product, widely advertised, makes it imperative for you to handle it. Both for your clients' sake—and your own.

That's why Canadian hardware dealers handling mill supplies have found Jacobs Chucks a most profitable line.

TRADE MARK Red Devil Tools

No. 1024

No. 3700

Red Devil Pliers, Nos. 1024 and 3700

Red Devil is the name found on a complete line of hand tools for mechanic, electrician and motorist. There are more than 50 different styles of pliers made from drop forged tool steel—not pressed metal—that stand up well under the hardest kind of use. They fit the hand comfortably, and every point of design is carefully worked out.

Giant Nail Puller, No. 101

For opening boxes, barrels and crates the Red Devil Giant Nail Puller is particularly convenient. One pull draws out a nail smoothly and straight; one stroke cuts an iron strap cleanly.

Red Devil Hack Saw Blades No. 1239

The teeth of a Red Devil Hack Saw Blade are milled—not punched—and so evenly set that cutting is smooth and easy. They give longer service than is usually expected of a Hack Saw.

If you handle Red Devil Tools the only come-backs will be repeat orders. They are well advertised and known the world over.

Catalog sent on request.

Smith & Hemenway Co., Inc.

89 Coit Street **Irvington, N.J., U.S.A.**

The line is complete: Pliers, Hack Saw Frames and Blades, Chain Drills, Auger Bits, Drills, Punches, Buffalo Grips, Haven's Clamps, Connectors, Slater's Tools, Bearing Scrapers, Cold Chisels, Snips, Bolt Cutters, Lineman's Belts, Climbing Irons, Safety Straps, etc., etc.

"Connor Helps

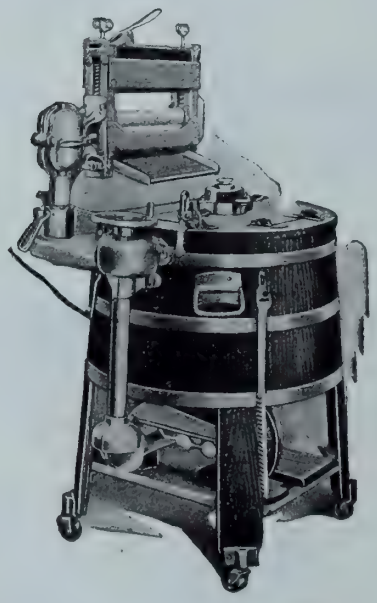
Connor Washers for Big Opportunity

For the Country

Connor Vacuum Washer is the best of all hand-power machines—has made hundreds of friends for dealers all over Canada. Works easily and quickly. Will add many dollars to the credit side of the cash register during the season.

For Water Power

In country homes where there is water power, and in many homes in towns and cities where a low-priced machine is wanted, the Connor Low Pressure Washer will find a ready sale. Thousands of these in weekly use are giving perfect satisfaction.



The Daddy of Them All
Connor Perfection Electric

For use wherever there is electric power. This type of washer takes all the hard work from wash-day, as the washing and wringing of the clothes is done by motor power. Since being put on the market it has proven a winner and every sale has made a satisfied purchaser.
Send for a copy of our new booklet "MORE CLEAN LINEN."

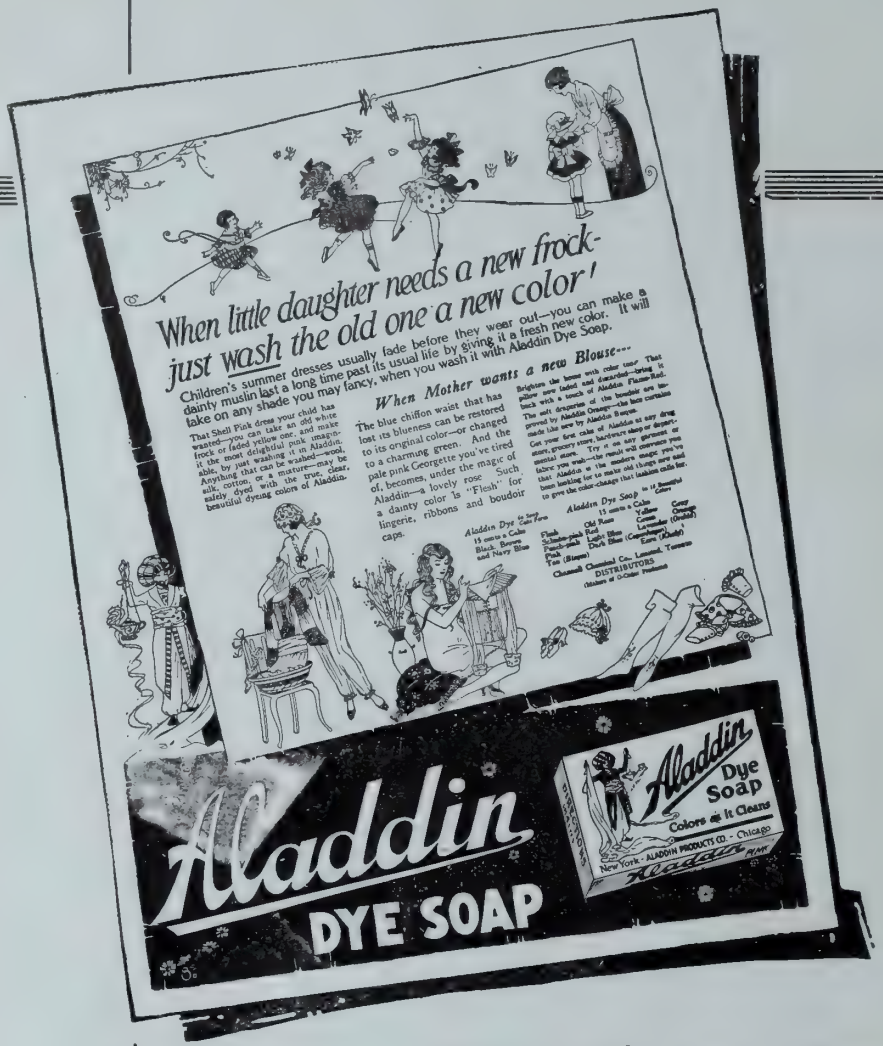
"Where there's a WILT — there's the Way"



A reproduction of one of a series of large Aladdin advertisements now appearing in daily newspapers from coast to coast.

"It's Safe to Count Your Sales Before They're Hatched"

where **ALADDIN DYE SOAP** sales are concerned. On the day you order one gross of Aladdin (and get a handsome revolving display stand free) it's safe to credit yourself on your books with the generous profit Aladdin will make for you. Because Aladdin Dye Soap is being advertised with huge space advertisements in daily newspapers from coast to coast. And—more important still, even the short time Aladdin Dye Soap has been on the market has proved to the feminine world that **The Aladdin** way of washing and dyeing fabrics is the quickest, safest, surest, simplest and most satisfactory way. Order a gross of Aladdin Dye Soap now and count on rapid turnover and good profits.

"The Trade Mark known in Every Home"

UNIVERSAL

Home Helps

Proof in Work—Not in Words

Anybody may claim that the moon is made of green cheese, but nobody ever ate it with crackers. Shallow claims do little in selling household appliances to the woman who thinks with her head and works with her hands.

Universal Home Needs are not objects of "Claims," but subjects of **work.** They render service that registers **results**—the kind that can be **seen, felt** and **tasted.**

When you sell Universal goods you can **prove in the home** what you claim in the store. You are dealing in work done—not merely words spoken. "UNIVERSALIZE YOUR KITCHEN" is widely advertised advice to women. Thousands are taking the advice, to their benefit. They are building business for "The Universalized Store."

Hatch
Garage Door Outfits

To be reliable, serviceable and efficient, a set of garage hardware doesn't have to cost almost as much as the automobile. The Hatch Garage Door Outfit has all the qualities the heart could desire in a dependable outfit—yet it is low priced. Low priced, that is, for the high quality. Try it on your own garage; then you'll realize why the customers are delighted.

The Set Includes:

3 Special Swivel Door Rollers; 22 feet of Track; 3 Pairs Special Garage Door Hinges; 3 Stay Rollers (floor guides); 2 Extra Heavy Garage Door Handles; 1 Safety Hasp (for fastening doors outside); 1 Hook and Eye (for hooking back swinging section inside).

The track comes in separate bundles—two 8-foot and one 6-foot lengths. Screws and bolts for everything. Japan finished and all neatly packed in a wooden box. Ask for prices and details.

A Sweeping Demand

Dust is dangerous. It is the duty of every merchant who handles necessities of life to eliminate dust as much as possible.

Dust rising before the sweeping broom lodges on the shelves, the merchandise, the display counters, carrying with it all the deadly contagion of disease.

IMPERIAL

FLOOR DRESSING

(Standard)

(Formerly "Imperial Standard Floor Dressing.")

—is a non-evaporating, wood preservative that cleans the surface of floors and *prevents dust from rising.* You can sweep your floors without danger of raising the dust if you treat them with Imperial Floor Dressing. One gallon will treat a floor surface of from 500 to 700 square feet, and one application will assure you of clean and dustless surroundings for months.

Stock up! The spick and span appearance of your store will demonstrate effectively the dust-killing qualities of Imperial Floor Dressing and help you sell it.

Sell Starrett Tools

Their *working points* are the best talking points of Starrett Tools.

Dealers who sell Starrett Tools know that the tools themselves are the best arguments they can use.

Take, for instance, the Starrett Micrometer Caliper Square. Show a machinist how it does the work of a whole set of "mikes." How the spiral spring between the jaw and clasp takes up the backlash and limits the pressure against the work to the strength of the spring. He'll soon be thinking of how the square will fit his work. Accuracy? That's understood—for it's a Starrett Tool.

It's because Starrett Tools *are* sold on their working points that the demand for them is steadily growing. Starrett advertising—in over fifty papers, reaching two and a half million possible buyers—directs this demand to Starrett dealers.

"The Tools Mechanics Buy" tells about the working points of other Starrett Tools. Write for free copies for yourself and your clerks.

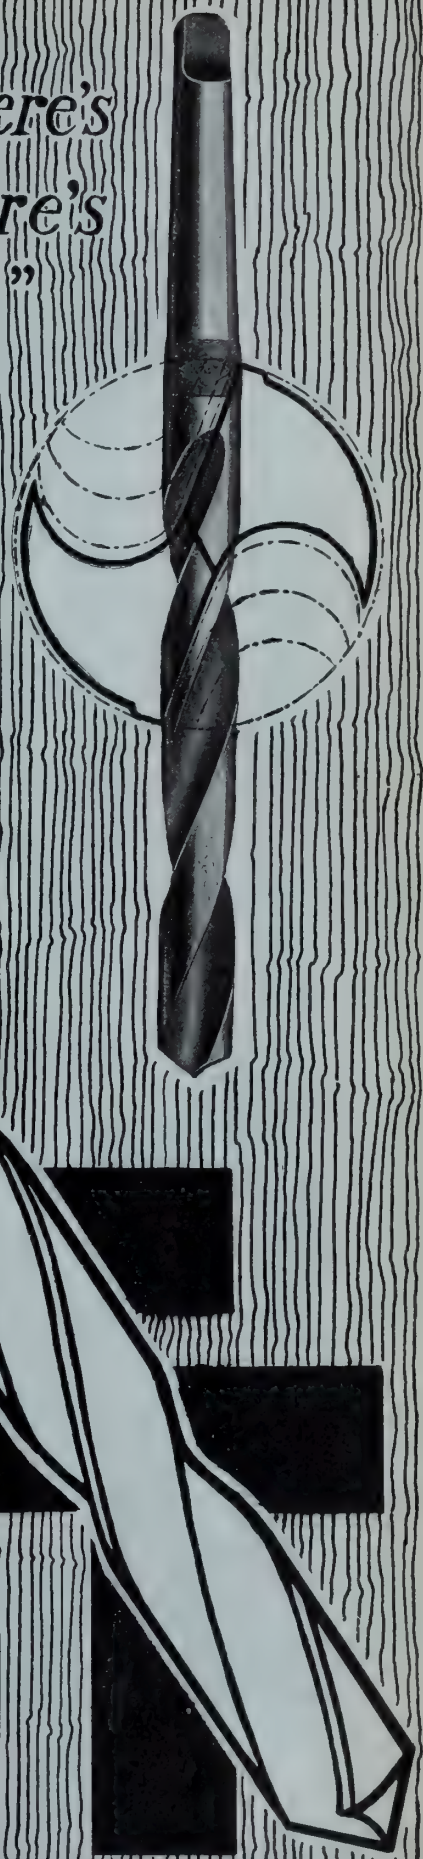
WILT

HIGH SPEED AND CARBON TWIST DRILLS REAMERS AND MILLING CUTTERS



What Do You Say

—when a **Drill Customer** enters your store? Talking about the weather will never sell him. A mechanic must have facts. He knows the need of a good drill in his work.

WILT Twist Drill Facts are concrete. They have a ring of truth and selling value to them. They answer the questions of the expert mechanic. They sell the goods, make sales and win prestige for the dealer.

The years of satisfactory service that **WILT DRILLS** have been giving the trade has earned for them the title of "Quality Products."

The same reputation is back of **WILT Reamers and Milling Cutters.** You will find them as easy and profitable to sell. Armed with **WILT Facts** and a stock to back you up, you will be in a position to capture more worth-while business. May we help you to do it? Write us now for full particulars on the selling value of **WILT Products.**

BUTTERFIELD Tools

Come to Mind at Every Mention of Industry

Butterfield Tools—reamers, taps, dies, high speed and carbon twist drills, milling and gear-cutters—have become so closely interwoven with the shops, plants and factories of Canadian Industry that the mention of industry recalls Butterfield's to men of mechanical callings.

The tool buyers of Canada are in far more than a receptive mood for Butterfield's and the hardware dealer finds them profitable to sell.

Sell a Popular Line

The Bicycle business opens an attractive and profitable field for dealers. People are learning to what wonderful uses the Bicycle can be put to, both for pleasure and utility purposes.

Congested transportation conditions and increased fares are strong factors in boosting the Bicycle as never before.

Riders, however, are demanding Bicycles that are serviceable and dependable, that combine beauty, strength, and easy riding.

You are safe then in choosing the Hyslop Bicycle Line. The demand for these high-grade Bicycles is exceedingly large, because they have for thirty-one years enjoyed a reputation for service and dependability, which has resulted in giving them Dominion-wide popularity.

HYSLOP BICYCLES

sell easily and quickly, especially when given proper display. Their beauty of design and finish attract attention, and upon examination reveal their hidden strength and easy-running qualities.

There is a generous margin of profit in selling these quality wheels, but as one dealer said: "Their exceptional goodness brings repeat orders which result in quick turnovers."

Display a few of our 8 models and your sales records will prove that **Hyslop Bicycles are a sound and profitable investment.**

Hyslop Bicycles will be exhibited at the Canadian National Exhibition, Automobile Accessory Building, west of Government Building—August 28 to September 11, 1920.

Don't fail to see this exhibit and arrange for next season's requirements.

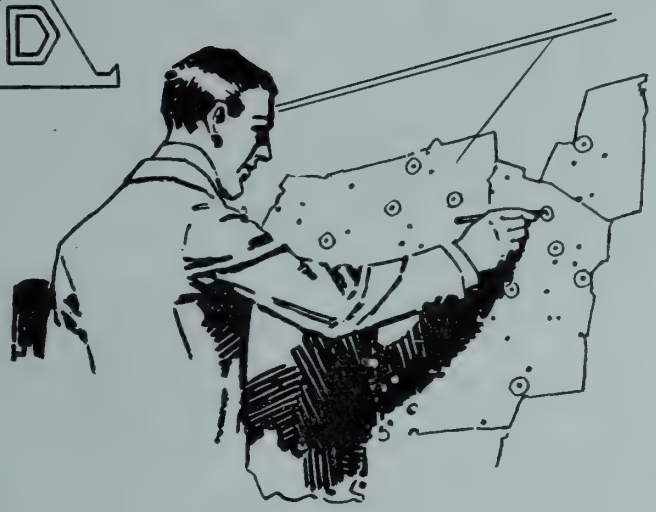
GTD
REG U.S.PAT OFF



One of those Dots may be worth a Thousand Dollars to you

Did you ever sit down and make a map of your community to see just where your business is coming from?—Try it.

Take screw-cutting tools, for an experiment.

Put a dot wherever you see a factory. If you're getting their business in screw-cutting tools, (which they all use in one way or another) put a *circle* around the dot.

Same with garages, where they use screw-plate *sets* day in and day out, according to the amount of repair work they do. How many circles around the dots can you show?

Or machine shops, where they use reamers, pipe wrenches, or taps, dies, etc.? Are there any dots there where you *might* put circles?

Think a minute! Putting a circle around one of those dots may bring you a thousand dollars in added profits.

It's an easy experiment to try. And when you know which dots have no circles, you'll know what business you ought to be getting.

Can you think of any easier way than that to build up your sales of screw-cutting tools—particularly the GTD line?

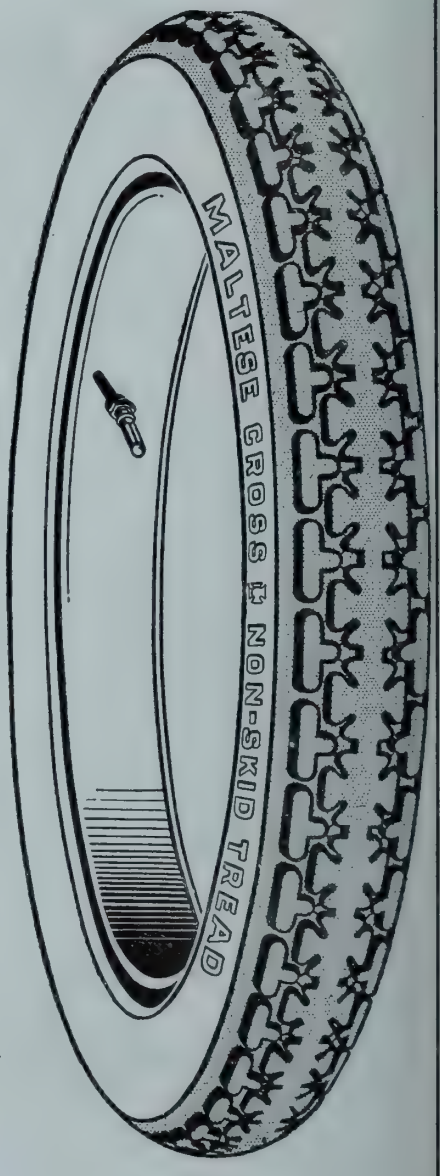
Many New Tires Are Needed

Do You Want the Business?

Many motors have been on the road long enough to require new Tires. Why not instruct your clerks to suggest tires and tubes to every motorist that enters your store? You'll find it helps sales.



"Gutta Percha" Tires

with the "Cross" tread are being used more and more for four-wheel equipment. You can recommend them. They are "The Tires that Give Satisfaction." Keep your stock complete—you may lose a sale if you don't.

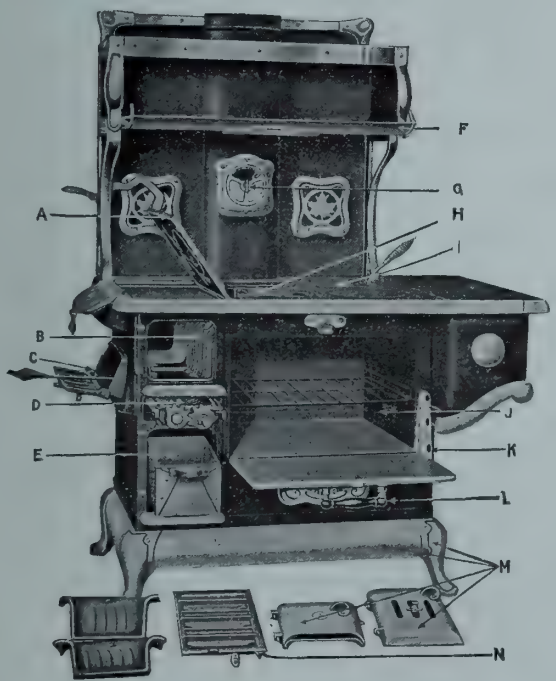
The New Maple Leaf "FALCON"

Is What Every Hardware and Stove Merchant Is on the "Qui Vive" for News of Just Now.

REPRESENTING the utmost in stove value and selling at a price that gives the dealer the edge on his competitor. Sold to only one dealer in a community and he, who gets his say in first, has the option for days to come. You men of experience—you men who have sold stoves by the hundreds in days of yore, read over this description of the Maple Leaf "Falcon" and deep down in your heart—be truthful with yourself and give us your own honest and candid opinion of what you think of the Maple Leaf "Falcon."

A Few of the Construction Features of the "Falcon"



A.—Note height to which front key plate may be raised, allowing scuttle of coal to be emptied freely without use of shovel or poker.

B.—Heavy sectional perpendicular fireback. All other linings also heavy and almost perpendicular.

C.—Large combination draft and poker door opening.

D.—Duplex grates that may be removed through grate opening for replacing with wood grate (note letter N) or for any other purpose, without disturbing the firebox linnigs. Also note improved cog gudgeons.

E.—Very large ashpan size.

F.—Drop closet door.

G.—Combination check draft with key to close off flue and opening for air intake.

H.—Improved sliding direct draft damper, giving full control of heat units to oven or chimney flue.

I.—Key plate top covers and short centres heavily ribbed. Sectional reducing cover.

J.—Large oven made in two sizes, 18 x 19 x 12½ in., or 20 x 19 x 12½ in.

K.—Improved attachment for spring oven door balance. Door held down by spring when open and held tight in place by spring when closed.

L.—Rubberoid oven door handle—always cool.

M.—All nickel parts plain, high finish, easily kept clean.

N.—Special wood grate replaces duplex grates for burnnig wood only.

First shipment—Aug. 15th, 1920. Your order now means early consideration. The price is one that will guarantee you a good profit. Write, 'phone or telegraph for complete information to-day.

You can recommend Carhartt Gloves to your customers with confidence because they will back up in wear any claims you may make for them.

Carhartt Gloves are not cheap gloves thrown together by cheap labor, but are good, serviceable gloves made of sound materials, by skilled workers, under strict supervision. They are uniform in quality right through — the samples are taken from stock. No sample is made up especially. When you buy from a sample you can count on the delivery being just the same, only fresher and cleaner.

Many hardware merchants throughout the country have added Carhartt Gloves to their stock and have found them to be one of the most profitable of their lines. Certainly a display case of Carhartt Gloves adds to the attractiveness of any store, for the goods look their value. Even the lowest priced range is well finished. Send for a sample assortment now, while we can make prompt deliveries.

Story for Week Dated August 28th, 1920 **Being No. 20 in the Series**

Pulp---What It Is; How It Looks; and What The Eddy Company Use It For

WHEN Ezra Butler Eddy began making matches in his little rented factory at Hull, away back in 1851, wood-pulp was to all intents and purposes an undiscovered source of wealth. To-day, with the world's supply of wood pulp none too plentiful, the production of it becomes one of Canada's most important industries. The E. B. Eddy Company are amongst the principal manufacturers of pulp in the Dominion, but they use all they make in the further manufacture of their many useful products.

Wood pulp is the substance of the tree freed from its sap and resinous matter, and its value lies in the length and tenacity of its fibres. They are small enough even when technically called "long," and you might well be pardoned for thinking pulp, in some stages of its manufacture, nothing other than porridge. That is what it looks like, and very watery porridge, too, not at all to the taste of the true Scotchman.

The fibres are hard to see at first, but they are there, and without them the pulp would be for manufacturing purposes as useless as porridge.

The Eddy Company's manufacturing experts can perform miracles with those tiny fibres. They have processes by which they can brush them nicely in one direction, as you would brush a small boy's hair. When they are thus placed in orderly manner they can be made to interlock with one another just as you lock the fingers of your left hand with those of your right. The result is strong, durable paper such as the E. B. Eddy Company have been making for years without fault.

From wood-pulp the Eddy Company manufacture book and writing, news-print, wrapping papers, tissue papers, toilet papers, paper bags, packing cases, sheathing paper for lining the walls of houses, barns and churches, match-boxes, and by ingenious processes, the most substantial and durable household utensils of indurated ware. The basis of all is wood-pulp delivered "From the Tree to the Trade."

More than $75,000,000 in Building Permits Issued in 1919

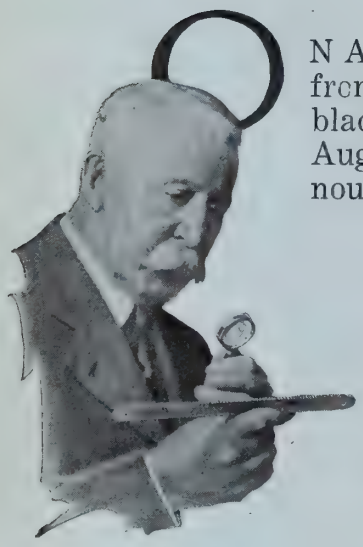
A Message from the man who makes the Stars



N August 15, our company, which has manufactured Star Hack Saws from the beginning, will change its selling policy and market its own blades. The double-page Saturday Evening Post advertisement of August 21 reproduced in miniature on the opposite page will announce this change to Star Hack Saw users.

This new service is, I believe, one of the most important steps ever taken by the organization over which I have the honor to preside. Since 1883 we have been making Star Hack Saw Blades of a quality that has made the green box of Star Saws famous wherever hardware or mill supplies are sold.

No matter how small or remote the store, you are almost sure to find Star Saws there—often the only hack saw carried. It is the famous old brand in hack saws that has stood out in front for 37 years.

There is no need here to recount the price paid for this leadership in a lifetime of metallurgical research and machine invention, concentrated on hack saws alone—in the development of a highly organized plant with special Star Hack Saw manufacturing methods from one end to the other.

The important thing now is that to this better Star Saw we are now adding a better Star Service by selling Star blades ourselves from the factory that makes them. This change is of vital interest to you and every other customer of Star blades, for it makes Star results doubly sure in the users' hands.

After August 15, 1920, send your orders for Star blades to this office if you order direct, or be sure to specify "Star" on your jobber orders. We invite correspondence and service suggestions from the trade on any subject connected with Star Saws. I will see to it personally that they receive every attention.

Geo. N. Clemson *President.*

CLEMSON BROS. INC.

Star national advertising is well known. And it has made the leadership of Star Hack Saws still more emphatically apparent. By a substantial margin Star Hack Saws are the largest selling hack saws and our advertising is increasing this demand still further and making them more and more profitable for you to handle.

Our plans for 1921 will continue our advertising policy on a larger, broader scale than ever before, which is your guarantee of the continued and increasing demand for this famous old brand of hack saws.

PERFORMANCE COUNTS

BURMAN CLIPPERS

Are made for clipping horses and for shearing sheep. They are made of the best materials procurable, by the best skilled workmen it is possible to engage, and by a large company who manufacture only clippers. Never has expense been spared if there was possible the slightest improvement in quality or cut. That means a tremendous lot to the hardware merchant.

YOU DON'T HAVE TO BUY A NEW HEAD

PLATES ARE INTERCHANGEABLE

BURMAN CLIPPERS

Are the acme of perfection when it comes to performance. They cut clean. Heavy work does not frighten the "Burman"; they handle the heavy, tough hair well, giving every service and satisfaction to the user.

One important point for the dealer is that plates are interchangeable, that is, when the purchaser wants to shear sheep he simply requires to change the plates. This does away with the old necessity of buying a new and costly head.

YOU DON'T HAVE TO BUY A NEW HEAD

Alloys to Specification—Phosphor Tin and Copper—Pig Metals, Etc.

LIONROYAL

the general service Babbitt

LIONROYAL fulfils every bearing need in a more thorough way than other general service Babbitts. The reason is:

We have alloyed copper *into* the other ingredients, obtaining for LIONROYAL a durability impossible to secure in a copper coated alloy. Coating a Babbitt with Copper is camouflage—it does not increase its wearing abilities.

We offer you a Babbitt which is honest in every particular—it not only looks the part, but is guaranteed to be every bit as honest in service.

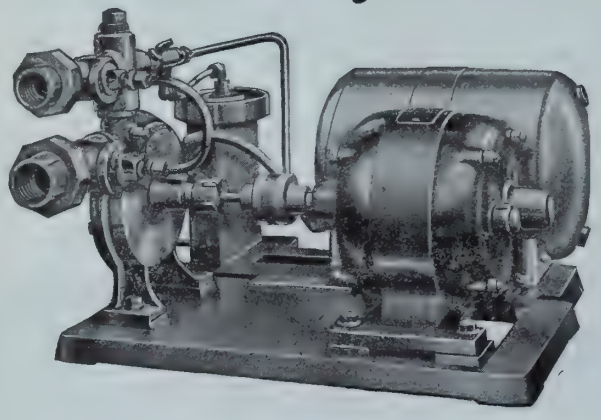
THE FARMER is Badly in Need of the *Westco* Tankless Water System



See It at Toronto Exhibition

Aggressive salesmen and progressive dealers are always looking for a good selling and profitable line to handle. A splendid place to find good selling lines is the Canadian National Exhibition, Toronto, where almost every modern appliance will be on exhibition. Nowhere in all the grounds will you find an article with greater selling possibilities than the Westco Tankless Water System.

It abounds with selling points, features that are vitally interesting to farmers, suburbanites and rural residents. These are some:

(a) Needs no storage tank; pumps water direct from well to taps.
(b) Low cost to buy, install, maintain and operate.
(c) Entirely automatic; turn tap and pump starts at once; close tap, pump stops.
(d) Runs off farm lighting plant or central station power.
(e) Has no valves, no gears, no belt.
(f) Pump has only one moving part—rarely needs attention.
(g) Pumps from 300 to 500 gallons per hour.
(h) Weighs less than 100 pounds.
(i) Uses less power than electric iron while supplying water to four faucets.

There is a fine field for aggressive salesmen selling the Westco System. Can you afford to ignore the possibilities it holds out? You will find it on exhibition at the west end of the Machinery Hall.

WILLIAMS' "AGRIPPA" TOOL HOLDERS

ENTHUSIASM is the lubricant that overcomes friction in production—the use of good tools promotes and encourages Enthusiasm. In this period of insistent demand for the products of manufacture, the importance of anything that tends to increase the output of man or machine is strongly emphasized.

Williams' Drop-Forged Machinists' Tools are sturdy and dependable—they have made good in quality and in efficiency for nearly half a century. Their reputation is thoroughly established. Ambitious operators welcome an opportunity to use them, for "Better tools make better workmen."

Suggest that your customers make an inspection of their equipment *now*. It may indicate where they could obtain increased production, or improved quality, or both, through the lubricant of Enthusiasm, stimulated by the use of Williams' Superior Drop-Forged Machinists' Tools.

Our Machinists' Tools Book will be sent on request.

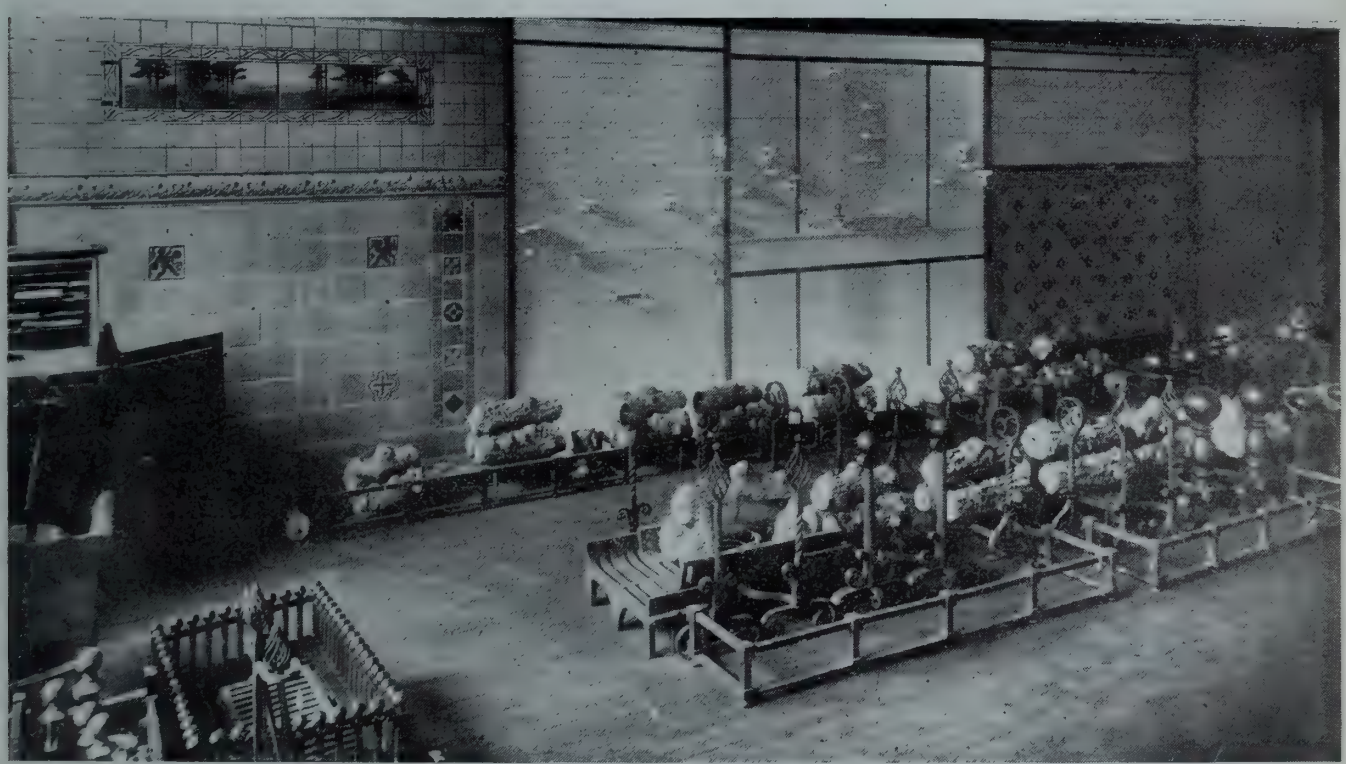
Tile and Mantel Dept. With a Future

Montreal Hardware Firm Sees Big Possibilities—Working with the Architect and House Owners—A Specialty Business that Offers a Big Growth

THERE is a great future ahead for the sale of mantels and tiles, according to the opinion of A. Cross, manager of the Tile and Mantel Department of the James Walker Hardware Company, Limited, Montreal. In an interview with Hardware and Metal, Mr. Cross stated that, while this department has been conducted for less than ten years, the future holds a big harvest, and developments are looked for on a big scale. Even within the period of nine years during which time this department has been conducted there has been great growth. This is attested by the fact that there are at present 43 men employed in executing work that has been contracted for. And in carrying out this work distance is no barrier; "at present," said Mr. Cross, "we have a gang of men in Ottawa carrying out work on a large Government building there."

The establishing of a department of this nature in connection with a hardware business is one that requires careful consideration. It is a department that can be made profitable, as Mr. Cross says, but there are many points to be taken into consideration. For instance, it must be under the care of a specialist in this work, a man who knows tiles of every description, their cost to install, their durability under different condi-



A neatly arranged display of tiles, bathroom fittings, tongs, andirons, imitation logs and other mantel fittings in the store of the James Walker Hardware Company, Montreal. Tiles are claimed to be much more in demand for bathroom finishing than marble and it is by showing some neat designs in tile work, such as are arranged in this display, that the popularity of tiled bathrooms is increased.

tions, and also their suitability for a given purpose. For it is quite important and even vital that when a customer calls for an estimate on such work the most desirable effect producible be clearly visualized by the department head. A pleasing and successful job is perhaps dependent upon this.

Follow Work Closely

Mr. Cross takes great pride in his department. To this end he not only solicits the contract, but has blue-prints prepared to accompany estimates. Then, once a contract is secured, it is followed up closely to see that the men acquit themselves in a workmanlike and expert manner. An instance cited by Mr. Cross while speaking with Hardware and Metal well illustrates this:—

Recently one of our men was on a job in a bath-room. I happened along. "What are you doing John," I asked.

"Why, what do you mean?"

"Take a look at your work," I replied, "do you really think it is all right?"

"Well, you wish to have the work done in a given time," came his answer.

"You know I do not want the work poorly done, and that an hour or two extra will not be amiss. We want our work to be satisfactory."

It is thus clearly indicated that the only way to successfully compete for business of this nature is to follow the contracts up closely that are being executed by the workmen. A careless job may cost the firm many others that were within reach. As much of the work done and much of that to be performed in future will be in homes, it is very important, Mr. Cross feels, that the very closest supervision be exercised while the work is being done.

Tastes Differ

Asked as to the average desire in selecting the material for work of this kind Mr. Cross stated that architects favored the various shades of marble. This was their choice largely because the cost thereof is from 15 per cent. to 20 per cent. less than that for tile. It also produces a cold-looking and not a cozy effect as is procurable when tiling is used. When the home is considered, the use of tile is, in Mr. Cross's opinion, much the better to recommend.

In connection with private work it becomes necessary for the merchant to suggest and advise. To this end his expert knowledge of effects desirable in a hallway, a bathroom or elsewhere will be called upon. A diplomatic way of advising will be appreciated, and the customer, in the long run, will be well pleased. And a pleased customer means everything.

There is, of course, the difficulty of running up against customers who are unreasonable. With an untrained eye, a man may come in to ask for a price on work of which he knows but little. A man of this type has perhaps secured a price on a given bath-room from a competitor. One looks the job over and names his price, only

Appeal for Women's Trade Through Windows

Perry Hardware Company, Estevan, Sask., Believes Windows Most Valuable in Appealing to Women—Smallware Tables With Screen Bottoms Avoid Collection of Dust and Dirt—Auto Accessories Given Prominence

EXTENSION of trade along several lines has made necessary the construction of a large addition to the rear of the store of the Perry Hardware Company, Estevan, Sask. A large bright tinshop and additional storage space is provided in the new building. A balcony extends around the new section with a wide stairway leading to it. The office is on the balcony and is arranged so that the manager's desk can be seen from any place in the store.

On the balcony a display of mattresses, beds, washing machines, baby carriages, pumps and electric fixtures is arranged. A novel means of displaying mattresses has been adopted by the use of runners which allow of twenty-four mattresses being hung at a time. The runners can be made any length.

Windows Sell Washers, Kitchenware, Etc.

Window displays are held to be largely responsible for the success which has attended the efforts to sell electric washing machines, kitchenware, etc. "Windows that appeal to the women have the biggest pulling power," said Mr. Perry to Hardware and Metal.

An up-to-date electric fixture display has been arranged, fixtures being affixed to the ceiling and connected up so that they can be illuminated.

Considerable trade is developed with the coal mining companies located nearby and a specialty has been made of this kind of business. Last year the store sold three cars of powder and two cars of carbide to the mines.

Took Business From Implement Dealers

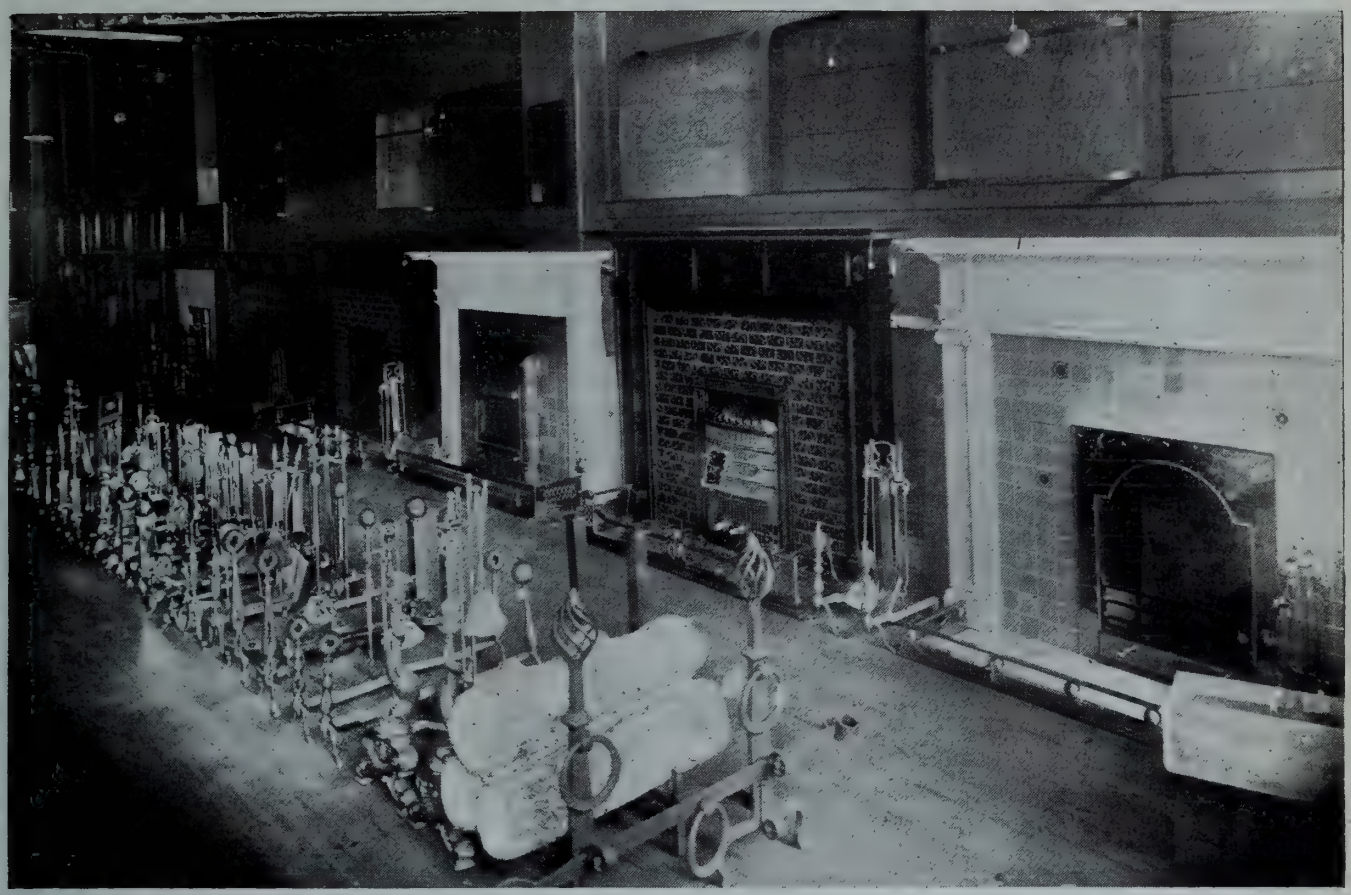
Plow shares are a line which were introduced to the trade through the Perry Hardware Company for the first time about a year ago. At the time a circular was sent to every farmer throughout the surrounding community. By thoroughly advertising the line and talking it up to the trade at every opportunity it is significant that the hardware store took away from the implement dealers a very large portion of trade in plow shares. Bins are built to contain each tye of plow share to facilitate handling.

A suggestion to other stores located in districts where a large farm trade is done, is to have the name of the store on the back of the store as well. Mr. Perry has found this a convenience to farmer customers who approach the store from the rear.

Tables for displaying small wares have been built in the centre of the store. These are about 30 inches wide and 12 feet long. A sand screen is used for the bottom of the shelves instead of a board so that dirt and dust will fall through instead of settling on the tables. Under these tables are movable platforms with sash rollers on each. These platforms carry washtubs, washboards, etc. This is found to be a convenient way of handling such lines as they can be pulled out easily for the inspection of customers.

Auto Accessories Given Prominence

An automobile accessory department has been opened just recently at the front of the store. "We believe in giving accessories the utmost prominence," says Mr. Perry. The paint department has recently been rearranged allowing of better display and arrangement, color cards being hung from the ceiling. A special section has also been set aside for bicycle accessories, it being found that this is a developing line with the people in rural districts and requiring special attention at the hands of the hardware dealer.



This is the other side of the display room and is devoted to a wide variety of mantels and fittings, including screens, fenders, tongs, poker and brush sets, andirons and logs. It will be noted that this display room is large enough to enable the showing of nine mantels along one wall. This class of goods takes a lot of display room, but according to the James Walker Hardware Co., Montreal, it is well worth the attention given it. No one will deny that this line makes a very attractive and homelike display.

to find the would-be customer retort that the price is too high, or something of that sort. When the facts are looked into and the estimates compared, Mr. Cross states that there are usually defects in the lower-priced contracts which make the job a cheap one for the owner, and one that will not give service. If reasonable, the customer can be made to see this and will award the contract, very probably, for the better material and workmanship.

With architects, it often happens that they will be set on a pattern and shade combination which, when finished, will not be at all suitable. This leads to more or less difficulty that is only overcome by diplomacy.

Average Bathroom $150 Up

In referring to the average cost of this work Mr. Cross stated that the outlay necessary for a bathroom would run from $150 and upwards. Then there are kitchens, hallways, entrance halls, and other odd places around the house where some of this work may be desired. It is here where a knowledge of the effects to be produced is valuable and really imperative. To the man who studies the whole question many excellent returns will come. It is a business, indeed, where one must be on the alert, for as Mr. Cross states, there is not only considerable competition, but much of this is of an unfair and unscrupulous nature.

In addition to this special work, already outlined, there is a good demand, and will be an increasing sale, for fireplace mantels. During the war period, with building so restricted, there was a lull in this activity and the pickings were small. But with buildings now being erected, and with the effort along this line bound to grow, there is a considerable amount of business in sight for years to come. Here, again, tastes and effects must be studied. Then there are firebaskets, tongs, fenders, andirons, etc., which are so well displayed in the accompanying photographs.

While it is possible, Mr. Cross thinks, to interest the householder in having work of this kind done, and while personal salesmanship can be brought into play in cultivating this, it is essential to work in with the architects closely. This is absolutely necessary in considering such work as is called for in public buildings, apartment blocks, stores, etc.

Anomalies of the New Tax Schedule

A Feature That Has Been Overlooked is in Regard to Mail Order Business Between Manufacturer or Wholesaler and the Actual Consumer—Small Items, It Is Claimed, Are Not, as a Rule, Invoiced.

By HENRY MILES, M.L.A., for St. Lawrence, Quebec

THERE are many anomalies in the new tax schedules. By departmental regulations or decisions the resolutions adopted by the Parliament of Canada have been satisfactorily covered in respect to objectives, and as to textual difficulties, but one feature that has been overlooked and which affords even a general interest is in regard to the mail order business or trade, if you would call it so, between the manufacturer or wholesaler and the actual consumer. The law lays down clearly the principle that a two per cent. tax applies; that the seller may absorb one per cent. of this tax, but that one per cent. must be levied upon the consumer; further—that an invoice must be rendered to the consumer showing at least a one per cent. tax charge.

This is all right enough with trading between the manufacturer and the retail tradesman. It is the trade custom to issue invoices to all dealers, but it is not the custom of the trade to invoice small items sent by mail or otherwise to the consumers.

Invoicing is Expensive

Tens of thousands of articles are thus sent out all over the Dominion in response to orders accompanied by the money to cover. Such invoices have never been sent to the purchaser. Every house in the country is transgressing the law technically in responding to these orders. The manufacturer or wholesaler makes return of two per cent. each month upon such sales but it is impracticable to comply with the law. Take for example a man in Edmonton who sends to a Montreal firm—we will say —25 cents for some article. To comply with the law and for the purpose of collecting from him one cent tax on the transaction the seller must send an invoice and collect. To do this will cost him four or five cents for stationery and postage stamps (3c)—then the buyer must spend a like amount approximately to comply with the invoice. In other words, between the two the cost of compliance would be, say, nine or ten cents to collect one cent tax.

This could not have been considered, and it would seem impossible that Parliament did so intend—ostensibly a tax of one cent on a 25 cent transaction would entail a cost to buyer and seller of ten cents, and of which the Government would get six cents for postage stamps. It would, in practice, constitute a prohibition of such trading with consumers. This would meet with serious objections. A large portion of such ordering emanates from places where there are no stores and the orders are often for goods urgently wanted. If this feature of the law is to be rigidly enforced there would be only one way to deal with such business logically.

CHARGED HIS WIRE FENCE

When a man connects a small battery with his fence, runs an electric current through it, and thereby causes children as well as older persons to be subject to harmless though sudden shock, and a neighbor objects and wants the inventor prosecuted, what should the charge be? After prying into the statutes to find some section under which the defendant might be tried, and receiving various sorts of suggestions from all counsels, the judge passed judgment along to the justice of the peace on a charge that it was a violation of the building statutes of the city.

Disorderly conduct, assault and battery and contributory charges were framed against the accused. Defendant said the fence was charged to protect his garden and keep children out of the yard.

Hope For a "Decision"

The manufacturer or dealer receiving the 25 cents would write to the buyer, return him 20 cents, expressing his regret that he cannot supply his wants and that under the Government's drastic prohibitory regulations such contact with the consumer cannot occur and, further, that to afford this information it unfortunately costs him five cents to obtain it—this to cover postage and stationery. It is hoped that the department will issue a "decision" that this tax, as between the manufacturer and any dealer or trader, must be collected by invoice and as set forth in the enactment referred to, but in respect to orders for goods to bona fide consumers—sent to the homes of citizens for consumption. Invoices need not be rendered and the seller shall — as at present — simply include the two per cent. tax in his usual monthly payments of taxes to the Government. The trade wants a departmental regulation permitting the absorption of this two per cent. tax, and the elimination of the invoice feature, which involves in one way or other a cost to buyer and seller of ten times the amount of tax the Government seeks by the text of the statute.

Representations have been made by me to the Government, and all manufacturers and wholesalers interested earnestly hope for the reaching of reasonable action in respect to same.

Welland Gets Rubber Plant

Manufacture of hard rubber goods, plates and cells for batteries, etc., will be undertaken in Welland by Joseph Stokes Rubber Company of Trenton, N.J., who have acquired a three-acre site in that city, adjoining the Grand Trunk Railway.

BUYERS AND SELLERS OF IRON AND STEEL

Pittsburgh sheet mills are curtailing production on account of the car shortage. It is estimated that production has now fallen to about 40 per cent. below capacity.

For the first seven months of 1920, the Ford Motor Company turned out 990,000 cars. This was 10,000 short of their schedule.

Deliveries on plates by Pittsburgh mills are improving. One result of this is a slightly easier market, but the price ranges generally from 3.25 cents to 3.50 cents.

In order to relieve the shortage of cars, it is proposed to move a much larger amount of grain over the Great Lakes. This in turn will cut into the ore shipments, which are already far behind.

The Dominion Steel Corporation recently shipped its first consignment of plates for foreign order from its new plate mill at Sydney, Cape Breton.

Increased car supply, and conservative buying, is expected to make the market price of coke in the U. S. drop considerably in the near future. A drop of from $1 to $3 is spoken of in some quarters.

The putting into force of the freight increases in the United States is expected to provide an impetus to the heavy machine tool trade. One road has already come into the market for 53 tools of various kinds.

European production, coupled with the increase in freight rates, is leading some of the steel exporters in the United States to fear the coming of competition from that quarter.

Although the United States production of July was greater than that of June, the daily production was less, counting the one day extra in July. The figures for the month were 3,060,626 tons in July, as against 3,046,623 tons in June.

Interesting Survey British Sheet Situation

Production Has Been Greatly Augmented by Many Mills But Skilled Labor Still Inadequate —Merging of Interests Has Helped Greatly— Will Cultivate Canadian Trade

Editor's Note: In this interview with W. S. Leslie, president, A. C. Leslie & Co., Ltd., Montreal, it was indicated to Hardware and Metal that there are desirable changes for the better in the British sheet steel market. Mr. Leslie spent several months in England and on the Continent and his outline of the present situation will be read with interest by readers of Hardware and Metal.

"I FOUND British manufacturers generally very busy and largely unable to fill all orders offered them, output being generally limited by lack of sufficient workers. Change to an eight-hour day had a great deal to do with that, as in the case of works running night and day (which of course is common to the steel trade), it required three shifts instead of two, and many makers had part of their plant standing idle on that account.

"The production of steel had been increased so largely during the war that even with works not running to full capacity, the tonnage available was fairly adequate, excepting, perhaps, in supplies for the shipbuilding trade, which, in spite of some cancellations, is still extremely brisk.

Imports Affect Price Basis

"Imports of American and other foreign steel have been rather small during the summer owing, largely, to transportation difficulties in the United States, but quantities had latterly been increasing, thus resulting in some concession from the very high prices of British make, and as demand for some forms of finished steel had rather slackened off it is probable there will be some further concessions in price. Even so, it would leave British prices too high to enable them to compete very seriously in Canada or other markets where they meet American competition.

"The supplies of iron are shorter than those of steel, as blast furnace capacity has not been increased so largely as steel furnace capacity. It is increasingly difficult to get puddlers as few young men care to learn that arduous trade when they can easily get good jobs at steel furnaces.

Amalgamation—Labor

"A marked development during the last year or two has been the merging of different works into large companies, or the formation of financial alliances which answer the same purpose. This has given many of the larger companies control of their own supplies of fuel and raw materials, as well as furnishing them an outlet for their semi-finished steel, and with the return to more normal conditions this should prove an important factor in helping the British maker meet competition.

"Labor conditions seemed to be much more settled than they had been a few months before, and the complaint is still very common that the men are not doing a fair day's work for the liberal wages which they now receive. This is probably most marked with the coal miners, and with the less skilled trades in connection with iron and steel works, the trained men generally giving efficient service, but not increasing the pre-war output.

For Better Trade

"With hardly an exception I found British makers most anxious to cultivate trade with Canada as far as conditions would permit, and in many cases showing great enterprise in meeting conditions, and while it is difficult to forecast the chances for increased trade between Canada and the Mother Country, when the present abnormal conditions have passed I am strongly in hopes that the connection will become closer than for many years past."

Big Demand for Heating Goods ; May Advance

Recent Advances for Raw Materials Will Tend to Firm and Perhaps Advance Finished Products—Boilers and Radiators Scarce—Increase in Rail Rates Will be Factor, Says Montreal Heating Man

"THERE is no likelihood of lower prices on stoves, ranges, radiators or boilers, and advances are probable." In these words, W. L. Helliwell, Montreal manager, Gurney-Massey Company, interviewed by Hardware and Metal, referred to the outlook on these products for the coming fall. "Increased costs for labor, coke, pig iron and the difficulty of obtaining steel sheets from the mills are factors, and what advances have been made in the past months have barely covered the increased costs for raw materials. I see no possibility whatever of lower prices, and I believe there will be little reduction, if any, for at least a year."

Mr. Helliwell stated that, in view of the uncertainty of obtaining raw material, and also in view of the general outlook last spring, there was an unwillingness to make commitments on definite contracts. Should conditions not improve this would lead to confusion and difficulty, and in many cases it was considered better business to continue supplying demands as they were made and thus hold the confidence of the trade. This has been done to a very great extent, and by carefully taking the trade into confidence, manufacturers, in some cases at least, have supplied the trade with their reasonable needs. There have been occasions on which deliveries could not be made, but on the whole matters have worked out quite well.

Supplies Stalled

In connection with producing raw materials the manufacturer has had no easy time. "I know of one case," continued Mr. Helliwell, "where several cars of steel sheets were on order by a certain manufacturer who needed them urgently to continue operations, and the supplier advised that the sheets were available. But they could not be moved. There were no cars. It simply made a very awkward situation for this manufacturer for there was no way of obtaining the sheets so urgently needed."

This is a typical instance of the difficulties which confront the manufacturer who is dependent upon steel sheets, and it follows with other commodities, such as coke, pig iron, skelp for making pipe, castings, etc. Of cast goods there is a real scarcity at the present time, and this shortage will perhaps not be much relieved for a long time.

"But transportation in Canada is very satisfactory, taking it all through," said Mr. Helliwell. "We are much better off than they are in the United States, and we would be still better situated had they not so many of our cars over there which we cannot get. The Canadian transportation situation is much better than it was six months ago; the Canadian roads are doing well."

No Let Up in Demands

There has been no great noise regarding the ordering of heating goods, but at the same time orders have bulked large all the season through. "Business has been good and the movement this year is greater than that of last. There has been a great deal of building in this part of the country, and at present there is a real scarcity of radiators and of boilers. Pipe and fittings, and also valves have been very scarce, and cast iron goods are hard to get," commented Mr. Helliwell.

In this part of Canada there has been much building of houses, and there have also been activities in connection with apartment blocks and other business premises. Taken in a general way, the

(Continued on page 45.)

By Co-operation Retailers Can Win Against Mail Order Competition

THERE are many Retail Merchants who do not feel secure nor hope for free expansion as long as the Mail Order House cloud hovers above.

A great deal has been written about methods which could be used by the Retailer in combating this menace. Some of these are rather fanciful and do not work out in practise but there is one which seems to prove universally successful and we commend it for your serious consideration.

It means the getting together of all the merchants in your town and the formulating of one policy to be followed by all. This policy calls for somewhat the same line of argument to be used to customers by every dealer in the community; in fact one might say it means that the merchants would need to conduct an intensive advertising campaign. This does not mean necessarily newspaper ads, but means anything which will reach and impress the peope in your community and which will bring home to them the effect this buying of goods outside of one's town will have on them, their property and their future. They must be told in unmistakable language that every dollar they send to Mail Order Houses depreciates their own property and lessens their own chances for success. This is the most powerful and effective appeal that can be made and it can be varied to suit local conditions. Thousands of people who patronize Mail Order Houses do not realize how they are working against their town. They have never had the vital truth brought home to them in the right way. Many of them think that their townsmen, engaged in Retail business, are merely working for their own personal gain when they attempt to fight the Mail Order House.

When it comes to the stove business itself, don't you think some of the following questions, if put by you to a prospect, would help along your case considerably?

DID YOU ever hear of a Mail Order House setting up a stove in a customer's house?

DO YOU know that it is often a matter of weeks before the mail order house makes delivery?

DO YOU know that the mail order stove often arrives broken, thus necessitating much red tape with railway officials and a great loss of time—often when the stove is most needed?

DO YOU have a look at the mail order stove before you buy it?

DO YOU see a mail order stove before you send your money?

IF THE mail order stove proves defective, who do you have to appeal to? The mail order house may be hundreds of miles away.

WHO uncrates and unpacks the mail order stove, puts the parts together, fits the joints and tests the stove to see if it is in perfect working condition?

WHAT DO you do when you want repairs for a mail order stove?

WHO FITS the pipes for a mail order stove?

DOES the mail order house haul the stove from the station, sign for the stove in good condition, unpack it, mount it and see that it is free from defects before it is delivered to you?

DOES the mail order house help to build up your community?

DOES the mail order house contribute to the support of local schools, churches and public institutions?

DOES the mail order house employ any of your fellow-townsmen and thus enable them to support their families?

DOES the mail order house buy anything from the other merchants of the town?

Originally some years ago this appeared in Hardware and Metal, and has been widely copied by stove manufacturers and other papers in all parts of America.

Editorial Comment

TRADE IN GERMANY.

MEMBERS of the iron and steel trade who have lately visited Germany give accounts of the industrial situation in that country, differing widely from most of the reports which one reads in print. They state that until Easter business in steel, machinery, tools, and other steel goods in Germany was even brisker than before the war, and a considerable proportion of the output was exported. Depression set in at Easter, and since then activity has declined to a much greater extent than in Great Britain. All sections of the community in Germany were working with a diligence which is said to be conspicuously lacking in England. They appeared convinced of the ability of their country to get on its feet again in commerce and industry unless some untoward event, such as another revolution should occur, and danger of this is threatened by a serious shortage of food. A great part of the population is living in a state of semi-starvation, and if this condition is not soon relieved it may drive the people to violent measures. Germany has produced and exported since the end of the war large quantities of machinery, and has sent a good deal of steelworks plant to various European countries, especially to Sweden. Contrary to the belief prevalent in this country, it appears that throughout the war Germany was able to make high-speed tool steel for use in her munition shops, the necessary tungsten being procured from ores which could not be worked profitably in normal times.

TAKE ADVANTAGE OF CASH DISCOUNTS

THE average merchant is apt to think that he loses nothing but the discount when he fails to take advantage of the cash discount offered for payment of his bill in five or ten days, and that so long as he pays before the expiration of the full time allowed his credit is A-1.

But, a perusal of an address by Webster King Wetherill, president of the Aldine Trust Company of Philadelphia, reveals the fact that financial men are apt to rate the merchant who fails to take advantage of the cash discount as of uncertain credit.

Mr. Wetherill says: "In all credit rating, the buyer who does not take advantage of this cash discount is always classed as of uncertain credit; and even though his statement may appear to show him a good credit risk, his credit rating is lowered when he does not take advantage of the cash discount. The best that can be said of a business man, and when once said eliminates any further consideration of his credit, is: 'He discounts his bills.' Those who discount are the highest credit; those who do not are inferior risks.

"It is to eliminate the credit risk that the discount is by natural process of business development continued at a rate higher than the use of the money is worth. The discount for prompt pay is sound in principle, and is a good practice, and differentiates between good credit customers who can discount and the slow-pay poor risks who have not got the money to pay promptly nor good credit to finance their business.

"While discount is called an allowance for prompt pay, it is in reality figured off the selling price in calculating returns, and is a penalty which the slow payer, who does not take advantage of this, pays for the use of the money and the risk of carrying the account.

"You classify your customers by their discounts—those who discount you can send all the goods they want and those who are not able to take your discounts are a class that must be watched."

THE early closing movement is meeting with a great deal of success, especially throughout the Western Provinces. In this as well as any other good cause there are always a few who are only too glad to take every opportunity to break the by-law. The latest comes from a Western city where apparently there are some merchants who have been doing business after closing hours by utilizing the telephone service. The city officials are putting through an iron-clad definition of the word closed which will leave no room for doubting its meaning.

Events in the Trade

Business Changes

DESERONTO, ONT. — The Quinte Glass Co., at Deseronto, Ont., have been succeeded by the Quinte General Mfg. Co., Ltd.

TORONTO, ONT.—The Quinte Glass Co., at Toronto, have also been succeeded by the Quinte Mfg. Co.

PORT CREDIT, ONT.—A new business has been commenced here by L. Harry. He is to carry a line of hardware and electrical goods.

Incorporations

The Richmond Wire & Iron Company, Limited, has been incorporated to manufacture household wire and iron products, goods of all kinds in iron, brass, tin, copper, aluminum, electrical, etc., their chief place of business to be at Richmond, Que.

The Exide Batteries of Canada, Ltd., has been incorporated to manufacture hardware, tools, utensils, batteries, etc., their chief place of business to be at Toronto, Ont.

Darling Bros., Ltd., have been incorporated to manufacture iron, steel and other metal products, their chief place of business to be at Montreal, Que.

The London Concrete Machinery Company, Ltd., has been incorporated to manufacture metals, structural materials, electrical apparatus, etc., with their chief place of business at London, Ont.

The Dominion Brass Products, Ltd., Toronto, Ont., has been incorporated to manufacture brass, etc.

Western Ontario News

A new $500,000 company has been formed at Listowel, Ont., to manufacture oil engines, locks and agricultural implements and tools. M. I. Adolph is president of the firm which will be known as the Canadian Farm Power and Machinery Co., Ltd.

The Andrews Wire Co., of Watford, Ont., contemplates the erection of a $25,000 addition to its factory.

Clifford Cake has joined the sales staff of the Russell Beattie Hardware at London, Ont.

On Friday evening London Sheet Metal Workers Union, No. 673, held the first of a series of social evenings that are planned for the fall. The affair was well attended and most successful in every way.

Announcement will be made shortly regarding the location in London, Ont., of a large new plant for manufacture of malleable castings. The plant, according to officials of the Chamber of Commerce, will be a subsidiary of the Ruggles Motor Truck Co. which will start work shortly on a new $2,000,000 plant.

H. L. Martinson, hardware merchant, at Cottam, Ont., and Mrs. Martinson were recent visitors at Point Pelee, making the trip by motor.

Mrs. R. M. Birce and children, of Essex, Ont., were recent visitors with friends at Belmont, Ont., and have gone to Cedar Beach to spend the rest of the summer.

It pays to make timely and seasonable appeals both by advertising and window displays. At Ridgetown, Ont., an Old Boys' Reunion is in progress all this week and among the visitors are many Canadians now residents of the United States. J. H. Slater, hardware merchant, is making a special "drive" on cutlery and in his advertising featured the following: "If you are an 'Old Boy' and from across the border, you will be interested in our line of English Pocket Knives and Razors." Splendid sales resulted from the advertising and display of cutlery.

Colonel T. S. Hobbs, of the Hobbs Hardware, London, Ont., who is a great lover of flowers and has one of the finest gardens in the province at his summer home at Kilworth, Ont., was rather strikingly honored at the big Western Ontario Gladioli Show in London. S. F. Wood, who had on exhibition a new and very beautiful specimen which he had raised, named it "Colonel Hobbs" in appreciation of the Colonel's work in furthering floriculture.

The County Police are investigating a mysterious robbery at Bateman's Hardware at Morpeth, Ont. In addition to a number of articles of merchandise the burglars secured all the money left in the till. A number of store robberies have been perpetrated in Western Ontario recently and in several places the police are warning merchants not to leave money around where it may easily be stolen. At Hoover and Millsons at Bothwell, near Morpeth, more than $300 worth of tires and auto accessories were stolen.

Car Shortage Still Acute

According to reports, car shortage on railroads of Canada and U. S. increased slightly during the week of August 1, when supply was 132,370 cars less than demand, compared with shortage of about 125,000 cars during previous week.

St. John, N.B., News

This year is the sixth in which the semi-annual dollar day has been observed as a bargain day in St. John, N.B. A greater number of merchants of the city joined the dollar day brigade this year than in former years, and also more citizens took part in the buying. Throngs of shoppers crowded the streets from early morning until closing time in the evening.

The sidewalks in front of the most popular stores were blocked from time to time, and inside the stores traffic was very much congested.

The merchants consider the day to have been a very real success. A large staff of extra clerks was put on for the day in many of the stores and sales were speeded as much as possible. In some cases it was found necessary to close the stores at noon time to give the clerks an opportunity to get a lunch. Half of the staff was not sufficient at any time to handle the crowd.

Many of the hardware concerns held special dollar day sales. One firm used full-page advertising in the local papers, calling attention to their specials.

The Retail Merchants' Association is largely responsible for the innovation of dollar day in St. John, and it has gained public favor with each recurring February and August.

Miss F. P. Alward, provincial secretary of the Retail Merchants' Association, St. John, N.B., has been attending a meeting at St. Stephen, N.B., at which arrangements were completed for the holding of the annual convention of the provincial organization in that town next month. The meeting was a busy and an enthusiastic one and Miss Alward reports that the details of the program of the convention have been most satisfactorily worked out. It is expected that there will be between seventy and eighty visiting delegates attending the convention, and the St. Stephen hosts entered into plans for their entertainment with anticipation of much pleasure.

Want Brazilian Consulate at Montreal

An effort is being made at Montreal to have the Brazilian Consulate reopened. It appears that since the transfer of the former consul to another city there has been a desire on the part of the Canadian Manufacturers' Association to have a new representative appointed for Montreal, and the matter has been handed over to R. W. Gould, the Montreal secretary, who will communicate with the New York Consul regarding definite representation here.

Amalgamation of St. John Axe and Tool Makers

On Sept. 1 Company to be Known as Campbell & Fowler, Ltd.—Re-Amalgamation of Business Founded Fifty-Seven Years Ago

THE recent amalgamation of two axe manufacturers in St. John, N.B., the Josiah Fowler Company, Limited, and G. Wilford Campbell & Son, is really a reunion of the sons of the founders of the businesses. Fifty-seven years ago the late Josiah Fowler and the late William Campbell entered into a partnership as edge tool and axe manufacturers, locating on City Road, St. John, N.B. In 1879 this partnership was dissolved, Mr. Campbell building a factory on Smythe St. (occupied at the present time by G. Wilford Campbell & Son) and Mr. Fowler remaining on City Road.

In 1893 the Fowler business became Fowler & Rankine, and in 1895 the firm was made a limited company, under the name of Josiah Fowler Co., Ltd. In 1918 Mr. Josiah Fowler, the founder of the business, died. William Campbell died in 1895, when the business was reorganized as Campbell Bros., the partners being G. Wilford Campbell and Charles R. Campbell.

In January, 1920, the name of this business was changed to G. Wilford Campbell & Son, Kenneth Campbell having been taken into the business by his father, representing three generations of Campbells.

The Josiah Fowler Company, Ltd., have built up a business apart from the tool and axe manufacturing in the manufacture of special automobile and carriage springs. This line will be carried on by the reconstructed company.

On September 1st the company will commence operations under the new name of Campbell & Fowler, Ltd., City Road, St. John, N.B., and will carry on the manufacture of axes, ship tools, boys,' hunters' and bench axes, carpenters' chisels, cold chisels, a complete line of hatchets, draw knives, striking hammers, Campbell's hammer poll ax, axes, automobile and carriage springs.

BLANCHARD FOWLER
Director and Manager, Campbell & Fowler, Ltd.

G. WILFORD CAMPBELL
President Campbell & Fowler, Ltd., St. John, N.B.

The executives of this reconstructed company are all young men, and born in the axe manufacturing business. Plans are under way for additions to be made to the factory.

The officers of the new company are: G. Wilford Campbell, president; Kenneth I. Campbell, vice-president; A. D. Barbour, secretary-treasurer; Blanchard Fowler, manager.

The capitalization of the new company has been increased from $49,000 to $99,000, which stock is held by above members of the firm.

Gurney Foundry Company Operating New Plant

Montreal.—In an interview with W. H. Helliwell, Montreal manager of the Gurney-Massey Company, Hardware and Metal was informed that the plant of the Canada Stove & Foundry Company, Limited, at St. Laurent, adjoining Montreal, recently taken over by the Gurney Foundry Company, is now operating and producing stoves, heaters, and enameled ware. Mr. Helliwell also stated that the plant has been somewhat enlarged and this increased production will be very welcome to them to take care of fall trade, in this part of the country particularly.

Montreal.—Chester F. Craigie, general sales manager of Ames, Holden, McCready, Limited, Montreal, has recently returned to Montreal after visiting points as far west as Winnipeg.

English Imports Coming More Freely

Stanley Davies, Weston, Ont., representing Frederick Giles & Co., Birmingham, Eng., in discussing with Hardware and Metal the situation as regards imports from England, stated that of late there has been a noticeable improvement in transportation and supplies of glass knobs, brass goods, china knobs, etc., are coming through much more freely and quickly than formerly. Shipments on straight goods are coming through within ten weeks from time of placing orders. Mr. Davies, who also represents Malkin Tile Works, Burslem, Eng., states that some supplies of white glazed tile are now coming through to the Canadian trade. Brass fenders, companion sets, etc., are coming through within three months from date of order.

Higher Export Rates to be Granted

On exports leaving the Port of Montreal, leave will be granted, according to a notice received from the Board of Railway Commissioners, to increase freight charges. This was conveyed in a communication received at the Montreal office of the Board of Trade last week, and this letter reads as follows:

"Whereas the rates and charges on freight traffic from United States shipping points to the Atlantic ports of the United States will be increased on the 26th August, 1920, by authority of an order of the Interstate Commerce Commission dated July 29, 1920, and the Board, by its General Order No. 303, dated August 13, 1920, has authorized increases in the freight rates and charges from Canada to the United States in conformity with the said Order of the Interstate Commerce Commission.

"And whereas it is expedient in the public interest that the relationship between the rates and charges from Canadian shipping points on freight traffic to the ports of Montreal, Quebec, St. John, West St. John and Halifax, for export, and those to the Atlantic ports of the United States be continued;

"Therefore, in pursuance of the powers conferred upon the Board by Section 325 of the Railway Act, 1919, by the Board in that behalf—

"It is ordered that the said rates and charges on export freight traffic from Canadian shipping points to Montreal, Quebec, St. John, West St. John and Halifax may be increased in conformity with the said relationship, to become effective on or after August 26, 1920, on not less than five days' notice.

(Sgn.) F. B. CARVELL,
Chief Commissioner,
Board of Railway Commissioners for Canada.

Ottawa, Aug. 19, 1920.

This notice appears to have caused no little unrest among some of the manufacturers who are at present catering to more or less export demand. The order was evidently not looked for, and those learning of the issuance of the order, in any way interested, began to carefully scrutinize the same.

News of Western Canada

Western Notes

Raddison, Sask.—W. F. Hatch, hardware merchant, is discontinuing his business here.

Tugaske, Sask.—McLaren & Son, hardware merchants, have been suceeded by Wm. Matheson.

Vanguard, Sask.—Henderson Bros., hardware merchants of Vanguard, Sask., are opening a branch store at Hodgeville.

Ochre River, Man. — Stevens and Lord, hardware merchants, have sold the bulk of their stock to Denstedt and Christ, Salter and Arnold trustees.

Jas. Kellas, provincial secretary of the R.M.A., Alberta, with an office at Medicine Hat, Alta., intends to make a trip to the Peace River country shortly.

Presentation of North-West Commercial Travellers' Grand Challenge Cup

Mr. Mihinnick, president of the N.W.C.T. Association in the Board Room of the Travellers' Building, presented Wood, Vallance Limited, baseball team with the Challenge Cup and prizes competed for in the special tournament, the final being played off at Winnipeg Beach, at the Travellers' Picnic. Mr. Mihinnick in a few well-chosen words complimented the boys on their clear-cut victory and looked forward to seeing even keener competition next year. Dave Miller, captain of W. V.'s team, formally accepted the cup on behalf of Wood, Vallance. This was supplemented by a short address by Mr. George Herity, vice-president of the club and Herb Carbray, manager.

Japan Reported to Have Placed Large Steel Orders in Germany

Reports from Japan dated last week state that German ironworks in Frankfort-on-Main have received Japanese orders for steel plate amounting to many millions of marks. The Government may permit the manufacture of spinning machinery at the Imperial Arsenal, as it is thought that machinery orders placed in America and Great Britain cannot be filled for several years.

Employees of Wood-Vallance, Ltd., Active in Sports

Wood, Vallance Limited, Winnipeg, have enjoyed a very successful year in the way of sports. To begin with, the bowling team captured third place in the Merchants' Bowling League and individual prizes were won by Gordon Hoskins and Bill Watt, in addition to entering a strong team in the league, comprised of Gordon Hoskins, Bill Watt, Bill Wilson, Gus Ward and Bert Lloyd. Six teams chosen from the different departments in the warehouse played out a regular schedule of games at the Saratoga Alleys, Bill Watt's team winning the premier honors, Jack Henderson, his right hand bowler, doing some sensational playing.

The curling season found Wood, Vallance well organized for this branch of sport, entering a strong team in the Wholesale League, the following being the personnel of the team: Skip: G. Myron McBride; third, George Herity; second, Gordon Hoskins; lead, Dave Miller. They captured third place in the classic event. The Warehouse League, composed of twelve teams, was handled in a most businesslike way. Valuable prizes were secured from different manufacturers and a Challenge Cup was presented by Bill Watt for annual competition. This was won by Jas. Feir's rink after quite a struggle. The great success of the Warehouse League was due to the untiring efforts of the genial secretary, Jimmy Waugh.

Several interesting hockey matches were played between the accessory warehouse and main warehouse, always resulting in close, hard fought games.

The Social Club, with Miss B. M. Parkinson as convener, assisted by Dave Miller and Morley Paul, staged some very attractive snowshoe and toboggan parties, ending up with a dance at the warehouse.

While the baseball season is not as yet completed, Wood, Vallance have already won the splendid Grand Challenge Cup and prizes presented by the North-West Commercial Travellers' Association, and are heading B. Section in the Commercial League. They hope to cop this off and will then challenge the winners of A. Section for a post-season series of games. The team is composed of the following players: Pitchers: Dave Miller, Art Morrison, Frank Troughton. Catchers: Bill Peletier and Dick Bird. First base: Gus Ward; second, Chic Little; s.s., Jack Lyons; third, Aubrey Keizer; right field, Laurie Dales; centre field, Morley Paul; left field, Dave Mackie.

The principals of the firm have been most generous in the whole-hearted support they have given the employees. Mr. David Wood, president of the baseball club, missed very few games this season and has expressed himself as being very well pleased with the good showing the boys have made.

Fall Rush is Expected in Machine Tool Trade

Montreal.—As the trade in the machine tool markets throughout Canada and the United States is continually reported at this time of the year as being quiet, it is stated that local conditions are no exception to this general tone. However, as in other trades, pending the Fall rush of business, this period is looked upon in a mild way as the calm before the storm.

In discussing the local trade prospects for the season, G. F. Foss, of the Foss Machinery and Supply Company, Ltd., said that a decided improvement was looked for, and that business promised to be brisk. Two important factors in the trade, which have been curtailing production for some time, now presented a more hopeful front, namely, the labor difficulties and the tightness of money. Mr. Foss said he believed these hindrances would be removed to a great extent this Fall, with the result that the unsettled state of the machine tool trade would be materially better.

In regard to prices, present indications do not appear to suggest any decline for the near future for the principal lines. This is due partly to the great scarcity of raw materials, of which the United States markets seem to be bare.

The demand for milling supplies is good, Mr. Foss concluded, signs of improvement in this line being already evident.

Many Farms in Danger

Winnipeg.—Appealing for assistance for the scores of families whose farms were devastated by the disastrous bush fires that swept through the Mulvihill district last week, two of the sufferers, W. F. Gold and H. Kiddier, have arrived in the city to approach the Government and arrange for supplies, equipment and food to be sent to the settlers.

Several returned soldiers who took up land in the district under the Soldiers' Settlement Act are among those burned out.

Wood Vallance Ltd. Opens New Branch at Regina

ON Monday next, with the formal opening of the handsome and commodious wholesale hardware warehouse of Wood, Vallance Limited, another milestone in the history of the wholesale business of Regina will be passed.

The Wood, Vallance chain of wholesale hardware houses, of which the new Regina branch is the latest link, extends across Canada from Hamilton and Toronto to the Pacific Coast, and is one of the largest and oldest-established hardware wholesales in the Dominion. The different branches are:—

Wood, Alexander & James, Hamilton and Toronto, established 1849.

Wood, Vallance Limited, Winnipeg, Man.

Wood, Vallance Limited, Regina, Sask.

Wood, Vallance & Adams, Limited, Calgary, Alta.

Wood, Vallance Hardware Co., Limited, Nelson, B.C.

Wood, Vallance & Leggat, Limited, Vancouver, B.C.

The parent house was founded in Hamilton in 1849 by the late Senator A. T. Wood in partnership with Matthew Leggat, the firm being known as Wood & Leggat. From this beginning, over seventy years ago, the present organization has gradually developed. The contract for the Regina building was let in January of this year. The excavation was begun in mid-winter, and by the use of a frost breaker, the entire excavation was finished before the frost was out of the ground. The reinforced concrete work, the brick work, and the interior finishing have proceeded rapidly, until to-day, less than six months from the time the ground was broken, the building stands practically completed.

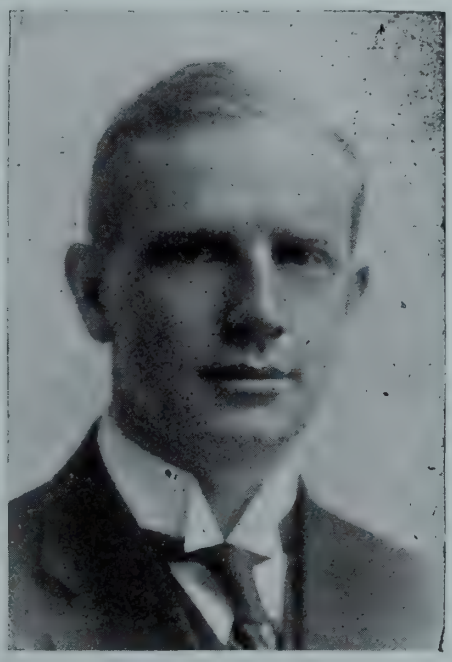
The new warehouse is situated in the heart of the wholesale section of Regina, at the corner of Hamilton Street and Eighth Avenue. The frontage on Hamilton Street is 250 feet and on Eighth Avenue, 100 feet, and the firm have an additional 125 feet on Hamilton Street for expansion purposes. A private railway siding runs the entire length of the building, giving splendid facilities. The structure consists of a basement and three storeys of reinforced concrete and solid brick, being what is known as slow burning mill construction, with a sprinkler system which gives the greatest safeguard against loss by fire.

The building is laid out to give the maximum of efficient service, with the minimum of handling of goods. Two elevators, as well as various chutes, serve to transfer goods from floor to floor. Large, airy offices and sample rooms are located on the ground floor, and employees' lunch rooms on the top floor, and everything has been done to render the facilities of the very highest order, the firm realizing the necessity for thorough equipment to enable them to properly look after their large and growing trade in this district.

The stock consists of shelf and heavy hardware of every description, enamelware and tinware, auto accessories and sporting goods.

The business conducted will be of an exclusively wholesale nature. Goods have been arriving for several weeks from various manufacturing centres of Canada, Great Britain, Belgium and United States, until the warehouse is almost filled with merchandise.

The president of the company is W. A. Wood, of Hamilton, who is also president of the various branches throughout the Dominion. The vice-president is Mr. J. C. Falls, and the secretary-treasurer is Mr. David Wood, both of Winnipeg.



JAMES FEIR

James Feir, the Regina manager, has been connected with the Winnipeg house for over eighteen years. Mr. Feir is still a young man, having joined the staff while in his 'teens, and for the past six years has been sales manager for the Winnipeg house. Mr. Feir has a thorough knowledge of the hardware business and is familiar with the needs of the retail merchants of Western Canada.

Several of the members of the staff have also been transferred from Winnipeg, Mr. Gordon P. Hoskins being credit manager and Mr. G. M. Watson, sales manager. A large number have also been engaged from Regina and surrounding towns. It is expected that it will require a staff of at least sixty employees in the various departments to handle the business from the day the Regina warehouse opens.

VALUE OF TOYS IMPORTED FROM GERMANY

It is of interest to note that the value of registered imports of toys and games, not of rubber or leather and not electrical, into Great Britain for the half year ended June 30, 1920, was £630,273.

The value of these imports for June shows an increase on previous months.

DEMAND FOR HEATING GOODS

(Continued from page 39.)

demands in 1920 have been highly satisfactory, and far more goods could be disposed of were they to be had. Mr. Helliwell expects that this condition bids fair to continue during the fall.

Would Buy Requirements

With regard to fall buying, or rather buying what may be required for trade this fall, Mr. Helliwell believes there is nothing to be gained by deferring this. "Prices cannot be lower, and I would say that a merchant is well advised to buy what he can reasonably expect to sell. I would not advise stocking up unduly or too heavily, but to buy in such quantities as one can sell."

"There will be an ample supply of heaters and stoves, I believe. Speaking for ourselves we shall be able to take care of the demand for these goods alright and yet there will be no advantage in deferring buying. Costs are high and there is nothing to indicate that they will be any lower, so that early ordering would be the best policy.

Referring to the proposed increase in freight rates, Mr. Helliwell stated that these increases, if effected, would naturally have an effect on prices of the finished product. Added to the higher prices recently introduced on coke, pig iron, fire brick, etc., there was every reason to suggest that any change made will be in the nature of an increase on many, and perhaps on all of these goods.

Reference was made by Mr. Helliwell to the strike of employees at one of the big Canadian car manufacturing plants. This would but serve to interfere with transportation, for there is a great need for rolling stock and if these men remained out the result is obvious, he concluded.

HARDWARE STORE MANAGER WANTS POSITION. Able to take full charge. Box 125, Hardware and Metal.

PAINT AND GLASS TRAVEVLLER WISHES to make a change in position. Fifteen years' road experience. Box 305, Hardware and Metal.

TRAVELLER NOW CALLING ON HARDWARE trade West and North of Toronto seeking a change in position. Box 81, Hardware and Metal.

FOR SALE—GOOD LIVE ONTARIO BUSINESS established 20 years, splendid location. Owner retiring on account of other interests. Present turnover about thirty-five thousand yearly and can be greatly increased. Box 119, Hardware and Metal, Toronto.

Newsy Notes From Here and There

Toronto, Ont.—George Moore, of Detroit, Michigan, president of the Mason Contractors' Association of the United States and Canada, Harry Hayman, of London, Ont., ex-president of the international association and president of the London association, Walter Wise, of Indianapolis, Ind., ex-president of the international association and president of the Indianapolis association, and Harry A. Fenton, of Indianapolis, Ind., general counsel of the international association, are here in conference with H. Elgie, of Toronto, provincial representative of the international association, in regard to the general affairs of the association in Canada.

The association is advocating a uniform agreement and working conditions with the Institute of Architects and National Dealers' Association.

Ottawa, Ont.—The Ottawa Trading Co., Ottawa, Canada, is now located in its new offices, rooms 68-70 in the Banque Nationale Building.

Ottawa.—The Ottawa Iron and Metal Company, Ottawa, Canada, dealer in waste material, has purchased ground 100 x 200 feet, adjoining its plant to provide increase of space.

Guelph.—A pleasant event took place at the International Malleable Iron Co.'s factory, Guelph, when Mr. J. Evans was honored by his fellow employees with a tangible token of respect and esteem on the occasion of his leaving the employ of the company to take up similar work at Fergus.

Hardware Letter Box

HARRISTON STOVES

B. N. Sparks, Enterprise, Ont.—Can you inform us of the address of makers of Harrison Stoves.

Answer.—We think you must mean Harriston Stoves, and they are made by the Harriston Stove Co., Ltd., Harriston, Ont.

Wallace Neale, North Vancouver, B.C. —Can you give me the names of books on Hot Water Heating, etc.

Answer.—Practical Steam and Hot Water Heating. Practical Heating Illustrated. 500 Plain Answers to Direct Questions on Steam, Hot Water, Vapor and Vacuum Heating.

Above are by Alf. G. King, and published by the Norman W. Healey Pub. Co., New York.

Also Heat by Shealey; publishers McGraw-Hill Pub. Co., New York, and Kent's Heating Engineers' Pocket Manual.

Hard to Determine Future Steel Buying Policy

"Mixed considerations are being carefully weighed by iron and steel consumers at present in an effort to determine future buying policies," says the Iron Trade Review. "The possibility of higher prices because of the increased freight rates is being placed against the effects of the manifest slowing down in some lines of manufacture, notably in the automobile field. The appearance of definite though spotty improvement in transportation conditions presents a further factor of primary market importance. The better movement of mill material is reflected by the fact that a leading Pittsburgh producer ha s been able to reduce its accumulation of finished and semi-finished material about 12 per cent. A large Pittsburgh independent interest attained an unusual record in July of shipping out more tonnage than in any month in its history. The largest part of this tonnage was handled by truck. Steel sales on the whole are larger, and prices, while they have not advanced, are firmer, particularly in those lines where some softness recently has prevailed. The steel corporation continues to name the minimum prices which it has followed for 16 months.

Catalogs and Booklets

The E. T. Wright Co., Ltd., Hamilton, who are operating factory and marketing the Wentworth line of goods formerly made by the Wentworth Mfg. Co., have issued a new catalogue "C," covering this line of cooking utensils in aluminum and brass and copper (nickel plated). It is stated that all aluminum goods of Wentworth make are made of 99 per cent. pure aluminum and copper goods are of 98 to 99 per cent. pure copper. Besides cooking utensils and tea kettles, tea and coffee pots and percolators, they manufacture smokers' trays and sets, cuspidors, fern pots, casseroles, bathroom fittings, compression taps, lawn sprinklers, and hoze nozzles. Readers of Hardware and Metal can obtain a copy on application to above firm.

2,100 TOOLS CATALOGUED

The Goodell-Pratt Co. of Greenfield, Mass., in issuing their new catalogue, No. 14, consisting of 464 pages, showing over 2,100 tools, draw attention to the difference between this and their first catalogue, issued 25 years ago, which described a few drills and screwdrivers made by the fifteen employees which the firm at that time employed.

The new catalogue contains more than 700 good-sized illustrations and descriptions are brief and accurate, aiming to give all the important points or selling features in regard to each tool listed.

The entire catalogue is arranged as conveniently as possible and is very fully indexed.

All new tools are fully marked, so that it is not necessary to refer to old lists to discover which items are new.

The list of tools made by this firm is too well known by the hardware trade to need describing in these columns, but all readers of Hardware and Metal who are interested are invited to write for a copy.

NEW SAVAGE ARMS CATALOGUE

The Savage Arms Corporation of Utica N.Y., U.S.A., have issued a new catalogue, No. 61, of their well-known sporting rifles and automatic pistols.

Among other models the new .250-3000 Savage Model 1920 is illustrated and described.

The catalogue is fully illustrated and contains a fund of information of interest to both dealers and sportsmen and includes among other features suggestions for the care and use of firearms; information on sights and their adjustment; and on ammunition, and also full instruction on taking down and assembling Savage arms.

Readers of Hardware and Metal are advised to write for a copy to the New York office of the company at 50 Church St., New York City.

HOW TO SELL A SAW

A book of extraordinary interest has just been published by E. C. Atkins & Co., Hamilton, Ont., and Indianapolis, Ind., manufacturers of Atkins silver steel saws, on "How to Sell a Saw." It is devoted entirely to the one subject, and although the underlying principle is how to sell a saw, practically all of the material can be applied to the general line of hardware.

The book is very attractive, suitable for library use if desired for that purpose. It has a Castillian cover embossed in gold, is easy, interesting reading and has plenty of illustrations.

E. C. Atkins & Co. will send one of these books to readers of Hardware and Metal upon request.

Stainless Steel Uses

Since the armistice there has been an enormous sale of stainless steel for cutlery purposes. The demand is increasing, and the labor and machinery in the Sheffield cutlery trade are inadequate to deal with the influx of orders. Stainless steel is being employed very largely in the manufacture of pump rods, valve spindles, valves and other parts which are exposed to contact with water, steam and other corrosives. The scientific instrument trade is using it for drawing instruments and other precision tools and for surgical instruments. It is being manufactured into stair rods, saucepans, and pans of varying shapes, fenders for the hearth, and even into pokers and garden implements; and butchers' rails, spikes, skewers, saws, and other butcher-shop requirements are being made from it. Stainless steel is also being used for golf-club heads, spurs, etc.

Trade Enquiries

The names of the firms making the inquiries given below, with their addresses, can be obtained only by those interested in the respective commodities upon application to HARDWARE AND METAL.

Please Quote the Reference Number When Requiring Addresses

1740. **Hardware, glassware, and china.**—A London firm who claim a first-class connection among wholesalers and export houses are desirous of securing the agency or selling rights for the United Kingdom of Canadian manufacturers of hardware, such as nails, screws, hinges, bolts, nuts; garden, farm and shop tools, and mincing machines; and also glassware and china.

1738. **Hollow-ware, tinware, domestic specialties, and labor-saving appliances.**—Glasgow correspondent states that there is a great demand in that area for hollow-ware, tinware, cast hollow-ware, household spring balances, and sad irons, and wishes to be placed in touch with any Canadian firms wishing to be represented in these lines. The demand for all domestic labor-saving appliances is very strong, and he would like to be placed in touch with all Canadian manufacturers who would consider export orders.

1737. **Machinery, tools, and hardware.**—An engineering and banking syndicate in Roumania desire prices and catalogues on the following articles immediately: Flour milling machinery for furnishing plant of 400 barrels per diem capacity, ice plant of 20 tons per diem capacity, conveying and transmission machinery, building materials of all kinds, machine tools, hardware, cooperage and wood-working machinery, motors and generators, tractors and gasolene engines, agricultural implements, automobiles and accessories, typewriting and calculating machines, measurement instruments, printing presses and linotypes. Manufacturers' prices are requested and payments will be made in cash. Agencies would be considered for some of the above articles.

1747. **Leathers, nails and wire.**—Established Belgian importer wishes to be placed in touch with Canadian manufacturers of upper leather for shoes, shoe nails, wire nails, and wire of every description. Has important connection for distribution of the same, and will furnish British references.

1720. **Leather.**—A Manchester firm are prepared to import sole and upper leather.

1721. **Leather.**—A Leicester firm are in the market for light leathers for shoes, particularly dressed sheepskins for linings.

1722. **Leather.**—A Northampton firm are in the market for sole and upper leather.

1723. **Leather.**—A Northampton firm are always in the market for all kinds of good class upper leather, such as box calf, box veals, box sides and glace kid, patent sides, etc.

1724. **Leather.**—A Manchester firm are prepared to import hides and leather of all descriptions.

1725. **Raw wool, raw skins and hides, tanned leather.**—An old-established firm in Naples are most willing to represent Canadian firms dealing in the above.

1660. **Foodstuffs and hardware.**—A South African agency in Cape Town, with branch offices in Johannesburg and Durban, wish to represent Canadian firms exporting hardware and foodstuffs. They have specialized in these two lines. The head of the firm will visit Canada shortly.

1681. **Lumber, plywood, hardware and furnishing.**—One of the oldest established British manufacturers' agencies in South Africa, with a successful record of 25 years, having their head office at Cape Town and branches at Johannesburg, Durban and Port Elizabeth, wish to make connections with Canadian firms having lumber, plywood, hardware and furnishing for export. A representative of this firm is expected in Canada this month. This company are already representing in South Africa one very important Canadian manufacturing company.

1741. **Hardware.**—A firm in Jassy, Roumania, desire to receive quotations and other particulars from Canadian firms in a position to export all kinds of hardware.

1742. **Enamelled and aluminum kitchen utensils.**—A firm in Jassy, Roumania, dealing in all kinds of hardware, desire to receive catalogues and quotations from Canadian firms in a position to export enamelled and aluminum kitchen utensils.

1743. **Food choppers.**—There is a market in Scotland for domestic sale of Canadian food choppers, and Scottish importer would like to get in touch with Canadian manufacturers.

1744. **Kitchen utensils.**—A Turin, Italy, house are anxious to buy kitchen utensils in Canada.

1745. **Foundry plant and tools.**—A Manchester firm are open to purchase foundry plant and furnishings, also engineers' tools, or would act as representative of manufacturers of same.

1746. **Tools, machines, etc.**—A Bradford, England, firm are interested in importation of tools, machines, etc., and all commodities used in the foundry and engineering trade.

BRITISH MANUFACTURERS CAN MAKE IMMEDIATE DELIVERIES IN MANY LINES

Captain Evan J. Edwards, H.M. Senior Trade Commissioner in Canada and Newfoundland, supplies the following information respecting the position of manufacturers in the United Kingdom:

The position as to tin plates, galvanized sheets, hardware, cutlery and pottery is that, while manufacturers are not urgently pressing for increased business, they can accept orders for delivery in the near future.

Beatty Bros.' Branch Managers Meet

All branch managers of Beatty Bros. recently met together at the head office in Fergus, Ont., to discuss plans and set quotas for the new business year commencing September 1. In addition to the Canadian managers, R. B. Stewart, manager at London, Eng., came home to attend this convention. This is the first visit he has paid to Canada since the founding of the English branch. Plans were also made for the summer convention of Beatty salesmen, which will take place August 19, 20, 21.

Back Row:—M. J. Beatty, General Sales Manager; R. B. Stewart, Manager, London, Eng; N. J. Cabeldu, Manager, St. John, N.B.; J. J. Rutherford, Sales Manager, Western Ontario; T. A. Farnell, Sales Manager, Eastern Ontario; D. R. Potter, Advertising Manager.

Front Row:—A. S. Walbridge, Manager, Montreal; W. H. Sterne, Manager, Edmonton; G. A. Renolds, Branch Representative; J. M. Thompson, Manager, Winnipeg; L. P. Winslow, Manager, Ontario Branch; A. K. Freeborn, Manager, Vancouver.

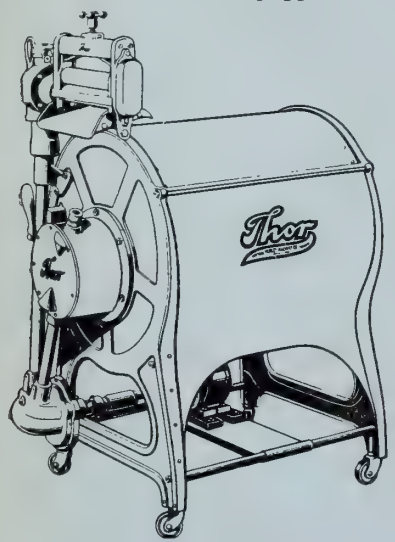
New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

The New Thor Electric Washer

The Hurley Machine Co. announce that their New Thor Washer No. 32 is in production and they will be able to make deliveries September 1. This machine they state is the result of fourteen years effort in developing and designing, and they believe they have a practical and handsome washer that will appeal to dealer and user.

It is stated that the machine is 98 per cent. steel and is equipped with a



New Thor Washer

ball-bearing swinging wringer of their own manufacture. The interior body is of galvanized steel or copper, with either wooden or copper cylinder as desired. The entire machine is enamelled in Thor gray. The new Thor 32 is a reversing cylinder type machine and will, it is claimed, wash ten sheets, which is 10 per cent. more than their No. 27 accommodates, though it takes up no more floor space than their No. 25. The company have a Toronto branch.

THE ARMSTRONG TABLE STOVE

The Standard Stamping Co., Huntington, W. Va., have brought out a new

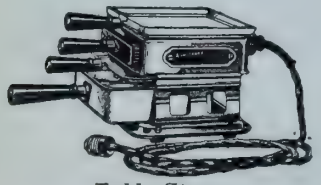


Table Stove

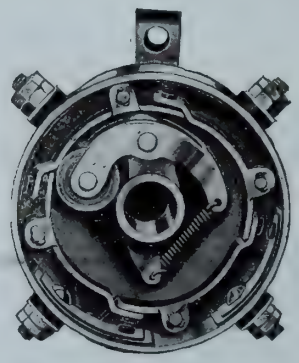
table stove which should especially appeal to people who wish to get breakfast or any other meal in a hurry. The aluminum cooking utensils include a deep boiling pan, four egg cups and rack, the toaster which browns both sides of the bread at once, griddle and waffle iron. Three things are cooked at once and the makers state that a typical breakfast menu of bacon, toast and eggs can be prepared in five to seven minutes on the stove.

The stove is nickelled steel and has a feature in the tilting connection plug which, it is said, never sticks, and slips on and off with an easy tilting motion.

THE DUPLEX TIMER

The Franco-British Supply Co., of Winnipeg, Man., are marketing a timer which the makers claim combines the accurate firing of the roller type and the superior contact of the magneto and gives user a double duty timer. The Duplex Timer consists of a case made of solid stamped, cold-rolled steel, eliminating internal condensation of moisture.

The only revolving part in the Duplex is a double row enclosed type roller which the makers claim has sufficient lubrication, avoiding the necessity



PATENT APPL'D. FOR.

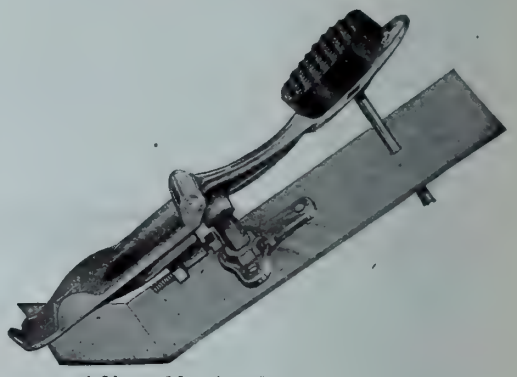
Duplex Timer

of oiling the timer, and it is further stated that motors fitted with it will accelerate instantly from high to low with a constant purr and can be throttled down so as to barely turn and yet run smoothly.

ADJUSTABLE ACCELERATOR PEDAL

The Williams Soft Pedal Co., of Cedar Rapids, Iowa, have put on the market a device which they claim eliminates leg strain on long drives, jerky acceleration, foot discomfort and spoiled shoes and prevents your driving foot from coming in contact with the heated accelerator.

The illustration shows how the pedal



Adjustable Accelerator Pedal

is constructed and it is adjusted for both men and women's heels. When not in use the rest folds out of the way or when it is desired to move floor boards.

It is stated to fit any car and be quickly and easily attached.

"DURO" ALUMINUMWARE

W. D. Shambrook & Co., Hamilton, are manufacturing a line of aluminumware under the name of "Duro." Among lines they have ready are a six-quart convex kettle and a six-quart convex saucepan; special features are stated to

"Duro" Aluminumware

be inset covers, and raised bottom centres to avoid burning and prevent warping. They are made of heavy material with outside highly polished and the insides have the X-ray finish.

The kettle has notched handle rest and rivets holding handles are not countersunk.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

MORE changes are made this week in hardware prices, and they are almost all in an upward direction. Among the lines bearing a higher price are stovepipes and stovepipe elbows and there seems to be a decided shortage of material to make them and they are likely to be very scarce this fall. Higher prices are noted on churns and ash-sifters. Different grades of lubricating oils have also been marked upward. Advances on roofing and building papers, on coal tar and pitch and creosote oil are reported. Horse shoe nails, fibre chair seats, some lines of English table cutlery and some makes of paint brushes are also affected.

Business, although a little slacker, is said to be good; fall lines are moving out well and seasonable lines are having a ready sale.

No improvement is felt in the supply of iron and steel products in heavy lines, and stocks of these commodities are very low everywhere. Nails and wire goods are still scarce and the effect of improved transportation conditions, if any, has not been felt.

Stoves and ranges are reported to be very scarce and makers are being hard put to find sufficient to put on floors for Exhibition purposes.

Collections are coming in well.

TORONTO MARKETS

TORONTO, Aug. 26.—Indications are this week that business is a little quieter generally though most jobbers and manufacturers state they have all they can very well handle. Goods for fall trading are moving out well and the demand for seasonable lines is fair.

Prices on the whole are firm with several increases. Among the lines advanced are hand churns, sheathings and tarred felts and roofing cements and coal-tar. Higher prices go into effect on different grades of lubricating oils. Stove pipes and stove-pipe elbows have also been increased in price and are likely to be hard to get. Fibre chair seats are higher in price.

New lists for harvest tools for next season show no increase in prices with the exception of scythes which are advanced.

Trading in ingot metals is fair with weaker tendencies, but prices unchanged. The shortage in iron and steel goods, in sheets and plates, pipe, bar iron and steel still continues. Wire nails are still scarce, as are also fence wire and wire products.

Prospects for fall seem good and collections are coming in well.

New Prices Out on Hand Churns

Toronto.

CHURNS. — Following the increased cost of raw materials and especially that of lumber the following new prices go into effect on Beatty Bros. Hand Churns:

No 0, $12.00; No. 1, $12.00; No. 2, $13.00; No. 3, $14.00; No. 4, $16.00; No. 5, $19.00.

Wrought Pipe Very Scarce and Hard to Get

Toronto.

WROUGHT PIPE. — The situation in regard to wrought iron pipe, both black and galvanized, is getting worse every week. Insufficient supplies to meet even a normal demand are coming to hand and jobbers and dealers profess an inability to see any relief in sight.

Unless the unforeseen happens it looks as if the markets will be swept bare within a very few weeks. Certain sizes are almost impossible to obtain and large mills are said to be shut down on account of the shortage of skelp and supplies.

List No. 46 is still the latest and quotations are as follows:

Standard Buttweld Pipe
Per 100 Ft.

	Steel Blk.	Gen. Galv.	Wrought Iron Blk.	Wrought Iron Galv.
1/8	$ 6.50	$ 8.50	$.....	$.....

Rope and Twines; Demands Lessened

Toronto.

ROPE AND TWINE. — The demand for rope has fallen off somewhat but prices are firm and unchanged.

There has been an especially active demand for binder twine noticed late this season, though it is now nearly over. At the beginning of the year the farmers' organizations placed orders direct with the twine manufacturers for their estimated requirements, causing many hardware merchants to cancel or reduce their orders. Later on many farmers, finding their supplies insufficient and failing to obtain any more from their clubs, were obliged to fall back on the local dealers, hence the recent exceptional demand.

Prices are as per current market quotation pages.

Dearth of Sheets Cause for Anxiety

Toronto.

BLACK AND GALVANIZED SHEETS. — The efforts to even partly fill orders for these is causing great concern to dealers. Manufacturers it is stated are six months and more behind with orders and jobbers fortunate enough to secure a few cases have goods sold before they arrive at their destination in many instances.

Shipments are expected to arrive shortly from England. Whether they will be sufficient to ease the situation remains to be seen.

The statement that there are no box cars to carry supplies is characterized as absurd.

Jobbers have to scour the markets to obtain small quantities and under the circumstances prices are but nominal.

BLACK SHEETS

14 gauge	$11 35
16 gauge	11 50
18-20 gauge	11 80
22-24 gauge	11 85
26 gauge	11 90
28 gauge	12 00
3-16 inch plate	....
¼-inch boiler plate	....

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS

	Premier		Apollo	
10¾ oz.	$12 00	$12 50	$12 00	$13 25
U.S. 28	11 45	12 70	11 45	12 85
U.S. 26	11 15	12 40	11 15	12 55
22 and 24	11 00	12 25	11 00	12 40
18 and 20	10 70	11 95	10 70	12 10
16	10 70	11 95	10 70	12 10
12 and 14	10 55	11 20	10 55	11 95

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Supplies Still Short of Bar Iron and Steel

Toronto.

BAR IRON AND STEEL. — The shortage of bar iron and steel continues with absolutely no sign of improvement. Mill after mill in the Pittsburg district is said to be closed down on account of inadequate supplies of raw material. No advance has been made in prices although it is understood that higher prices may have to be paid in certain cases in order to secure supplies.

Nominal prices are as below:

IRON AND STEEL

Common bar steel, 3-16 in. and lighter	$ 6 00
Common bar steel, ¼ in. and heavier	5 50
Common bar iron, 3-16 in. and lighter	6 00
Common bar iron, ¼ in. and heavier	5 50
Angle base	5 75
Horseshoe iron	6 00
Tire steel	5 95
Band steel	6 00
Spring steel	12 75
Mining drill steel	31 95
Sheet cast steel	....
Mild steel	5 75
Norway iron	16 25
Toe caulk iron	6 70
Sleigh shoe steel	5 75
Hoop steel	6 75

Good Demand Shown for Asbestos Products

Toronto.

ASBESTOS PRODUCTS.—A good demand is reported for asbestos pipe and boiler coverings. No shortage is felt on these goods, though as regards asbestos sheathing supplies are more limited. Asbestos roofings and asbestos shingles are said to be very scarce and prices on these are quoted on application.

No change has been made on sheet packing or gaskets.

Higher Prices on Tarred and Dry Papers

Toronto.

TARRED AND DRY FIBRES. — Higher prices are asked on building papers both dry and tarred. These advances approximate from 10 to 20 per cent. and new prices are as follows:

Dry Fibre No. 1, $1.85 per 400 ft. roll; No. 2, $1.50; Stag Sheathing $1.55 per 400 ft. roll.

Prices on Tarred Felt Raised Slightly

Toronto.

TARRED FELT. — A small advance of 35 cents per 100 pounds has been made on 7, 10, and 16 oz. tarred felts, and these are now quoted at $6.05 per hundred pounds.

Straw and Spruce Sheathings Higher

Toronto.

SHEATHINGS. — An advance of 30 cents per hundred has been made on both dry and tarred straw sheathing and both are quoted now at $8.05 per cwt.

Spence Sheathing has been advanced approximately ten per cent. and is now selling at $11.75 per cwt.

Increased Prices on Ready Roofings

Toronto.

ROOFINGS. — Higher prices are in effect on some lines of ready roofings and the following are latest quotations on these brands:

	1 ply	2 ply	3 ply
Everlastic	$2.30	$2.85	$3.35
Panamoid	2.15	2.65	3.10
Red Star		2.38	2.80

Approximate 10% Advance on Coal Tar and Pitch

Toronto.

COAL TAR AND PITCH.—An advance of about 10 per cent. has been added to cost of coal tar and coal tar pitch which are now selling as follows:

Coal tar, crude, per bbl., $9.25; refined, $10.50; Coal Tar Pitch, per cwt., $1.50.

Higher Prices on Roofing Cement

Toronto.

ROOFING CEMENT. — Advanced prices are given on Everlastic Roofing Cement which is quoted as follows:

Per bbl., 70c. per gal.; half bbls., 75c. per gal.; 5 and 10 gal. cans, 85c. per gal.; 1 gal. cans, $10.50 per dozen.

New Prices on Brockville Lawn Mowers

Toronto.

LAWN MOWERS. — The Brockville make of lawn mowers have been further revised in price, and the following are the new net prices for these lines:

Whippet, 3 blades—12 in., $7.65; 14 in., $8.35; 16 in., $8.95.

Model K, 3 blades—8 in., $8.90; 10 in., $9.30; 12 in., $9.50; 14 in., $10.10; 16 in., $10.50.

Model K, 4 blades—8 in., $9.30; 10 in., $9.70; 12 in., $10.10; 14 in., $10.50; 16 in., $10.90; 18 in., $11.65.

Model K, 5 blades—8 in., $9.70; 10 in., $10.10; 12 in., $10.50; 14 in., $10.90; 16 in., $11.65; 18 in., $12.00.

Model C, 4 blades—12 in., $10.50; 14 in., $11.05; 16 in., $11.60; 18 in., $12.05; 20 in., $13.10.

Model C, 5 blades—12 in., $10.90; 14 in., $11.40; 16 in., $11.95; 18 in., $12.40; 20 in., $13.45.

Bluebird, 4 blades—12 in., $12.25; 14 in., $12.85; 16 in., $13.45; 18 in., $14.10; 20 in., $14.45.

Bluebird, 5 blades—12 in., $12.90; 14 in., $13.50; 16 in., $14.10; 18 in., $14.70; 20 in., $15.25.

Pipe Fittings Are Firm and Scarce

Toronto.

PIPE FITTINGS. — Prices on pipe fittings are holding firm and like pipe there is a growing scarcity, especially among certain kinds and sizes. The demand has been fairly heavy and a big call has been noticed on pipe and fittings in rural districts for well work and water installation.

Supplies are coming to hand only slowly.

PIPE FITTINGS

Cast iron fittings	Plus 10%
Plugs	7½%
Bushings	10%
Unions, ¼-in. to 2½-in.	30%
Do., ⅛-in. to 3-in. and larger	25%
Dart unions, ¼-in. to 2 in.	8%

Class B	0 30	0 40
Class C	0 20	0 30

Higher Quotations on Machine and Black Oil

Toronto.

MACHINE AND BLACK OILS. — Higher prices are in effect on machine oil, regular grade which is now 64 cents less 15 per cent.

Black oil is also marked higher and new prices are for summer grade 32½ cents, and winter grade 33 cents less 15 per cent. in both cases.

Steam Cylinder, Tractor, Gas Engine Oils Advance

Toronto.

CYLINDER OILS.—There has been an advance in prices of cylinder oils of various kinds and following are latest quotations on these brands: Imperial Kerosene Tractor, $1.45 per gal.; Imperial Gas Engine Oil, 65c. per gal.; Capitol Cylinder (steam), $1.00½ per gal.; Paraffine Oil, 45c per gal. List less 15 per cent.

Revision on Prices of Polarine Oil

Toronto.

POLARINE. — Prices of Polarine oil have been revised upwards, and following is latest quotation on this line of

cylinder oil; barrel basis: Polarine, heavy, medium, and A grades, $1.45, list less 25 per cent.

Next Season's Harvest Tools Unchanged

Toronto.

HARVEST TOOLS. — The lists on harvest tools for the season of 1921 are out, and show practically no change in prices over the present season with the exception of scythes which are advanced $2.75 per dozen net.

New Prices on Stove Pipe Elbows

Toronto.

STOVE PIPE ELBOWS. — New prices are quoted on stove pipe elbows and show an advance of about 15 per cent. The following are new quotations: Heavy, black, 6 in., $3.95 per dozen; 7 in., $4.40 per dozen; light, black, 6 in., $3.20 per dozen; 7 in., $3.50 per dozen; galvanized, 7 in., $7.30 per dozen.

Stove Pipes Advance Nearly Twenty Per Cent.

Toronto.

STOVE PIPES. — There is every probability of a scarcity of these goods for fall as there is a great and growing shortage of the raw material. Manufacturers have been unable to fill orders and stocks on hand are very low. Prices are approximately 20 per cent. higher, and are as follows: 6 in., $25 45 per 100; 7 in., $27.28 per 100.

Horse Shoe Nails Advanced 25c Per Box

Toronto.

HORSE SHOE NAILS. — There has been an increase of 25 cents per 25 lb. box on horse shoe nails, and the new base price is $4.50 per 25 lb. box.

Tarred and Dry Sheathings Revised Upwards

Toronto.

TARPAPERS.—There has been an upward revision on tarred and dry building papers, and the following are new prices: Tarred fibres No. 1, $1 95 per roll of 400 sq. ft.; No. 2, $1.70; Surprise sheeting, $1.55 per roll of 400 sq. ft.

Waste Prices Firm; New Cotton Crop Large

Toronto.

WASTE. — Business in cotton waste has been fair with a falling off noticed lately and a tendency on the part of buyers to hold off in the expectation of lower markets. The cotton crop is reported to be much larger than was at first thought, but it is impossible to foretell what may happen if manipulators get control. Prices are unchanged and are as follows:

WASTE

Above lines subject to trade discount for quantity.

Screwdrivers Advance Approximately 15%

Toronto.

SCREWDRIVERS.—There has been an advance in price of approximately fifteen per cent. on all makes of Bridgeport line of screwdrivers.

Prices Increased on Fibre Chair Seats

Toronto.

FIBRE CHAIR SETS.—An advance of approximately 20 to 25 per cent. has been made in the price of fibre chair seats.

Gasoline and Coal Oil Firm and Unchanged

Toronto.

GASOLINE AND COAL OIL.—The demand for both coal oil and gasoline is reported as being exceptionally strong and though no change in prices has taken place, Hardware and Metal is given to understand that there is every likelihood of an increase in prices before very long. Other oils, cylinder, machine, black oil, paraffine, etc., have all advanced in price since a change has been made in gasoline or coal oil and the price of crude oil and the costs of production keep steadily climbing.

Higher Prices on Tin and Graniteware

Toronto.

TINWARE AND ENAMELWARE.—It is understood that an increase in the price of enamel and tinware has gone into effect, but the new discounts are not available at the time of going to press.

New List Out on Tinners' and Coopers' Rivets

Toronto.

TINNERS' AND COOPERS' RIVETS. —New lists on black iron rivets were issued last week and reproduced in issue of Aug. 21st. The following part of it was unavoidably crowded out:

TINNERS' AND COOPERS' RIVETS

Lead and Zinc Products Unchanged

Toronto.

LEAD AND ZINC PRODUCTS. — There is a slight improvement reported in the lead market and though the demand for these products is not heavy jobbers are well satisfied with amount of business being done.

Prices are firm and seem to point to a continuance of present quotations.

Ingot Metals Quieter With Prices Unchanged

Toronto.

INGOT METALS. — Business in the metal market has been a little quieter this week with no special features. Prices appear firm and are unchanged.

TIN.—Declines have been noticed in outside markets in tin but trading is stagnant and local prices are quoted at 58 cents per pound.

COPPER. — The demand for this metal has been light though it is said to be wanted abroad in large quantities. Markets here are dull and prices for casting copper remain at 24 cents.

ANTIMONY. — This is said to be unchanged and markets are quiet. Price 10 cents per pound.

SPELTER.—This continues firm at 10¾ cents and there is said to be no shortage.

LEAD.—A slight improvement is reported in lead and at the same time a slackening of demand. Local basis is 10 cents per pound.

ALUMINUM. — Prices of aluminum are reported higher on American markets but local quotations remain round 37 to 39 cents.

LONDON MARKETS

LONDON, Aug. 25.—Business here has been reported as excellent during the past week. In addition to the regular good trading London merchants enjoyed a lot of extra business on account of "Dollar Day," which was featured here on Thursday. All stores report increased sales.

Prices continue to be very firm and advances are noted on some lines. Nails are still short in some sizes. Higher prices are quoted on English table cutlery, and on Pyrex-ware, also on apple parers, molasses gates, chisel handles. Building papers and roofings have also been revised upwards and increases made in coal tar and roofing pitch. Certain lines of paint brushes are higher.

Shot guns and ammunition are having a good demand. Shipments of goods are only arriving slowly from factories.

Collections are good.

A Further Decline in Linseed Oil

London, Ont.

LINSEED OIL.—There have been further reductions on quotations of linseed oil and present prices are about twelve cents a gallon less than last week.

Today's prices are as follows:

	Raw	Boiled
1 to 2 bbls.	$2.00	$2.03 per gal.
3 to 5 bbls.	1.99	2.02 per gal.
6 to 9 bbls.	1.97	2.00 per gal.

Less bbls. add 15 cents gal.

Turpentine Quoted Two Cents Less This Week

London, Ont.

TURPENTINE.—The latest quotations on turpentine show a decline of 5 cents per gallon from last week. The demand is normal. Prices are:

1 bbl. lots	$2.60 per gal.
2 to 4 bbls.	2.59 per gal.
5 gal. lots	2.75 per gal.

Nail Sales Good But Shortage Continues

London, Ont.

NAILS.—A good demand is reported for nails, but the shortage in some sizes has not improved and a difficulty is experienced in filling orders. Prices continue firm and are as follows:

Wire, $6.25 base; cut, $7.50.

Seasonable Demand For White Lead; No Change

London, Ont.

WHITE LEAD IN OIL.—There is a good seasonable demand for this product reported and quotations hold firm without change. Prices: Ton lots—pure, $20.45; Elephant Brand, $20.95; less than tons—pure, $20.80 per 100 lbs.; Elephant Brand, $21.30 per 100 lbs.

Fall Sorting of Window Glass Goods

London, Ont.

WINDOW GLASS.—Reports indicate that window glass is moving well and that the Fall sorting orders are good. No change has occurred in prices which remain at 15 per cent. off list in single and double diamond, and 40 per cent. off for cut lights.

Putty Prices Firm and Demand Good

London, Ont.

PUTTY.—There has been a good demand for putty for the season of the year and prices appear to be firm.

Present quotations are:

Standard in 100 lb. drums, $8.30 per 100 lbs.; standard in 25 lb. irons, $8.55 per 100 lbs.; pure, in 100 lb. drums, $10.80 per 100 lbs.; pure, in 25 lb. irons, $11.05 per 100 lbs.

Still Selling Harvest Sizes in Rope

London, Ont.

ROPE.—There is still reported to be a good demand for heaviest sizes in rope and in binder twine. Prices are unchanged and are as follows:

Pure Manila, 35½c per lb.; Beaver Manila, 28c per lb.; New Zealand hemp, 28c lb.; Sisal, 22½c lb.

Good Demand Experienced For Lanterns

London, Ont.

LANTERNS.—These are said to be selling well at present and good shipments have been made for Fall.

Present prices on cold blast, either short or long patterns, is $15.00 per dozen.

Lantern Globes Are Selling Well

London, Ont.

LANTERN GLOBES.—The demand is good at present for lantern globes and long and squat patterns sell as follows: 1 doz. to case, $1.20 doz.; 3 doz. to case, $1.15 doz.; 6 doz. to case, $1.10 doz.

Sale of Lamp Chimneys Helped by Coming of Fall

London, Ont.

LAMP CHIMNEYS.—With the approach of Fall and the long evenings, interest is stimulated in the sale of lamp chimneys as well as lanterns and present prices are as follows:

Size 0, $9.00 per case of 6 dozen; A, $11.00 per case of 8 doz.; B, $9.65 per case of 6 doz.

Imports of English Cutlery Said to be Arriving

London, Ont.

ENGLISH CUTLERY.—Supplies of English table cutlery and carving sets and pocket knives are said to be arriving more freely. The prices show an increase of from ten to twenty per

cent. over prices quoted earlier in the year.

Apple Parers Are Finding Ready Sale

London, Ont.

APPLE PARERS.—There has been a good sale for these machines and the prices are: Hudson, $20.00 doz.; Little Star, $15.00 doz.

Molasses Gates Advanced in Price

London, Ont.

MOLASSES GATES.—Owing to increases in raw material and cost of production there has been an increase in the price of molasses gates.

Latest prices: No. 1, $7.50 doz.; No. 2, $8.75 doz.; No. 3, $10.00 doz.; No. 4, $11.00 doz.

Pyrex Ovenware Advanced Considerably

London, Ont.

PYREX GLASSWARE.—New lists are out on this line of ovenware and discount quoted is still 30 per cent. New prices are approximately 20 per cent. higher than previously.

Higher Prices on Wyandotte Cleaner

London, Ont.

WYANDOTTE CLEANER. — New higher prices are quoted on this product and are as follows: in 5 lb. sacks, 50 to bbl., $20.75 per bbl.; single sacks, 43 cents each.

Advances Made on File and Chisel Handles

London, Ont.

CHISEL HANDLES.—This line has been short locally for some time and new stocks arriving are priced much higher than old prices. The following are quotations on some of the best sellers: No. 607, $3.25 doz.; No. 616, $2.15 doz.; No. 617, $2.35 doz.; No. 601, $1.45 doz.; No. 621, $1.35 doz.; No. 610, 95 cents doz.

File handles, No. 630, quoted at 60 cents doz.

Building Papers Again Advanced

London, Ont.

BUILDING PAPERS.—New prices are out on building papers, dry and tarred, and on tarred felts, carpet felt and spruce sheathing. The following are new quotations: Dry fibre, No. 1, $1.85 rod; dry fibre, No. 2, $1.50 rod; tarred fibre, No. 2, $1.70 rod; tarred felt, $6.05 100 lbs.; carpet felt, $9.00 100 lbs.; spruce sheathing, $11.75 per 100 lbs.

Higher Prices on Roofing Pitch and Tar

London, Ont.

COAL TAR AND ROOFING PITCH. —Both these have undergone a revision upwards in price and now sell as follows: Roofing pitch, $1.30 per 100 lbs.; coal tar, $9.00 per bbl.

Paint Brushes Revised Upwards

London, Ont.

PAINT BRUSHES.—Some lines of Meakins' paint brushes have advanced in price and new higher lists are quoted at 30 per cent. off.

Cow Chains and Stall Fixtures Higher

London, Ont.

COW CHAINS.—New prices are in effect on cow chains which are now quoted at list plus 25 per cent.

Stall fixtures of the hollow steel variety now sell at $2.25 per doz.

Ash Sifters Have Revised Prices

London, Ont.

ASH SIFTERS.—The scarcity of sheet metal and the high prices on lumber are responsible for new advanced prices on ash sifters. The common wood sided now sell at $3.75 doz.; the Banner at $3.65 each and the No. 1 rocker at $6.25.

Shot Gun Shells and Cartridges Move Well

London, Ont.

CARTRIDGES AND SHOT GUN SHELLS.—These are moving well and in spite of higher prices due to luxury tax and increased cost of production, the demand is brisk.

Dominion make is selling at 37½ per cent. off list and American ammunition at 27½ per cent. on list.

Roofing in Demand; Prices Firm; Stocks Low

London, Ont.

ROOFING AND ROOFING SHINGLES.—There is said to be a good demand at present for both ready roofing and for roofing shingles. The prices rule very firm and stocks at present are low.

Good Sales For Builders' Hardware

London, Ont.

BUILDERS' HARDWARE. — Good sales are reported for builders' hardware and prices continue firm, with indications of remaining so.

WINNIPEG MARKETS

WINNIPEG, Aug. 25—Prices on hardware commodities for the most part have remained firm for the past week with a tendency for higher prices. Many lines of builders' hardware are quoted higher this week, also lawn mowers have been advanced in price. Horse muzzles are quoted at a lower price. All lines of building paper have been revised upwards in price. Iron jack chain is again advanced in price. The base price on cut nails has been changed this week and is higher. The base on cut nails to-day is $8.15. Other lines quoted higher in price this week are: Gimlet bits, revolving punches, belt punches, Todd nippers, glaziers' points, shaft couplings, sleigh and axle clips, tap soles, picture cord, some lines of axe handles, window brushes, Snap hand cleaner, garbage cans, some lines of sheet iron ware, carvers and table knives and forks, Swift lubricators and a few lines of auto accessories. Collections are coming in more promptly and in view of the prospective good crops a good fall trade is expected.

Lawn Mowers Advance 50 Per Cent.

Winnipeg.

LAWN MOWERS.—Owing to the shortage of raw material and the increased cost of labor, it has been necessary to advance the price of lawn mowers approximately 50 per cent. The following are the prices quoted this week on three lines:

Daisy—12 in., $8 each; 14 in., $8.75; 16 in., $9.50.

Woodyatt—12 in., $11.25 each; 14 in., $12; 16 in., $12.75; 18 in., $13.50; 20 in., $14.25.

Empress—14 in., $14.25 each; 16 in., $15; 18 in., $15.50; 20 in., $16.

More Money Charged for Leather Belt Punches

Winnipeg.

BELT PUNCHES.—Approximately a 10 per cent. advance has been made in the price of belt punches. Following are the prices quoted: Revolving punches—No. 4, $22 per dozen; No. 6, $24 per dozen. Belt punches, No. 20—1 to 5, $3; 6, $3; 7, $3.60; 8, $3.60; 9, $3.60; 10, $5; 11, $5; 12, $5.

Sheet Scarcity; Improvement Not Expected

Winnipeg.

SHEETS AND PLATES.—It is intimated on all sides that there will be a scarcity of steel plate and sheets this fall. There seems to be no hope expressed by the manufacturers whatever for any improvement in the near future. In order to obtain supplies at the present time it is necessary to scour the market. Prices quoted to-day are liable to be changed in two or three days. Orders are only accepted subject to prices ruling on date of shipment.

Black Sheets—10 gauge, $10; 12 gauge, $10; 14 gauge, $10; 16 gauge, $10.35; 18-20 gauge, $10.70; 22-24 gauge, $10.45; 26 gauge, $10.50; 28 in.,

$10.50.

Galvanized Sheets—10¾ gauge, $13.75; 28 gauge, $13.35; 26 gauge, $12.80; 24 gauge, $12.65; 22 gauge, $12.65; 20 gauge, $12.50; 18 gauge, $12.50; 16 gauge, $12.35.

Todd Nippers Have a Ten Per Cent. Advance

Winnipeg.

TODD NIPPERS.—Approximately a 10 per cent. advance has been made in the price of Todd nippers and they are quoted as follows: No. 1, $3.75 each; No. 3, $3.20 each.

Many Lines of Builders' Hardware Up

Winnipeg.

BUILDERS' HARDWARE.—An advance of approximately ten per cent. has been made in various lines of builders' hardware. No change has taken place on the common lines of locks, lock sets. etc., but on those lines requiring brass or bronze in their manufacture it has been found necessary to increase the price about 10 per cent.

Brass Butt Hinges Revised Upwards

Winnipeg.

BRASS BUTTS.—It is expected that before long all lines of brass goods will have higher prices. There seems to be a shortage of raw material, and if conditions do not change advances are sure to come. The following are prices quoted: Brass butts—narrow, middle, broad and desk, 50 per cent. advance on the list.

Cut Nails Scarce; Price Advanced

Winnipeg.

CUT NAILS.—Like all other lines manufactured from iron and steel cut nails are scarce, due to the manufacturers being unable to procure raw material, and the situation does not seem to be improving very much. The following base price is quoted this week: cut nails, $8.15.

Price on Shaft Couplings Revised Upwards

Winnipeg.

SHAFT COUPLINGS. — Owing to shortage of raw material and increased cost of labor the price on this line has been advanced. The following prices are quoted: No. 1045—No. 0½, $11; No. 2B, $12; No. 3½, $17.25; No. 4, $20; No. 5, $30. No. 1047—No. 0½, $7.00; No. 2B, $7.75; No. 3½, $12; No. 4, $14; No. 5, $20.50.

Ten Per Cent. Added to Axle Clips

Winnipeg.

AXLE CLIPS.—A revision has been made in the price of axle clips, sleigh clips and saddle clips, and all are advanced approximately 10 per cent. The following are the quoted prices. Axle clips:

5-16 x 2¾, $6; 3¼, $6.05; 3¾, $6.90; 4¼, $7.75; 4¾, $8.60; 5¼, $9.45; 6, $10.7. ⅜ x 4, $9.60; 4½, $10.90; 5, $12.20; 5½, $13.50; 6, $13.95; 6½, $1[illegible].90; 7, $17.40; 7½, $18.70.

Sleight Clips—5% off list.

Spring Clips—5% off list.

Saddle Clips—25% advance.

Building Papers and Felts Again Revised Upwards

Winnipeg.

BUILDING PAPER.—The paper situation is anything but good and shipments are not coming in as they should. The factories will not guarantee any time as to when they will fill orders. Raw material is scarce and costing the manufacturer more and prices are gradually going up. The following are today's quotations: Building paper, No. 1, $1.60; "Sunrise," $1.45; tarred sheathing, "Anchor," $1.75; "O.K.," $1.75; tarred felt, $6.25; carpet felt, 16-oz., $5.50; 20-oz., $7.

MONTREAL MARKETS

MONTREAL, August 26.—Several advances have taken place in hardware prices this week and other prices are firm.

Ready roofings and tarred felts are higher in price while coal tar and roofing cement have been advanced. Stove pipes and stove pipe elbows have a higher price. Horse shoe nails, ash-sifters and churns have been increased and new discounts have gone into effect on tin and enamelwares. A good business is reported and prospects for fall would be excellent if there was no difficulty experienced in getting the goods.

The shortage is extending from one line to another week by week and there is scarcely any article made from metal, particularly of iron and steel, that has not been affected. It is to be hoped that relief will come in supplies of raw and finished materials before very long or markets will be cleaned out.

Nails and wire products are very scarce. Pipe and black and galvanized sheets too are hard to get and difficulty in getting supplies is no small one.

Sheets and Plates Still Scarce

Montreal.

SHEETS AND PLATES.—The situation is still serious in this market and shortage of sheets and plates is very acute.

Prices are firm and high and there is nothing to indicate that there will be any easing of the situation for some time.

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Iron and Steel Bars no Easier

Montreal.

IRON AND STEEL.—Mills are not delivering much bar iron or steel, and as a matter of fact the situation is getting worse rather than improving. Jobbers state that they cannot obtain necessary stocks of staple sizes of iron and steel and the demands this fall, from all accounts, will be active. Prices are firm, though unchanged.

IRON AND STEEL

Iron finish machinery steel		$5 05
Norway iron	13 50	15 00
Single reeled machinery steel		6 50
Spring steel		5 50
Sleigh shoe steel		5 50
Tire steel		5 20
Toe calk steel, per 100 lbs.		5 90
Band steel		5 00
Harrow tooth steel		5 15
Mining tool steel, per lb.		0 24½
Black diamond tool steel, per lb.		0 24½
Black diamond cast steel, per lb.		0 24½
Common bar iron, per 100 lbs.		4 65
Refined iron, per 100 lbs.		5 65
Mild steel		5 00

3-16 and thinner flats in iron or steel take extra 50c per 100 lbs. over base and regular extra.

Advanced Prices Quoted on Churns

Montreal.

CHURNS.—New prices are issued on Beatty Bros. hand churns and following are new quotations:

No. 0, $12.00; No. 2, $13.00; No. 4, $16.00; No. 1, $12.00; No. 3, $14.00; No. 5, $19.00.

Scarcity Felt of Canada Plates

Montreal.

CANADA PLATES.—As reported previously the scarcity of these goods is very pronounced. There was some hope that the dearth of supplies would be relieved but there seems little prospect of this relief coming this Fall.

Those who have got their requirements are lucky and should make good use of them. Prices are only nominal and range round $13.25 per box of 60 sheets, regular grade.

Stove Pipes Scarce and Costing More

Montreal.

STOVE PIPES.—There has been an advance in the price of stove pipes and these lines are said to be very scarce and will be difficult to obtain this Fall unless supplies of raw material come in much better than they are at present and the outlook now is not very hopeful. Prices are: 6 in., $25.45 per 100; 7 in., $27.30 per 100.

Higher Prices on Stovepipe Elbows

Montreal.

STOVEPIPE ELBOWS.—New and higher prices are charged for these and like the stovepipes there is every indication that they are going to be hard to get.

Prices are: light, 6 in., $3.20 doz.; light, 7 in., $3.50 doz.; heavy, 6 in., $3.95 doz.; heavy, 7 in., $4.40 doz.; galvanized, 7 in., $7.30 doz.

Wrought Iron Pipe Scarce and Unchanged

Montreal.

IRON PIPE.—Some sizes of iron pipe are nearly impossible to obtain and there is a shortage in most sizes. The dearth of supplies is aggravated through the scarcity of skelp and no improvement in conditions is to be observed.

The following are market quotations:

Standard Buttweld Pipe
Per 100 Ft.

	Steel Blk.	Steel Galv.	Gen. Wrought Iron Blk.	Gen. Wrought Iron Galv.

Ingot Metal Market Quiet and Firm

Montreal.

INGOT METALS.—Very little change has taken place during the past week sales have been limited and prices remain unchanged.

TIN.—Little business has been done in tin and prices are round 56 to 57 cents per pound.

LEAD.—A little firmer tone has been observed in this, but the market generally was dull. Quotations on basis of 10¼ cents.

COPPER.—Local business was rather slow and outside markets are reported stagnant. Prices of electrolytic 24½ and for casting 24 cents.

ANTIMONY.—A little easier tone is noticed and what business was done was round 10 cents a pound.

ALUMINUM.—Higher prices are reported from outside markets, but locally this metal is quiet at 37 to 39 cents.

SPELTER.—A limited amount of business was done at 10¾ cents.

Higher Prices on Ready Roofings

Montreal.

ROOFINGS.—Prices on various grades of felt and rubber roofings have been advanced and the following are new prices on some well known lines.

Everlastic, 1 ply, $2.30 per roll; 2 ply, $2.85; 3 ply, $3.35.
Panamoid, 1 ply, $2.15 per roll; 2 ply, $2.65; 3 ply, $3.10.
Red Star, 2 ply, $2.33 per roll; 3 ply, $2.75.

Lubricating Oils Revised Prices

Montreal.

LUBRICATING OILS. — Higher prices are in effect this week on different kinds of lubricating oils and the following all have new prices: Black oil, winter, 33c per gal.; black oil, summer, 32½c per gal.; Imperial kerosene oil, $1.45 per gal.; Capitol cylinder, $1.00½ gal.; machine oil; regular, 64c gal.; Imperial gas engine cylinder, 65c.; paraffine, 45c gal.; Polarine (list less 25 per cent.) $1.45; barrel basis.

Scythes to Cost More Next Season

Montreal.

SCYTHES AND HARVEST TOOLS. —New prices are out for the season of 1921 for harvest tools and while these generally are unchanged, scythes are advanced about $2.75 per dozen.

Horse Shoe Nails Costing More

Montreal.

HORSE SHOE NAILS.—Increased costs have led to an upward revision of horse shoe nails and 25 lb. boxes are marked up 25 cents, making base price $4.50.

Painters' Tools Advance in Price

Montreal.

PAINTERS' TOOLS. — Increased prices are asked on different lines of painters' tools, including wheel knives and painters' rollers. Advances approximate ten per cent.

Roofing Cements Advance in Price

Montreal.

ROOFING CEMENT. — Increased prices are in effect on Everlastic roofing cement and the following are new quotations:

Bbl. lots 70c per gal.; ½ bbl. lots, 75c gal.; 5 and 10 gal. cans, 85c gal.; 1 gal. cans, (case of 12) $10.50.

PITTSBURGH MARKETS

PITTSBURGH, August 26.—Pig iron and coke still occupy the centre of the stage. Pig iron was going to advance because coke was so high. Now coke has declined slightly, with prospects of further declines, while pig iron has advanced sharply, with no proof that it will not advance indefinitely beyond the present level.

Car placements in the Connellsville coke region have continued good, this being due of course to the cars moving less slowly and thus making round trips more frequently. The total number of cars in the coke service rarely varies much. The increase in production, due entirely to better car supplies, is shown by the Connellsville Courier's reports of coke production in the Connellsville and Lower Connellsville region, which for three successive weeks have been as follows: 172,870 tons, 194,140 tons and 219,440 tons. Thus the last week reported upon shows an increase of 25,300 tons over the preceding week and an increase of 46,570 tons over the week before that, an increase of 27 per cent. in two weeks. The immediate influence upon the market has been small because the increase has been chiefly in the production by the furnace ovens, rather than in production by the merchant ovens, but it is going to come to the same thing in the long run, as if the steel interests make more coke in their own ovens they will seek less in the open market. In the past week spot furnace coke has been rather soft at $17.50 per net ton, f.o.b. ovens, while formerly and for many weeks it was $18.00 and $18.50, with a strong leaning towards the higher figure. "Off" coke has sold down to $16 or less.

Advancing Pig Iron

A curious caper was cut by valley foundry iron, for after being quotable at $46, valley, for several weeks, suddenly there were sales at $50. The sales were not heavy in point of tonnage, only a few thousand tons altogether, but they were in numerous lots, and in a few cases the deliveries ran to the end of the year, so that there is no question about the market being established at $50. The jump was a quick one, but from a long range view foundry pig iron has not had a particularly rapid advance, since three months ago it was $45, and six months ago it was $40. Bessemer and basic grades are probably going to be established at $50, but thus far not enough sales are on record to establish the fact. The last well established quotations were $47, valley, for Bessemer, and $46.50 for basic. There was a large sale of basic reported at $48.50, but the reported buyer has al-

ways required a limit of .03 per cent. on sulphur, and that is not standard iron. A furnaceman would be throwing money away if he could not get an extra for such sulphur in these times, hence the sale did not make a general market for basic.

An interesting commentary on the pig iron market situation is that wh.. foundry iron was $4 some of the furnaces were discussing whether the advance in freight rates on the raw materials, coke, ore and limestone, ought not to be passed on to the pig iron buyer. For valley furnaces the advances were computed to amount to between $1.50 and $1.75 per ton of pig iron. Now the furnaces have passed $4.00 to the consumer, and the consumer must pay the advanced freight on the pig iron as well. Even to a Pittsburgh consumer the advance on pig iron freight is about 60 cents, as all rates have gone up this week 40 per cent. and the old valle Pittsburgh rate was $1.40. On New England buyers the 40 per cent. advance will fall much more heavily. Thus the pig iron buyer has to pay his increased freight on pig iron, the furnaceman's increased freight on the raw materials assembled, and an advance in the price besides.

The pig iron advance is made the more remarkable because pig iron was already high relative to steel, yet steel shows a slight declining tendency and pig iron advances. In last report sales of sheet bars were recorded at $70, Pittsburgh, a decline in the market of $5. It has since developed that some of the sales there is now a possibility that the next were equal to $1 or $2 below $70, and sales will be at $65, as some of the mills are anxious to sell sheet bars and the demand has slackened off. Several sales of billets are reported from the east on the basis of $60, Pittsburgh, a price that was very difficult to do two or three weeks ago.

Market Anomalies

The general market, of course, is upside down. If coke really cost all the furnaces $17.50 ovens, $50 would be altogether too low for pig iron, for at 2,200 pounds coke consumption the cost of coke delivered to valley furnaces, with the new freight, would be about $22 per ton of pig iron made. With $50 pig iron billets at $60 would be altogether too low. With $60 billets bars and shapes would be too low, for they can be bought from large independent mills at little if any above $60 per net ton. If one started from the coke he could argue that prices ought to advance all along the line, but when one came to bars and shapes at $60 or thereabouts, by the independents, he would encounter the fact that the Steel Corporation, which produces between 40 and 45 per cent. of all the steel, has prices of $47 per net ton on bars and $49 on shapes. The corporation has had those prices since the Industrial Board adjustment of March 31, 1919. It is nearly a year since the independents began to expect that the corporation would advance its prices, but the corporation has not done so.

Transportation Improved

The steel interests as a whole complain almost as much as formerly about transportation conditions, but the fact is that almost every week there is a decided improvement. The complaint is due in most cases to the improvement not being as rapid as was expected. Several weeks ago the turning point occurred in the matter of accumulating steel at mill, the rate of accumulating decreasing, and in the past week or two the condition has been of the mills shipping as much steel as they were making. Some have shipped less and have added to their accumulation, while others have shipped more, thus moving some of the steel they had previously accumulated.

Ever since steel started to accumulate at mills the question has been discussed what effect there would be upon the market by the steel eventually being shipped, in addition to current production. There is a little weakening in prices, but it is hardly discernible. One reason for the market's remaining rather strong probably is that the shipments are far from uniform to different customers, since on account of embargoes and other influences the mills can ship much more freely to some customers than to others, and thus there are left many steel consumers who are still very short of steel.

PAINT MARKETS

(Continued from page 62.)

100 lb. drums	7.60 per 100 lbs.
25 lb. irons	7.85 per 100 lbs.
1 and 3 lb. tins	11.35 per 100 lbs.

No Change Reported in White Lead

Toronto.

WHITE LEAD IN OIL.—Present prices for white lead hold and are unchanged with indications at the moment of being stable.

Demand is not so great, but business has been good.

Present quotations will be found on market quotation pages.

TORONTO

Very Little Movement in Linseed Oil

Toronto.

LINSEED OIL. — There seems to be a waiting tendency on the part of dealers in regard to linseed oil and very little trading is reported this week. It will be some time before the new crop of seed is available and at present the situation is a trifle uncertain. Latest reports would make it appear that both American and Canadian crops have been rather over-estimated as to size. Last week's quotations generally hold and are as follows:

Linseed Oil—	
1 to 2 barrels, gal.	2 00
3 to 5 barrels, gal.	1 99
10 barrels and over, gal.	1 97
Boiled.	
1 to 2 barrels, gal.	2 03
3 to 5 barrels, gal.	2 02
10 barrels and over, gal.	2 00

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market; less than barrel lots are 15c per gal. higher than single barrel price.

Turpentine Easier; Price Unchanged

Toronto.

TURPENTINE. — No change is reported this week in the price of turpentine, but the situation is regarded as somewhat easier. Stocks are a little heavier but the demand is barely normal. Present quotations are: 1 barrel lots, $2.60 per gallon; 2 to 4 barrel lots, $2.59 per gallon; less quantities, 5 gallon lots, $2.75.

STEEL MARKET LESS ACTIVE

"Due in part to the price uncertainties connected with the railroad freight advances effective next week and in part to the recession in the automobile and other industries, the steel market is less active," says the Iron Age. There have been further cancellations of steel by automobile makers, but the effect has been greater on sentiment than on steel mill operations.

Conflicting influences are at work and for the time the effort to forecast the effect of these on the new demand for steel in the remainder of the year has taken precedence over the movement of product out of the blockade at the mills.

What action the Steel Corporation will take as to prices for its product in view of the freight advances is widely discussed. A considerable volume of business for 1921 waits on the decision, which involves not only the effects of the advance of many million dollars in the cost of a year's output of the corporation but also the duration of the present condition of insufficient supply of steel.

The shipment of steel from mills is better on the whole and the situation is expected to work easier.

MAXWELL SAFETY LADDER STAY

The Maxwell Safety Ladder Stay Co., 101 West 43rd St., New York City, are marketing a device under the above name which they claim will eliminate ladder slipping and possible resulting injuries.

The ladder stay consists of a malleable rod with adjustable clamp which is fastened to bottom of ladder, and a rubber suction cup and steel point at bottom of rod; cup and point being interchangeable.

It is stated that the device can be used on any kind of ladder regardless of the condition of floors or sidewalks and that no matter at what angle the ladder is placed the rod holding the suction cup will always remain at an angle of 8 degrees, giving it a downward pressure and creating a vacuum that offsets the angle of the ladder.

Creating Export Markets

A few months ago a British firm of importers, located in London, England, asked us for names of packers of condensed milk in Canada. We sent them a copy of "Canadian Grocer" which contained the announcement of the name of a prominent company. They write, December 17th, as follows:

"You will be interested to know that as a result of our asking you some time ago for information for packers of condensed milk and referring us to ——— people, we were able to place orders with that firm within a few months to the extent of £72,000."

—An instance of the splendid service MacLean business papers are giving in introducing Canadian business firms to world-wide markets. This double approach to business means much to all firms who are interested not only in home markets, but also in whatever foreign markets can be developed.

MacLean business papers give an added service by constantly adding to their readers the names of foreign concerns in all important world-wide markets where Canadian goods can and will be sold. Publicity in these media gives the same effective service in the development of foreign sales that it does in Canada. We could tell you of many other instances where business papers have developed splendid markets where none were thought to exist.

What an opportunity for scientific, intensive, wasteless and immensely productive advertising—and what amazing results are being reaped by those who know how to grasp it. Give us an opportunity to show you how MacLean business papers can develop foreign trade in addition to building up your Canadian business.

Salesmanship in the Paint Department

Service That Sells—Few Hardware Dealers Get the Volume of Paint Sales to Which They Are Entitled—Some Other Lines Can Often be Sold to the Customer Who Visits the Paint Department —Catering to the Children's Trade—Moving Slow Sellers

Written for Hardware and Metal by F. A. Farrar

THE whole town needs hardware at one time or another; everyone in your neighborhood should visit your store, and yet, while this is the case, few hardware men get the volume of trade to which they are entitled.

Now what is the reason for this?

One reason is that the clerks are sometimes not really efficient salesmen.

When a customer comes in, do you greet him with a smile, a real "Hello," and "How are you to-day?" Do you meet him with optimism and good fellowship, or do you act as if you were insulted by his imposing on your time?

Do you really try to sell him paint or do you let him wait on himself? Do you show a real, live interest in this customer, or do you keep on discussing the political convention or the local ball game with a co-worker?

Practically everyone who comes into your store could be sold something, if proper sales effort was put forward, if the clerk applied real salesmanship instead of "just waiting on the trade."

I have sometimes been in a hardware store where the clerks were having a little party of their own, sometimes they excuse themselves from this friendly gab feast and come forward with hurry but lack of interest. Their mind was on the parties from which they had separated themselves and not on a sale. They had the "Hurry on, I want to get back to the big talk" attitude.

Now, when a man comes into your department and asks for varnish stain, you can not only sell him this, but you can sell him varnish or polish, or brushes, house paint or roof paint just as well. Don't stop at the first sale, and even if you don't sell him additional articles to-day, you can at least sow seeds that will flower in profits later on.

Don't conclude your first sale with a "Thank you," go right on to sell more. Whatever you do don't add the bromide "What else please," or "Will that be all?" We hear these on all sides and they are recognized by real salesmen as first-class sales killers.

Learn to meet your customers in a friendly way and make them feel at ease in your store. Don't just wait on them, be a real constructive help. Follow up a sales suggestion by talks on other articles a customer might need. Always send him on his way smiling, with an invitation to return, impressing your customers with the idea that you have a personal interest in their business.

Catering to the Kiddies:

There are discussions in many sections as to whether dealers should encourage parents to let their children do the trading. There isn't a hardware man anywhere who has not at one time or another been required to sell an article from a list furnished him by the little hands of children, and in many cases there is no list furnished, and the child simply attempts to get what he is sent for.

This is a real opportunity for the retailer. Try and find out what the goods are for and then send back the best possible material for the purpose. It may take a little more time, but sooner or later the parents will get to know yours as a store of real service.

One parent I know of said he was sending all his trade in hardware, paints and kindred line articles to a ceratin store because the boss always took time to send the best thing for the purpose. He never tried to cheat the children, always giving a little more than was expected.

You remember the old saying, tried but true, that a pleased customer was the best advertisement. It is

"Save the surface and you save all" *Paint & Varnish*

MOORE'S LINE

of Famous Salesmaking Paints and Varnishes

Moore's absolute guarantee of satisfaction makes selling easy. These popular paints and varnishes give the service they are guaranteed to give; that is why they sell.

A Moore Agency for Paints, Varnishes and Muresco means bigger and better profit, new customers and repeat orders.

The Moore Lines contain: "Impervo" Porch and Deck. Tile-Like, Mooramel, Auto Finish, "Muresco." "Impervo" Varnishes, Morelustre Enamel. Barn Paint, Moore's Floor Paint, Sani-Flat, High Gloss Enamel, Carriage Enamel, Wagon and Implement Paint, Shingle Stain.

Ask About Our Agency Proposition

Benjamin Moore & Co.

LIMITED

Paints, Varnishes and Muresco

Toronto

"Save the surface and you save all" *Paint & Varnish*

just as true to-day as it was years ago. There are few things that equal the trade-making value of a satisfied customer, and there is no better trade killer than a dissatisfied one, for the one who is pleased will not only continue to purchase from you but he will influence others in your direction. A personal endorsement is all a friend needs, advertising will attract people to your store to your paint department, and competent salesmen, satisfactory goods and prices will make an additional sale, but the customer's good will is the very last answer and must be secured and **maintained** if your paint department is to be a success.

The Best Way to Use Agency Pictures

I see many hardware stores are making use of the news agency pictures in their windows, and I often see them pasted on the glass, which makes it too easy for the passerby, who is really a prospective customer, to glance at them or stop to study them carefully **without seeing the goods** in the window.

The real reason for this advertising is to attract attention to the window, which is the main object of the display. In order to get better results from this, why not, instead of pasting them on the glass, mount the pictures on cardboard and set them inside the window along with the display. Have the display surround them. You can also call attention to their position by a little sign in the window with a hand pointing to them. In this way goods will not be overlooked.

Moving Slow Sellers

One paint department head in a hardware store recently called upon complained that a certain grade of barn paint was not moving well. He had a good stock but few sales had resulted, and the salesman from whom he had purchased this material told him that the goods were well advertised, and there would surely be a demand for them. Whether that was true or not he followed a suggestion given that a good window display be made of the barn paint, letting the trade know that he had the goods in stock. This plan was carried out, and

in less than a week three-fourths of the barn paint stock had been sold, and another lot had been ordered.

There are no two ways about it, if you want to sell paint you must do your part. Advertising is perfectly willing to do its share, but unless you let the people know that you have the goods, that you are selling the line and have the goods on display, you cannot hope for quick turnovers.

Labelling "Combination" Leads and Zincs Defined by Association

The Educational Bureau of the Paint Manufacturers' Association has issued the following circular:

"At the annual meeting of the Paint Manufacturers' Association of the United States, held at Chicago in 1913, the following resolution offered by the Educational Bureau, with the approval of the Board of Directors, was unanimously adopted:

Resolved: That this Association strongly deprecates any form of mislabelling.

Resolved: That the terms, "Lead" or "White Lead" will be used by its members exclusively to designate the pure basic carbonate or basic sulphate of lead, or the two combinations; the terms "zinc," "zinc oxide," "oxide of zinc," "zinc white" only" to designate pure zinc oxide, and the term "linseed oil" only to designate pure linseed oil.

Resolved also: That the members of this Association will print upon their labels the net weight or measure of the contents of the package.

Explanation: The terms defining zinc oxide are to be used only on oxides containing 99 per cent. or more of pure zinc oxide. Where a zinc oxide is reduced by the addition of inert reinforcing pigments, if the term "zinc," "zinc white," etc., be used, it shall be followed by the word "compound" in type of the same size.

At a general conference of the industry held in Cleveland on April 28, 1908, the following declaration was also unanimously adopted:

Resolved: That whenever and wherever legislation on these matters is insisted upon it should be strictly confined to that which is honestly and intelligently directed towards the maintenance and upbuilding of the general paint trade and allied industries, by legislation insuring full weights and full measures, and prohibiting false or misleading descriptions.

"The result of these unequivocal declarations was that a number of members either withdrew their products referred to or changed the labels in conformity with the resolution.

"The Federal Trade Commission has already taken cognizance of this fact in certain specific instances, and, we have reason to believe, it collecting evidence on on a wide scale. Some intimation of this activity has been given from time to time in the Bulletin of the Regional Associations; but it appears that more sound and direct notice should be given at this time.

"Recognition has frequently been given by Government authorities to the paint manufacturing industry as exceptional, in that it has consistently endeavored to reform, of itself, such practices as are shown to be unfair or evil. This is a reputation worth maintaining. It is therefore respectfully suggested that, if you have not already done so, you take prompt measures to revise your "lead" and "zinc" schedules to conform to the following:

1. "White lead" on labels or in advertising, means only the basic carbonate or the basic sulphate of lead. If reduced or "reinforced" at all, the term should be modified or followed by the word "Compound," in letters as conspicuous as the main title. If the lead content be less than 50 per cent. of the whole, the word "Lead" should not be used at all on the label, except as a part of the complete formula printed thereon.

2. The same rule applies to colors in oil, etc.

3. "Zinc," "Zinc Oxide," "Zinc White," "White Zinc," etc., means only plain, unreduced zinc oxide, including perhaps, those grades containing under 5 per cent. of lead sulphate* (since these are permitted in existing state laws). If zincs having a higher lead content are used, the title should be followed or preceded by the word "Leaded." If in any way reduced or compounded, the title should be followed conspicuously by the word "Compound," and if less than 50 per cent. of zinc is used, the term "zinc" should not appear.

Compounds of zinc or of lead with other pigments exceeding 50 per cent. are properly designated as "Whites."

4. "French Zinc," "French White Zinc," "French Process Zinc," "White Seal," "Green Seal," "Red Seal," etc., all designate zinc oxide made by the French process, and are not permissible on the label of any oxide made by the American process. "Vieille

Weekly Paint Markets

MONTREAL

MONTREAL, Aug. 26.—The paint market this week while a little quieter has been good for the season of the year and manufacturers regard the year's trading up to now as very satisfactory, and are optimistic with regard to the balance of the season.

Prices rule firm and little change of any account is looked upon as likely for some time to come. Turpentine and linseed oil are quieter, and smaller business is being trasacted. Glass supplies are reported to be below the average and indications are that there may be a shortage.

Some Lines Paint Brushes Higher

Montreal.

PAINT BRUSHES.—There has been an advance on certain lines of these goods. The shortage of bristle is one of the causes, as very little, if any, is coming from what used to be the largest source of supply, namely Russia and Poland and China has to supply the bulk of the world's trade.

Prices are understood to be ten to fifteen per cent. higher and discount is 30 per cent.

Linseed Oil Quiet and Firm

Montreal.

LINSEED OIL. — There is not much trading reported in linseed oil this week and prices are not regarded as being likely to change much until new flax crop is in.

	Imp. Gal.
Raw—	
1 to 4 barrels	1 85
3 to 4 barrels	....
Boiled—	
1 to 4 barrels	1 87½
3 to 4 barrels	....

NOTE—Owing to fluctuations seed markets jobbers, generally, are not quoting.

Turpentine Dull; Demand Small

Montreal.

TURPENTINE. — There seems to be a little easier tone in the turpentine market but prices are firm. Whether they will go any lower is a matter of conjecture.

Stocks on hand are fair but not excessive.

	Imp. Gal.
Turpentine—	
Single barrels	2 60
Small lots	2 70

(Packages extra.)

Putty Sales Seasonable; Prices Firm

Montreal.

PUTTY. — There has been a fair demand for putty and prices are unchanged. The scarcity of whiting has not been relieved and until that happens lower prices on putty seem unlikely.

New Prices on Liquid Creosote Oil

Montreal.

CREOSOTE OIL. — New prices are out on liquid creosote oil (carbosota) and are as follows: Bbls. 60c. per gal.; ½ bbls., 65c. per gal.; 5 and 10 gals, 75c. per gal.; 1 gal. cans, per doz., $9.50.

Glass for Fall May be Scarcer

Montreal.

GLASS. — At present the stocks on hand are fairly ample, but reports show that factories are having difficulty in getting raw materials and there may be a shortage in window glass this fall. It is doubtful if much glass will be imported from Belgium this year.

White Lead Prices Firm

Montreal.

WHITE LEAD IN OIL.—There seems to be no possibility of prices changing much on white lead for some little time. Demands are said to be seasonable and stocks fair. Prices are based on $20.35 in small lots and lower prices for larger quantities.

TORONTO

TORONTO, August 26th.—A little slackening of output is noticed in the paint market, although manufacturers say they are well satisfied with the amount of business done up to date.

Prices generally are holding firm with no immediate indication of any radical change.

Carbon roofing paints along with coal-tar have been increased in price and creosote oil has also been marked up.

Glass is unchanged and is likely to be scarcer.

Linseed oil and turpentine are unchanged from last week and very few inquiries are being made for same. It is thought likely that present prices for oil will hold for a few weeks and by that time the effect of the new crop of flax will be known to the market.

Advanced Prices For Carbon Paint

Toronto.

CARBON PAINT.—An advance has been made on Everjet Elastic carbon paint, which is now quoted as follows:

Per bbl.	$0.80 per gal.
Per half bbl.	0.85 per gal.
5 and 10 gal. cans	0.95 per gal.
1 gal. (cases of 12 gal.)	10.75 per gal.

Increased Price on Liquid Creosote Oil

Toronto.

CREOSOTE OIL.—A new higher price is given on "Carbosota" liquid creosote oil, which sells as follows:

Per bbl.	$0.60 per gal.
Half bbls.	0.65 per gal.
5 and 10 gal. cans	0.75 per gal.
Cases of 12 1 gal. cans	9.50 per gal.

No Change Reported in Glass Outlook

Toronto.

GLASS.—There is no indication at present that stocks will be more plentiful or prices any easier for fall. It is said that slightly lower prices have been quoted than current market quotations in some cases, but this is believed to be only a local flurry due to the slack season of the year and it is doubtful if it will continue.

Plate is said to be scarce and the auto industry is in the market for large quantities, although it is curtailing output of cars.

Litharge Prices Ruling Firm

Toronto.

LITHARGE.—Quotations on this product are ruling firm and are as follows:

In casks, $17.00 per 100 lbs.

Smaller quantities, 20 cents per lb.

Putty Demand Fair; Prices Unchanged

Toronto.

PUTTY.—There is a little falling off in the demand for putty. Prices are unchanged and supplies are normal.

Present prices of standard:

Bulk in bbls. .....$6.75 per 100 lbs.

Continued on page 56

The Luxeberry Painter Says:

"SPARE THE VARNISH, SPOIL THE FINISH. Homebuilders should give the same thought to the choice of varnish as to the selection of woods for the interior trim. The finest interiors of natural woods can easily be spoiled by the use of poor or unsuitable finishes. I use Berry Brothers' Varnishes, Enamels and Stains because they produce the highest possibilities in artistic wood finishing."

The "Berry" label is the only sales argument needed by most varnish buyers.

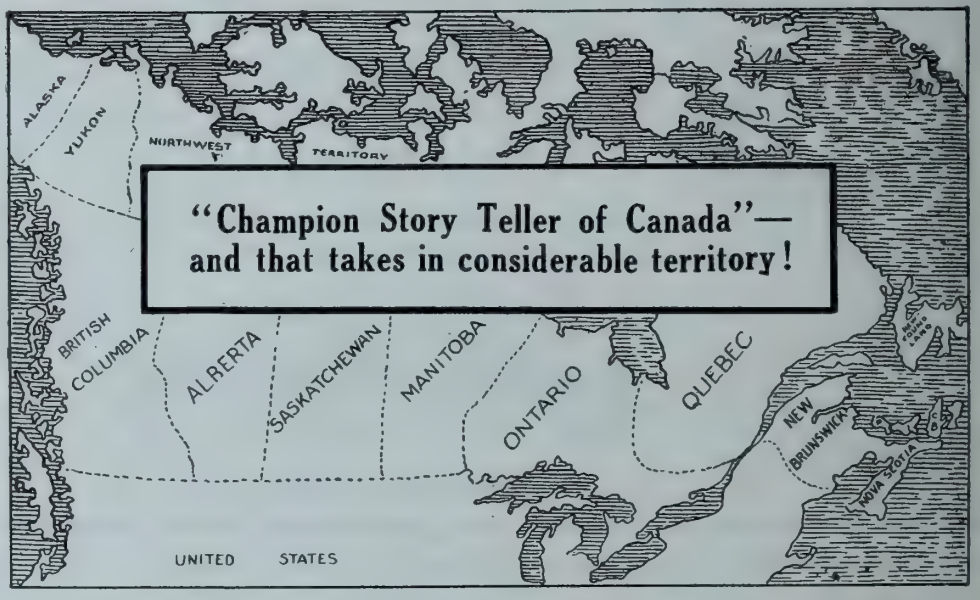
Certainly! He Invented the Glad Hand!

What's his official position? Well, no one exactly knows, but he's a sort of "good mixer" and general entertainer for the C.P.R., he travels nearly all the time, he knows almost everybody—and he's the Champion Story Teller of Canada!

Prominent visitors coming to Canada? All right! George Ham is on the job, travelling with them, smoothing their pathway, showing them the sights, telling them the best stories they ever heard—and making them think well of Canada, the C.P.R., and, incidentally, of Colonel George Ham.



He has always been known as a clever and witty speaker, and Canada's Prince of Story Tellers. George Ham now proves that he can write as entertainingly as he can talk. His reminiscences will run as a feature serial in MACLEAN'S MAGAZINE, and start in the big August 15th issue.

More Than That!

The Memoirs of Mrs. Asquith—Brilliant, daring, vital, and actually awaited with trepidation because of their possible disclosures—are now running in MACLEAN'S.

Also, in this big September 1st issue, are splendid stories by **Gilbert A. Chesterton, Pelham Grenville Wodehouse, Arthur Beverley Baxter, G. Appleby Terrill, Charles Liddle** and others —and in the Review of Reviews, articles by **Archibald Hurd, Count Von Bernstorff, George Ade, Frank A. Vanderlip, Mary Roberts Rinehart** and others.

The demand for copies of MACLEAN'S far exceeds the supply—but on account of the scarcity of paper we cannot increase the press run. So don't miss this big issue. Get your copy NOW!

Almost Half a Million Canadians Read

If interested tear out this page and place with letters to be answered.

How Hardwaremen Advertise Paints--No. 22

WHEN the crop has been harvested then is the time to appeal to the farmer. The crop outlook in all parts of the coutnry this year is very good the country this year is very good mood to consider the expenditure of some part of their goodly earnings on their farm properties. Under such circumstances an advertisement similar to this one by the Collingwood Hardware Co., Ltd., Collingwood, Ont., might be used to advantage. The ad. gets the attention of Mr. Farmer and then asks him to stop and consider the requirements of his house, barn or silo, as far as painting is concerned. The ad. points out that in many cases where paint is badly needed it will require a great deal more money to renew the woodwork unless paint is soon applied.

LABELLING "COMBINATION" LEADS AND ZINCS, ETC.

(Continued from page 60.)

Montagne" or "V. M." is permissible only on the products of that company, which have never been obtainable by the rank and file of American manufacturers.

The rule as to the use of the term "Compound," etc., applies here precisely as with white lead.

G. B. HECKEL, Secy.

*A preferable practice, even with these, would be to follow strictly the rule laid down by the Association, labeling them "Leaded Zinc Oxide."—G.B.H.

OIL FOR FUEL AND POWER

The use of fuel oil has grown so extensively during the past year that an overburden now rests upon it which will bring an inevitable train of industrial disasters, as the supply is wholly inadequate to sustain even the current demand.

NEW METHOD OF SWINDLING DEALERS

The newest thing in systematic theft, according to the police, was revealed by the arrest of Walter U. Burchard. The man, it was alleged, entered a paint store, picked up a can of varnish from a stand near the door, walked back with it to the proprietor's son, and told him that it was one of three cans that he and his brother had bought last week. He said he did not need it, and asked for the return of the money. The merchant's son gave him $4.30, the price of the can, the police said.

The deception was not discovered until Burchard was arrested on complaint of another merchant, on whom it was alleged he unsuccessfully tried to work the same game. Burchard had $500 when arrested.

MILLION DOLLAR CORPORATION WILL MAKE TURPS FROM STUMPS

Lake Charles, La.—The Acme Products Co. is building a million dollar turpentine plant at De Quincy, for the purpose of utilizing the great source of wealth in Louisiana. They have purchased 19,000 acres of cut-over pine land lying in Southern Beauregard Parish for $146,000.

Keen Effort Required on Part of Canadian Manufacturers

During the war Canada has established itself in a strong way in oils, paints and varnishes. The Canadian manufacturers now exporting and others seeking trade for the first time in these lines must remember that with anything like the normal production in the United Kingdom, real competition is in sight, and a keen effort on the part of Canadian manufacturers is required if we are to hold the big advantage already secured.

As Good As Sold

To be labeled Glidden is as good as sold.

On Varnish it means "Green Label Varnish," a finish that is *known and used* by painters from coast to coast.

On Jap-a-lac this name signifies a sure result for your customer and a sure profit for you.

On Paint it is rapidly winning this same high quality reputation. With the first announcement that *"Glidden now makes paint,"* the Glidden reputation for quality was immediately attached to this new product. It is this Glidden reputation that will bring the demand. Your paint order will be *as good as sold* when you open the case. Glidden quality will keep the orders coming.

Write for prices and interesting literature.

Establishing the Reputation of a New Firm or Extending the Reputation of an Old One

When the shrewd, modern advertiser has successfully harnessed the great power of publicity to his business, his next operation is the selection of a definite objective. Perhaps one of the most familiar objectives that makes his continuous advertising productive and profitable is the establishing or extending of the firm's reputation by a regular weekly message to the whole hardware trade of Canada setting forth the claims and policies of the house. The trade invariably prefers to purchase from a concern that has become familiar in the pages of their favorite trade newspaper—HARDWARE AND METAL.

Wrought and Steel Plate

WASHERS

OF ALL DESCRIPTIONS

ROUND AND SQUARE

PLAIN OR GALVANIZED

Annealed Rivet Burrs; Felloe Plates; Sheared and Punched Plates; Malleable Washers and Cast Iron Washers.

PROMPT SHIPMENTS

We Guarantee Quality and Service.

Wrought Washer Mfg. Co.

Milwaukee, Wis.

HARDWARE & METAL is the only weekly hardware paper in Canada and is read by practically every worth-while buyer, both wholesale and retail, in Canada. HARDWARE & METAL is the logical medium to use if you have a message for the Canadian hardware trade.

If interested tear out this page and place with letters to be answered.

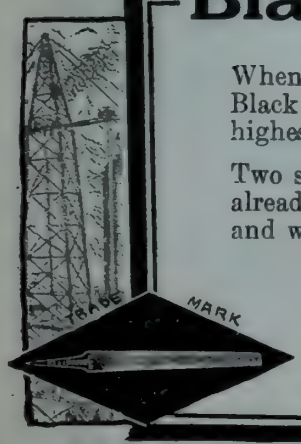
Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works

G. & H. Barnett Company 1078 Frankford Ave. Philadelphia, Pa.

Owned and Operated by Nicholson File Co.

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Silkstone fills the bill for the Canadian housewife. She has tried it and liked it and uses it whenever walls need beautifying, without regard to season. Silkstone is a year-round seller.

Silkstone beautifies walls at less cost than wall paper. It can be washed easily without rubbing off. Its soft, silky finish gives an artistic effect much appreciated by home lovers.

Silkstone is a tried and proven, steady salesmaker. It satisfies customers because it gives good results.

LACO LAMPS

Have Proved Themselves

The best test of any article is how well it does its work in the hands of the user. Does it give full value for every cent invested, and does it bring the customer, satisfied, back to your store again?

Laco lamps are proven. They satisfactorily answer the above questions. Consumers are asking for them as the best lighting value obtainable, and are bringing repeat orders to Laco dealers every day.

Are you lined up for your fall requirements?

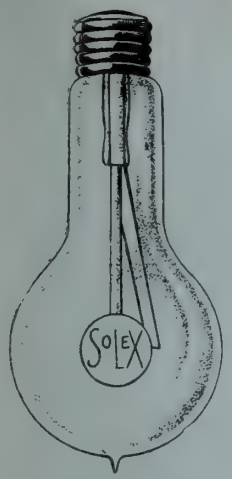
DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada



Nitrogen Lamp

Solex
Electric Lamps
Fully Guaranteed

All Solex Tungsten Lamps are pure, continuous filament drawn through diamond eyes into a fine, strong wire. Breakage is minimized through springy metal supports.

The Round Bulb Tungsten Lamp will be found in some cases more suitable than the pear-shape. Can be used to fit in smaller electric light fixtures, etc.

The Solex Low Voltage Nitrogen Lamps are specially designed for use on farms. Conserve electricity, yet give a steady, bright light.

The Blue Lunar Lamp when illuminated gives a soft and diffused light. A most suitable lamp for window illumination.

Round Tungsten

Lamps That Save Money

Solex Lamps combine quality materials and superior workmanship. They are brilliant—yet economical, giving a white, intense light closely resembling natural light. Solex Lamps give more light for the same cost of current, to which is added an average life guarantee of 1,500 hours. These efficient lamps save money. There are Solex Lamps to meet all requirements of the home, factory, office, or farm.

COOKING & HEATING APPARATUS

TORONTO,
CANADA

An Open Letter to Canadian Hardwaremen

We have recently purchased the plant, patterns and equipment of the Canada Stove and Foundry Co., Limited, at St. Laurent, near Montreal. We commenced operations in the new plant on the second day of August, and to-day the plant is working towards full capacity production.

Many of the excellent lines made by the Canada Stove Co. are being continued on the market. The Gurney line has been strengthened by these valuable additions, and additional machinery and methods installed by us at the new factory will mean that the Gurney standard of excellence will be found in the new goods.

Our sales representatives are now on the road and carry photographs and full data covering the new lines; bulletins will be issued to the trade giving details as soon as stock for the prompt filling of orders can be accumulated.

A most useful addition will be the enamelware plant, which will enable us to offer our customers the best of white enamel trim for Gurney lines at reasonable prices.

The continued support of the Canadian hardware trade has made it possible for us to make this advance; and I want to thank all our customers for this support, and assure them of this: We believe in the hardware man as our chief avenue of distribution, and will do everything in our power to make it easy and profitable for the good hardware man to handle Gurney lines.

Yours very truly,

THE GURNEY FOUNDRY CO., LIMITED.
F. H. Gurney, Pres.

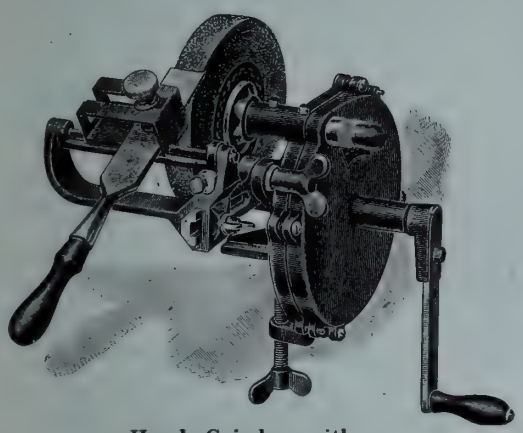
AMERICAN GRINDERS

QUALITY TOOLS

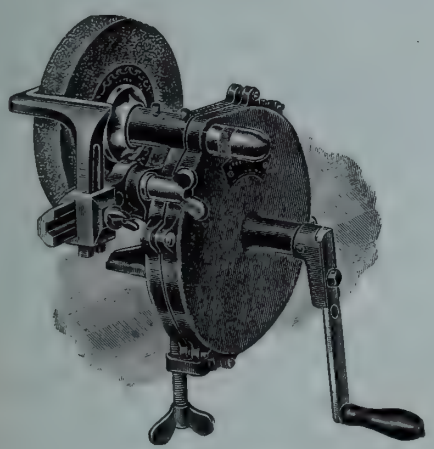
Associated With Best Workmanship



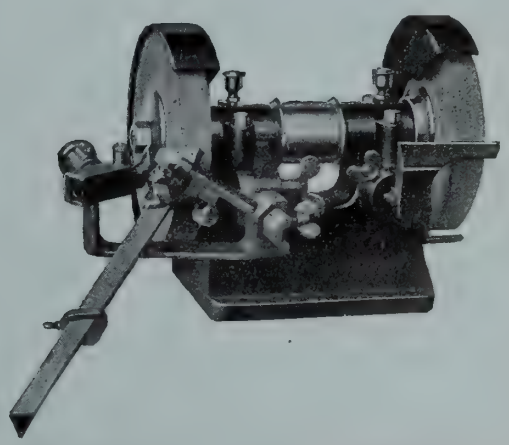
Hand Grinder with Chisel Attachments

WHERE quality, workmanship and service are most sought after by the mechanical trades, there you are most likely to find American Quality Tool Grinders, preferred because of their accurate design, careful construction, great strength and endurance.

Repair parts for American Grinders are seldom needed, this factor making the sale of these machines a profit and prestige-builder for both jobber and dealer.



Hand Grinder with Wheel Dresser



American No. 75 Power Grinder With Bronze Bearings

TRADE M MARK

Roofing and Building Papers That Continually Boost Your Store

Building Papers, Tarred Felt, Sheathings and Tar Products, and Wrapping Paper of all kinds that give service in use reflecting credit on the dealer and inspiring confidence in all the lines he sells—that's the McArthur line.

Drop us a line for an interesting little booklet on Roofing Materials. It will tell you of each one of our lines—reasons why they sell, and serve the consumer so that you hold his future trade.

We cannot tell of all the lines here, but for instance, "Black Diamond" Tarred Felt is pure wool tarred roofing felt, from selected woollen rags saturated with pure coal tar, producing the most durable roofing felt possible to make.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

CROWBARS

No. 102-A—CHISEL POINT

We offer you bars of High Carbon Steel at the same price as you are buying the Mild Steel Bar elsewhere. Write for price list and catalogue.

Reed's Patent Plastic Asphalt Roof Cement

repairs cracked joints, nail holes and defective places on slate, metal, gravel and prepared roofs.

This cement will repair a roof WHERE SOLDER CANNOT BE USED.

It is VERY ADHESIVE and sticks firmly to anything forming a tough leather-like skin over the top; WILL NOT RUN or loosen from joints or cracks in Summer or Winter.

For twenty-five years, in all climates, this cement has given perfect satisfaction and its supreme usefulness makes it one of the best-selling items in a hardware store when properly displayed.

Put up in 1, 5, 10, 125 and 500 lb. containers
